

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

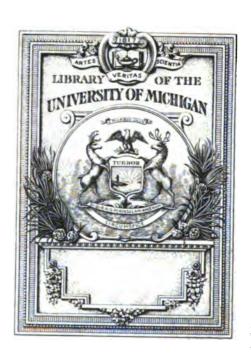

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

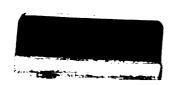

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

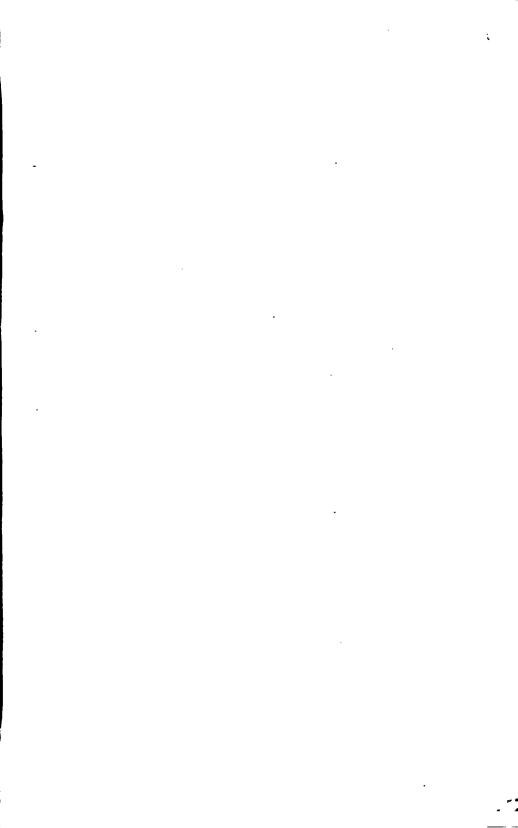

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

In consideration of the forthcoming report of the Commission appointed by the last Legislature to investigate the charitable and reformatory interests and institutions of the Commonwealth, the Board refrains from making any recommendations for legislative action.

#### STATE BOARD OF LUNACY AND CHARITY.

STATE HOUSE, BOSTON, December 28, 1896.

To His Excellency the Governor and the Honorable Council:

The undersigned, members of the State Board of Lunacy and Charity, present herewith the Eighteenth Annual Report of the Board.

GEORGE W. JOHNSON, Chairman.
HENRIETTA G. CODMAN, Vice-Chairman.
CHARLES F. DONNELLY.
EDWARD HITCHCOCK.
ANNE B. RICHARDSON.
LABAN PRATT.
LEONTINE LINCOLN.
JOHN L. HILDRETH.
EDWARD H. HASKELL.

### EIGHTEENTH ANNUAL REPORT

OF THE

# STATE BOARD OF LUNACY AND CHARITY OF MASSACHUSETTS.

#### Powers and Duties of the Board.

The powers and duties of the Board include the supervision, visitation, and inspection of all public and private institutions for the insane, the State Almshouse, the State Farm, the State Schools, the city and town almshouses containing insane inmates, and all places where State paupers are supported; the care and custody of insane patients boarded in families; the supervision of juvenile offenders. including attendance at court in the interest of such offenders: the care and maintenance of indigent and neglected children boarded in families, and the visitation of all minor wards of the State in families; the licensing of boarding-houses for infants, and the prosecution of cases of violation of the infant-boarding law; the removal of non-settled paupers to other states and countries; the administration of the laws concerning the support of State paupers by cities and towns; the prosecution of cases of bastardy among non-settled persons; the tabulation of returns from Overseers of the Poor of paupers supported by towns; and the care and maintenance of alien immigrants falling into distress within a period of one year from the time of their landing. Each of the State institutions for the insane, as well as the Hospital for Dipsomaniacs and Inebriates, is under the immediate control of a Board of Trustees, appointed by the Governor and Council. There are also a Board of Trustees of the State Almshouse and the State Farm, and a Board of Trustees of the State Schools, each similarly appointed. The State Board, however, has sole power of discharge from the State Farm, and shares with the Trustees of the State Almshouse, and the Trustees of the several State Hospitals for the Insane, the power of discharge therefrom.

The progress of legislation regarding the powers and duties thus summarized may be briefly stated as follows:—

The Legislature of 1856 created a Board of Commissioners to execute all the laws in relation to alien passengers and The supervisory authority of this Board was State paupers. limited to State Almshouse visitations, but its administrative powers extended to the execution of all the laws relating to alien immigrants; the prescription of forms for statistical returns from the State Almshouses at Tewksbury, Bridgewater, and Monson, and the form of certificate permitting the introduction of inmates thereto; the binding out of apprentices from the State Hospital at Rainsford Island; the control of State pauper inmates of the State Lunatic Hospitals and their property; and the transfer of pauper inmates from one State charitable institution or lunatic hospital to another, and their transportation to their homes in other states and other countries, - the last-named duty involving a rigid inspection of all passengers arriving from foreign ports, and the exclusion of those liable to become a public charge.

The Legislature of 1863 abolished the Board of Alien Commissioners and established the Board of State Charities. To this Board was entrusted all the administrative authority conferred upon the Board of Alien Commissioners, and it was also made its duty to "investigate and supervise the whole system of the public charitable and correctional institutions of the Commonwealth"; but its supervisory power was subsequently limited by the transfer, in 1875, of the oversight of the institutions for the instruction of the deaf, dumb and blind to the Board of Education, and by the farther transfer, in 1879, of the oversight of the correctional institutions of the State to the Board of Commissioners of Prisons. On the other hand the executive authority of the new Board was considerably increased by the Acts of 1865, 1866, 1869, 1870, and 1877, charging the Board with the

execution of the laws relating to the unsettled poor in the several cities and towns of the Commonwealth and to the children of the State.

The authority conferred upon the Board of State Charities by the legislation of 1869 and 1870 with reference to the minor wards of the State was substantially as follows:—

Whenever a complaint was made against a boy or girl under the age of 17 years, the Court or Magistrate in the case was required to notify the Board in writing, so that one of its agents might have opportunity to investigate the case, attend the trial and protect the interest of, or otherwise provide for, the child. On the agent's request, the Court or Magistrate might authorize the Board to take and indenture or place in charge of any person, or in the State Primary School, such child, till he or she attained the age of twentyone years, or for any less time. No child could be indentured, adopted, or taken in charge of any person from a State institution, until notice thereof had been given the Board, and its report in writing, made after investigation into the propriety thereof, had been filed with such institution; and all the applications for the release or discharge of any children so indentured or placed in charge of persons were to be given to the Board for its report in like manner. as once a year all children so maintained, indentured or placed, were to be visited, and such other investigation made in regard to them as the Board might prescribe.

The Legislature of 1879 abolished the Board of State Charities, and established the State Board of Health, Lunacy and Charity, thus conferring upon the new Board, in addition to the powers of its predecessor, all the power and authority previously possessed by the Board of Health and Vital Statistics, which was organized in 1869. In 1886, however, the State Board of Health was re-established, and it was provided that "the Board heretofore known as the State Board of Health, Lunacy and Charity, shall be hereafter called the State Board of Lunacy and Charity." Excepting, therefore, that the present Board no longer exercises the functions of a Board of Health, and excepting also that, in 1894, its executive anthority was somewhat curtailed by the transfer of the State supervision of immigration to

United States officials, its powers and duties remain essentially the same that they were at the time of its establishment in 1879; and, as direct successor of the Board of State Charities, the greater part of its authority is of much earlier date.

The law of 1879 provided that the State Board of [Health] Lunacy and Charity shall consist of nine persons, two members of the Board retiring each year, excepting every fifth year, when one shall retire,—all vacancies occurring from time to time to be filled by the Governor, with the advice and consent of the Council.

As the laws now stand, the State Board of Lunacy and Charity is given general supervision over the State Lunatic Hospitals, the State Almshouse, the State Farm, and the State Reform Schools; and when directed by the Governor may assume and exercise the powers of the Boards of Trustees of said institutions, and it may "assign any of its powers and duties to agents appointed for the purpose, and execute any of its functions by said agents, or by committees appointed from and by said Board." The Board is authorized, with the consent of the Governor, to appoint such officers as may be necessary, and fix their compensa-It is required to make its own by-laws, and make an annual report of its doings to the Governor and Council, embodying in the report a statement of the receipts and expenses of the Board and of the several above-named State institutions, and also a statement of annual estimates, and "a concise review of the work of the several institutions for the year preceding, with such suggestions and recommendations as to them, and the charitable and reformatory interests of the State, as may be deemed expedient." There is also to be included in the annual report information obtained from the annual returns required to be made by the overseers of the poor of the several cities and towns of the Commonwealth, of the numbers and cost of persons supported and relieved at the expense of such cities and towns.

The Board is required, at least once a year, to "visit all places where state paupers are supported, and ascertain from actual examination and inquiry whether the laws in respect to such paupers are properly observed"; to visit the State

1897.7

Almshouse and the Lyman School for Boys at least once a month, and "for this purpose it shall, by some woman, or women, deputed by it, have access at all hours of the day or night to the portions of said institutions occupied by the women or children there maintained at the public expense"; to visit and inspect every private asylum or receptacle for the insane at least once in every six months: and also "as often as once a year visit all children maintained wholly or in part by the State, all who have been indentured or placed in charge of any person by any state institution, board or officer of the Commonwealth, or under any provision hereof, and all minor children supported at the expense of any city or town; and shall inquire into the condition of such children, and make such other investigations in relation thereto as it may think fit; and for this purpose it may have private interviews with such children at any time." It prescribes the form of certificates required of overseers of the poor of cities and towns, when paupers are sent therefrom to the State Almshouse. The Board has the same powers in relation to State paupers who are inmates of either of the State Lunatic Hospitals, or of the State Almshouse, and their property, as are by law vested in overseers of the poor, in reference to paupers supported or relieved by towns. It may transfer pauper inmates from one State charitable institution or lunatic hospital to another, or send them to any State or place where they belong; on the application of the Trustees of the State Reform Schools may transfer inmates of said Schools to the State Farm, and return them again to the Schools; in certain emergencies may transfer inmates of the State Almshouse to the State Farm; on the certificate of two physicians may transfer and commit to the State Lunatic Hospitals and Asylums, inmates of the State Almshouse, the State Farm, and the Massachusetts Hospital for Dipsomaniace and Inebriates; and under certain conditions may transfer inmates of private asylums and of the Boston Insane Hospital to other private asylums and to State Lunatic Hospitals, and from such Hospitals to private asylums and private dwellings; it may also transfer any pauper lunatic from a State charitable institution or Lunatic Hospital to the Lunatic Ward of the State Almshouse. When the overseers of the poor of cities and towns full to comply with the law forbidding the retention in almshouses of pauper children over a certain age, the authority vested in said overseers may be exercised by the State Board to the exclusion of the overseers.

In the cases of sick State poor supported by cities and towns and State poor temporarily relieved, as well as in cases of burial, the State Board has large administrative authority, including the visitation of the several cities and towns of the Commonwealth by its agents, investigation and decision of settlements, and the auditing of bills of local authorities against the Commonwealth.

The Statutes provide that the Board shall act as Commissioners of Lunacy, "with power to investigate the question of the insanity and condition of any person committed to any lunatic hospital or asylum, public or private, or restrained of his liberty by reason of alleged insanity at any place within this Commonwealth, and shall discharge any person so committed or restrained, if, in its opinion, such person is not insane, or can be cared for after such discharge, without danger to others and with benefit to him-The Board is required to cause application to be made for the commitment to a hospital of any insane person, whether a public charge or otherwise, whom it has reason to believe is deprived of proper treatment, and is confined in an almshouse or other place. It also has the legal custody of all persons removed from the State Hospitals for the Insane, to be boarded in families under the authority of the Board, and the power of return of such persons to the Hospitals, and unlimited power of transfer of State patients from one lunatic hospital to another.

As regards the State children, it may be generally stated here, that in addition to the power of visitation, the State Board of Lunacy and Charity has practically the same authority to-day, regarding the care, maintenance, and education of the indigent and neglected children of the State, and the maintenance, education, and reformation of juvenile offenders placed or boarded in families, that the State Board of Charities possessed in 1870.

Members. — Committees. — Chief Agents.

The nine members of the Board are appointed by the Governor and Council for terms of five years each, or until their successors are chosen. They serve without compensation, but their travelling expenses are paid by the State.

Dr. Edward Hitchcock, whose term of office expired June 7, 1896, was immediately re-appointed; and Mr. Edward H. Haskell, of Newton, was appointed to succeed Dr. Curran. The membership is now as follows:—

GEORGE W. JOHNSON, of Brookfield, Chairman.
HENRIETTA G. CODMAN, of Brookline, Vice-Chairman.
CHARLES F. DONNELLY, of Boston.
EDWARD HITCHCOCK, M.D., of Amherst.
ANNE B. RICHARDSON, of Lowell.
LABAN PRATT, of Boston.
LEONTINE LINCOLN, of Fall River.
JOHN L. HILDRETH, M.D., of Cambridge.
EDWARD H. HASKELL, of Newton.

The By-Laws of the Board provide that regular meetings shall be held on the first Saturday of each month, in the rooms of the Board at the State House, at eleven o'clock in the forenoon, or at such other place and hour as the Board may from time to time direct. Special meetings may be called by the Chairman or Vice-Chairman. The By-Laws also provide for the annual election, in June, of a Chairman, a Vice-Chairman, a Clerk, a Superintendent of In-Door-Poor, a Superintendent of Out-Door-Poor, and an Inspector of Institutions.

The Standing Committees of the Board are as follows: -

Committee on Charities: Mrs. Richardson, Mr. Donnelly, Mr. Johnson, Mr. Pratt, Mr. Haskell.

Committee on Lunacy: Dr. HITCHCOCK, Mrs. Codman, Mr. Lincoln, Dr. Hildreth.

Committee on Inspection of Institutions: Mr. Pratt, Mrs. Richardson, Mr. Lincoln.

Committee on Removal of Insane Persons out of the State: Mr. Johnson, Mrs. Codman, Mr. Pratt.

The Executive Committee consists of the Chairman, the Vice-Chairman, and the Chairmen of the several Standing Committees.

The chief agents of the Board are the Heads of the several Departments.

Stephen C. Wrightington is Superintendent of the Department of In-Door-Poor. His Deputies are Joshua F. Lewis, M.D., in charge of the Central Division; and Bertha W. Jacobs, in charge of the Division of Visitation.

William P. Derby, M.D., is Superintendent of the Department of Out-Door-Poor. His Deputy is George B. Tufts.

Charles E. Woodbury, M.D., is Inspector of Institutions. His Deputy is Henry C. Prentiss, M.D.

John D. Wells is Clerk and Auditor of the Board, and its disbursing officer.

#### ORGANIZATION OF THE DEPARTMENTS.

### The Department of In-Door Poor.

The By-Laws provide that the Superintendent of In-Door Poor shall execute all the provisions of the laws relating to inmates of the State Hospitals and Asylums for Lunatics, the State Almshouse, the State Farm, the State Reform Schools, proceedings in bastardy, and visitation of iuvenile wards of the State; and also certify quarterly to the Treasurer of the Commonwealth the several amounts due the State for the support of inmates in the several Institu-This Department, whose Superintendent is Stephen C. Wrightington, has two divisions: the Central Division and the Division of Visitation, - each with its Deputy Sup-In the former, which is under the immediate erintendent. direction of Dr. Joshua F. Lewis, the general business of the Department is transacted, including the matter of the investigation of settlements of the pauper inmates of the several State Institutions, with reference to the question whether State, or town, or some relative, is bound by law to support them; and for this purpose constant visits are made to the several State Hospitals, the State Almshouse, and the State Farm. This Division also has charge of the transportation

of paupers out of the State to other states and countries, and of transfers between State Institutions. The Division of Visitation, under the immediate direction of Miss Bertha W. Jacobs, has the care of the State minor wards over three years of age boarded and placed in families.

There are employed in the Central Division, in addition to the Deputy, six clerks, two transportation officers, and a messenger; three of the clerks being engaged more or less in outside investigations and transportation work. In the Division of Visitation there are employed, in addition to the Deputy, three clerks and seventeen visitors. Of the visitors, one man is a visitor-at-large, with a general oversight of the duties of the rest. Nine men attend courts in the interest of juvenile offenders, investigate homes and visit boys in places; four women have the immediate supervision of children between three and twelve years of age placed at board; and one woman, a visitor-at-large, with two assistants, cooperates with the Auxiliary Visitors in the placing and oversight of the girls over twelve years of age placed in families, this work including occasional Court attendance. iliary Visitors live in various parts of the State, and a few of them in adjoining States; they are appointed annually by the Board with special reference to their qualification for such duties, and they serve without pay. They hold three meetings each year for purposes of consultation. The Auxiliary Visitors in office at the close of the official year, September 30, 1896, were as follows: Mary A. Andrews, Vergennes, Vt.; Eliza A. Babbitt, Westford; Anna M. Bailey, Fitchburg; Eliza L. Barnard, Worcester; Martha J. Barrell, York Corner, Me.; Mary W. Bartol, Lancaster; Cyrene J. Bean, South Paris, Me.; Martha B. Bishop, North Brookfield; Frances Brewer, Northampton; Alice T. S. Brewster, Pittsfield; Velma Briggs, Hanover; Mary E. Brown, West Roxbury; Alice W. Burnham, Waltham; Helen J. C. Butler, North Adams; Carrie E. Buzzell, Durham, N. H.: Ella F. Bucklyn, New Bedford; Abby C. Clapp, Reading; Emily G. Collins, Brattleboro, Vt.; Annah H. R. Cook, Hartford, Conn.; Mary C. Crump, New London, Conn.; Mary S. Eaton, Concord; Kate Edwards, Northampton; Elizabeth H. Elliot, Jamaica Plain; Carrie S.

Emmons, Russell; Edith Forbes, Milton; Nella B. French, Clinton; Miranda Gibbons, East Granville; Julia A. Gibson, Somerville; Elvira Gorham, Bellows Falls, Vt.; Ellen M. Hartwell, Littleton Common; Mary Catherine Hicks, Stafford Springs, Conn.; Lucy A. Hitchcock, Palmer; Leura E. Jenkins, Barre; Maria L. Johnson, Lynn; Belle G. Johnson, Marlborough; Adelaide H. Jones, East Derry, N. H.; Amanda T. C. King, Thompsonville, Conn.; Sarah F. Lampher, Montville, Conn.; Anna C. Leonard, Springfield; Ophelia M. A. Lovejoy, Haverhill; Lois Allyn Mason, Winchendon; Caroline E. Maynard, Dedham; Mabel G. Merrill, Worcester: Elizabeth Merrim, South Framingham; Ella F. Morrison, Lawrence; Lucy A. Morton, Springfield; Mary K. Morton, Hatfield; Harriet E. Noyes, Ipswich; Rose Chandler Paine, Worcester; Mary W. Palfrey, Cambridge; Sarah F. Palmer, Saco, Me.; Amelia S. Phelps, Wilbraham; Amy Porter, Hartford, Conn.; Hannah A. Porter, Quincy; Lydia A. Pratt, Shelburne Falls; Sarah C. Purrington, Farmington, Me.; Catherine N. Ranger, North Brookfield; Sarah C. Read, North Adams; S. Ellen Robertson, Chicopee; Mary C. Rogers, Canton; Celeste S. Russell, Great Barrington; Mary H. Rust, East Bridgewater; Frances N. Shepard, Lowell; Helen T. Spalding, Webster; Ellen B. Stebbins, Roslindale; Marrietta H. Stevens, Westfield; Elizabeth Thurber, Plymouth; Julia E. Tilton, Williamsburg; Hattie M. Trask, Richmond, Me.; Agnes C. Tribou, Middleborough; Charlotte H. P. Twitchell, Greenfield; Elizabeth W. Twitchell, Keene, N. H.; Mary Aubin Vinal, Lebanon, N.H.; Lucy G. Wadsworth, Boston; Eliza G. Washburn, Hyde Park; Alice E. Wetherbee, Fall River; Abigail Wheeler, Northbridge; Martha Lee Whelden, West Barnstable; Harriet R. Wiley, Wellfleet; C. Amelia Williams, Taunton; Mary L. Williams, Dedham; Emma M. Wilson, Athol; Elizabeth L. Withington, Newburyport; Adeline V. Wood, Middleborough; M. Anna Yerrington, Norwich, Conn.

### The Department of Out-Door Poor.

It is the duty of the Superintendent of Out-Door Poor to execute all the provisions of the laws relating to the sick State poor, those ill with dangerous diseases, those receiving temporary relief, and infant wards of the State. This Department, in addition to the Superintendent and Deputy Superintendent, employs nine visitors, six clerks, and a messenger. Two of the visitors, a man and a woman, are physicians, and are occupied with the visitation and general management of pauper infants, - wards of the State under three years of age, - boarded in families; and one of them also with the visitation of the State inmates of the Boston City Hospital and the Carney Hospital. Another visitor has the immediate supervision of licensed boarding-houses for infants, and investigates cases of violation of the infant boarding-house law. He is also appointed by the Board as a special district police officer, under the legislation of 1895, to enforce the provisions of the laws with regard to the protection of infants. The other visitors, assigned to different sections of the State, make personal examinations and reports of all cases of which the Superintendent has notice under the laws.

# The Inspector of Institutions.

It is the duty of the Inspector of Institutions to exercise constant watchfulness over all the institutions the Board is required to supervise, including all city and town almshouses containing insane inmates; to see that the statutes regulating the commitment and detention of lunatics are complied with; to execute all the provisions of the laws relating to the board of insane persons in families; to make detailed monthly reports of all his visitations; and to perform statistical work not otherwise assigned. He is thus the Board's general supervisory officer, and its principal agent in the performance of its duties as a Commission in Lunacy. In this department, besides the Inspector and the Deputy Inspector, there are regularly employed three clerks and a visitor. In addition to these, a temporary medical visitor has been occupied for several months in an investigation of the condition and treatment of the insane inmates of city and town almshouses.

#### The Clerk of the Board.

The Clerk of the Board is required to be present at the meetings of the Board and of several of its Committees, and keep a record of all transactions; to conduct the Board's correspondence, under its direction; to receive and disburse all money used by the visitors of the Board for travel and other necessary purposes; to have custody of the Board's records and files, and of all funds that may come to the Board or its wards; and to audit all bills against the Commonwealth on the part of the Board. He employs an assistant.

#### THE JUVENILE WARDS OF THE STATE.

The juvenile wards of the State are cared for by two Departments of the Board; the Department of In-Door Poor having charge of all over three years of age, and the Department of Out-Door Poor having charge of the infants, or those under three years of age. These children may be classified as follows:—

- 1. Dependent children, or children between three and sixteen years of age, without local settlement, who, by reason of orphanage, or the poverty of their parents, are dependent on the State for their support.
- 2. Neglected children, or children between three and sixteen years of age, who, by reason of the wilful neglect of their-parents, are committed by the Courts to the custody of the Board.
- 3. Juvenile offenders, or children between the ages of seven and seventeen years, convicted of crime or misdemeanor, and committed to the custody of the Board, the Lyman School for Boys, or the State Industrial School for Girls.
- 4. Destitute infants, or dependent and neglected children under three years of age.

In the case of dependent children the State Board has original jurisdiction only where the support of such children is properly chargeable to the Commonwealth on account of their having no known legal settlement. Neglected chil-

dren, under fourteen years of age, are arraigned before a court or magistrate, on complaint of any citizen, and if the alleged neglect is proved are committed either to the custody of the State Board or to the Overseers of the Poor of the city or town of settlement, or in case of the City of Boston, to the Commissioners of Public Institutions. Juvenile offenders, under seventeen years of age, are similarly arraigned, and upon conviction, may be sentenced, if a girl, to the State Industrial School and, if a boy under fifteen years of age, to the Lyman School, or if over fifteen, to the Massachusetts Reformatory; all during their minority except those committed to the Reformatory. Or, at the request of the State Board, one of whose agents is always present at the trial, any of the offenders above named may be committed to its custody, or placed on probation "in charge of a person," or otherwise disposed of at the discretion of the magistrate in accordance with law.

At the trials of neglected children and juvenile offenders notice must be previously given, both to the parents or guardians of the child and to the State Board; and care is taken by the agent of the Board, in all cases, to acquaint himself with the character and habits of the child, with the character of the parents or guardians, and to possess himself of all important facts in connection with the matter, in order that he may be able to advise the magistrate in making the best possible provision for the child's future well-being.

Dependent and neglected children, when received into the care or committed to the custody of the Board, if incapable of self-support, are placed directly in suitable families at board, or if able to support themselves, in such families without payment for board; and in either case they may be placed temporarily in the house of Mrs. Bean at Arlington.

Families where children are placed at board are carefully selected; and after such placing, the Board's visitors assure themselves by frequent examinations that the children are in all respects properly provided for, well fed, clothed and sheltered, that they attend school, and that in every way they are treated, so far as practicable, as they would be if they were the children of the family. Similar methods are fol-

lowed in the cases of children capable of self-support and placed in families without board.

Juvenile offenders, when committed to the custody of the Board, may be placed directly with their parents, when the offence is slight and the home exceptionally good, otherwise in some other selected family. Some of the boys are temporarily cared for by Mrs. White of Ludlow, from whose house they are removed from time to time, to their homes on probation, or to some family in this or in some other of the New England States. Should all efforts toward their reformation fail, the State Board, under authority of its original mittimus, may commit such children either to the Lyman or to the Industrial School. When so committed, they usually remain in the School for about a year, and are then released on probation, either to their own homes or to When thus released, the boys are under conother families. stant visitation by officers of the Board, who are in close communication with them; and on the first intimation from the boy or his employer, or any interested neighbor, that the placing is not satisfactory, examination is made by the agent of the Board in person, and if matters cannot be satisfactorily adjusted, the boy is removed and placed in a new home, or if necessary returned to the School. The girls so released on probation or placed in families are, as already stated, in the immediate charge of three paid visitors of the Board assisted by the Auxiliary Visitors.

Indigent and neglected children under three years of age, having no local settlement, come under the care of the Department of Out-Door Poor through commitment by Overseers of the Poor and by the Courts, directly from the State Almshouse, and also in the following ways:

Under the Acts of 1892, Chapter 318, Section 14, the parents, surviving parent, or guardian of any infant under three years of age, if unable to support such child, may, upon personal application to the Board, and with the Board's consent, place such child in its custody by an instrument in writing, signed by the mother, and the Board may receive such infant, if in the opinion of the Board it is for the public interest.

Under Section 15 of the same chapter, illegitimate infants,

under two years of age, may be given up for adoption by their mothers, who are residents of this Commonwealth, and who have previously borne a good character, when, in the opinion of the Board it is for the public interest; and such giving up shall operate as a consent to any adoption subsequently approved by the Board.

Under the provisions of Chapter 309 of the Acts of 1889, as amended by Chapter 194, Acts of 1891, an illegitimate infant under two years of age may be removed by the Board when complaint of alleged abuse has been brought to the attention of the Department of Out-Door Poor, and when upon investigation it is considered that the life and health of the infant would be endangered, if allowed to remain longer under existing conditions.

When an application is made to the Department of Out-Door Poor by a parent or friend to place a child in the custody of the Board, under Section 14, above cited, a history of the child is taken, and all information possible is ascertained in regard to its parents and their ability to support the child, wholly or in part, and the prospect for its present and future support. The child is brought to the office, and a physical examination is made by the Superintendent, or one of his medical officers. If it is decided that the case is a suitable one, the child is received. While there are no fixed rules regulating the taking of this class of children, such cases as the following would be considered suitable: A mother dies, leaving an infant and several other young children; the father can manage to take care of all, except the infant; in another case, a father deserts his family, and the home is broken up temporarily, until the mother is able to support the children; or a husband dies leaving a sick wife and infant, and her friends apply to have the child cared for until its mother recovers. Other instances might be mentioned, but in all cases the present and future welfare of the child is the chief consideration.

Under Section 15, above cited, whereby a mother of an illegitimate infant under two years of age makes personal application to be relieved of the care and support of her child, and to give it up for adoption, the problem is more complicated. The question of separation of mother and

child is always a serious one, and is justifiable only under exceptional circumstances. An infant is received, for example, when the mother is sick and unable to nurse or care for her child, and whose friends, while willing to give her a home, will not shelter the child; or when the mother is inefficient and homeless, with scarcely ambition or knowledge enough to take care of herself; or when the mother is very young or weak-minded, with parents too poor to support the child.

It is with great reluctance that a child is taken from a mother who is able to nurse it, particularly during the period between the first of June and the first of October. Experience has shown that the risk of weaning during the summer months is great. No mother is allowed to give up her nursing infant, and no nursing child is taken from its mother during that period, except when it is evident that her character is such that it would be dangerous to trust her with the child, or when the infant can be placed where it can be wet-nursed. In many cases mothers apply to have their children adopted, not because they wish to be separated from them, but because they have tried and failed to support themselves and their infants, and have become discouraged. Some mothers show great natural affection for their illegitimate children, and are willing to go to the country to work in families where they can receive small wages and have their infants with them, and fortunately many such homes are found.

On the establishment of the State Board of Lunacy and Charity in 1879 there were 1,905 children subject to the Board's visitation, — 846 of them being in the State Institutions and 1,059 outside of the Institutions, — either in their homes or under indenture. At the close of the last official year, September 30, 1896, there were 2,790 children subject to the visitation of the Board, 397 being in Institutions and 2,393 in their homes, in selected families, or otherwise cared for. Of the 2,393, 1,576 were practically self-supporting and 817 were at board in families. Thus it appears that while in 1879, at the beginning of the administration of the present Board, there were but 56 per cent of the State

children cared for outside of the Institutions, there are now 86 per cent of such children so cared for.

Of the 2,790 children, 492 were classed as dependent, 662 as neglected, 1,432 as juvenile offenders, and 204 as infants. The dependent and the neglected children were all in the custody of the Board in the Department of In-Door Poor. Of the 1,432 juvenile offenders, 330 were in the custody of the Board in the Department of In-Door Poor, 268 were in the Lyman School, 129 in the State Industrial School, 485 in the custody of the Trustees of the Lyman School, outside the School, and 220 in the custody of the Trustees of the State Industrial School, outside the School. The 204 infants were in the custody of the Board in the Department of Out-Door Poor.

The same statement may be made in tabular form, as follows:—

|                                       | Dependent. | Nrgleated. | Juvenile<br>Offenders. | Infants. | Total. |
|---------------------------------------|------------|------------|------------------------|----------|--------|
| State Board, Department In-Door       | 492        | 662        | <b>3</b> 30            |          | 1,484  |

| State Board, Department Out-Door      | -          |            | -                      | 204      | 204    |
|                                       | 492        | 662        | 1,432                  | 204      | 2,790  |

Besides the 397 children in the schools, and the 2,393 outside, — 5 of whom were under treatment at the State Almshouse, — there were 62 other children in the State Almshouse, making a total of 2,852 children under the supervision of the Board at the close of the official year. Of the 62 children in the State Almshouse, 48 were in the maternity wards, in care of their mothers, 3 were idiots, 8

were under treatment in the hospital ward, and 3 were United States cases, subsequently deported.

Of the children in charge of the In-Door Department, October 1, 1895, 564 were regularly at board. To this number were added, during the year, 206 children, making a total of 770 children regularly at board. Of this 770, free homes were found during the year for 83; 39 were released to relatives or friends; 9 were adopted; 3 were indentured; 2 died; 9 were sent for medical treatment; and 2 successfully eloped; leaving at regular board, September 30, 1896, 623. In addition, 7 children were adopted who had become self-supporting before the beginning of the year.

The number of visits paid to wards of the State during the year by the paid visitors of the Department of In-Door Poor was 5,325, and the number paid by the Auxiliary Visitors was 742.

The whole number of children under three years of age in charge of the Department of Out-Door Poor at the beginning of the official year, October 1, 1895, was 181; the number received during the year was 175; making the whole number supported during the year, 356; and there remained at the close of the official year, September 30, 1896, 204. Of the 175 children received, 112 were committed to the custody of the Board by Overseers of the Poor, 16 were committed by the Courts, 40 were taken under Sections 14 and 15 of Chapter 318 of the Acts of 1892; and 7 by removal from their homes in order to save their lives. Of the 356 children, 35 were legally adopted, 30 were transferred to the Department of In-Door Poor, having reached the age of three years, 47 were discharged to parents or other relatives, 2 were discharged to towns of settlement, and 38 died. Of the remaining 204, 10 were on trial for adoption without expense to the State, and 11 were on trial at board; the rest were at board. During the year, 157 infants were received at the Temporary Nursery in Roxbury. Nearly all the children received by the Department are first sent to this Nursery. There they are bathed, suitable clothing is given them, they receive medical and surgical treatment, if needed, and are then placed out to board. The Nursery is indispensable, not only as a temporary home

for children when first received, but also for treating those who have been placed out to board, and who are brought back again for surgical operation, or special medical care. There was no outbreak of contagious disease in the Nursery during the year, but it was thought expedient in July to remove all the infants from the house for a time, and thoroughly disinfect it, as many of the infants were ill with summer diarrhoea.

3,238 visits to infants were made. This number includes visits that are strictly medical, visits of supervision to infants in the custody of the Board, visits of inspection to premises of applicants for licenses to maintain boarding-houses for infants, visits of investigation to prospective homes where children are desired for legal adoption, and visits to boarding places where only one infant is desired, and where therefore a license is not required. The mortality rate of infants for the year was the lowest since the present system of caring for these children was adopted; and, in view of the unfavorable weather conditions during the summer months, this fact is extremely gratifying, and due credit for it should be given to the medical visitors.

The number of infants eligible for adoption was small; this is owing to the fact that a child whose parentage is known and who is taken under Section 14, Chapter 318, Acts of 1892, or committed by a Court, or committed by the Overseers of the Poor, cannot be adopted within two years of the date of its commitment, unless the written consent to such adoption is first obtained from the parents, surviving parent, or guardian of such child. Judges of Probate, however, sometimes allow an adoption to be completed within two years after the date of a child's commitment, if the child is a foundling of unknown parentage. Infants who are diseased or deformed must also be counted with those that are ineligible, so that the deduction of these classes from the whole number supported, leaves a limited number from which applicants for infants for adoption can choose. The Board cannot make any discrimination and select cases, but must accept all children lawfully committed to its custody, whether they are healthy, or suffering from hereditary disease, congenital deformity, or moribund through acquired disease, neglect or abuse.

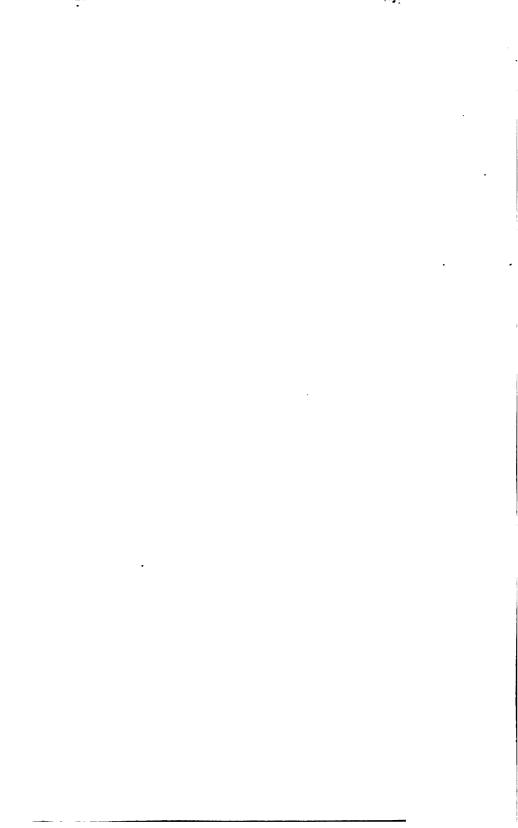

#### LICENSED BOARDING-HOUSES FOR INFANTS.

Under the present law (Chapter 318, Acts of 1892) no person can take to board at one time more than one infint under the age of two years, unattended by a parent or guardian, and unrelated to such person by blood or marriage without first obtaining a license from the State Board of Lunacy and Charity. Applications for such licenses must first receive the approval of the local Boards of Health; and before granting the licenses, the State Board requires thorough investigations and satisfactory reports by the medical agents of the Department of Out-Door Poor. This law was enacted to abolish the business of "baby-farming," and it has practically accomplished its purpose.

During the last official year, 154 licenses to maintain boarding-houses for infants were granted by the Board in 39 cities and towns, in addition to the 155 licenses in force at the expiration of the previous year; 135 licenses expired by the one-year limitation; 32 were revoked,—31 on account of a change of residence, and one on account of death; and 142 licenses, permitting the boarding of 300 infants in 35 cities and towns, remained in force September 30, 1896. These represent the licensed homes, not only of infants supported by the Commonwealth, but also of those placed out by their parents, by the Boston Children's Aid Society, the Massachusetts Infant Asylum, the St. Mary's Infant Asylum, the Marcella Street Home, the Gwynne Temporary Home, the New England Moral Reform Society, and a few others.

Table showing number of Licenses issued; number of cities or towns where Licensees reside; number of Licenses expired and revoked; whole number in force, etc., for the year ending September 30, 1896, and the four preceding years:

OFFICIA OFFICIA

At board in families. ¥ ¥ 1897.7

During the year 1,221 reports were received from persons taking infants to board; 609 from those placing infants to board, and 1,142 of discharges. Of the 1,235 infants reported on, 663 were boys, 572 girls; 448 were legitimate, 567 illegitimate, and 220 unknown. Of these 1,235, 252 died, 293 were returned to their parents, 177 became two years old, and 30 were adopted. The remainder, 483, were at board at the end of the year, —159 of them in licensed homes, and 324 in homes having but one infant each at any time, and therefore not required to be licensed.

#### DISTRIBUTION OF CHILDREN.

In connection with the accompanying chart, the following table shows the distribution of the children in institutions, and the percentage of the whole number in institutions, self-supporting in families and at board in families, at the close of the official years 1866, 1876, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896.

## THE STATE OUT-DOOR POOR.

The Department of Out-Door Poor received, during the official year, from 228 cities and towns, 10,123 notices, on account of 25,521 persons. Of these notices, 5,922, covering 8,181 individuals, were on account of persons too sick to be removed, (including 70 notices covering 314 individuals, on account of persons sick with dangerous diseases); 700 notices, covering 3,039 persons, were for wife settlement cases; 3,326 notices, covering 14,123 persons, were for temporary aid and transportation; and 175 notices were for infants. Of the total number of notices, 1,815, covering 6,824 persons, were in cases on account of which a previous notice had been received during the year.

# Cases of State Sick Poor.

The number of notices received during the year, under Public Statutes, Chapter 86, Section 25, was 5,922. This law provides that no city or town officer shall be allowed to send to the State Almshouse any person infected with small-pox or other disease dangerous to the public health, or any

other sick person whose health would be endangered by removal; but all such persons liable to be maintained by the Commonwealth, are to be supported during their sickness by the city or town in which they are taken sick, and notice of such sickness must be given to the State Board, which examines the case, and directs the removal of the patient if it deems it expedient. These 5,922 notices were sent by the Overseers of the Poor of 181 cities and towns, and covered 8,184 persons, of whom 5,988 were represented as being too ill to be removed. This number of notices shows an increase of 423, as compared with the previous year, or about 7.7 per cent; and as compared with the official year 1893-1894, an increase of 225, or about 4 per cent. The largest number of notices received in any one month was 786, in January; and the smallest, 381, in November. The number of persons actually supported shows a decrease of 58, as compared with the previous year, and of persons actually sick and requiring medical attendance, an increase of 332, as compared with the previous year.

Of these 5,922 notices, 3,210, or about 54.2 per-cent of the whole number, were from Boston, viz:—2,970 from the City Hospital, 71 from the Carney Hospital, 106 from the Institutions Department, 33 from the Boston Lying-In Hospital, and the remainder, 30, on account of persons supported at their homes.

The number of visits made by the officers of the Department, in the investigation of these 5,922 notices, was 9,774. As a result of their investigations, the Overseers of the Poor were directed to discontinue aid in 410 cases,—353 in consequence of the recovery of the patient sufficiently to permit his removal, and in the other 57 cases for other reasons manifest to the visitor. In 390 cases all aid was refused; in 355 of these cases because at the time the application for aid was made, the patient could have been removed without danger, and in the other 35 cases for other evident reasons. 4,821 cases were investigated by the visitors of the Department; and in 231 cases settlements were found, covering 382 persons. Among those reported as sick, there were 267 deaths.

### Cases of Diseases Dangerous to Public Health.

Of the 5,922 notices previously stated as received in regard to the sick State poor, 70 were on account of "diseases dangerous to the public health", covering 314 persons and 113 patients. These patients cannot be removed to the almshouse, but must be supported during their sickness by the city or town in which they are taken sick. These 70 notices were from 39 cities and towns; 15 being for cases of scarlet fever, 40 for diphtheria, 11 for measles, and 4 for small-pox. Five settlements were found, covering 17 persons.

## Cases of Wife Settlement.

The number of notices received under Public Statutes. Chapter 86, Section 31, in cases of poor and indigent persons where the wife has a legal settlement in some city or town of the Commonwealth, but the husband is a state pauper, was 700, from 87 cities and towns, covering 3,039 persons, of whom 297 were sick. This law, as amended by Chapter 211, Acts of 1885, provides that the expense of thus supporting the person who is a state pauper, (written notice having been given to the State Board within sixty days from the time when such aid shall be first given,) shall be paid by the Commonwealth, reference being had to the expense of supporting such persons at the State Almshouse, if thereto committed. The above figures show a decrease in the number of notices, as compared with the previous year, of 77, or about ten per cent; and as compared with the year 1893-1894, a decrease of 501, or about 41.7 per cent. Of these 700 notices, 371 were from the City of Bos-221 cases were investigated by the agents of the Department and five settlements were found, and 2,339 persons were acknowledged as settled; so that the whole number aided by the State was 695, of whom 206 were sick. number of visits made in these cases was 792. As a result of these visits, the local authorities were advised to render no aid in one case, and to discontinue aid in 10 cases.

## Cases of Temporary Aid.

Chapter 183, Acts of 1877, as codified, Chapter 84, Section 18, Public Statutes, permits cities and towns to furnish temporary aid to poor persons found therein having no lawful settlement within the State, if the overseers of the poor deem it for the public interest; but except in cases of sickness not for a longer period than for four weeks at one time, or to a greater amount than one dollar a week for each person, or five dollars a week for each family."

This Section, as amended by Chapter 90, Acts of 1891, reads as follows: "A city or town may furnish temporary aid to poor persons found therein, having no lawful settlements within the State, if the overseers deem it for the public interest; but, except in cases of sickness, not for a longer period than four weeks at one time between May first and November first, or for a longer period than eight weeks at one time for cases notified between November first and May first, or to a greater amount than one dollar a week for each person, or five dollars a week for each family; and the overseers shall in every case give immediate notice by mail to the State Board of Lunacy and Charity, which Board shall examine the case and direct as to the continuance of such aid. or removal to the State Almshouse, or to some place out of the State, either before or after removal to the State Almshouse, according to law. A detailed statement of expenses so incurred shall be rendered, and after approval by the State Board, such expenses shall be paid from the State Treasury."

The total number of notices received under this law, during the last official year, was 3,826, covering 14,123 persons, from 163 cities and towns. The largest number of notices received in any one month was in January, —475; the smallest number was in April, —185. The whole number shows an increase of 848, as compared with the preceding year, or about 11.7 per cent, and as compared with the year 1893–1894, a decrease of 2,612, or about 44 per cent. 580 of these notices, or about 17.4 per cent, were received from the city of Boston. The number of visits made under these notices was 3,453. 1,181 cases were investigated by the

officers of the Department and 164 settlements were found, covering 609 persons. As a result of visitation, aid was discontinued in 354 cases; aid was refused in 87 cases, and in 38 cases, involving 110 persons, directions were given that no aid be rendered, except at the State Almshouse.

It is the general policy of the Board to refuse all applications for temporary aid, excepting in cases where the need of such aid is not likely to continue beyond the period of four weeks in summer, or eight weeks in winter.

Included in the cases of persons to whom temporary aid was rendered, were 514 who, at their own request, were furnished transportation to places out of the State, directly through the Department in Boston. In addition to these, a considerable number were also sent from other cities and towns. During the year bills for the transportation of 729 persons were allowed. These include persons sent out in previous years. Of these 729, 174 were sent to European countries, 226 to Canada and other British Provinces, and 329 to other States.

The destination of the 514 sent from Boston during the year was as follows: —

To Foreign Counties: Austria, 1; Azores, 9; Belgium, 3; England, 62; Finland, 3; Germany, 29; Ireland, 31; Italy, 3; Norway, 3; Portugal, 2; Scotland, 6; Sweden, 12; Switzerland, 1; West Indies, 1; British Provinces, 144.

To Other States: California, 4; Connecticut, 5; District of Columbia, 5; Florida, 1; Georgia, 4; Illinois, 20; Kansas, 3; Maine, 28; Michigan, 4; Maryland, 6; Missouri, 1; Montana, 4; New Hampshire, 7; New York, 50; North Carolina, 4; Ohio, 10; Pennsylvania, 27; Rhode Island, 4; Texas, 1; Vermont, 7; Virginia, 9.

In addition to the above, 49 shipwrecked seamen were sent from Tisbury and Nantucket to New Bedford and Woods Hole, at an expense of \$58.20.

The bills examined by the Superintendent of Out-Door Poor, during the official year, on account of cases of sick State poor, wife settlement, dangerous diseases, temporary aid, and burials, were in number, amount, and allowance, as follows:—

| CLASSES             | o <b>p</b> | CA   | 9K8. |   | Number<br>of<br>Bills. | Amount of Claim.    | Amount of Allowance. | Amount of Deduction. |

Of the 2,538 removed, 322 were insane. Of the latter, 108 were sent to other States, and 214 to other Countries.

Of those removed to other States, 20 were sent to Maine, 12 to New Hampshire, 4 to Vermont, 14 to Rhode Island, 9 to Connecticut, 28 to New York, 3 to New Jersey, 5 to Pennsylvania, 1 to Virginia, 2 to North Carolina, 1 to Georgia, 1 to Louisiana, 1 to Michigan, 1 to Ohio, 1 to Illinois, 1 to Iowa, 2 to Wisconsin, 1 to Tennessee, 1 to California.

Of those removed to other Countries, 13 were sent to New Brunswick, 17 to Nova Scotia, 4 to Prince Edward Island, 5 to Newfoundland, 32 to Canada, 2 to West Indies, 2 to the Cape Verd Islands, 29 to England, 53 to Ireland, 3 to Scotland, 15 to Sweden, 2 to Denmark, 7 to Finland, 8 to Russia, 3-to Austria, 10 to Germany, 6 to Italy, 1 to Belgium, 2 to China.

#### SETTLEMENT WORK.

The settlement laws of the state are somewhat peculiar in their character, and a clear understanding of them, with the judicial decisions upon them, involves no little study and experience. The investigation and determination of questions of settlement, and consequent liability for support, as between the Commonwealth and its cities and towns, as between this State and other States of the Union, and, again, as between the State and foreign nations, engages the con-

stant attention of some of the Board's most efficient and diligent agents.

Summary of the Settlement Work done in the Department of In-Door Poor during the Official Year.

The amount charged cities, towns and kindred for the support at State institutions of patients originally entered as State charges, but afterwards ascertained either to have local settlements or to be properly chargeable to private account, was \$106,367.44. Of this amount \$48,134.87 was for inmates of the State Lunatic Hospitals, \$8,393.70 for inmates of the Massachusetts Hospital for Dipsomaniacs and Inebriates, \$657.39 for inmates of the Massachusetts School for the Feeble-Minded, \$34,322.40 for inmates of the State Almshouse, \$14,757.86 for inmates of the State Farm, \$101.22 for inmates of the Hospital Cottages for Children.

Summary of the Settlement Work done in the Department of Out-Door Poor during the Official Year.

#### THE STATE INSTITUTIONS.

The State Institutions under the general supervision of the Board are as follows: --

- THE LYMAN SCHOOL FOR BOYS, Westborough, Superintendent, Theodore F. Chapin.
- THE STATE INDUSTRIAL SCHOOL FOR GIRLS, Lancaster, Superintendent, Luann L. Brackett.
- THE STATE ALMSHOUSE AT TEWKSBURY, Superintendent, Herbert B. Howard, M.D.
- THE STATE FARM AT BRIDGEWATER, Superintendent, Hollis M. Blackstone.
- THE WORCESTER LUNATIC HOSPITAL, Superintendent, Hosea M. Quinby, M.D.
- THE TAUNTON LUNATIC HOSPITAL, Superintendent, John P. Brown,
- THE NORTHAMPTON LUNATIC HOSPITAL, Superintendent, Edward P. Nims, M.D.
- THE WORCESTER INSANE ASYLUM, Superintendent, Ernest V. Scribner, M.D.
- THE DANVERS LUNATIC HOSPITAL, Superintendent, Charles W. Page.
- THE WESTBOROUGH INSANE HOSPITAL, Superintendent, George S. Adams, M.D.
- THE MEDFIELD INSANE ASYLUM, Superintendent, Edward French,
- THE MASSACHUSETTS HOSPITAL FOR DIPSOMANIACS AND INEBRIATES, Foxborough, - Superintendent, Marcello Hutchinson, M.D.
- \*THE MASSACHUSETTS SCHOOL FOR THE FEEBLE-MINDED, Waltham, - Superintendent, Walter E. Fernald, M.D.
- \*THE HOSPITAL COTTAGES FOR CHILDREN, Baldwinville, Superintendent, Everett Flood, M.D.
- THE McLean Hospital, Waverly, Superintendent, Edward F. Cowles, M.D.

#### THE LYMAN AND INDUSTRIAL SCHOOLS.

Trustees: Melvin H. Walker, of Westborough, President; Elizabeth G. Evans, of Boston, Secretary; Henry C. Greeley, of Clinton, Treasurer; Michael J. Sullivan, of Chicopee; Elizabeth C. Putnam, of Boston; Charles P. Worcester, M.D., of Newton; Samuel W. McDaniel, of Cambridge.

The market value of the trust funds was \$65,705.78 on September 30, 1896.

Number in School, October 1, 1895, 264.

Number in School September 30, 1896, 268.

Average weekly cost per capita, \$4.61.

Of the 144 boys committed during the past year, one was nine years old, 6 were ten years old, 15 eleven years, 22 twelve years, 35 thirteen years, 58 fourteen years, 4 fifteen years, and 3 sixteen years; 63 of them were committed for larceny; 30 for stubbornness, 32 for breaking, entering and larceny, and the rest for other offences. 87 boys were placed on probation with their parents, and 125 in other families.

This School shows a generally improved condition, and the boys appear stronger and more healthy. An attack of diphtheria, which appeared the early part of the year, was vigorously stamped out, and there has been no return of it. In one respect there has been a marked departure from the old rule of segregation, the pupils being now sent, without supervision, from one house to another for school instruction. The object of this is to provide for a better system of grading, but it appears to neutralize, to a considerable extent, the good effects of the cottage system. The Board repeats its objection to the absence of a night-watch in the dormitories.

The house at Berlin has been satisfactorily managed, but it is to be questioned whether additional legislation may not be required to remove the legal obstacles in the way of its establishment as an adjunct to the School.

# The State Industrial School for Girls.

(Opened, 1856.)

### LUANN L. BRACKETT, Superintendent.

The market value of the permanent funds was \$3,300.00 on September 30, 1896.

Number in School October 1, 1895, 111.

Number in School September 30, 1896, 129.

Average weekly cost per capita, \$4.17.

Of the 86 commitments during the year, 48 were for stubbornness, 5 for idle and disorderly conduct, 13 for larceny, 5 for fornication, one for drunkenness, 3 for lewdness, 2 for night-walking, 7 for vagrancy and idleness, and 2 for disturbance of the peace. Of the girls outside the School, but in its custody, 45 were with relatives on probation, 112 in other families, 8 at school, 6 at board (5 of them attending school), and 33 married. Of 67 girls who, during the year, passed out of the care of the State, the conduct of 47, or 70 per cent. is reported good.

The number of inmates is steadily increasing, so that the attic dormitories, condemned by the fire inspectors as unsafe, have had to be re-occupied, and it will soon be necessary to provide for the erection of an additional building. Notwithstanding the long illness and enforced absence of the Superintendent, the School continued in its usual orderly and prosperous condition, thus showing the permanent effect of her admirable influence and teachings, and the faithfulness of those left in charge.

### THE STATE ALMSHOUSE AND THE STATE FARM.

These two Institutions are under the direction of a single Board of Trustees. The Trustees are as follows: J. White Belcher, of Randolph, *Chairman*; Payson W. Lyman, of Fall River, *Secretary*; Sarah D. Fiske, of Malden; Leonard Huntress, M.D., of Lowell; Jacob H. Hecht of Boston; Anna F. Prescott, of Boston; Warren E. Rice, of Lawrence.

<sup>\*</sup> Persons fifteen years of age and under.

Classification of discharges: Deaths, 272; Removals, 3,210; Total, 3,482. Number of maternity cases during the year: confinements, 105; births, 106. Number of illegitimate births during the year, 72.

The number admitted during the year, 3,604, was an increase of 533 from the previous year. The largest number present was 1,547 on Oct. 2; the weekly average was 1,231, or 64 more than the previous year. Nearly 87 per cent. of the persons admitted were treated in the hospitals. Of the 272 deaths, 39 were among the insane. Among the diseases treated were 245 of syphilis. In the 105 maternity cases, 35 of the mothers were born in Ireland, 10 in England, 31 in other foreign countries, and 29 in the United States. The women in the pauper department manufactured 23,997

articles during the year, and the women in the insane ward 11,757 articles.

Under the authority given and the appropriation passed by the last Legislature, the farm area has been enlarged, summer-houses have been built in the yard of the women's asylum, and the new asylum ward for insane women is nearly completed. The training school for nurses continues with good results, much valuable scientific work is accomplished in the laboratory, and provision will probably soon be made for the employment of a bacteriologist.

The Trustees suggest the need of the renovation of the old asylum ward for women, changes in the maternity wards,—allowing the sun to reach every room, a new store-house, and the erection of a cottage for consumptives.\*

The Board sees no reason to change its favorable opinion of the management of this institution, as expressed in its report of last year.

Classification of discharges: Deaths, 51; Removals, 1,028; Total, 1,579.

The population of this institution is made up of three classes, viz., paupers, prisoners, and insane, - the latter occupying that portion of the Institution designated by the law of 1895 as the State Asylum for Insane Criminals. At the end of the official year there were 30 more paupers than at the beginning, and 56 more insane, while the number of prisoners had increased from 574 to 578. The largest number of all classes during the year was 1,248, the smallest 946, and the average 1,098, the corresponding figures for the previous year being 1,203, 887, and 1,002. The largest number of admissions in any one month was 182 in the month of December, out of a total of 1,669 for the year. Among the 1,332 prisoners received, 977 were classed as drunkards, 201 as vagrants, and 139 as tramps; 395 of them had been admitted previously, viz., 238 for the second time, 81 for the third, 26 for the fourth, 17 for the fifth, 10 for the sixth, 9 for the seventh, 4 for the eighth, 6 for the tenth, one for the eleventh, one for the twelfth, one for the thirteenth, and one for the sixteenth time. Of the sentences. 852 were for six months, and 255 for one year, the rest for periods varying from 3 to 24 months. Of the 1,669 persons admitted, 541 were born in Massachusetts, 292 in other parts of the United States, 455 in Ireland, 127 in England, 137 in the British provinces, 30 in Scotland, 6 in Germany, 14 in Sweden, and the remainder in other foreign countries.

Of the 100 cases admitted during the year to that portion of the Institution known as the State Asylum for Insane Criminals, 50 were transferred from State Lunatic Hospitals,

46 were committed directly from penal institutions and by the Courts, and 4 were transferred from the almshouse department of the State Farm. Of the 44 cases discharged, 7 were discharged as recovered. There were 9 deaths. the 300 cases remaining in this portion of the Institution at the end of the year, only 212 can be classed as criminal insane, the remaining 88 being those left of the pauper class of insane at the time of the opening of the Asylum. It is suggested that it would be well to separate the noncriminals from the rest of the insane population by transferring and committing all insane inmates of the almshouse department of the Institution to the State Lunatic Hospitals. Of the 344 cases under treatment during the year, mechanical restraint for short periods was used in 13, and seclusion for short periods in 98. An average of 81 inmates have been employed in chair-seating during the year, and an average of 25 on the farm during the summer.

Improvements authorized by the last Legislature, extending the prison department, erecting a workshop, increasing the administrative accommodations of the Asylum for Insane Criminals, and adding to the heating and lighting facilities, are near completion; and the Trustees recommend farther improvements in the building of a new infirmary, the construction of additional cells for sentenced criminals, and the erection of a new cow barn and piggery.

As regards the recommendation of the Superintendent, endorsed by the Trustees, that a law be passed providing that all commitments for offences to the State Farm be by indeterminate sentence, with authority vested in the Trustees to issue permits to be at liberty any time before the completion of the sentence, it appears to the Board that such legislation is inadvisable and entirely unnecessary,—all that it is intended to accomplish by the proposed law being now attained under the Statutes, which give the State Board the authority to release a convict at any time previous to the expiration of his sentence, upon satisfactory evidence of his reformation.

It may be questioned whether, in this admirably ordered Institution, some regular instruction might not be provided to fill the "loafing time" alluded to by the Superintendent in his Report.

Classification of discharges: Recoveries of insane, 107; Deaths, 107; Discharged by transfer, 240; Other removals, 222; Total, 676.

The average number for the year was 956,—the largest in the history of the Institution. In addition to the 107 discharged as recovered, 82 were discharged as much improved, and 91 as improved. Of the recoveries, 40 had alcoholic insanity, 25 acute mania, 11 recurrent mania, and 12 acute melancholia; 48 of them had been insane less than one month before admission, 22 less than three months, and 7 less than six months. The whole duration of insanity in 62 per cent. of those who recovered did not exceed one year. Of the 107 who died, 14 died of general paralysis, 13 of phthisis, and 11 of senile dementia. Among the probable causes of insanity in persons admitted during the year, intemperance is assigned in 109 cases, heredity in 37, senility in 33, epilepsy in 32, ill health in 10, worry in 12.

The scope of the medical work at this well-managed Institution has recently been enlarged by the appointment of a corps of four internes, — young college and medical school graduates, desiring to perfect themselves in nervous and mental diseases. They were selected from a considerable number of candidates, after a thorough examination. They will be required to compile and record an exhaustive history of each case on admission, to accompany the assistant on his medical rounds, take notes of all the cases, make urinary analyses and bacteriological tests, and assist at autopsies. They will have the benefit of all the lectures given to the assistant physicians, and together with them will form a training-school under the direction of Dr. Meyer, the pathologist and specialist in nervous diseases, appointed last year.

Five rooms in the basement have been set apart for the purpose of this school, being occupied for library, microscopic, chemical, photographic and other purposes. The entire supervision of the purely medical and laboratory work is now in the hands of Dr. Meyer. The appointment of these internes will greatly relieve the assistant physicians from routine work, and will enable them to devote themselves more thoroughly to special cases. In this matter this Hospital is in advance of all the rest.

No action has yet been taken here toward the establishment of a training-school for nurses, the authorities holding that the beginnings of pathological work and the establishment of a training school for assistant physicians, were of prior importance. The opening of a nurses' school should not be longer delayed.

The new farm-house has now been used and occupied by all the patients willing and able to work on the farm for nearly a year, and has proved a success. Notwithstanding the absence of locked doors, grated windows, and other safeguards, the patients have been kept in order without difficulty. They are happier in their new quarters, and the good effect of their separation from the rest of the inmates is unquestionable.

The Trustees in their Annual Report state the need of two new buildings for hospital or infirmary wards, one for men and one for women, and suggest an early appropriation by the Legislature for that purpose. They also ask for an appropriation to erect a new building for kitchen uses and apartments for outside help. The estimated expense of all these improvements is \$160,000.

Classification of discharges: Recoveries of insane, 65; Deaths, 111; Discharged by transfer, 148; Other removals, 155; Total, 479.

The largest number in the hospital at any one time was 890, the smallest number was 725, and the daily average was 819. In addition to the 65 patients discharged as recovered, 45 were discharged as much improved, and 47 as improved. Of the 65 recoveries, 12 had acute mania, and 17 acute melancholia; 28 of them had been insane less than one month before their commitment, 9 less than three months, 9 less than six months, and 2 less than twelve months. The whole duration of insanity in  $67\frac{9}{18}$  per cent. of those who recovered did not exceed one year. Among the deaths, 16 were from phthisis, and 15 from paresis. Among the probable causes of insanity of the patients admitted, intemperance is assigned in 52 cases, senility in 29, heredity in 26, and epilepsy in 17.

Twenty-one autopsies were made, with satisfactory results in a number of cases. An unusually large number of patients have been employed, and some new industries have been developed. The women not able to go to the sewing room have been employed in the wards, and altogether a vast amount of work has been done, with great benefit to the patients. A good beginning has been made of a training-school for nurses, and all the attendants are required to take the first year's course in it. Two rooms in the basement of the Institution have been fitted up for autopsies and other pathological investigations, and the authorities are now looking for a competent specialist to undertake the same kind of work as that already instituted in the Worcester Lunatic Hospital.

A number of repairs and improvements have been made during the year, and the industrial building, containing four work-shops, and room for employés, has been completed. The renovation and enlargement of the Chapel is nearly finished.

One ward of the Institution is practically given over to the care of recent cases, and the Trustees express the opinion that a new building for the exclusive care and treatment of such cases should be erected. A new gate-house, outside painting, and new bay-windows for the sake of giving more light and air in the oldest wards, are also among the needs of the Hospital, as declared by the Trustees.

# THE NORTHAMPTON LUNATIC HOSPITAL.

(Opened, 1858.)

Trustees: Adams C. Deane, M.D., of Greenfield, Chairman; Sarah M. Butler, of Northampton, Secretary; Sarah A. Woodworth, of Chicopee; William D. MacInnes, of Pittsfield; Lyman D. James, of Williamsburg; Elisha Morgan, of Springfield; Alvan Barrus, of Goshen.

EDWARD B. NIMS, M.D., Superintendent.

Classification of discharges: Recoveries of insane, 36; Deaths, 46; Discharges by transfer, 36; Other removals, 78; Total, 196.

The daily average number of patients was 560,—the largest for any year since the establishment of the Institution. The largest number present at any one time was 583; the smallest 544. In addition to the 36 discharged as recovered, 14 were discharged as much improved, and 39 as improved. Of the recoveries, 12 had toxic insanity, 8 acute melancholia, and 13 acute mania; 18 of them had been insane less than one month before admission, 9 less than three months, and 4 less than six months. In 88 per cent. of the recoveries the whole duration of insanity did not exceed one year. Among the deaths, 2 were from paresis, 2 from heart disease, 11 from phthisis, and 2 from apoplexy. Among the admissions, intemperance is assigned as the probable cause of insanity in 39 cases, and heredity in 25.

For some years past a record of the weight of patients at the time of admission and discharge has been kept in this hospital. This record covers 425 cases which have left the institution. Of these, 167 were discharged as recovered; 142 of them gained in weight while in the hospital, 16 remained stationary, and 9 lost. The average gain of the 167 was about 11½ pounds; the average period of their residence was about 5 months. The largest gain recorded was 56 pounds.

The improvements in progress here during the last five years are nearly completed. The wards are now cheerful and convenient, and the light and ventilation of the hospital are second to none in the State. The abundant farm products give the patients excellent nourishment, and all are well cared for, so far as outward attendance and nursing are concerned. It is to be regretted, however, that a training school for nurses has not been established, and that there is no movement in the direction of the pathological work already begun in other institutions, and no indication of any.

Classification of discharges: Deaths, 35; Removals, 7; Total, 42.

One patient was discharged as recovered, and 4 as improved. The 20 patients admitted were women transferred from Westborough Insane Hospital. Among the causes of disease in these 20, heredity is assigned in 3 cases, intemperance in 2, and epilepsy in 3. Among the 35 patients who died, 19 died from phthisis, one from heart disease, 2 from Bright's disease, and 3 from epilepsy.

The recent addition to the women's ward, giving increased accommodations as well as improved bathing facilities, has greatly improved the general condition of the Institution. In spite of the fact that the patients sent here from other institutions for the insane are never among the most efficient workers of the class of chronic insane, the greater portion of them have been profitably employed. Although in the heart of a great city, patients move freely about the grounds, and receive all possible care and attention.

# THE DANVERS LUNATIO HOSPITAL.

(Opened, 1878.)

Trustees: Samuel W. Hopkinson, of Bradford, Chairman; Solon Bancroft, of Reading, Secretary; Zenas E. Stone, of Lowell; Harriet R. Lee, of Salem; William B. Sullivan, of Danvers; Orville F. Rogers, M.D., of Boston; Florence Lyman, of Boston.

# CHARLES W. PAGE, M.D., Superintendent.

Classification of discharges: Recoveries of Insane, 59; Deaths, 102; Discharged by transfer, 195; Other removals, 164; Total, 520.

The daily average of patients under treatment was 914. In addition to the 59 discharged as recovered, 59 were discharged as much improved, and 55 as improved. Of the 59 recoveries, 11 had acute mania, 16 acute melancholia, and 8 acute confusional insanity; 35 of them had been insane less than one month before admission, 45 less than three months, 50 less than six months, and 54 less than twelve months. The whole duration of insanity in 83 per cent. of those who recovered did not exceed one year. Among the deaths, 26 were from general paralysis, 17 from old age, 5 from phthisis, and 3 from epilepsy. Among the admissions, intemperance is noted as the probable cause of disease in 52 cases, heredity in 46, old age in 25, and epilepsy in 19.

During the year quite important changes have been made in this Institution, the most noteworthy being the building of a new congregate dining-room, with long corridors connecting it with the main building; new rooms for pathological research and study; and the improvement of many of the wards by the re-laying of floors, painting, decorating, etc. All this work has been paid for from the earnings of the Hospital. The corps of assistants and nurses is very efficient, giving the patients under their care good treatment and kind attention. Good work has been done by the training-school for nurses, now in the eighth year of its existence. were four graduates last year and seventeen are in the present senior class. All attendants engaged in ward work are required to purchase and study books on nursing, and attend the regular class work and lectures for at least one year, even if they do not become pupils in the training-school. Two married women, graduates of the training-school, have been transferred to the male wing, where they assist their husbands in the care of the patients, with beneficial results. Dr. Worcester, the pathologist, has not been able to enter upon elaborate research in his department, but has done a good deal of scientific and practical work, making thirtysix post-mortem examinations and other examinations and analyses, and preparing and publishing certain reports of special cases.

The matter of non-restraint in this Hospital is carried to an extent far beyond that of any other State institution. The Trustees urge the early erection of a separate building for the treatment of acute cases, and will ask for an appropriation for this purpose.

Classification of discharges: Recoveries of insane, 51; Deaths, 44; Discharged by transfer, 101; Other removals, 99; Total, 295.

Besides the 51 patients discharged as recovered, 50 were discharged as much improved, and 27 as improved. Of the recoveries, 16 had acute melancholia, and 18 acute mania; 16 of them had been insane less than one month before admission, 19 less than three months, and 5 less than six months. The whole duration of insanity in 80 per cent. of those who recovered did not exceed one year. Among the deaths, 8 were from general paralysis, and 14 from senile dementia. Among the admissions, intemperance is assigned as the cause of disease in 25 cases, senility in 9, ill health in 30, and epilepsy in 9.

With regard to the claim of the Trustees that there is a much larger percentage of recoveries here than at the other hospitals, the Board stated, in its last Annual Report, that "it must be remembered that the use of the word recovered depends entirely upon the point of view, and in some instances where the authorities at Westborough discharge a patient as recovered, other hospitals may discharge him as 'much improved', or 'improved'. It should be noted besides that the percentage of recoveries here is based upon the number of alleged curable cases, instead of the number of admissions, which is the case at the other hospitals, and also that the method of diagnosis followed is apparently different from that employed at the other hospitals." The Trustees having recently questioned the correctness of this statement, it seems proper to repeat and emphasize it here. It is a simple matter of record that Westborough Insane Hospital has been accustomed to base its percentage of cures

upon alleged curable cases, and in no other way, while other hospitals base their percentage of cures upon either admissions or discharges, and in no other way. Thus the Superintendent of Worcester Lunatic Hospital, in his Report for the year ending September 30, 1895, says: "the percentage of recoveries calculated upon the average number of discharges and deaths was 18.31; calculated on the number of admissions it was 21.28." The Superintendent of Taunton Lunatic Hospital, in his Report for the same year, says: "the percentage of recoveries calculated upon the admissions was 19.7, and calculated upon the discharges, including the deaths, was 23." The Superintendent of Northampton Lunatic Hospital, in his Report for the same year, says: "the percentage of recoveries on the number admitted was 13.9; on the whole number who left the Hospital, 23.89." Now, the latter method of obtaining the percentage is certain and upon a definite basis; the former is uncertain and The number of admissions to an institution is a fixed quantity, while the number of curable cases depends entirely upon the point of view. The other hospitals do not state the number of cases they consider curable, but Westborough not only declares the number of inmates admitted to its own institution diagnosed by its Superintendent as curable, but assumes to make a similar diagnosis for the other institutions, reaching its conclusion by classifying as curable all cases appearing in the annual reports of the institutions as cases of acute mania, acute melancholia, puerperal insanity, and confusional insanity; and all others as incurable; - it being certainly questionable whether a consensus of alienists would lead to a like conclusion.

The difference in the method of diagnosis followed by this Institution and by some of the others is well illustrated by the following table, showing the ratio of acute cases to the whole number of admissions for the year ending September 30, 1894.

|                |  |  |  |   | Worcester<br>Lunatic<br>Hospital. | Taunton<br>Lunatic<br>Hospital. | Westborough<br>Insane<br>Hospital. |
|----------------|--|--|--|---|-----------------------------------|---------------------------------|------------------------------------|
| Admissions, .  |  |  |  | • | 581                               | 870                             | 804                                |
| Acute cases, . |  |  |  |   | 189                               | 185                             | 62                                 |
| Percentages, . |  |  |  |   | 32.5                              | 36.4                            | 20.3                               |

The difference in diagnosis is at once apparent. The number claimed by Westborough Hospital as acute being only 20.3 per cent., while that of Worcester is 12.2 greater and that of Taunton 16.1 per cent. greater, it follows that the percentage of recoveries must be very much larger at Westborough than at either of the other two institutions, all three hospitals receiving practically the same class of The difficulty and misunderstanding would be at once removed were the Westborough authorities to place their percentage of recoveries upon the same basis as that of the other hospitals. And if it seems desirable to make comparisons, the method adopted in the following table, - in which are considered, not all the recoveries within each official year, but the recoveries only of patients admitted within that year, during a period of three years, - would lead to fair results.

| •                       | Number of Patients admitted within the past three years. | Recoveries of Patients admitted within the past three years. | Percentage of recoveries. |
|-------------------------|--|--|---------------------------|
| Northampton Hospital,   | 580  | 75   | 12.9                      |
| Westborough Hospital, . | 785  | 97   | 12.8                      |

| Taunton Hospital,       | 1,186  | 120  | 10.1                      |
| Danvers Hospital,       | 1,125  | 111  | 9.8                       |

The Board has been glad to observe an improvement in this Institution from time to time during the year. The wards have been greatly relieved by the removal of disturbed patients to Medfield; more attention has been paid to the patients' personal appearance, and the condition of the wards; the nurses are more attentive, neater, and more diligent; the patients are under better control, and a greater variety of work and amusement has been provided for them; and on the whole, there is decided progress in matters of general order and good management.

The Trustees, in common with the Trustees of other State institutions for the insane, recommend the erection of a detached building for the treatment of acute cases.

# THE MEDFIELD INSANE ASYLUM.

Classification of discharges: Deaths, 24; Removals, 13; Total, 37.

When completed, this Institution will have thirty-seven buildings, situated on the slope of a hill in the town of Medfield, with 426 acres of land bordering on the Charles River. Eighteen of these buildings are designed for patients,—the upper stories for sleeping purposes and the lower for sitting and work rooms. Most of them will accommodate about fifty patients each, but two are capable of holding one hundred each. Some of them are provided with dining-rooms, but all patients who are able will use the general dining-rooms in the centre of the quadrangle, each dining-room being capable of seating about five hundred persons.

The Hospital was opened May 1, 1896, by proclamation of the Governor, and on that day the Board made a transfer to it of 120 patients,—60 women and 60 men, from Taunton Lunatic Hospital. May 12, 29 women were received from Northampton Lunatic Hospital; May 27, 30 women and 20 men from Westborough Insane Hospital; June 4, 110 men and 64 women from Worcester Lunatic Hospital; June 6, 24 women, and June 11, 20 women and one man from Boston Insane Hospital, Austin Farm; June 23, 71 women and 106 men from Danvers Lunatic Hospital; making, with five other patients received from different hospitals at different times a total of 600, 302 women and 298 men.

Twelve buildings out of the eighteen are now occupied, and it is expected that the remaining six will be completed within a few months, when the establishment will easily accommodate one thousand patients, and with a little crowding, twelve hundred.

The affairs of the Hospital are now running very smoothly. The female patients have been largely employed in the mending-room, laundry, kitchen, and in sewing and knitting in the wards; the men in the dining-rooms, the laundry and kitchen, and on the farm. For some time to come there will be work enough on the grounds for all the male patients fit for labor. Nearly two hundred of the patients take their meals in the dormitories, the rest in the general dining-rooms.

This Institution has already cost more than twice as much as was contemplated at the outset, and in spite of the enormous amount of money already spent upon it, certain faults in construction have already appeared. The most serious problem is the inadequacy of the water supply; the driven wells have proved a failure, and all the water required for drinking purposes is now hauled in barrels.

The Board wholly disapproves of the recommendation of the Trustees that the laws establishing the Asylum be so amended as to provide for the admission of acute cases, thus placing the Asylum upon the same basis as the State Hospitals. On no account should there be any departure from the intention of the Act of 1892, and the purpose of all succeeding legislation in regard to the matter, in making the Asylum an institution for the care and treatment of the chronic insane.

# THE MASSACHUSETTS HOSPITAL FOR DIPSOMANIACS AND INEBRIATES,—Foxborough.

<sup>•</sup> The receipts include \$4,382.70 from sale of brooms.

<sup>†</sup> The expenditures include \$4,784.55 on account of broom shop.

The number of patients admitted during the year, 271, was 59 more than during the preceding year, and the daily average, 145, was an increase of more than 20 over the preceding year. The weekly average cost of support per patient has been steadily reduced from \$11.18 four years ago to \$8.41 three years ago, \$7.00 two years ago, and The patients have been employed in the \$6.32 last year. dining-rooms, kitchen, laundry, boiler-house, in the care of the barn and stock, in the vegetable gardens, in general farm work, and in repairs on the buildings. In the broom shop an average of 60 men have been occupied daily, making about 1,200 brooms per week. This industry is selfsupporting. Under the direction of a competent teacher of physical training, who gives his whole time to the work during five days of each week, the use of exercise and baths, as therapeutic agents, has been steadily pursued during the year, nearly all the patients attending the class each day; and the benefit following this practice has been decided and unquestionable. There is a good hospital library, one of the patients taking an active part in its management.

Changes in the Board of Trustees in the Institution, notably in the recent appointment of three experienced physicians, one of whom is Superintendent of the McLean Asylum, are already resulting in a change of methods and a new spirit in the direction of the affairs of the Hospital. The failures of past years and the urgent needs of the Institution are more fully recognized than ever before, and a determination is evident on the part of the Trustees to remedy, so far as possible under existing conditions, the defects which have stood in the way of the success of this experiment in the care, treatment, and cure of inebriates, and to seek for necessary legislation where the present laws have proved inadequate. Foremost among the requirements of the Institution are declared to be a new building for chapel, gymnasium, library and reading-room; and a custodial building to be divided into small wards, possibly with an enclosed garden, with accommodations for 25 or 30 inmates, where a certain class of excited and uneasy patients can be kept under closer supervision than has hitherto been possible, to remain there until in condition to be put on parole. The Trustees will also ask for legislation giving them authority to discharge persons, who, upon examination and trial, are found to have been improperly committed by the courts, — that is, people who are either simply common drunkards, or are of bad character apart from their habits of inebriety. The Board is heartly in sympathy with this request, and with all movements in the direction of a more effectual accomplishment of the real purpose of the establishment of the Hospital.

This Institution continues to maintain its high standard in every respect. Much farm work, grading, filling and other labor, has been performed by the inmates. The new building for boys is progressing rapidly, and will soon be ready for occupancy. The building to accommodate 80 women, authorized by the last Legislature, will be erected during the coming year.

The question of another School, or a division of this, — the separation of the custodial from the school department, — should be carefully considered before the School becomes much larger.

The classes of patients cared for in this Institution are children under fourteen years of age suffering from epileptic seizures; children suffering from other nervous disorders; children with certain deformities and other afflictions of the joints; cases needing operations or fitting supports; and a few adults, in Blake Cottage, which is used for private cases only. So far as is known, this is the first institution established in the United States for the care of epileptic patients. Considering the means at the disposal of the management, the work done here is very successful. The buildings have been recently improved, but will never be wholly satisfactory owing to defects in structural arrangement.

# THE McLEAN HOSPITAL, Waverly.

EDWARD COWLES, M.D., Superintendent.

This is a branch of the Massachusetts General Hospital, a corporate institution. At the beginning of the official year it contained 136 inmates, — 61 men and 75 women; admitted

during the year 121,—56 men and 65 women; discharged 107,—45 men and 62 women; remaining September 30, 1896, 151,—72 men and 79 women; of those discharged, 29 were discharged as recovered; of the 151 remaining at the close of the official year, 146 were supported wholly or in part by individuals and 5 by the Hospital.

Important additions to the fine buildings have been made during the year, and no effort is wanting on the part of the Trustees and the Superintendent, to maintain the Institution at the high standard already reached.

#### THE BOSTON INSANE HOSPITAL.

This is a municipal institution, but, in common with all receptacles for the insane in the Commonwealth, is subject to visitation and inspection by the State Board. It is divided into two establishments,—one known as Boston Insane Hospital, Pierce Farm, and the other as Boston Insane Hospital, Austin Farm.

#### Pierce Farm.

#### WILLIAM NOYES, M.D., Superintendent.

At the beginning of the official year there were 159 inmates,—78 men, 81 women; admitted during the year, 91,—39 men, 52 women; discharged during the year, 100,—40 men, 60 women; remaining, September 30, 1896, 150,—77 men, 73 women. Of those discharged, 7 were discharged as recovered.

The buildings, as far as completed, are in many respects unsatisfactory. They are so arranged that many corridors and passages are dark, and there is much unutilized space. The management is good.

#### Austin Farm.

# EDWARD B. LANE, M.D., Superintendent.

At the beginning of the official year there were 368 inmates,—158 men, 210 women; admitted during the year, 55,—18 men, 37 women; discharged during the year, 91,— 15 men, 76 women; remaining September 30, 1896, 332,—161 men and 171 women. Of those discharged, 3 were discharged as recovered.

This is now the receptacle for acute cases, and in many ways has become materially improved, especially in the original building, where extensive repairs have been made, the building now being divided into two wards. Under its present efficient management, the patients are comfortable and well cared for.

#### THE MASSACHUSETTS HOSPITAL FOR EPILEPTICS.

The Trustees report that three new brick buildings are now in process of erection, very nearly on the site of the old State Primary School, extending along the west slope of the hill, and at a distance of one hundred feet from each other. In the centre of the group is the administrative building, three stories in height, occupied on its first floor by offices, reception room, library, dispensary, and laboratory; on the second by the Trustees' room and apartments for the Superintendent's family; on the third by rooms for the other officers. On either side of this building are hospital cottages for men and women, each designed to accommodate one hundred persons. Each is divided into four wards of equal size, each ward containing a day-room, dining-room, dormitory, and four bed-rooms, besides bath, toilet, clothes rooms, etc. In the basement of each building is the kitchen. The cost of these three buildings, including heating and lighting, is not expected to exceed one hundred thousand dollars. In addition to these, the old hospital building is being remodelled into a cottage for employés, and the old laundry into a laundry, bakery, dynamo room, etc. The contracts call for the completion of the work on or before May 1, 1897.

#### THE PRIVATE INSANE ASYLUMS.

Licenses for the establishment of two new private asylums were issued by the Governor during the year, after investigation and report by the State Board of Lunacy and Charity. The private asylums in operation at the end of the

1897.7

official year, September 30, 1896, were thirteen in number and were nearly all in a highly satisfactory condition. They are as follows:—

- 1. "Woodbourne," Roslindale. Henry R. Stedman, M.D., Superintendent.
- 2. "The Highlands," Winchendon. Frederick W. Russell, M.D., Superintendent.
- 3. Private Asylum, Brookline. Walter Channing, M.D., Super-intendent.
- 4. Private Asylum, Norwood. Eben C. Norton, M.D., Super-intendent.
- 5. "Riverview," Baldwinville. Lucius W. Baker, M.D., Superintendent.
- 6. "Herbert Hall," Worcester. Merrick Bemis, M.D., Super-intendent.
- 7. "Newton Nervine," West Newton. N. Emmons Paine, M.D., Superintendent.
- 8. "Attleboro Home Sanitarium," Attleborough. Laura V. G. Mackie, M.D., Superintendent.
- 9. "Locust Grove Asylum," Sandwich. Alice R. Cooke, Superintendent; Geo. E. White, M.D., Medical Director.
- 10. "Broadview Sanitarium," Holyoke. Leo. M. Selling, M.D., Superintendent.
- 11. Private Asylum, Newton. Edward H. Wiswall, M.D., Superintendent.
- 12. "Cutter Retreat," Pepperell. William F. Heald, M.D., Superintendent.
- 13. "Dr. Ring's Sanatorium," Arlington Heights. Allan Mott Ring, M.D., Superintendent.

Dr. Russell reports extensive repairs and alterations, including a large increase in the water supply, and provision for ample fire protection, by means of hydrants.

Dr. Paine reports the completion of a new and thoroughly equipped building for ten patients, so that he now has accommodations for eighteen patients.

Dr. Channing reports the repetition, last summer, of his experiment of the previous year in selecting a pleasant house in a quiet town on the sea-shore, where several patients were continuously cared for. They thoroughly enjoyed the change, and gave no trouble whatever, although they had almost unrestricted liberty. They had a feeling of

greater responsibility there than in the comparative confinement of the institution, and amusements and occupations of various kinds were entered into in a less perfunctory spirit than at the asylum proper. On their return they were all found to be improved physically if not mentally. It is Dr. Channing's intention to receive no more male patients, so that his Asylum will eventually become an institution for women only. In his opinion, this arrangement, while providing for better classification, will be likely to secure added efficacy of treatment.

Dr. Heald reports that he has made no special attempt to get new patients, and that at present his institution is rather an old peoples' home than a private asylum.

Dr. Stedman.

# THE BOARDED-OUT INSANE.

By an Act approved June 19, 1885, the State Board of Lunacy and Charity was authorized to place in suitable families throughout the Commonwealth insane persons of the quiet and chronic class, and in accordance with its provisions the first patient was placed in a family in the following August.

Up to the close of the year ending September 30, 1896, 471 cases, — 99 men and 372 women, have been placed at board. The average age of those thus placed was 46 years;

the average time at board, 2 years, 8 months, 1 day. ing the eleven years, 266 transfers of patients were made from one family to another; 131 of them because of disturbance of the patient, 59 to make better provision for self-support, 19 to be cared for at home, and 57 from other causes. Of the entire number placed out, 329 have remained in the family where they were first placed, either until their discharge or their return to the hospital. Of the patients remaining September 30, 1896, 2 have been out eleven years, 6 ten years, 10 nine years, 11 eight years, 22 seven years, 24 six years, 13 five years, 16 four years, 8 three years, 7 two years, 4 one year, and 6 less than one year. largest number at board at any one time was 175; the present number is 129. 17 elopements have occurred. — 10 men, 7 women. There have been 39 deaths, -12 men, 27 women; and 18 of those returned to hospitals on account of physical disability died within three months after their return.

Sufficient time has now elapsed to form an estimate of the result of the experiment, with reference to the well-being of the patients, to hospital management, and to the community at large.

First, with regard to the patients. An improved condition is to be found in typical cases placed in typical families; that is to say, in chronic cases of good physical health and quiet and tidy habits, placed in families without young children, and one or both of whose heads have had hospital training. In such a family the patient enjoys home comforts and pleasures and a measurable return to his former habits of life: while, through the previous training which the care-takers have received, enough of the hospital system appears to help ordinary family government. In such a situation the flickering remnants of mental activity are stimulated by the presence of old and familiar habits, and the patient is happier than in the hospital. Such combinations in families. however, are very rare, there being among all those who have patients to board but a single instance where both husband and wife have had hospital training. This family has had continuously four male patients, who are comfortable and well cared for, and the family is making money.

A large hill farm has been purchased by them, and, — largely through the aid of the patients' labor, and the revenue derived from their care and support, — has been paid for, and is now quite productive. These people are thrifty, good managers, not afraid of work or the sacrifice of personal comfort, and yet even they are tiring of the strain which this constant and unremitting attendance occasions. They can never leave home together without first securing some reliable neighbor to take charge in their absence; and as this is not always easy to arrange, one or the other almost invariably remains on the farm.

Again, there are several families where one member has had hospital training, and in these cases, on the whole, the experiment may be regarded as fairly successful.

In regard to those families that have had no previous experience with insane people, it is fair to state that they provide excellent homes for some of the milder cases, but as a rule, the duty they undertake is a somewhat difficult one. Only such patients can be given them as are entirely tractable, little more than pieces of animated machinery, simply requiring to be comfortably clothed, housed and fed; these, on the whole, they take good care of; and there are several instances of this kind where patients have remained many years in the same family.

There remain other classes of families where patients have been placed for a time, - such as families who take patients simply for the sake of gain; families where the homes are cheerless and unattractive, and the care-takers unsympathetic; families having young children, either as inmates or frequent visitors, (and it may be said here that the companionship of a person afflicted with insanity is extremely unsuitable for young and unformed minds, and is sometimes even attended with dangerous results); and families receiving patients who partly pay for their board in work. Under conditions otherwise favorable, some of these homes may be regarded as fairly satisfactory, but in many, trouble has so often arisen as to render necessary frequent changes of location. It is a significant fact that the demand for insane boarders invariably exceeds the supply, a considerable number of persons in different parts

of the State being always ready to receive and care for all the patients offered them, for the small amount paid,—\$3.25 per week being the highest rate allowable under the law. One applicant, for instance, stated that he had recently purchased a farm, on which there was a heavy mortgage, and he wished to take insane boarders in order to pay it off. Of course, this motive of personal gain, necessarily existing to some extent in every case of family care, does not exist at all in a hospital.

In cases, (and they are in a large majority), where patients are expected, if for nothing more than their own good, to assist in the work of the family, there is always danger that too much work may be imposed upon them, and the most careful scrutiny has to be used to guard against this abuse. In the case of a patient whose mind is so impaired that his testimony cannot be rated at its true value, or who is too demented to express himself clearly on the subject at all, it is comparatively easy for the care-taker to conceal from the visitor the advantage taken of the patient's condition, and the imposition of tasks too severe for his strength. Such abuse has sometimes arisen without any intention or disposition to do wrong on the part of the care-taker, but because of insufficient knowledge of the patient's capacity for work, the criterion being that of a person in good mental and physical condition. Of course in an institution such conditions cannot obtain, for under the eyes of an expert official and the supervision of trained employes, the idiosyncrasies of all patients are recognized and their ability is rated at its true value.

A large majority of those boarded out are women, who are much more tractable than men, and more inclined to try the experiment; for no patients are ever placed out against their will, if they possess sufficient intelligence to make their preference known.

It may be observed here that patients in families are necessarily deprived of almost all the advantages of social life, the amusements and entertainments, which form so large a feature of the ordinary hospital routine.

During the eleven years since this system was inaugurated, 34 patients have been discharged as self-supporting. These have mostly first been allowed parole; they are then visited in as quiet a manner as possible (for they often become quite sensitive on the question of the State's authority and continued visitation); and after they have satisfactorily shown their ability to support themselves, they are discharged. For these patients the system may certainly be said to work very well.

While the system was intended primarily and expressly for the care of the chronic insane, it seems to apply most happily to those who are on the road to recovery, the boarding-places proving convalescent homes for them, from which they go out to resume their places in the world. There have been several cases placed out who entirely recovered in this way, but whose recovery would have been doubtful or very much delayed had they remained in the hospital.

Among the obstacles to the entire success of the system may be mentioned the difficulty of securing in case of illness the same care that can be obtained without the slightest delay at the hospitals.

With regard to the effect of the system upon the hospitals themselves, it must be declared to be of but little, if any, The classes required both by law and necessity to be boarded out are those easiest to care for in the hospitals. The majority of such patients make no trouble, can sleep in dormitories without special watching, and are able not only to take care of themselves but to aid in the care of others. The number of paid employés in our hospitals is so small that much of the work must be done by patients, with the result not only of a considerable saving to the State but of being a wise adjunct to the treatment of the patient. Thus the greatest number eligible for boarding out are either quiet patients, doing no work, and requiring the minimum of hospital care, or else chronic cases, helpful to themselves and others, whose departure reduces the working force of the hospital. It is due the several Superintendents to say that they have greatly assisted in the trial of the system, and in many cases, have gone so far as to recommend some of their most efficient workers.

A word remains to be said with regard to the effect of the system upon the community at large. Notwithstanding the

1897.7

fact, already stated, that the demand for patients is always greater than the supply, the number of families in the State who really care to take such boarders is after all comparatively small. They fear danger to themselves and the patients, and even where they do not hesitate on their own account, their neighbors have the moral if not the legal right to demand that no person shall be placed near them liable to injure them or their property. The influence on children is far from good, as already stated, and most women shrink from near association with persons of impaired intellects.

The law permits none but State cases to be boarded out under the direct authority of the Board. In all city and town cases, the consent of the Overseers of the Poor must first be obtained, and in most instances the town authorities either are inclined to disbelieve in the system, or, if they approve of the boarding out of patients, prefer to care for them in their own almshouses. This reluctance on the part of the Overseers of the Poor is one serious obstacle to the success of the system. During the year ending March 31, 1896, 86 persons were discharged to the Overseers of the Poor from the different hospitals, most of whom were eligible for boarding in families. Were small towns forbidden by law to make their almshouses receptacles for the insane, the number of those boarded out would be largely increased.

It may be fairly concluded, then, that convalescent cases receive the most benefit, and that for them the system is best suited; that chronic and incurable cases can be placed out to good advantage, under proper conditions, which are difficult to find; that there are comparatively few patients who receive more benefit than if they remained in a hospital; that the happiness and comfort of a large majority of those now out at board have not been increased by the change; that neither the hospital nor the Commonwealth is materially benefited; that the community at large has certain claims in regard to the subject that the State should not ignore; that under the present laws the system can be extended very slowly, if at all.

The record for the past year shows thirteen less patients in families than were reported a year ago, and the number

placed out during the year, three less than the year before. There has been the same effort to place out patients during the year, and the lack of material alone has prevented the advance of the system.

During the year twelve cases have been returned to institutions for various reasons, and two women have been discharged recovered. Five cases, (one being a woman twice returned), became unmanageable in private families; four were returned for hospital treatment,—two at the request of friends; one was discharged to the Overseers of the Poor; six have died,—one from epilepsy, one from exhaustion from chronic mania, two from disease of heart, one from phthisis, and one from Bright's disease.

The patients are distributed in towns and cities as follows:—

Bristol County, 13, viz.: Easton, 3; North Attleborough, 1; Norton, 3; Taunton, 6.

Essex County, 1, viz.: Danvers, 1.

Franklin County, 2, viz.: Ashfield, 1; Hawley, 1.

Hampden County, 3, viz.: Monson, 1; Southwick, 1; Springfield, 1.

Hampshire County, 19, viz.: Cummington, 2; Easthampton, 2; Goshen, 6; Northampton, 1; Williamsburg, 8.

Middlesex County, 33, viz.: Arlington, 1; Framingham, 1; Marlborough, 3; Newton, 3; Tewksbury, 23; Tyngsborough, 2.

Norfolk County, 17, viz.: Dover, 5; Foxborough, 2; Norwood, 2; Walpole, 8.

Plymouth County, 7, viz.: East Bridgewater, 3; West Bridgewater, 4. Suffolk County, 5, viz.: Boston, 4; Chelsea, 1.

Worcester County, 25, viz.: Athol, 4; Northborough, 4; North Brookfield, 9; Oakham, 1; Shrewsbury, 1; Southborough, 1; Sutton, 1; Westborough, 3; Winchendon, 1.

There are also three patients outside the State, viz.:

Kensington, N. H., 1; North Barnstead, N. H., 1; Providence, R. I., 1. Also one case of elopement since May 9, 1895.

Statistics from October 1, 1895, to September 30, 1896.

# GENERAL CARE OF THE INSANE.

94 126 142 168 168 158 147

Three years ago in its Annual Report the Board called attention to the general care of the insane in the State Hospitals, and intimated that this was not altogether satisfactory, especially if regarded from a medical and scientific point of view. The following year the subject was again alluded to, and considered at some length. Speaking of the existing standard of care in Massachusetts as certainly a high one, the Board seriously questioned whether the hospitals of

the State ought not rather to be denominated asylums. in view of the fact that they were in charge of physicians upon whom were imposed custodial duties requiring no medical knowledge or training, and in view also of the character of a great part of their inmates. The Board went on to declare that in order to secure a high degree of hospital excellence there must be "a more precise and complete system of records, closer medical relation with inmates, trainingschools to create a better class of attendants, and a more ample use of the vast opportunities for scientific study furnished by the very considerable number of institutions under the control of medical superintendents." McLean Hospital as the best illustration of an institution answering the highest requirements that the State has yet offered, the Board proceeded to illustrate and emphasize these several points in detail, and to urge especially the general establishment of training-schools for nurses, a better classification of inmates, the building of infirmaries, more and better occupation for the insane, and, as of very great importance, provision in the institutions for laboratory work under the direction of trained pathologists.

In its last Report, in considering the general subject of the care of the insane, the Board advised the appointment of resident internes at the several State institutions; repeated its observations with regard to the importance of the occupation of as many of the insane as it is possible to employ; urged the necessity of careful attention to the nursing of acute cases; suggested the provision of homes for hospital nurses outside the hospitals; spoke of the importance of training-schools, and recognized the success of those already established; referred to the matter of proper attention to the food of insane patients as of great importance, both as an aid to recovery in curable cases and as productive of better condition of body and mind in the incurable; and advised more frequent conferences among superintendents for study of methods and comparison of work.

Within the last two years a new life and movement have been manifest throughout our institutions for the insane, until now there is to be found a condition of things in which the hospitals are apparently vying with each other in their 1897.7

efforts to reach and maintain the highest standard of management. Training-schools are already established in nearly all of the hospitals, - in one of them a training-school for physicians rather than for nurses having been judged of primary importance; almost all have either already provided or will soon provide for the appointment of special pathologists; most of them are asking for the establishment of buildings for the separate treatment of the sick, and of acute cases also; well equipped laboratories are either already built or in prospect; a renewed interest is taken in the study of recent cases; special efforts are being made in the way of exhaustive examination of all cases upon their admission; farm-houses where all patients who are able to work can live and enjoy a certain degree of freedom outside of the large buildings are built or planned for; greater care is taken in the selection of nurses as well as in training them: drugs in the form of chemical restraint are largely done away with, and there is less and less restraint of any kind; in brief, our institutions are becoming, not only fully alive to their deficiencies, but earnest in their efforts to remedy them.

A large proportion of the insane are and always will be of the chronic class; and for these, good housing, good food, kind treatment, and as much occupation as they are able to perform, are the prime requisites, and indeed the sole essentials. There remains the class of cases commonly known as recent or acute, a considerable proportion of which are recognized as curable, and in these there is to be applied not only the treatment given to the rest, but the most careful, thorough and painstaking study, and the use of all the aids that the most enlightened science can afford. And these cases are to be studied, not only for the sake of the patients themselves, but for the purpose of the prevention of insanity in others; and to this end all the new study of insanity inevitably tends. How best to care for, how to cure, and how to prevent, - these are the three elements of the great problem. - the first easy, the second difficult, the third the most difficult of all.

There is no question, then, that the State must go on with its good work, and while recognizing the fact that some

serious mistakes have been made in the past in unwise expenditures, in the erection of needlessly expensive buildings, and, in some cases, in a lamentable waste of the people's money, must place in the hands of competent boards of trustees sufficient funds not only for the equipment of the institutions, but for a thorough prosecution of pathological and clinical research and study.

In all our hospitals a more careful classification should be made, entirely separating the acute cases as well as the sick from the rest; and farm-houses for those able to work, and outside buildings for the accommodation of the nurses should be provided. The farm-houses need not necessarily be upon the hospital grounds proper, but might be established at some distance. Not only patients accustomed hitherto to perform farm labor, but any patient, capable of doing any out-door work, (and at the same time sufficiently undisturbed mentally), could be placed there. Even women in many instances might be also employed in farm labor with results sometimes more marked than in cases of men.

It is not so very long ago that all insane persons were relegated to structures erected solely for the safe-keeping of those "furiously mad", and yet such progress has been made in this direction that now in all enlightened communities an insane man or woman is known and recognized as a sick person, to be cared for and treated as such.

In the care and treatment of the insane, if the point can be reached, through a wise administration, whereby we can not only shorten the duration of disease, but prevent the development of insanity in many persons, who, under present conditions, would become inmates of our hospitals for life, a source of grief and anxiety to their friends and a burden to the State, we shall have made a gain hardly to be over-estimated in the health, happiness, and prosperity of the community, besides securing in the end a great financial saving.

Defects, and some serious ones still exist, and the Board has not hesitated to call attention to them from time to time. Here and there are to be found, for example, untidiness, want of system, lack of discipline, and insufficient night supervision, — especially for patients under restraint. Regarding this latter point, the Board is of the opinion that there should

be a night nurse on every hospital ward, not only as a matter of security in exceptional cases, but for the more efficient care and well-being of the patients. But, whatever their shortcomings, the Commonwealth has reason to congratulate itself that its institutions for the insane are on the whole well managed, and that they are governed by able boards of trustees, who give generously of their time and strength to the interests placed in their charge.

# THE CITY AND TOWN ALMSHOUSES.

Almshouses are maintained by 216 of the cities and towns of the Commonwealth. Of these, 207 cities and towns maintain each its own, two have an almshouse in common, and one almshouse, situated in Holden, is used by seven towns.

It is satisfactory to note that in a general way the almshouses have improved during the year. The buildings are in a better condition, the inmates receive greater care, and a better understanding of the mutual needs of the poor and the municipalities appears to prevail. There still remains, however, room for improvement in too many instances, and in a few there is imperative need of radical changes.

In the reports issued by the Board from year to year, emphasis has always been laid upon the necessity of provision for separation of the sexes; and, in cases where many are lodged in one almshouse, of the sane from the insane. While this is done in the larger almshouses, in the smaller ones little attention is paid to the matter.

One hundred and thirty-six cities and towns maintain no almshouses; their dependents being placed in private families, or boarded in almshouses in other towns, or cared for in institutions. While nothing but words of commendation can be used with regard to the systems prevailing in many of these places, the reverse is true of some of them. It is certainly not to the credit of the State that a town should sell its unfortunate poor at public auction to the lowest bidder at the annual town meeting. Some means should be devised to abolish such a practice, and also that followed by a number of other towns, which practically arrive at the same result by placing their poor in the family

offering to support them at the lowest price. In one instance a town actually receives twenty-five dollars from an individual for the privilege of boarding one feeble-minded woman, who renders valuable service. One of our cities maintains its poor at its almshouse by allowing the warden a certain sum per capita per week, his salary being what he is able to save from this amount. While in the case of an honest and reliable man no harm might come to the poor from such an arrangement, it affords an opportunity for abuse.

The Overseers of the Poor have manifested in most instances a willingness to heed advice and suggestions from the Board; they have at its request removed insane inmates to the nearest hospital; and in other cases they have carried out suggestions made by it for the disposition of persons not requiring hospital treatment, but needing removal to a better home.

In previous years, reports of visitation of almshouses were not brought to the notice of Overseers of Poor, — except in cases requiring instant action, — until the publication of the Annual Report. This year it was decided to communicate with the Overseers of the Poor immediately after visitation in each instance, and send them an abstract of the visitor's report, in order that they might be made acquainted at once with any defects or abuses discovered, and have the opportunity for reply. The plan has worked well. In the following condensed reports of the several city and town almshouses, replies of Overseers of the Poor to these visitor's reports are noted.

For a long time it has been felt that the information received by the Board from the Overseers of the Poor in their annual returns, required by law, concerning the exact number of insane and idiotic persons supported at public expense outside of the State institutions, was far from being correct or satisfactory, and this, not through any fault of the town officials, but owing to the lack of trained knowledge on their part. It was therefore thought best to correct this important matter, and to this end a special appropriation was made, and a physician, skilled in diagnosis and in the care and treatment of the insane, was selected, to make

personal examination of all the city and town dependents not in State institutions. The work of this special visitor, Dr. Wentworth, is shown in a report and statistical tables immediately following the almshouse reports. It has brought into our hands knowledge most valuable, not only to the State, but to the cities and towns, and not readily attainable in any other way.

#### Acton.

## (Visited November 2, 1896.)

This almshouse is fairly well situated and presents a good external appearance, but within it is disorderly and unattractive. The sanitary condition, as found in the condition and location of vaults, sink and drains, should have a radical change. A bathroom supplied with hot and cold water should be provided. There is no provision for the separation of the sexes or of the sane from the insane. There is a farm of seventy acres.

The inmates are two insane women. The warden and matron receive a combined salary of \$350 per year. Receipt of the abstract of the visitor's report not acknowledged by the Overseers of the Poor.

#### ACUSHNET.

This almshouse was closed in March, the last inmate having died a short time before.

#### ADAMS.

# (Visited July 2, 1896.)

The generally unsatisfactory condition of this almshouse continues. The exterior is poor, the interior is disorderly, unclean, and infested with vermin. The house is not fit for occupancy and should be abandoned. A detached building, used by the men, is in fair repair and good order; it is cared for by one of the female inmates. There is no provision for separation of the sane from the insane.

There are eleven inmates, two men, six women, and three children, two with their mother. One woman has epileptic insanity. Whatever is saved from the weekly allowance of \$2.50 for each inmate is allowed the warden and matron for their services. The salary was formerly \$600, and the inmates are far from being benefited by the new arrangement. Receipt of visitor's report not acknowledged.

#### AGAWAM.

# (Visited May 13, 1896.)

This almshouse shows but little change since the last report. Although presenting a fair outside appearance, it is dilapidated, and very cold in winter. The house and bedding are infested with vermin, and the drainage is very unsatisfactory. The house lacks a bath-room, and has no provision for separation of the sexes or of the sane from the insane. The Overseers report (July 7) that they have removed most of the old bedsteads and replaced them with new ones; they also state their intention to improve the sink drain.

There are five inmates, one man and four women, one woman being insane. Salary of matron, \$275.

#### AMESBURY.

# (Visited May 6, 1896.)

This almshouse, poorly constructed for its purpose, presents a fairly good external appearance. It is clean and orderly within and appears to have efficient management. It is imperfectly supplied with bathing facilities, the bath-room being available only in warm weather, and the tub unprovided with running water. There is no provision for the separation of the sexes or of the sane from the insane.

There are six inmates, four men and two women, one man and two women being insane. The combined salary of warden and matron is \$500. Receipt of visitor's report not acknowledged.

#### AMHERST.

#### (Visited Nov. 4, 1896.)

This almshouse presents a fair appearance without, and is clean and orderly within. Proper bathing facilities should be provided, and regular bathing enforced. Although there is separation of the sexes by day, at night they occupy contiguous rooms. There is no separation of the sane from the insane.

The inmates are six in number, three men and three woman, one man being idiotic. The warden's and matron's combined salary is \$400. Receipt of visitor's report not acknowledged.

#### ANDOVER.

### (Visited March 24, 1896.)

This almshouse was found in its usual excellent condition,—clean, orderly and well managed. There is provision for separation of the sexes but none for the separation of the same from the insane.

1897.7

Number of inmates, twenty-three; eight men, twelve women, and three children, the latter here temporarily with their mothers. Six inmates are insane, two men and four women; one man and one woman are idiotic and one man is epileptic. Two of the insane who are receiving fairly good care could have more liberty and be better provided for in a hospital. The warden and matron receive a combined salary of \$700. Receipt of visitor's report not acknowledged.

## ARLINGTON.

# (Visited November 17, 1896.)

This almshouse presents an attractive appearance and is clean and orderly within. Some improvements have been made within the past year, including the introduction of electric lights and the addition of new iron bedsteads. The combined sleeping and bath-room, now occupied by two male inmates, should be made to serve but one purpose. There is no separation of the sexes or of the sane from the insane.

Number of inmates, seven; three men and four women, two women being insane. There are also three boarders, two of whom are employed by the town. Salary of warden and matron, \$360.

#### ASHBY.

### (Visited June 25, 1896.)

This almshouse, with pleasant surroundings, is built of wood, two stories in height, with two wings. The exterior presents a good appearance, and the interior is clean and orderly. Better provisions for heating are needed, the stoves being inadequate; and a bath-tub with hot and cold water should be supplied. The general care of the inmates is good. The use of the cellar for storage of vegetables should be abandoned. There is no separation of the sexes or of the sane from the insane.

There are five inmates,—two men and three women. One man is insane, and one man and one woman are idiotic. The warden's and matron's combined salary is \$400. Receipt of abstract of visitor's report not acknowledged.

#### ASHBURNHAM.

#### (Visited October 27, 1896.)

This almshouse is pleasantly situated. It is a wooden building, two stories in height, with one wing. The outside appearance is good, and within it is clean and orderly. It is insufficiently beated in winter, and lacks bathing facilities. An improvement is manifest in the general administration, some slight repairs and improvements have been made, and there are fewer vermin.

There is complete separation of the sexes at night and at meals; no separation of the sane from the insane.

The inmates are nine in number, — three men and six women, of whom one man and two women are feeble-minded. The combined salary of warden and matron is \$500. In reply to abstract of report of visitor, the Overseers report, November 5, "No more changes at farm this season."

#### ASHFIELD.

(Visited Aug. 5, 1896.)

This almshouse is pleasantly situated; it is built of wood, one and one-half stories in height. It is clean and orderly, presenting a good appearance within and without; is well furnished, and under excellent management. The farm is under good cultivation and productive. Since March 1 there have been no inmates. The combined salary of warden and matron is \$260. Receipt of abstract of report of visitor not acknowledged.

#### ASHLAND.

(Visited February 10, 1896.)

The almshouse has a pleasant location; it is built of wood, two stories in height and has two wings. The exterior is in good condition and the interior is clean and orderly. Some improvements have been made and more are contemplated. The management is efficient, and the inmates are well cared for. There is no separation of the sexes or of the sane from the insane.

There are eight inmates, — seven men and one woman, of whom two men are insane and two idiotic. The combined salary of warden and matron is \$500. Receipt of abstract of report of visitor not acknowledged.

#### ATHOL.

# (Visited August 26, 1896.)

This almshouse is built of wood, two stories in height, with two wings, and situated some distance from town. The surroundings are rather cheerless. The exterior needs minor repairs and painting, the interior painting, papering and other renovation. There is ample evidence of insufficient help to maintain the house properly. There is no separation of the sexes, or of the sane from the insane.

There are six inmates, — four men and two women, one of the latter being insane and one an epileptic idiot. The combined salary of warden and matron is \$400. Receipt of abstract of report of visitor not acknowledged.

#### ATTLEBOROUGH.

# (Visited February 18, 1896.)

This almshouse is small, built of wood, one and one-half stories in height, and poorly adapted for any town, especially one of over eight thousand inhabitants. It lacks many of the conveniences which should belong to such an establishment, such as a bath-room and inside water-closets. It is furnished with the objectionable feather beds, and wooden bedsteads.

The inmates are seven in number, — six men and one woman, of whom two men are idiotic. The combined salary of warden and matron is \$375. The Overseers report, under date of June 4, that the kitchen has been enlarged, and a small wash-room added.

### AYER.

# (Visited May 8, 1896.)

This almshouse, built of wood, two stories in height, with one wing, is kept clean and orderly, and in fair condition without and within. It lacks suitable conveniences and comforts, but those in charge are interested and active. The house needs improved heating and bathing facilities. There is separation of the sexes by night but none by day; none of the sane from the insane.

The inmates are five in number, — three men, one woman, and one child; one man insane and one idiotic. The combined salary of warden and matron is \$600. The Overseers report, under date of June 1, that the deficiencies are clearly manifest, and that improvements will be made as soon as funds are available.

#### BARNSTABLE.

### (Visited April 27, 1896.)

This almshouse, pleasantly situated, built of wood, of two stories with a wing, is efficiently managed and in good condition both within and without, except that it lacks a bath-room and other sanitary appliances. There is separation of the sexes at night, but none of the sane from the insane.

There are ten inmates, — two men, seven women, and one child, of whom two women are insane, and one man and four women are idiotic. The combined salary of warden and matron is \$400. The Overseers of the Poor report, under date of June 6, that they do not consider it expedient to make any alterations at present.

#### BARRE.

# (Visited June 1, 1896.)

This almshouse is well situated and sufficiently large to accommodate a much larger number of inmates. Some adjoining town could well provide for its paupers here. A few improvements have been made and more are contemplated. The building is heated by steam, has good sanitary arrangements, and is kept clean and in good order. There is separation of the sexes, but none of the sane from the insane.

There are five inmates; four men and one woman, of whom two men are insane and one is idiotic. The combined salary of warden and matron is \$450. Receipt of abstract of visitor's report not acknowledged.

#### BECKET.

# (Visited July 20, 1896.)

The poor of this town, three women (a mother and two daughters) are boarded by the Overseers of the Poor in private families. The mother and one daughter live together, and are found poorly clothed, in a disorderly and dirty house, but apparently have a sufficient amount of food. Another daughter lives with the crippled father in East Otis, eight dollars per month being paid for their support, four dollars being received from a pension.

#### BEDFORD.

# (Visited July 14, 1896.)

While the exterior of this almshouse remains poor and unsatisfactory, the interior has been thoroughly renovated, with paint and paper, and otherwise much improved in appearance. Farther repairs are imperatively demanded, also the addition of a bathroom supplied with hot and cold water and a suitable system of heating. There is separation of the sexes only at night, and there is no separation of the sane from the insane.

The inmates are six in number, three men and three women, of whom one man is insane and two women are feeble-minded. The combined salary of the warden and matron is \$500. The Overseers acknowledge receipt of visitor's report, but make no statement.

# Belchertown.

### (Visited May 17, 1896.)

This almshouse continues to be efficiently conducted, is kept in good repair, and is clean and orderly within and without. There is need of a bath-room and either furnace or steam heat. There is no separation of the sexes or of the sane from the insane.

The inmates are eight in number, four of each sex, one man being insane. The combined salary of the warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

#### BELLINGHAM.

## (Visited September 28, 1896.)

No change has been made in this almshouse since the last report. It is not properly arranged for its present use, and the rooms should be reconstructed, providing for the separation of the sexes and of the sane from the insane. The inmates are kindly cared for and made as comfortable as possible under the present conditions.

There are nine inmates,—four men and five women, of whom four women are insane. The combined salary of warden and matron is \$500. Receipt of abstract of visitor's report not acknowledged.

#### BERKLEY.

# (Visited July 9, 1896.)

No change has been made here since the last report. The house is utterly unsuited in its present condition for human occupancy. It is very old, dilapidated, abounds in vermin, has bad drainage, and is in great danger of pollution of drinking water. There is fortunately but one inmate, — an insane man seventy-nine years of age, who is made as comfortable as possible under the circumstances.

The warden and matron have been here four years and receive a salary of \$225. Receipt of abstract of visitor's report not acknowledged.

#### BERLIN.

### (Visited June 12, 1896.)

This town boards its poor, one man and two women, in private families. The man is demented and blind; he receives satisfactory care. One woman is demented and difficult to care for; \$3.25 a week is paid for her support, and she has reasonably good care. The other woman, mildly insane, is well provided for, and has a good home.

#### BEVERLY.

## (Visited April 30, 1896.)

No special change is noticed at this almshouse, which is kept in good repair. As two-thirds of the inmates are mentally defective, management is difficult and the work burdensome. More paid help might be employed, with advantage. There is separation of the sexes, but none of the sane from the insane.

The inmates are twenty-eight in number; fourteen of each sex. Nine are insane, ten idiotic and two epileptic. The combined salary of warden and matron is \$500. Receipt of abstract of visitor's report not acknowledged.

#### BILLERICA.

## (Visited June 12, 1896.)

The almshouse here remains unchanged. No repairs have been made, and it lacks proper facilities for bathing and heating. The house is clean and orderly, and the inmates are well treated. There is no separation of the sexes or of the sane from the insane.

The inmates are eight in number; four men and four women, three men being insane and two women idiotic. Combined salary of warden and matron, \$504. Receipt of abstract of visitor's report not acknowledged.

#### BLACKSTONE.

# (Visited July 21, 1896.)

This almshouse continues under the same management and presents the same general features as at the last report. There is room for improvement both in the general appearance of the building and in some reconstruction of the interior, which should provide for the proper separation of the sexes. There is no separation of the same from the insane.

The inmates are eighteen in number; fourteen men and four women, of whom two men are insane. Salary of warden and matron, \$450. The Overseers of the Poor report, under date of August 5, that no improvements have been made, and none are contemplated.

## BLANDFORD.

## (Visited June 26, 1896.)

But one woman receives town support, and she is well provided for in a house formerly her own. She is entirely blind and has had epilepsy since childhood. The case is a difficult one, but she receives good care.

#### BOLTON.

### (Visited July 17, 1896.)

This almshouse is badly in need of repairs: no changes have been made during the year in this direction except shingling. It is old and unattractive, especially within. The house is kept clean and orderly, and is as well managed as possible under the circumstances. There is no provision for the separation of the sexes, or of the sane from the insane.

1897.]

The inmates are five in number; four men and one woman. All are mentally defective, the woman being insane and the men feeble-minded. Salary of warden and matron, \$300. The Overseers report, July 27, the shingling and roofing of all the buildings.

## BOSTON.

#### Charlestown.

(Visited November 18, 1896.)

Some improvements have been made at this almshouse since the last report. Two new sun-rooms have been built, one for either sex, two new water-closets added, and other minor repairs made. The general condition was found as usual, and the inmates appear happy, and are well clothed and fed, but the building is over-crowded. There is a partial separation of the sexes by day, and complete separation at night. There is no separation of the sane. from the insane.

The number of inmates is one hundred and forty-nine, of whom eighteen are insane, two feeble-minded and one is epileptic. The warden and matron are serving their seventh year in this place, and they receive a salary of \$1,300.

# Long Island.

(Visited December 2, 1896.)

No special structural changes have been made since the last report. The almshouse is composed of a number of commodious buildings, which provide for a good separation of the sexes as well as of the vicious from the unfortunate poor. The well-appointed hospital is doing a good work. It is understood that the custom of employing men from the Deer Island Institution to work in and about the almshouse building, returning each night, is soon to be discontinued. It is hoped that this will be done and that the able-bodied paupers, who are present in sufficient numbers, will be required to do the necessary work about the Institution. A training school is in operation. Dr. C. H. Cogswell continues in charge, assisted by a staff of three physicians.

There are seven hundred and thirty-nine inmates. It is not the intention to care for insane persons at this Institution, but a special examination revealed the presence of forty-four mentally defective people, thirty-two of whom are considered insane, and twelve are feeble-minded; six also have epilepsy.

## Marcella Street Home.

(Visited November 12, 1896.)

This Institution, devoted entirely to the care of children, shows no special change since the last report. In appearance and general order there is some room for improvement.

There are four hundred and eighty-one children under supervision. This includes a number at board in families, — one hundred and fifty-two. One hundred and eighteen are neglected children. Twenty-nine children are idiotic, of whom sixteen remain at the school. The other thirteen are boarded out in families and receive good care, frequent supervision, and necessary medical attendance. M. J. Dwyer is the present Superintendent.

## BOXFORD.

# (Visited July 31, 1896.)

There has been no special change at this almshouse since the last report. There is lack of good executive management, as shown by its disorderly condition. A bath-room with hot and cold water is needed. There is no separation of the sexes, or of the same from the insane.

There are four inmates, two men and two women, the man being idiotic and epileptic. The warden's and matron's combined salary is \$450. Receipt of abstract of visitor's report not acknowledged.

#### BOYLSTON.

# (Visited May 18, 1896.)

This almshouse, as has been reported previously, differs but little from an ordinary farmhouse. It is old and in need of repair, and lacks bathing facilities. There is no provision for separation of the sexes or of the sane from the insane. A room for tramps is provided in the woodshed chamber which was found exceedingly filthy and evidently receives no care.

The inmates are four men, of whom one is insane and one idiotic. The combined salary of warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

#### BRAINTREE.

## (Visited February 12, 1896.)

This almshouse presents its usual satisfactory appearance. It is kept in good repair, is clean and orderly, and the inmates receive good care. There is provision for separation of the sexes, but not of the sane from the insane.

There are eleven inmates, seven men and four women. Two men are feeble-minded and one is epileptic; one woman is insane and two are feeble-minded. The combined salary of warden and matron is \$480. Receipt of abstract of visitor's report not acknowledged.

#### BREWSTER.

## (Visited October 20, 1896.)

The building used as an almshouse is an ordinary dwelling, but it is kept in excellent condition, and the inmates have very satisfactory care. A bath-room should be supplied, and some structural changes made for the separation of the sexes.

The inmates are nine in number, six men and three women. Three men and two women are feeble-minded and one woman is insane. The combined salary of warden and matron is \$300. Receipt of abstract of visitor's report not acknowledged.

#### BRIDGEWATER.

# (Visited February 14, 1896.)

The building used as an almshouse is much dilapidated and not worth repairing. There is imperative need of a new and properly arranged building. The management both of the house and the farm shows lack of experience and executive ability. There is no provision for separation of the sexes or of the sane from the insane.

The inmates are thirteen in number including two children. One man and two women are insane and one woman is feebleminded. The combined salary of warden and matron is \$300. Receipt of abstract of visitor's report not acknowledged.

#### BRIMFIELD.

### (Visited May 14, 1896.)

This almshouse has many objectionable features. The inmates do not receive proper care, and some structural provision for complete separation of the sexes should be made, most unfortunate results having followed from the present arrangement. There is evidence of inefficient management in the general appearance of the place.

There are ten inmates, including one child, of whom three are insane, two of each sex are feeble-minded, and one is epileptic. The combined salary of the warden and matron is \$425. Receipt of abstract of visitor's report not acknowledged.

#### BROCKTON.

(Visited October 15, 1896.)

This almshouse continues to be satisfactory in most respects, and is one of the best in the state. The management is excellent and very efficient. The house is amply provided with proper sanitary appliances and safeguards against fire, and there is complete separation of the sexes, but not of the sane from the insane,— a matter which should receive early attention. If more inmates are to be admitted, increased accommodations should be added. The farm is quite productive, and products have been sold during the past year to the amount of \$4,500.

There are fifty-one inmates, of whom thirteen are insane and three feeble-minded. There are four children. The combined salary of the warden and matron is \$1,200. Receipt of abstract of visitor's report not acknowledged.

## BROOKFIELD.

(Visited May 20, 1896.)

There has been no change at this almshouse since the last report. For an old house it is in very good condition, and is provided with steam heat and bath-room. It is kept clean and orderly, and the inmates are under a fair degree of control.

There is a partial separation of the sexes, (which should be made complete), but none of the same from the insane.

The inmates are seven in number, of whom three women are insane and one is feeble-minded. The combined salary of the warden and matron is \$350. Receipt of abstract of visitor's report not acknowledged.

#### BROOKLINE.

(Visited November 11, 1896.)

This almshouse was found in its usual excellent condition, and the addition of new water-closets which could be flushed would leave little to be desired. There is complete separation of the sexes, and no insane people are received.

The inmates are four in number. A matron is in charge of the place, who receives a salary of \$500. Receipt of abstract of visitor's report not acknowledged.

#### BUCKLAND.

# (Visited July 3, 1896.)

This almshouse continues in its old dilapidated condition, no repairs or improvements having been made the past year. The building should either be abandoned for its present use or extensively repaired. The house is kept as clean as possible under the circumstances, but the wooden bedsteads and partitions are badly infested with vermin. The water-closets are improperly constructed and very offensive. There is no separation of the sexes by day and but an insecure one by night, and there is no separation of the sane from the insane.

There are six inmates, of whom four are insane. The warden and matron receive a salary of \$200. No reply to abstract of visitor's report.

## BURLINGTON.

# (Visited April 16, 1896.)

This almshouse, although nearly new, lacks a cheerful appearance and is of cheap construction. The rooms occupied by the inmates are very cold in winter. There is need of a bath-room supplied with hot and cold water. The management is not efficient, the house being disorderly and dirty. There is no separation of the sexes or of the sane from the insane.

The inmates are five in number, one being feeble-minded. The warden and matron receive a salary of \$400. No reply to abstract of visitor's report.

## CAMBRIDGE.

## (Visited September 8, 1896.)

There has been no special change in this almshouse since the last report, either in structure or in the character of the inmates. The almshouse is under excellent management. There is complete separation of the sexes by day and night, and at meals, with a partial separation of the sane from the insane. The farm and quarry are quite remunerative, \$6,000 being realized from the former, and \$7,000 from the latter.

There are one hundred and eleven inmates, of whom twenty-three are insane and two feeble-minded. There are nine children. The warden and matron, who have occupied their present position for ten years, receive a salary of \$1,500.

#### CANTON.

# (Visited April 10, 1896.)

This almshouse is pleasantly situated, and was found in good repair, being also clean and orderly within. No special changes have been made since the last inspection. There is complete separation of the sexes by night, but none of the sane from the insane. The place is under good management.

There are nine inmates, of whom one is insane and one feebleminded. The warden and matron receive a salary of \$500, and are serving their fifth year. The Overseers report, under date of June 15, that no further changes have been made.

#### CARLISLE.

#### (Visited November 13, 1896.)

This almshouse is pleasantly situated, and possesses the advantage of having a farm, the income from which makes it practically self-supporting. The whole is under good and economical management. There is no provision for separation of the sexes.

There are four inmates, three of whom are idiotic. The salary of the warden and matron is \$350 per year.

### CHARLEMONT.

## (Visited July 2, 1896.)

The poor of this town, two in number, both mentally deficient, are boarded in private families, where they receive good care and kind treatment.

## CHARLTON.

### (Visited October 26, 1896.)

This almshouse, which has been much improved within the last two years, is under very good management. Some further repairs would improve the house, and if some structural change could be made to provide for the separation of the sexes, the building would be entirely creditable to the town. It has a farm of two hundred acres, and products to the amount of \$2,184 were sold during the past year.

There are ten inmates, two of whom are insane and one feeble-minded, and one is a child three years of age. The salary of the warden and matron is \$450.

#### CHATHAM.

## (Visited October 21, 1896.)

Although the administrative part of this almshouse is inconveniently arranged, in other respects it is fairly well adapted to its present use. There is, however, inefficient management, as shown in the dirty and disorderly condition of the house. The Overseers of the Poor fully realize this, and will make improvements as soon as possible. There is no separation of the sexes, or of the sane from the insane.

There are eight inmates, one of whom is insane and three are feeble-minded. The salary of the warden and matron is \$150. Receipt of abstract of visitor's report acknowledged by Overseers of the Poor.

#### CHELMSFORD.

# (Visited June 12, 1896.)

This almshouse, formerly an old tavern, is kept in fairly good condition, and is under good management. It should be supplied with a bath-room, and some provision should be made for the separation of the sexes. There is a productive farm of one hundred acres.

There are eleven inmates, two of whom are insane and three feeble-minded. There are three children. The warden and matron receive a salary of \$350 a year.

#### CHESHIRE.

### (Visited July 1, 1896.)

The poor of this town are boarded in two families, one of which has materially improved since last year's visit, the inmates receiving much better care, and having more healthful surroundings than before. The two men, one of whom is insane, boarding in the second family, are well provided for. They occupy separate rooms, which were found clean and in good order.

#### CHESTERFIELD.

# (Visited August 19, 1896.)

This town has no almshouse, and its poor are distributed in families. One case is a feeble-minded man who boards where he has been for several years. The house is poor and his surroundings are disorderly, but he is made comfortable.

The case is one requiring much care and supervision. The town allows \$65 a year and clothing.

### CHICOPEE.

## (Visited November 3, 1896.)

There has been no change in this almshouse since the last report. It is kept clean and orderly, but some renovation and rearrangement of rooms is necessary. The privy vaults in the rear are offensive and a menace to health, and should be removed. Some division of the house should immediately be made for the separation of the sexes. Owing to the small number of insane, separate apartments for them are not at present considered necessary.

There are forty-five inmates, of whom twelve are insane and one is feeble-minded. A matron is in charge who receives a salary of \$25 per month, and a man is employed to take charge of the farm and all out-door work. One of the inmates is also allowed a small amount a month for his services. Receipt of abstract of visitor's report not acknowledged.

#### CLINTON.

## (Visited September 22, 1896.)

The recent alterations and additions to this almshouse have much improved it. The house is heated by steam and well provided with new bath-rooms and water-closets, and evidence of good management is shown in its clean and orderly appearance. There is complete separation of the sexes by night, but they mingle through the day and at meals. There is no separation of the sane from the insane.

There are fifteen inmates, six being children, and one man is insane. The warden receives a salary of \$700 per year. Receipt of abstract of visitor's report not acknowledged.

#### COHASSET.

## (Visited April 23, 1896.)

This almshouse, which is an old, irregular building, and poorly arranged for its present use, was found clean and the inmates very comfortable. There has been a great improvement here within the last three years. The bath-room, which, owing to its location, can be used only in the summer, should be changed and provided with hot and cold water. There is no separation of the sexes.

The inmates are eight in number, including one child. One is insane and three are feeble-minded. The warden and matron receive a salary of \$600 per year. Receipt of abstract of visitor's report not acknowledged.

# CONCORD.

## (Visited November 7, 1896.)

There has been no change in this almshouse since the last inspection, and it presents its usual appearance, being homelike and cheerful both within and without. It is heated by steam, supplied with bath-room and other sanitary appliances, and is under good management. There is no provision for the separation of the sexes.

The inmates are six in number, none of whom are insane. One woman has epilepsy. The salary of the warden and matron is \$480. Receipt of abstract of visitor's report not acknowledged.

### CONWAY.

# (Visited August 5, 1896.)

This almshouse is not pleasantly situated, is in a dilapidated, leaky condition, and should be abandoned or replaced by a new building. The condition of the interior is disorderly and dirty. Some slight effort is made to subdue the vermin with which the house is infested. The farm is made fairly productive under the present management. It would appear that the expense to the town would be less were the inmates of this house placed in a good almshouse in some neighboring town.

There are but two inmates, both men and idiotic. The salary of the warden and matron is \$350. The Overseers of the Poor report, October 14, that no changes are proposed.

#### CUMMINGTON.

### (Visited August 6, 1896.)

The poor of this town, three in number, one man and two women, all mentally defective, are supported in different families at different rates. The women are made fairly comfortable, but the man, eighty-five years of age, should be removed to a different place and a larger sum than one dollar per week furnished for his support. The rates paid for the women are two dollars and two dollars and fifty cents respectively.

## DALTON.

# (Visited July 24, 1896.)

Having no almshouse, this town provides for its poor in private families. A woman with four young children, one of whom is a helpless idiot, referred to in last year's report, continues to be supported by the town at the rate of \$2 per capita per week.

#### DANA.

## (Visited June 2, 1896.)

This almshouse is a large, old-fashioned structure, and well situated, but is greatly in need of repairs. Such small improvements as new paper and paint are contemplated. The house is clean and orderly, but bathing facilities are lacking.

The only inmate, an insane woman, receives good care. The combined salary of warden and matron is \$225. Receipt of abstract of visitor's report not acknowledged.

#### DARTMOUTH.

# (Visited Oct. 5, 1896.)

This almshouse is comparatively new, and provides good separation of the sexes, but none of the sane from the insane. There is a lack of proper facilities for bathing and heating. The interior is neat and clean, and sufficient paid help is employed.

There are seven inmates, of whom two are insane and one is idiotic. The combined salary of warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

#### DEDHAM.

### (Visited May 7, 1896.)

This almshouse is new, well constructed and supplied with all modern appliances, including electric lighting. There is proper provision for separation of the sexes, but none of the sane from the insane. No paid help is employed, but a few of the inmates are capable of light work. The management is efficient.

There are eleven inmates, of whom one is idiotic and epileptic. The combined salary of the warden and matron is \$600. The Overseers of the Poor report, under date of June 25, that no changes are contemplated.

#### DEERFIELD.

## (Visited August 11, 1896.)

This almshouse is pleasantly situated, is in fair repair, and presents an interior clean and orderly. The sleeping rooms occupied by the men are in the L, and need radical changes. Farther repairs should be made upon the out-buildings. The cellar is small, ill-ventilated, and damp, and should be enlarged and properly drained. The inmates receive kind care and treatment. A bath-room supplied with hot and cold water is needed.

The inmates are five in number, three of whom are insane. The salary of the warden and matron is \$425. The Overseers of the Poor report, October 7, no change in buildings or management.

#### DENNIS.

## (Visited Oct. 21, 1896.)

This house occupies a lonely site, and is far removed from any other buildings. It is in a fair state of repair and well managed, and the inmates appear to be well cared for. A bath-room is needed. Owing to the distance from town, the tramp quarters in the attic are but seldom occupied.

There are six inmates, two of whom are feeble-minded. The warden receives a salary of \$300. Receipt of abstract of visitor's report not acknowledged.

#### DIGHTON.

## (Visited July 9, 1896.)

This almshouse, of the construction of an ordinary farm dwelling, is in good condition, and presents a clean and orderly appearance within. Repairs are much needed upon the exterior, and a bath-room, properly supplied with hot and cold water, should be provided. A sum of money has been appropriated to build a new barn. The drainage is defective and offensive, but the evil could be easily remedied with a small outlay of money and labor. Either more interest should be taken in this place by the Overseers of the Poor, or the place should be abandoned and the inmates boarded in the almshouse of some neighboring town.

The inmates are two in number. There are no insane. The warden and matron receive a salary of \$200. Receipt of abstract of visitor's report acknowledged by the Overseers of the Poor, but no statement made by them in reply.

#### DOUGLAS.

# (Visited July 21, 1896.)

No changes have been made at this almshouse since the last visit. The building is old and in need of repairs. The house is poorly arranged, and does not provide for any separation of the sexes. There is urgent need of a bath-room and a better heating apparatus. The interior is disorderly and not clean, and the management is evidently inefficient. The custom of permiting the warden to engage in outside work, as followed in this and some other towns, is to be deprecated; his whole attention should be paid to home affairs.

The inmates are seven in number, two of whom are feebleminded and one is epileptic. The salary of the warden and matron is \$300.

The town also pays for the care, at his mother's house, of a feeble-minded man afflicted with a severe form of epilepsy. The case is a difficult one to care for, and the mother gives him constant attention. He should, however, be better provided for in some respects.

#### DRACUT.

## (Visited May 1, 1896.)

The almshouse of this town is an old building kept in a fair state of repair, and shows no change since the last inspection, except some improvement of the interior by painting and whitewashing. The few inmates receive very good, homelike care. There is no separation of the sexes or of the sane from the insane, nor is it necessary in small families like this, where proper supervision is exercised. The farm is well managed and quite productive. A large amount of milk is sold which, with other produce, yielded the sum of \$2,647.29 to the town during the year.

The inmates are four in number, of whom two are insane. The salary of the warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

#### DUDLEY.

## (Visited September 15, 1896.)

The almshouse of this town is undergoing extensive repairs, and the result will be a great improvement. The building will be much enlarged; the structural arrangements will be made much better than formerly and, it is hoped, will provide for a separation of the sexes. Steam heat will be used, but the bath-room which it is proposed to build is to have no hot water connections; these it is highly desirable to supply.

There are seven inmates, two of them are insane and two feeble-minded. The salary of the warden and matron is \$450. Receipt of abstract of visitor's report not acknowledged.

#### DUXBURY.

# (Visited Nov. 16, 1896.)

This almshouse is new, having been occupied but about two weeks at the time of the visit. Although of very good construction, the arrangement of the rooms is such that it is inconvenient in administration and must involve much discomfort and disorder.

A properly planned house would have cost no more money, and would have been infinitely better than an ill-arranged structure like this, which does neither the town nor the builder credit.

The inmates are four in number, two of whom are insane. The salary of the warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

#### EAST BRIDGEWATER.

(Visited February 14, 1896.)

Additions and changes which have long been needed are in progress at this almshouse. Additional sleeping-rooms are being supplied; a new stairway at the rear of the men's dormitory has been built; the interior is to be newly painted, and improvements have also been made in the sanitation. The general management of the house is good, the interior being clean and orderly. Only partial separation of the sexes is secured, but the structural changes in progress will secure greater efficiency in this respect. There is no separation of the sane from the insane.

There are seven inmates, one woman being insane and one feeble-minded. Combined salary of warden and matron, \$425. Receipt of abstract of visitor's report not acknowledged.

#### EASTHAM.

(Visited August 21, 1896.)

This town continues to support its poor in private families. Among them is a feeble-minded woman, who is boarded at three dollars a week, and has suitable care in an excellent home.

#### Easthampton.

(Visited August 18, 1896.)

But little change has been made in this almshouse since the last report. Minor repairs are needed inside, but the exterior is in good condition. Partial separation of the sexes is secured, but the sane and the insane are allowed to mingle.

There are twelve inmates, of whom one man and four women are insane, and two women are epileptic. All the insane have had hospital treatment. The combined salary of warden and matron is \$600. Receipt of abstract of visitor's report not acknowledged.

#### EASTON.

## (Visited April 14, 1896.)

This [almshouse presents a good appearance and is mostly in good repair. There should be improvements in the attic sleeping-rooms, these apartments being uncomfortable both in winter and summer. The bath-room should be supplied with hot and cold water, and the water supply for the whole institution should be improved. There is no efficient separation of the sexes and none of the sane from the insane.

There are nine inmates, of whom two men and one woman are insane, and two men and one woman feeble-minded. Combined salary of warden and matron, \$450. Receipt of abstract of visitor's report not acknowledged.

#### EDGARTOWN.

## (Visited July 14, 1896.)

A feeble-minded, epileptic woman of this town is cared for by her mother, and the town pays \$1.50 per week toward her support. She is able to perform certain household duties, and has good care.

## EGREMONT.

#### (Visited July 22, 1896.)

An elderly woman of this town, feeble-minded since childhood, is boarded in the family of a relative, where she has good care, at \$140 per year. This woman is untidy, often excited, and is a difficult case to care for.

#### ENFIELD

#### (Visited June 4, 1896.)

This town continues to board its poor in private families. A feeble-minded woman, who is epileptic, is cared for by her mother for \$2 per week. Another woman, who has been insane many years, is boarded in a family in Leverett at \$2.20 per week. Both cases are well situated.

#### Essex.

## (Visited September 21, 1896.)

No repairs or improvements have been made at this almshouse since last year. It continues in a very dilapidated condition, and should be replaced by a new and properly arranged building. There are no modern sanitary appliances. There is no provision for separation of the sexes, and complications from this source are not unknown. Sane and insane mingle indiscriminately.

1897.]

There are nine inmates, of whom two men and one woman are insane, and three women feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

# FAIRHAVEN.

# (Visited October 6, 1896.)

The new almshouse in this town has been used with satisfaction during the past year and gives evidence of efficient management. The house is thoroughly clean and orderly, the heating and sanitary equipment is good, and the inmates are well provided for. The construction provides for complete separation of the sexes excepting at meals. No provision is made for separating the sane from the insane.

There are five inmates, all men, two being insane. Both of them have had hospital treatment. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

# FALL RIVER.

## (Visited July 10, 1896.)

Substantial improvements have been made at this almshouse during the past year, the old hospital building having been renovated and repaired for use as an infirmary, one floor for men, the other for women. Minor repairs have been made in the interior of the main building. The house is generally well kept and is clean and orderly. Some of the attic rooms used for the insane are lacking in light and ventilation. There is complete separation of the sexes, but none of the sane from the insane.

The inmates number one hundred, — sixteen men, sixty-nine women, and fifteen children. Of the men, two are insane and one is feeble-minded, one of the insane being also epileptic; of the women, five are insane. The warden receives a salary of \$650; and his wife, who is matron, \$350. Receipt of abstract of visitor's report not acknowledged.

## FALMOUTH.

## (Visited August 10, 1896.)

This almshouse continues in the clean and satisfactory condition that has been previously reported, and is under good management. The structural conditions allow of no systematic separation of the sexes, and the sane and the insane mingle. Among the inmates are several untidy cases that require a great deal of care, to facilitate which a suitable bath-room should be supplied. Addi-

tional domestic help is also needed. The farm is productive, and a large quantity of small fruits are supplied to the inmates.

There are eight inmates. One of the men is insane and two of the women are feeble-minded; one of the latter is also paralyzed and helpless. Combined salary of warden and matron, \$375. Receipt of abstract of visitor's report not acknowledged.

#### FITCHBURG.

## (Visited August 17, 1896.)

A partial renovation of this almshouse has taken place the past year. Paint has been renewed, and the house has been equipped with electric lights. The house is clean and orderly, and efficient management is everywhere apparent. Complete separation of the sexes is secured, and some of the most troublesome of the insane are separated from the general population.

There are sixty-eight inmates, including two children. Seven men are insane and five feeble-minded, one of the latter being also epileptic. Eighteen women are insane and one is feeble-minded. Combined salary of warden and matron, \$950. The Overseers report the addition of a fruit and vegetable storehouse, detached from the other buildings.

#### FOXBOROUGH.

# (Visited September 11, 1896.)

The buildings at this place are dilapidated and unfit for occupancy; no repairs have been made for a long time, and general neglect is evident. The rooms are cold in winter. The present house should be abandoned, and a new one, adapted to the uses of an almshouse, built at the earliest feasible time. The sanitation should be improved, the cellar being damp and insufficiently drained. The water supply is deficient, the well at the house being dry and water carried from the well at the barn. The sexes are not separated, and no provision is made for separating the sane from the insane.

There are three inmates, all sane. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

#### FRAMINGHAM.

## (Visited January 29, 1896.)

Minor repairs have been made in the interior of this almshouse, and the tramp quarters have been removed to a distant part of the town. No provision is made for the separation of the sexes or of the same from the insane.

There are fifteen inmates, including two children with their unmarried mother and one insane man. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

#### FRANKLIN.

## (Visited March 27, 1896.)

Repairs and improvements have been made at this almshouse during the past year, and others are contemplated. An abundant supply of water and efficient fire protection have been secured. A store-room for general household supplies is much needed. In general the house is kept clean, but some rooms are infested with vermin. Increased orderliness would improve the appearance of the interior. There is imperfect separation of the sexes and none of the same from the insane.

The inmates, who number seven, have good care and appear to be comfortable. There is one feeble-minded man, and one insane woman. Combined salary of warden and matron, \$550. Receipt of abstract of visitor's report not acknowledged.

# FREETOWN.

# (Visited July 9, 1896.)

This house, as previously reported, continues much out of repair, and unfit for almshouse purposes. There is no bath-room, and the arrangement of the house is inconvenient for caring for the inmates. General cleanliness prevails, and the inmates seem to be made comfortable at this season. The farm is productive and contributes materially to the support of the household. There is no separation of the sexes and none of the sane from the insane.

There are six inmates, including one child with its mother. One man and four women are feeble-minded. Combined salary of warden and matron, \$250. Receipt of abstract of visitor's report not acknowledged.

#### GARDNER.

## (Visited August 31, 1896.)

Having been in use but a few years, this almshouse is still in good repair and in generally good condition. It is equipped with modern conveniences, and the interior is well arranged. Some minor improvements have been made since the last report. Complete separation of the sexes is secured, but no attempt is made to separate the same from the insane.

Of the sixteen inmates, two of each sex are insane. Combined salary of warden and matron, \$425. Receipt of abstract of visitor's report not acknowledged.

#### GEORGETOWN.

## (Visited September 25, 1896.)

There have been no special repairs and no material improvements at this almshouse since the last report. It is comfortably heated by a hot water system, and is kept clean and in good order. A bath-room should be provided. The sexes are separated by night, but no classification of inmates is made by day.

The inmates are five in number, of whom two men are insane and one is feeble-minded. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report acknowledged, and the statement made that a domestic is usually employed.

#### GLOUCESTER.

# (Visited January 21, 1896.)

This almshouse is found in its usual condition, and is kept very clean and in excellent order, although these results are secured in the face of many difficulties, owing to the inconvenience of the house, its overcrowding, and the lack of proper water supply. For general domestic purposes cistern water is used, and the water for drinking and cooking is carried in pails from a distant well. The interior is in need of quite extensive repairs. The sexes are separated by assignment to different floors. No effort is made to provide separately for the insane.

The inmates number thirty-one. Five men and seven women are insane and two men and one woman feeble-minded. Combined salary of warden and matron, \$550. Receipt of visitor's report acknowledged, and statement made that no changes are contemplated.

#### GRAFTON.

## (Visited September 18, 1896.)

This almshouse is in a better condition than when last visited. It provides good bathing facilities, but there has been a lack of enforcement of proper bathing regulations. A considerable amount of new bedding has lately been supplied. There is no effectual separation of the sexes and no separate provision for the insane.

The inmates number thirteen, of whom one man is idiotic and epileptic, and one woman feeble-minded. Combined salary of

warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

The town supports two insane women in private families, one within the town limits and the other with her mother at Worcester. The latter case has had hospital treatment. Both cases are well cared for.

#### GRANBY.

# (Visited August 6, 1896.)

This town still continues to board its poor in private families. Among those so cared for is a feeble-minded woman with her child, who is in wretched surroundings. The attention of the town authorities has been called to the case, and a change will probably be effected.

## GRANVILLE.

## (Visited June 25, 1896.)

This town supports its poor in private families, and among them is a woman, many years insane, who is well situated at \$2 a week. A feeble-minded man is also cared for by his mother at the same rate. In both cases this sum is almost the sole support of these families.

## GREAT BARRINGTON.

# (Visited July 22, 1896.)

This town, although having a considerable number of poor, does not provide an almshouse for their care, but boards them in private families. In one of these four cases were found, for whom the town pays \$8 a month apiece, a man and three women, all defective, the man and one woman being insane and two women feeble-minded. A rough unfinished building, which is unattractive and must in the colder season be very uncomfortable, is used for the care of these cases. There appears to be but little discipline enforced, and the inmates of both sexes roam about the place unrestrained. A colored woman, who has been insane for many years, is boarded in a colored family at \$10 a month, where she has good care. Criticisms on conditions found here were sent to the Overseers of the Poor, but no acknowledgment has been made.

#### GREENFIELD.

## (Visited August 4, 1896.)

This house has been improved by the finishing of the attic, making two comfortable rooms; and a room for the special care of a troublesome insane woman has been built in the wing: this case

has very good care. The building should be provided with fire escapes, and a properly equipped bath-room should be supplied. The sexes are not separated, nor are the same separated from the insane.

The inmates are five in number, three women being insane. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

An insane woman, who has had hospital treatment, is boarded in a private family in a neighboring town at \$13 a month, which is partly paid by her relatives. The case is well provided for.

## GREENWICH.

## (Visited May 19, 1896.)

The town has done very little in the way of repairs at this almshouse, although they are much needed. The farm is only slightly productive, and has little capacity for improvement. The inmates receive reasonably good care, but their surroundings are cheerless. There is no separation of the sexes or of the sane from the insane.

There are three inmates, all men; one is a helpless idiot. Combined salary of warden and matron, \$275. Receipt of abstract of visitor's report not acknowledged.

## GROTON.

## (Visited May 8, 1896.)

Besides the painting of the exterior, no repairs have been made at this place since the last report. The interior is cheerless and dilapidated. The house is kept clean and orderly, chiefly through the assistance rendered by the inmates. Tramps are lodged in the wing, with the men. Complete separation of the sexes by night is secured by locking the women in their rooms. There is no attempt made to separate the sane from the insane.

The inmates are seven in number, of whom one man and one woman are insane and one of each sex is feeble-minded. Combined salary of warden and matron, \$550. Receipt of abstract of visitor's report not acknowledged.

#### GROVELAND.

# (Visited October 4, 1896.)

The surroundings of this almshouse are unattractive, and the house itself has little to make it inviting, being old, poorly arranged and lacking in modern conveniences. The inmates are

PUBLIC DOCUMENT — No. 17.

well provided for and receive considerate care. There is no separation of the sexes or of the sane from the insane.

There are five inmates, — all men, one being insane. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

# HADLEY.

# (Visited August 8, 1896.)

This almshouse remains unchanged, and continues under the same efficient management. There is need of bathing facilities and a better supply of heat. The sexes are not separated, or the same from the insane. The water supply has been improved within the past year.

There are five inmates, of whom one is insane. The combined salary of the warden and matron is \$375. The Overseers of the Poor report, under date of October 24, that the adoption of a general supply of heat has been advocated for some time.

## HANOVER.

# (Visited March 25, 1896.)

Formerly an ordinary farmhouse, this place is not adapted to its present use. The sleeping quarters on the second floor, occupied by men, are rudely finished and cold in winter. There is a lack of bathing facilities, and no provision for separation of the sexes or of the sane from the insane. The house is kept clean and made as homelike as possible under the circumstances.

There are eleven inmates, of whom three are insane. The combined salary of the warden and matron is \$250. Receipt of abstract of visitor's report not acknowledged.

#### HANSON.

## (Visited April 24, 1896.)

This is an old, dilapidated building past repair, insufficiently heated, and without bathing facilities; but withal kept neat and clean. The sexes are not separated or the sane from the insane.

There are five inmates, of whom one man is idiotic. The combined salary of warden and matron is \$225. Receipt of abstract of visitor's report not acknowledged.

#### HARDWICK.

(Visited June 2, 1896.)

This almshouse is well situated, in good repair, and under good management. There is no structural provision for separation of the sexes, or of the sane from the insane. The method of heating is by stoves only. The warden has evinced an interest in the farm and is repaid by a good income.

There are six inmates, two of whom are insane and two idiotic. The salary is \$450. Receipt of abstract of visitor's report acknowledged, but no changes reported.

#### HARVARD.

(Visited June 24, 1896.)

This almshouse is pleasantly situated and has an attractive exterior. The interior is poorly furnished and shows the want of systematic housekeeping. It is insufficiently heated by stoves and lacks bathing facilities. There is fairly good structural provision for separation of the sexes, but they mingle more or less. Tramps are lodged in cellar and attic.

There are six inmates, of whom three are idiotic. The salary paid for warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

## HARWICH.

(Visited October 21, 1896.)

No special changes have been made in this place, but it is well conducted, and kept in comparatively good repair. The bathing facilities are inadequate and heat is supplied by stoves. The sexes are well separated, but not the sane from the insane. The lodging room of an insane woman is not suitable.

There are ten inmates, including two children, who are simple-minded. One inmate is insane and three are idiotic. The salary of the warden and matron is \$250. The receipt of abstract of visitor's report was acknowledged, in which it was proposed to improve the drainage.

#### HAVERHILL.

(Visited October 16, 1896.)

This almshouse, continuing under the same good management, is neat, clean, and orderly. The number of inmates has increased and the capacity of the house has been taxed to such an extent that the attics have been fitted up for dormitories. All modern

appliances are supplied. The sexes are well separated, but sane, insane, and criminals indiscriminately mingle.

There are ninety-five inmates, of whom sixteen are insane, and twenty-one idiotic. The combined salary of the warden and matron is \$1,200.

#### HAWLEY.

#### (Visited June 14, 1896.)

This almshouse has received some repairs during the past year improving its general appearance. It is heated by stoves, and bathing facilities are not provided. The sexes are separated by night. Tramps are lodged in the house, an objectionable arrangement. The water supply is not sufficient in dry seasons.

The number of inmates is three,—no defectives. The combined salary of the warden and matron is \$293.39. The Overseers of the Poor acknowledged the receipt of the visitor's report, but did not suggest any changes.

#### HEATH.

This almshouse has been closed and the place leased, as there were no paupers to be cared for here after April 1, 1896.

#### HINGHAM.

## (Visited February 12, 1896.)

This almshouse is brick, in good repair and under good management. There is structural provision for separation of the sexes, but none of sane from insane. It is well heated by steam, but bathing facilities are lacking. It is proposed to supply this deficiency in the near future.

There are thirteen inmates, two idiotic and two insane. The salary is \$720. The abstract of the visitor's report has been acknowledged and a proposition made to supply a bath-room.

## HOLBROOK.

## (Visited March 13, 1896.)

The poor of this town are boarded in private families, at the rate of \$3 per week. A feeble-minded man who has had hospital treatment, lives with his mother.

#### HOLDEN.

## (Visited October 2, 1896.)

This almshouse is occupied by the poor of seven towns, viz.: Holden, Hubbardston, Oakham, Rutland, Westminster, Paxton, and Phillipston. It is known as the "Poor Farm Association." It is old and badly arranged, and does not well accommodate the large number of inmates. The house is inadequately heated by furnace, and is poorly equipped with means of escape in case of fire. The water supply is inadequate for daily consumption. The bath-tub, supplied by cold water only, is situated in a general thoroughfare on the first floor. The water-closets are improperly placed. The sexes are not separated, or the sane from the insane.

There are twenty inmates, of whom eight are insane and four feeble-minded. The combined salary of warden and matron is \$575. Receipt of abstract of visitor's report not acknowledged.

## HOLLISTON.

## (Visited September 18, 1896.)

This almshouse, known as the "Holliston Home", is all that the name suggests. It is pleasantly situated near the village, in good repair, and kept neat and clean. Good bathing facilities are provided, and it is well heated by steam. There is no separation of the sexes or of the sane from the insane.

There are twelve inmates, of whom two are insane and two idiotic, and two are children. \$450 is paid for the services of warden and matron. Receipt of abstract of visitor's report acknowledged.

#### HOLYOKE.

## (Visited November 4, 1896.)

This almshouse occupies a commanding site overlooking the Connecticut River. It is comparatively new, and the grounds about it still remain partly in the rough. An extension is being built to each wing, which it is proposed to have occupied by the insane now here and the mildly insane of the town at the State Hospitals. The general appearance is untidy and disorderly. There is a supply of all modern appliances. The sexes are separated, and there is a partial separation of the sane from the insane. The discipline is not good.

1897.7

The inmates number eighty-eight, including four children. Twenty-eight are insane, and two are idiotic. There are three epileptics. The warden's salary is \$540, and the matron's \$420. Receipt of abstract of visitor's report acknowledged.

#### HOPKINTON.

(Visited February 10, 1896.)

This almshouse is pleasantly situated and has an attractive exterior, but its accommodations are inadequate for the large number of inmates. There is a lack of proper bathing facilities and a general want of repairing. The water-closets are badly placed, and a source of danger. The sexes are not separated nor are the sane from the insane. In-door help is insufficient, but the house is clean and orderly.

There are seventeen inmates, including one child; two women are insane, two men and one woman idiotic. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

#### HUDSON.

(Visited July 17, 1896.)

This almshouse is pleasantly situated, in very good repair, and under efficient management. There are good bathing facilities and other modern appliances. There is no separation of the sexes, or of the sane from the insane.

There are nine inmates, of whom one man is insane. Combined salary of warden and matron, \$500. Overseers of the Poor acknowledged receipt of abstract of visitor's report, but proposed no changes.

## IPSWICH.

## (Visited February 11, 1896)

This almshouse continues under efficient management, and is in good condition. There has been some rearrangement of the partitions, increasing the convenience of the interior and facilitating escape in case of fire. The farm is productive and in a good state of cultivation. The sexes are separated, but the sane and the insane are allowed to mingle.

There are thirteen inmates, of whom four men and two women are insane, and one man and two women feeble-minded. Combined salary of warden and matron, \$600. Receipt of abstract of visitor's report not acknowledged.

#### KINGSTON.

(Visited March 20, 1896.)

Among the poor of this town who are boarded in private families is a feeble-minded, epileptic woman, who is cared for by relatives at \$5 a week. She is well provided for.

# LANCASTER.

(Visited September 22, 1896.)

This almshouse was found neat and orderly, in good repair, and in generally satisfactory condition. The management is efficient and the inmates are under careful supervision. There is complete separation of the sexes, but none of the sane from the insane.

There are fourteen inmates, including three children. One man is insane, and two men, two women, and a boy are feeble-minded; one woman and the boy being also epileptic. Combined salary of warden and matron, \$600. Receipt of abstract of visitor's report acknowledged.

# LAWRENCE.

(Visited September 9, 1896.)

A new brick building for the pauper department is in process of erection, upon the completion of which the old wooden structure is to be torn down. It is intended to provide the new building with all modern conveniences. The department for the insane is orderly and clean, and the inmates were found comfortable. A considerable number of the women were employed in the sewing room and in other work. The hospital has been greatly improved, and was found in excellent condition. There is complete separation of the sexes, and the insane are cared for in a separate department.

There are one hundred and thirty-one inmates, including ten children. Eleven men and forty-one women are insane and one woman is feeble-minded, and there is one epileptic. Combined salary of warden and matron, \$1,000. Receipt of abstract of visitor's report not acknowledged.

#### LEE.

(Visited July 23, 1896.)

There have been no repairs and improvements at this almshouse since the last report, and the unfavorable conditions previously referred to are still existing. The house is unfit for an almshouse, and at the last annual meeting the town voted to purchase a farm to build a new one on. The warden is also town sexton, and in addition has charge of the sluices and bridges on the highways. Two men sleep in a damp basement room, and the general state of dilapidation of the building is a barrier to good management.

There is general separation of the sexes but not of the sane from the insane.

There are seven inmates. One man and one woman are insane, and one man and two women feeble-minded. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

An insane woman, who has had hospital treatment, is cared for in the home of her daughter in a neighboring town at \$2.25 per week.

#### LEICESTER.

## (Visited October 26, 1896.)

This almshouse was found in its usual neat and clean condition, and under good management. Farming has been partially discontinued and the dairy herd and farming tools have been sold. Milk and vegetables for household use will still be produced. A new system of sanitation has been placed here at the dictation of the Metropolitan Water Commission and is in satisfactory operation. There is no provision for separating the sexes or of the sane from the insane.

There are fourteen inmates, of whom three women are insane and two men feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

## LENOX.

## (Visited July 22, 1896.)

The poor of this town are distributed in private families. One of them, a woman who has been insane many years, is cared for in the family of relatives at a cost of \$2.50 per week.

#### LEOMINSTER.

#### (Visited August 17, 1896.)

This almshouse presents a very good appearance, and is in fair repair. The management is good and the inmates are well cared for. A system of hot water heating has been supplied since last year, and additional sleeping-rooms have been finished in the lower floor of the wing. The farm is productive. The sexes are separated, but the sane and insane associate.

Of the eleven inmates, three men and one woman are insane, and three men are feeble-minded. Combined salary of warden and matron, \$700. Receipt of abstract of visitor's report not acknowledged.

## LEXINGTON.

#### (Visited July 14, 1896.)

This almshouse has been improved during the year by the addition of steam heat. The house is inconveniently arranged and not adapted for its present use. Repairs are contemplated, and it is intended to provide a bath-room and new sanitary appliances. There is no separation of the sexes or of the sane from the insane.

The inmates number five, all of whom are sane. The combined salary of warden and matron is \$550, and they pay for the hire of a domestic. Receipt of abstract of visitor's report acknowledged.

# LITTLETON.

# (Visited June 24, 1896.)

There have been no changes at this almshouse during the past year. The drainage is still faulty and a menace to the health of the inmates. The housekeeping is inefficient. The sexes are not separated or the sane from the insane.

There are five inmates, three of whom are children; one woman is insane. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report acknowledged, and it is intended to remedy some existing defects.

#### LOWELL.

# (Visited November 13, 1896.)

Very substantial improvements have been made at this almshouse during the past year. A new office has been fitted up and general improvements and renovations have been made in the administrative portion. A new kitchen and bakery are being built, and farther changes are contemplated. The old building that was occupied by the insane men has been torn down. The objectionable feature of indiscriminate association of the workhouse inmates with the general population still continues, and there are at this time seventy criminal inmates. There are twenty-one employés. Separate departments are maintained for the insane, and there is complete separation of the sexes.

There are four hundred and nine inmates, including thirty-seven children. There are twenty-nine insane men, and seventy-five insane women; two feeble-minded men, and two feeble-minded

women; also four men and six women epileptic. Combined salary of warden and matron, \$2,000. Receipt of abstract of visitor's report not acknowledged.

#### LUDLOW.

# (Visited May 22, 1896.)

The poor of this town are chiefly supported in one family under a contract of \$2 per week. There are at this time three persons so situated, — a man and his wife, who occupy a very comfortable room; and an insane man, who has had hospital treatment, and is well cared for.

#### LUNENBURG.

## (Visited May 8, 1896.)

The surroundings of this almshouse are very pleasant, the buildings are attractive and in excellent repair, and a general condition of thrift is apparent. A bath-room is still needed, and there should also be improvements in the heating. There is no structural provision for separating the sexes or the sane from the insane.

Of the eight inmates, four men are insane and two are feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

#### LYNN.

## (Visited October 12, 1896.)

The new almshouse has been occupied during the year; it is commodious and well built, and has been used with satisfaction. The arrangement of the culinary department is not wholly convenient, and its situation over the boiler-room is undesirable. The insane men still continue to occupy the old building, which is not well suited for its present use. Complete separation of the sexes is secured, and the insane men have separate apartments. No special provision is made for the insane women.

There are eighty-eight inmates. Eighteen men and two women are insane, five men and five women are feeble-minded, and one man and two women are epileptic. There are six small children. Combined salary of warden and matron, \$1,200. Receipt of abstract of report of visitor not acknowledged.

## MALDEN.

## (Visited February 17, 1896.)

This almshouse is found, as usual, in an orderly condition. A good deal has been done in the way of repairs and improvements, — electric lights have been put in, and the laundry, kitchen, and

heating departments have also received additions to their equipment. The management is good and the house is clean and orderly. There is complete separation of the sexes, but no special provision is made for the insane, as it is not intended to keep any here.

Of the thirty-seven inmates, one woman is insane and one epileptic, and one man is feeble-minded. There are ten children. Combined salary of warden and matron, \$700. The warden is also inspector of milk and provisions, for which he receives an additional \$100. Receipt of abstract of visitor's report not acknowledged.

## MANCHESTER.

# (Visited April 30, 1896.)

This almshouse, which was originally built for a dwelling, is very antiquated, but it is in excellent repair and the inmates are made very comfortable. No provision is made for the separation of the sexes or of the sane from the insane.

There are six inmates, all sane. Combined salary of warden and matron, \$275. Receipt of visitor's report acknowledged; no comments.

#### MANSFIELD.

# (Visited March 17, 1896.)

This house continues in need of repairs and is lacking in modern conveniences. Some improvements have been made during the past year, and the tramp quarters have been removed from the almshouse proper to a detached building. Over three thousand tramps were lodged here last year. One aged woman is situated in a detached building distant from the house, and mostly provides for herself. Complete separation of the sexes is secured at night, but the sane are not separated from the insane.

There are seven inmates, of whom two women are feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

A feeble-minded man, who has been at the State School, is boarded with a relative, where he has good care.

#### MARBLEHEAD.

## (Visited February 7, and April 13, 1896.)

Since the last report this almshouse has had many and important repairs made, including thorough renovation of the detached building occupied by the insane. Bath-rooms and water-closets of an improved pattern have been introduced and the whole building put in good order. The main building has also been repaired to a lesser degree, and a decided improvement is manifest throughout. The Overseers and the newly appointed warden and matron are thoroughly alive to the needs of the town, and evidences of good management are everywhere apparent. The place is clean and orderly, and the inmates are receiving kind care and treatment. There is complete separation of the sexes and a partial one of the sane from the insane, the more violent and untidy cases of the latter class being lodged in the detached building.

There are twenty-one inmates, including one child. Two are insane, and three feeble-minded. One of the latter, a feeble-minded man, who has for many years been practically confined to his room, is now taken out regularly for exercise in the open air, greatly to his improvement.

#### MARION.

# (Visited March 11, 1896.)

Most of the poor supported by this town are mentally defective. Among the latter is an insane man, who is boarded with relatives at \$4 a week; he has excellent care. A feeble-minded man, who is supported at the same rate, is with his father in an adjoining town. Although a troublesome case, and epileptic, he is reasonably well provided for.

# MARLBOROUGH.

# (Visited July 16, 1896.)

Some improvement has been made in the surroundings of this almshouse, but the house is not adapted to its present use, and a new building is much needed. There is objectionable overcrowding, and the inmates who sleep in the attic are not properly provided with means of escape in case of fire. The sexes are separated completely by night and partially by day. No separate provision is made for the insane.

There are twenty-nine inmates, of whom six men and five women are insane, three men feeble-minded, and one is epileptic. Combined salary of warden and matron, \$750. The receipt of abstract of visitor's report was acknowledged, the Overseers reporting that suggestions made had been adopted.

#### MARSHFIELD.

#### (Visited October 9, 1896.)

One-half of this house has been shingled during the past year, but no other repairs have been made. A large number of fires are required to make it habitable in the winter season. The equip-

ment is generally faulty and deficient. There is no separation of the sexes and no special provision is made for the insane.

There are five inmates, of whom one man is feeble-minded. Combined salary of warden and matron, \$250. Receipt of abstract of visitor's report not acknowledged.

#### MATTAPOISETT.

(Visited October 6, 1896.)

This house, originally a farm dwelling, has a wing devoted to the use of inmates which is unsuited for the purpose. The sexes are not separated, and evils from this defect are apparent. There is no separation of the sane from the insane.

There are four inmates: one is a feeble-minded man, and another a feeble-minded woman with her illegitimate child. Combined salary of warden and matron, \$350. Reply to receipt of abstract of visitor's report states the intention to make alterations and improvements, especially in regard to separation of the sexes.

#### MAYNARD.

(Visited July 7, 1896.)

Better results would be reached in the care of the inmates of this almshouse if the whole of the building were devoted to almshouse purposes; as previously reported, one half is rented to a private family. There have been some renovations made during the past year, chiefly in paint and paper. There are no provisions for separating the sexes or the sane from the insane.

There are seven inmates, including one infant, and one insane man. Combined salary of warden and matron, \$350. Receipt of abstract of visitor's report not acknowledged.

#### MEDFIELD.

(Visited September 28, 1896.)

This almshouse presents a good appearance, and is found in its usually good condition. There is need of a bath-room, and better heating should be supplied. The sane and the insane are not separated, and the house does not provide for the complete separation of the sexes.

There are four inmates, of whom one woman is feeble-minded. Combined salary of warden and matron, \$425. Receipt of abstract of visitor's report not acknowledged.

#### MEDFORD.

# (Visited February 17, 1896.)

This almshouse was found in its usual good condition. The inmates are under good supervision and have satisfactory care. There is no provision made for separating the sexes or of the sane from the insane. (A subsequent visit shows that a new wing has been built which will give more efficient classification and provide for the removal of some of the insane from State hospitals. An insane woman has been removed to a State hospital.)

The inmates number twenty-one, of whom one man is feeble-minded and one woman insane. Combined salary of warden and matron, \$700. Receipt of abstract of visitor's report acknowledged; no comments.

# MEDWAY.

# (Visited September 28, 1896.)

This almshouse is much less attractive within than the exterior would indicate. It is poorly arranged, many of the rooms communicate, and on the whole it is not well suited for its present use. A bath-room is needed, and there should be improved sanitation. The housekeeping is not wholly satisfactory. An excited insane woman, who is also epileptic, is kept closely confined in the wing. There is no farther separation of the sane from the insane and no separation of the sexes.

There are fifteen inmates. Two men are insane and two feebleminded and one woman is insane. Combined salary of warden and matron, \$450. Receipt of abstract of visitor's report acknowledged; no comments.

Since this visit the excited woman has been committed to a State hospital.

#### MERRIMAC.

## (Visited July 31, 1896.)

Among the poor of this town who are supported in private families, is a feeble-minded man who is boarded with relatives, at \$3 per week, and an insane woman who is with relatives in Lawrence at \$2 per week. Both have been in institutions: the man, who is blind, at Perkins Institute, and the woman at a State hospital. Both have good care.

#### METHUEN.

#### (Visited February 20, 1896.)

This house is generally lacking in modern conveniences, but is in good repair, and well managed. Heating is by stoves and imperfect. There is partial separation of the sexes, but none of the sane from the insane.

There are five inmates, including two children. One man is feeble-minded. Combined salary of warden and matron, \$450. Receipt of abstract of visitor's report not acknowledged.

## MIDDLEBOROUGH.

(Visited October 22, 1896.)

This almshouse is well kept, and, aside from needing renewal of paint, is in good repair. The basement rooms occupied by the mentally defective men are objectionable. The drainage is defective. Complete separation of the sexes is secured except at meals. No separate provision is made for the insane.

There are fifteen immates, of whom two men and two women are insane, and two men and four women feeble-minded, one of the latter being also epileptic. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

## MILFORD.

# (Visited July 28, 1896.)

There has been an improvement in the management of this almshouse during the past year: the sexes are separated, and there has been a general improvement in the interior of the house. There is a marked degree of over-crowding, and a large number of inmates would be in danger of injury in case of fire. Some simple fire apparatus has been provided. Better sanitation is needed. No separate provision is made for the insane.

The inmates number forty-one, among whom are one insane man, two insane women, and two children. Combined salary of warden and matron, \$600. Receipt of abstract of visitor's report not acknowledged.

## MILLBURY.

# (Visited July 20, 1896.)

But little has been done in the way of repairs at this almshouse excepting what is absolutely necessary to keep it habitable. It is old and poorly arranged, and does not provide for the separation of the sexes or of the sane from the insane. It is kept clean and the inmates are as well cared for as can be expected with the lack of proper conveniences.

Of the four inmates, one woman is insane. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

#### MILTON.

## (Visited August 13, 1896.)

This place is in good condition, and the inmates are well cared for. The arrangement of the house is not good for its present use, and the detached building for men is objectionable. The well has been dry a portion of the year, during which time cistern water has been used. There is complete separation of the sexes, but no special provision is made for the insane.

The inmates number seven. One woman is feeble-minded. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report acknowledged, and resignation of superintendent and matron reported.

## Monson.

# (Visited May 15, 1896.)

No special repairs or improvements have been made here during the past year. The house is in good repair and is well kept. It still lacks a bath-room, and only stove heating is supplied. There is imperfect separation of the sexes and sane and insane are allowed to associate. The general management of the property has improved. An insane man has unattractive lodgings in an out-building.

There are ten inmates, among whom are three insane men and two insane women, and one man and one woman feeble-minded. Combined salary, \$600. Receipt of abstract of visitor's report not acknowledged.

#### MONTAGUE.

## (Visited August 25, 1896.)

This house is inadequate for the needs of the town, being poorly arranged and scantily furnished. Stoves are used for heating, and the danger from this source is emphasized by the death of an inmate from asphyxiation in April. Tramps are lodged in a detached building, which is cared for by an inmate of the almshouse. There is no separation of the sexes, and none of the sane from the insane.

There are eleven inmates, among whom are one insane woman, one feeble-minded man, one feeble-minded and epileptic woman, and one child. Combined salary of warden and matron, \$850. Receipt of abstract of visitor's report not acknowledged.

#### MONTEREY.

## (Visited July 21, 1896.)

The poor of this town, outside the State hospitals, are supported in private families. At present there are two so supported,—an epileptic feeble-minded man in the care of relatives in a neighboring town, and a feeble-minded woman, also outside the town limits. Both of these cases have good care, the man at \$10 a month, and the woman at \$1.87 a week.

## NANTUCKET.

## (Visited July 15, 1896.)

This almshouse was found in in its usual good condition, scrupulously clean and orderly throughout. The management of the almshouse and the general management of the poor of the town are very creditable. There is complete provision for separation of the sexes, but none of the sane from the insane.

There are twenty-four inmates, including one child, seven of whom are insane, one is feeble-minded, and two have epilepsy. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

## NATICK.

## (Visited January 17, 1896.)

Two visits have been made to this almshouse. As the result of criticisms regarding the condition of things at the first inspection, the town appropriated \$10,000 for the erection of a new and modern almshouse, which is rapidly approaching completion. It is in close proximity to the old one, but on higher ground, and the appearance of the partially finished building indicates that it will be very satisfactory and a credit to the town.

At the first visit there were present twenty inmates, including one child, one woman being insane, and one feeble-minded. Combined salary of warden and matron, \$600. Receipt of abstract of visitor's report not acknowledged.

# NEW ASHFORD.

(Visited June 30, 1896.)

Among the poor of this town, all of whom are supported in private families, is a feeble-minded woman who is farmed out by the town for her board and clothes. The case is disposed of by

auction at the annual town meeting, and under the arrangement for this year the town receives a bonus of \$25. As may be supposed, a good deal of work is exacted of the woman.

#### NEW BEDFORD.

(Visited September 20, 1896.)

This almshouse, which is most advantageously situated, presenting a very pleasant appearance, is not up to the standard which should be maintained in an institution of this size and which the city has a right to expect. Although it provides for the separation of the sexes, there is no separate provision for the insane, who mingle more or less freely with the other inmates. It also contains the workhouse element, another most objectionable feature, which should be entirely eliminated. The main house is poorly arranged and might be improved by rearranging the interior. A different disposition should be made of some of the insane men, their present quarters being dark and unhealthy. The detached water-closets should be removed, and their places supplied with modern and sanitary appliances. Greater attention should be given to the care of the inmates and their surroundings.

There are eighty-six inmates, of whom twenty-one are insane, and nine feeble-minded, and seven are children. Combined salary of warden and matron, \$950.

#### NEWBURY.

#### (Visited April 7, 1896.)

The poor of this town are boarded in private families, and among them are two harmless insane women in the same family, who were found reasonably well clothed and provided with sufficient food, but the one room which they occupy is very disorderly and dirty. An idiotic girl, referred to last year, is found in the same place as formerly, and no improvement has been made in her care.

#### NEWBURYPORT.

## (Visited May 6, 1896.)

This almshouse continues under efficient management, and its general condition is commendable. The sanitary appliances are good, and there is an efficient system of heating. The farm is productive, and furnishes occupation for a considerable number of the men. The most untidy inmates continue to occupy basement rooms. There is complete separation of the sexes, but none of the sane from the insane.

The inmates number forty, of whom four men and two women are insane, and six men are feeble-minded, one of the latter being also epileptic; three are children. Combined salary of warden and matron, \$700. Receipt of abstract of visitor's report not acknowledged.

## NEW SALEM.

## (Visited June 3, 1896.)

There have been no changes at this almshouse during the past year. It is in good repair, but entirely lacking in modern conveniences. It provides for no separation of the sexes, and the insane are not separated from the sane. More careful attention to individual cases is desirable.

There are three inmates, of whom one woman is insane. Combined salary of warden and matron, \$260. Receipt of abstract of visitor's report not acknowledged.

## NEWTON.

## (Visited July 30, 1896.)

Some of the rooms at this almshouse have been renovated during the past year, and aside from more efficient sanitation little is required to make the place satisfactory, no extensive repairs being required. An additional bath-room for women is still needed. There is no provision for complete separation of the sexes, but they are kept apart at night. Sane and insane associate.

The inmates number nineteen, including one child. One man and three women are insane, and one man and two women are feeble-minded. Combined salary of warden and matron, \$700. Receipt of abstract of visitor's report acknowledged.

# NORTH ADAMS. (Visited June 30, 1896.)

No improvements have been made at this almshouse since last year. The construction is good and provides for complete separation of the sexes, but no separate provision is made for the insane. The housekeeping is open to criticism, there being a general lack of order and cleanliness. The proximity of the outbuildings is still an objectionable feature.

There are nineteen inmates. Two men and two women are insane. Combined salary of warden and matron, \$950. Receipt of abstract of visitor's report not acknowledged.

A feeble-minded woman, who has efficient care, is boarded with her mother in a neighboring town at \$10 per month. An idiotic man is boarded in town and cared for by his sister.

## NORTHAMPTON.

# (Visited August 11, 1896.)

Recent renovations have brought this almshouse into satisfactory condition, and the sanitary fixtures are in good order. Cleanliness and order prevail, and the inmates have good care and seem contented. The men and women occupy opposite wings, but there is no separation of sane and insane. The method of paying the warden and matron is not to be commended. Under the present arrangement, which has existed for several years, the warden receives \$2.25 per week for inmates from Northampton and \$2.50 for boarders from other towns.

There are twenty-seven inmates, one of whom is epileptic, three men and eleven women are insane, and one woman is feeble-minded; two are children. Receipt of abstract of visitor's report not acknowledged.

## NORTH ANDOVER.

(Visited March 24, 1896.)

There are no changes to report at this almshouse: it is found in good condition and is made homelike. The farm is productive. Separation of the sexes is secured, but the same and the insane are allowed to mingle.

There are six inmates, of whom one woman is insane, and two are feeble-minded. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

## NORTH ATTLEBOROUGH.

(Visited February 18, 1896.)

Criticisms based upon observations at the above visit have resulted in providing for a detached hospital building. The house and buildings are in good repair, and there is a well equipped kitchen with ample cold storage. The place is under efficient management, and provides for complete separation of the sexes, but there is no special provision for the insane.

There are thirteen inmates. Two men are feeble-minded, one of whom is also epileptic, and there are two feeble-minded women. Combined salary of warden and matron, \$550. Receipt of abstract of visitor's report not acknowledged.

# Northborough.

(Visited July 16, 1896.)

This almshouse is poorly arranged and lacking in proper conveniences. There have been no improvements within the past year, except minor ones in the way of painting and papering. The house is heated by stoves, and some portions of it are uncomfortable in winter. There is no separation of the sexes and none of the sane from the insane.

The inmates number three, all sane. Combined salary of warden and matron, \$350. Receipt of abstract of visitor's report not acknowledged.

# NORTHBRIDGE.

(Visited July 21, 1896.)

This almshouse is under good management and the house is in satisfactory condition. No repairs or improvements have been made during the past year. There should be improvements in the sanitation, and the bath-room lacks water connection. There is no provision for separation of the sexes, and none of the sane from the insane.

The inmates number six, all sane. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

## NORTH BROOKFIELD.

(Visited March 11, 1896.)

The criticisms which have formerly been made on this almshouse are again emphasized. The house should be abandoned, being unfit for occupancy and past repair. It is kept clean and the management is as good as the difficulties of the situation permit. The farm has been made very productive under fertilization of the town sewage. The structural conditions permit of no separation of the sexes nor of classification of the inmates.

The inmates are nine in number, including one child with its unwedded mother. One man is feeble-minded, and one woman insane. Combined salary of warden and matron, \$450. Receipt of abstract of visitor's report has been acknowledged, and conference has been held with the Overseers relative to bringing the matter of building a new house before the town at the next annual meeting.

An insane woman, formerly at a State Hospital, has excellent care in a private family in Westfield.

#### NORTHFIELD.

# (Visited April 24, 1896.)

The poor of this town are situated in different private families. Most of them are boarded, by contract, at the rate of \$2.50 a week; but an idiotic man, for whose support \$1.50 a week is paid, receives most of his clothes and part of his board from neighbors, for whom he runs errands and saws wood. The lodgings for this man are very objectionable.

## NORTH READING.

# (Visited March 10, 1896.)

This almshouse is on the whole well kept, but the portion formerly occupied by tramps and now used for general purposes was found much overheated from the stove which is left to the care of an inmate, and the inmates who are kept here, and locked in their rooms, are in great danger from fire. The house lacks modern conveniences. Tramps are now lodged in a detached building, which was found in fair condition. There is no separation of sexes, and the sane and the insane are allowed to mingle.

There are four inmates, including one insane woman, and one woman who is a dwarf and feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

#### NORTON.

## (Visited March 17, 1896.)

This almshouse is pleasantly situated, in a good state of repair, in good order, and well equipped. The water supply is deficient, and the well on the place failed a part of the year, so that water had to be brought from a neighboring farmhouse. The sexes are not separated, nor are the sane from the insane.

The inmates are four in number, of whom one man is insane and one woman feeble-minded. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report acknowledged, and suggestions noted.

# NORWELL.

#### (Visited October 9, 1896.)

The good impression made by the exterior of this almshouse is dissipated by inspection of its interior, which is poorly arranged, unattractive, and unsuitable for its purposes. The situation in the centre of the town is undesirable, and a re-location in a more

retired place is recommended. The inmates are well cared for, and the condition of the house and its management is as good as the structural inconveniences permit. There is no classification of inmates.

There are six inmates, of whom one of each sex is insane, and one man and one woman are feeble-minded. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

## ORANGE.

## (Visited June 4, 1896.)

This almshouse continues under good management and is clean and in good order. The situation is undesirable. There is no separation of the sexes, nor is there any provision for separate care of the insane.

There are four inmates, of whom two women are insane, and one is feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

#### OXFORD.

# (Visited September 15, 1896.)

The sanitary conditions at this almshouse remain unsatisfactory, and the place is still lacking a bath-room. No repairs and improvements have been made during the past year, and the too rigid system of economy which is generally apparent is not to be commended. There is complete separation of sexes by night, but no special provision for the insane.

The inmates are twelve in number. One woman is insane and three men and two women feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report acknowledged, and Overseers report that alterations in the vaults and improvements at the barn have been made.

An insane woman belonging to this town has good care in a private family in New Braintree at \$2 a week.

#### PALMER.

## (Visited May 14, 1896.)

Changes and additions at this almshouse, formerly mentioned, have been completed and entire separation of the sexes is now secured. The new wing was cheaply constructed and is scarcely large enough for the present demands. The arrangement of the interior is not good. The housekeeping is subject to criticism, especially in the men's department. The bath-room is not used

and is very objectionably located in a passage way. A domestic should be employed. No provision is made for separating the sane from the insane.

There are twenty-six inmates. Four men and three women are insane and one of each sex feeble-minded. One child is here, cared for by his mother. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

#### PEABODY.

# (Visited February 7, 1896.)

This almshouse is found in its usual condition. It is clean and orderly, and the inmates are under good care. Eight paupers belonging to other towns are boarded here. The house is provided with modern conveniences. The farm is productive and furnishes employment for a considerable number of the men. The warden distributes supplies to the outside poor of the town from the almshouse stores. There is complete separation of the sexes, but the sane and insane are not separately provided for.

The inmates number forty, among whom are four children. One inmate is insane and four are feeble-minded, one of the latter being also epileptic. The warden and matron are paid \$600. Receipt of visitor's report acknowledged, and mention made of minor interior repairs.

#### PEMBROKE.

## (Visited April 24, 1896.)

Farther improvements in the management of this almshouse are to be noted, but a higher standard is desirable. The construction of the building is a barrier to the best classification of inmates, several of the sleeping-rooms communicating with each other. Objectionable feather beds are used for most of the inmates. The sexes are completely separated by night, but no effort is made to separate the sane and insane.

Among the inmates, who number seven, are one insane, one epileptic and two feeble-minded persons. The warden and matron are paid \$350 per year. Receipt of abstract of visitor's report not acknowledged.

#### PRPPERELL.

#### (Visited May 28, 1896.)

But little has been done at this almshouse in the way of repairs during the last year. It is in good condition, however, although lacking in some modern appointments. The bath-room is of little use, not being supplied with water. Tramps are accommodated

in neat quarters in the attic, — an objectionable arrangement. The house is not arranged for separation of the sexes, but they are kept apart at night. The sane and insane associate.

There are three inmates, of whom one is insane, and one feebleminded. Warden and matron are paid \$375. Reply to visitor's report states that a contract has been made for supplying the bathroom with hot and cold water.

# PERU.

(Visited July 21, 1896.)

This town supports a helpless, deformed idiot in her mother's home at \$1.50 a week. The case has as good care as can be given by the family in their squalid condition. More liberal provision should be made for this family.

#### PETERSHAM.

(Visited May 30, 1896.)

This almshouse is an old, poorly arranged structure, and but few repairs are made excepting such as are necessary to preserve the property. The water supply is in danger of contamination from the drains and vaults. No separation of the sexes is made, and none of the sane from the insane.

There are three inmates, all mentally defective, two being insane, and one feeble-minded. The warden and matron are paid \$400. No comments on visitor's report.

## PITTSFIELD.

(Visited October 20, 1896.)

This almshouse is pleasantly situated, and in many respects is well arranged. It provides a separate building for its insane, who are kindly treated. The general condition, while not up to the highest standard, is commendable, and the discipline, order and thrift shown are praiseworthy. The house provides for complete separation of the sexes. A new barn is building, which, when finished, will make the equipment very complete.

There are forty-six inmates, including two children. Eighteen are insane and six feeble-minded. There is also one woman boarding in a private family, who receives partial support from the town. The warden receives a salary of \$600 per year.

#### PLYMOUTH.

# (Visited April 23, 1896.)

This almshouse is under good management and is in good condition. The inmates are well cared for. Complete separation of the sexes is secured, and a separate wing has been arranged for several insane of both sexes, but it has not yet been used for that purpose.

There are thirteen inmates. Two men are insane, one of them being also epileptic, and another inmate is feeble-minded. The warden and matron are paid \$450. Receipt of abstract of visitor's report not acknowledged.

#### PROVINCETOWN.

## (Visited October 20, 1896.)

This almshouse is found in excellent condition and is a model of neatness and order. It lacks modern appliances, but the inmates are provided with a good home and receive the best of care. No separation of the sexes or of the sane from the insane is made.

There are seven inmates. One man is feeble-minded and epileptic, and three women are also feeble-minded. The matron is paid \$260. Receipt of abstract of visitor's report not acknowledged.

# QUINCY.

# (Visited January 20, 1896.)

The almshouse here remains unchanged. No proper separation of the sexes is secured. There is a bath-room, but it is used by the inmates only as they choose. Heating and ventilation are good, and the house is clean and orderly. The premises have been improved by discontinuing the use of the front yard as a city dump, but the swill nuisance in the rear continues. There are accommodations for nearly twice the present number of inmates. The warden distributes supplies to the outside poor of the town from the almshouse stores.

There are twelve inmates, of whom one man is insane. The warden and matron have a salary of \$500. Receipt of abstract of visitor's report not acknowledged.

#### RANDOLPH.

#### (Visited March 13, 1896.)

This almshouse is found in a dirty, disorderly condition, showing a general lack of good management. There have been no

repairs since the last report except such renewals of paint and paper and similar minor interior renovations as have been made by the warden. The vaults continue as an objectionable feature, and should be re-located. A domestic should be employed. The house does not provide for effectual separation of the sexes, and the sane and the insane are allowed to associate.

Of the eight inmates, two women are insane, and one man is feeble-minded. There is also an insane woman boarded here who has had hospital treatment. The case is a troublesome one, requiring almost entire seclusion, and her care occupies a large portion of the time of the matron. Salary of warden and matron, \$500. The Overseers of the Poor acknowledge the receipt of visitor's report, and deny that there is ground for the criticisms made.

## RAYNHAM.

# (Visited June 22, 1896.)

The poor of this town are supported in private families. A feeble-minded girl, thirteen years of age, also epileptic, is in a good home, where she is treated as one of the family. The town pays \$3 a week for her support.

## READING.

# (Visited March 10, 1896.)

This almshouse is found in a good state of repair, and every portion of it is clean and orderly. Two men sleep in a rough attic room, occupying it by preference. There is no separation of the sexes, and the sane and the insane are allowed to mingle. There is one criminal inmate who is associated with the rest.

There are six inmates, of whom two men are feeble-minded. Combined salary of warden and matron, \$500. Receipt of abstract of visitor's report not acknowledged.

Since the above visit, charges of harsh treatment of inmates have been made against the warden, and a change of management has taken place.

#### **Виновотн.**

## (Visited September 24, 1896.)

At this almshouse an improvement has been made in removing the tramps from the attic rooms to a detached building; otherwise the place is found in the same condition as last year. Additional changes are very much needed. The interior is not cheerful, is poorly arranged, and in need of renovation. The drainage is very faulty, and a recent case of typhoid fever is undoubtedly due to contamination of the water supply from the privy vaults. The sexes are associated, and there is no separate provision for mental cases.

The inmates are seven in number, including two children. One of each sex is feeble-minded, one woman being also epileptic. Combined salary of warden and matron, \$350. Receipt of abstract of visitor's report not acknowledged.

## ROCHESTER.

## (Visited October 6, 1896.)

This town continues to use for an almshouse the old, poorly arranged, and somewhat dilapidated building that has served for the purpose for many years. It is entirely without modern conveniences, and is heated by stoves. There is a lack of good housekeeping, although a reasonable degree of cleanliness is maintained. There is no structural provision for separation of the sexes, and no separation of the sane from the insane.

The inmates, four in number, including one child, are all defective. One insane woman is kept in close confinement most of the time. Two women are insane, and one of each sex is feeble-minded. Combined salary of warden and matron, \$200. Receipt of abstract of visitor's report not acknowledged.

#### ROCKLAND.

## (Visited March 25, 1896.)

This almshouse is found in good repair, clean, and in good order. Since the last report, wiring of the house for electric lights has been completed, and the system is in good working order. At the last annual town meeting a committee was appointed to report upon the enlargement of the house, with the view of providing for separation of the sexes, and making other improvements. At the present time no separation is made, and the same and the insane are also allowed to mingle. Tramps are accommodated in a detached building.

The inmates are thirteen in number, two of whom are feebleminded men. Combined salary of warden and matron, \$400. Reply of Overseers to visitor's report states that the committee referred to has not yet reported, and no changes in the house have been made.

#### ROCKPORT.

# (Visited January 21, 1896.)

Since the last report, city water has been introduced, but otherwise no repairs or improvements have been made at this almshouse. The place, however, was found in good order and well cared for.

Improvements in the bath-room are suggested: there is no set tub and no supply of hot and cold water. No effectual separation of the sexes is made, and the sane and the insane are in association.

The inmates number seven. One of each sex is insane and three women are feeble-minded. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

#### SALEM.

## (Visited October 14, 1896.)

This almshouse is well constructed, well arranged and in good preservation. In general it is clean and orderly. It provides for a complete separation of the sexes, and the insane are cared for in a separate building. The general management is excellent, and with a few changes and improvements, the almshouse would be all that could be desired. More attention should be paid to good housekeeping in the department occupied by insane men. The use of the outside water-closets on the men's side of the department for paupers should be at once given up, and the objectionable buildings removed. Some minor repairs are also much needed upon the main building. The house has a most excellent situation, with plenty of pure, fresh air, and good opportunities for drainage.

There are one hundred and nineteen inmates, of whom fifty-two are insane, two feeble-minded, and four epileptic. Several children are present, — some with their mothers, and others for temporary relief. The warden and matron receive a salary of \$800.

#### SANDISFIELD.

# (Visited June 25, 1896.)

This town has no almshouse, and its poor are supported in private families. They are two in number, one of them in another town. One, a feeble-minded man, has insufficient care and accommodation, and the Overseers express their willingness to remove him to a hospital or provide a better home. The other, also feeble-minded, lives with his mother and receives but indifferent care. \$2 per week is paid for his support.

#### SANDWICH.

## (Visited January 24, 1896.)

The general condition of this almshouse remains the same as stated in the reports for many years. The house is old, poorly arranged, and inadequate for its present use. A complete separa-

tion of the sexes is provided by night, but none during the day. There is no separation of the sane from the insane. There is a general appearance of order and cleanliness. The house is heated by stoves. It is necessary to lock several patients in their rooms, and, owing to the peculiar construction of the building, in case of fire there would inevitably be loss of life. A different method of heating should be adopted, and a bath-room should be furnished. The insane man, whom for so long a time it has been considered necessary to keep apart by himself, now has entire freedom, assisting somewhat in work upon the farm.

There are sixteen inmates, eleven of whom are insane, and one is feeble-minded. The warden and matron receive \$800 a year. The Overseers of the Poor report, June 27, that no changes have been made.

#### SAUGUS.

## (Visited March 23, 1896.)

This almshouse presents its usual appearance, with the exception of an improved exterior, which has been recently painted. The interior is ill arranged, and the care which the house and inmates receive is poor. Dirt and disorder are found throughout. The use of the attic as a sleeping place for men should be abandoned, for in case of fire there is no exit from it except by the steep attic stairs. The room which serves the double purpose of a chamber and bath-room should be devoted entirely to the latter use, and hot and cold water supplied. There is no provision for separation of the sexes.

There are six inmates, one of whom is insane, two are feeble-minded, and one is epileptic. The warden and matron receive \$500. Receipt of abstract of visitor's report not acknowledged.

# SAVOY.

# (Visited July 1, 1896.)

This town sells the keeping of its poor to the lowest bidder. At present they are placed in two families. For the care of an insane woman and her idiotic daughter \$229.50 per year is paid, with clothing in addition. One man, eighty-eight years old, is boarded and clothed by another family at a cost of \$90 to the town. His general appearance and surroundings would indicate that the amount was entirely too small.

## SEEKONK.

## (Visited September 24, 1896.)

There has been no change at this almshouse since the last report. The exterior presents a good appearance, and within order and cleanliness prevail. A bath-room should be put in, and heat should be supplied from a common source, either by furnace or steam. There is no provision for separation of the sexes.

There are five inmates, two of whom are feeble-minded. The warden and matron receive \$400 a year. Receipt of abstract of visitor's report not acknowledged.

#### SHARON.

# (Visited April 10, 1896.)

This almshouse is an ordinary country dwelling-house, without any of the characteristics of a modern almshouse. It is placed in an isolated spot, and lacks conveniences for good administration. A bath-room should be supplied, and a furnace would be an improvement upon the present use of stoves. The place is kept clean and in an orderly condition.

There are four inmates, one of whom is insane. The warden and matron receive \$275. Receipt of abstract of visitor's report not acknowledged.

#### SHEFFIELD.

## (Visited July 22, 1896.)

This town has no almshouse, and its poor are boarded in a private family, which is regarded as a substitute for the almshouse. \$2.50 a week is paid for such cases as are sent here. They are lodged in an old frame building, which is dilapidated and cheerless. The furniture, mostly town property, is old and poor. The inmates, however, seem contented, and probably are well supplied with food. Several cases are boarded in other families at a lower rate. Receipt of abstract of visitor's report acknowledged.

#### SHELBURNE.

## (Visited July 3, 1896.)

This town has no almshouse, and supports one feeble-minded man at an expense of \$2.50 per week, besides clothing. He apparently receives good and sufficient food, but the condition of his room and bedding is one of dirt and disorder.

1897.7

#### SHERBORN.

# (Visited June 11, 1896.)

This almshouse, which, in its old and dilapidated condition, has been so long a subject of criticism, is about to be replaced by a new one. Plans for this have been submitted to the Board and heartily approved. While it is to be regretted that a little larger sum could not be appropriated, so as to insure more ample accommodations, yet the town is to be congratulated that, upon the completion of the building, it will have one of the best arranged almshouses in the State. There will be provision for the complete separation of the sexes, and, if necessary, of the sane from the insane. For ease of administration and economy of space, it will be a model building.

The number of inmates now supported by the town is four, including one insane and one feeble-minded. The warden and matron receive \$475.

# SHREWSBURY.

# (Visited September 2, 1896.)

This almshouse, as reported previously, is too old and dilapidated for its present use, and should either have extensive repairs or be replaced by a new building. The general condition is as good as could be expected under the circumstances. The old barn has been replaced by a new one.

There are four inmates, one of whom is feeble-minded and one epileptic. The warden and matron receive a salary of \$300. Receipt of abstract of visitor's report not acknowledged.

# SHUTESBURY.

## (Visited August 25, 1896.)

This almshouse is like an ordinary country farmhouse. It appears to be very well managed, and is kept in a clean and orderly condition. There is need of a bath-room with hot and cold water. The farm is quite productive, and supplies the house with good and suitable food.

The inmates are five in number, of whom one is insane, four are feeble-minded, and two epileptic. The salary of the warden and matron is \$225. Receipt of abstract of visitor's report not acknowledged.

#### SOMERSET.

## (Visited July 10, 1896.)

No improvement has been made in this almshouse. It is still much in need of repair, and is cheerless and unattractive without

and within, and very cold in winter. Greater attention should be paid to good housekeeping, the lack of which is very apparent. A bath-room is needed. There is no provision for separation of the sexes.

There are seven inmates, three of whom are insane and one is feeble-minded. The warden and matron receive a salary of \$400. Receipt of abstract of visitor's report not acknowledged.

#### SOMERVILLE.

# (Visited August 15, 1896.)

Two of the insane of this city are provided for at the homes of relatives, one in East Taunton and one in Maine. Both have satisfactory care.

# SOUTHBOROUGH.

# (Visited August 29, 1896.)

This town has no almshouse, and its poor are supported in private families. There is at present but one, a feeble-minded man, who has a good home, and receives proper care and attention.

#### SOUTHBRIDGE.

#### (Visited September 16, 1896.)

No changes have been made at this almshouse since the last report. The general management would not appear to be of the best, the house not being in that clean and orderly condition which is desirable. The bath-tub placed in a remote room, and never used, should be changed and properly fitted, and regular bathing enforced. More attention should be paid to the condition of the water-closets, which were found neglected. A more wholesome and nutritious diet should be provided. There is provision for separation of the sexes, but not of the sane from the insane.

There are fifteen inmates, four of whom are insane and one feeble-minded. The warden and matron receive a salary of \$600.

## SOUTH HADLEY.

#### (Visited November 3, 1896.)

This almshouse was found in good order, well cared for, clean and tidy. A bath-room is much needed and should be immediately supplied. There is no provision for separation of the sexes. The custom of providing for tramps in the almshouse proper, as practised here, should be abandoned, and such persons placed in some remote building.

There are nine inmates, one of whom has epilepsy. They evidently receive good care. The warden and matron are paid \$400 a year. Receipt of abstract of visitor's report not acknowledged.

#### SOUTHWICK.

# (Visited June 25, 1896.)

This town has no almshouse, and the one charge of the town, an aged feeble-minded woman, is boarded in a private family, where she receives proper care and attention.

#### SPENCER.

## (Visited September 14, 1896.)

This almshouse is a wooden building of two stories and two wings, pleasantly situated, in good condition, and under efficient management. Necessary repairs are made from time to time as occasion demands. There is no provision for separation of the sexes.

There are nine inmates, four of whom are insane and one has epilepsy. The warden and matron receive a salary of \$500 and the aid of two employés. Receipt of abstract of visitor's report not acknowledged.

## SPRINGFIELD.

# (Visited November 4, 1896.)

This almshouse is one of the best in the State. It is fitted throughout with every requirement for good administration and the care of its inmates. There is complete separation of the sexes, and the insane are well provided for in a building constructed specially for their use. All the inmates have the advantage of regular medical inspection, and the insane are provided with special attendants. The management is excellent.

There are one hundred and eighty-two inmates, including ten children. Eighty are insane, two feeble-minded, and nine have epilepsy. The warden and matron receive a salary of \$1,000. The Overseers report that no changes are contemplated at present.

#### STERLING.

#### (Visited September 22, 1896.)

This almshouse is well managed, and kept in a clean and orderly condition, but it lacks some appliances, the most important of which is a bath-room, of which there is urgent need. There is no separation of the sexes, and a structural provision for this purpose

should be made. The farm is quite productive, yielding \$1,300 for the town in the past year.

There are eight inmates, three of whom are insane and two feeble-minded. The warden and matron receive a salary of \$564. Receipt of abstract of visitor's report not acknowledged.

#### STONEHAM.

# (Visited January 27, 1896.)

This almshouse is a wooden structure of two stories with two wings, and is pleasantly situated. It is under good management, and is kept in a clean and orderly condition. It is provided with steam heat and a sufficient number of properly equipped bathrooms and closets. A number of inmates sleep in the attic dormitories, and better means for escape in case of fire should be provided for them. There is a complete separation of the sexes, but none of the sane from the insane.

There are ten inmates, two of whom are feeble-minded and one is epileptic. The warden and matron receive a salary of \$500. Receipt of abstract of visitor's report not acknowledged.

# STOUGHTON.

## (Visited March 13, 1896.)

This old almshouse is still badly out of repair, and so ill adapted to its present use that it should be abandoned. It lacks a bathroom and fire escapes. In general it is kept in a clean and orderly condition, but a little more attention to details is desirable. The inmates are made as comfortable as the place will permit. There is no provision for separation of the sexes or of the sane from the insane.

There are eight inmates, including one child. Two are insane and one idiotic. The warden and matron receive \$500 a year. The Overseers report, July 11, that no change has been made.

#### STOW.

# (Visited July 7, 1896.)

This almshouse, although it is very old, is kept in fairly good repair, and the management is very efficient. The house is clean and orderly throughout, and the inmates receive very satisfactory care. Proper facilities for bathing should be added.

The inmates are five in number, all women. There are no insane. The warden and matron receive \$300 per year, besides

having the assistance of one man the entire year, and of another a portion of the year, for farm work. Receipt of abstract of visitor's report not acknowledged.

# STURBRIDGE.

# (Visited September 16, 1896.)

This almshouse, originally built for a tavern, is very old and dilapidated and very cold in winter. It should either be repaired, or replaced by a new building. It is kept in a clean and orderly condition, but its appearance would be much improved by new paper and paint. A bath-room is an urgent need. There is no provision for separation of the sexes or of the sane from the insane. The warden and matron receive a salary of \$300. Receipt of abstract of visitor's report not acknowledged.

There are nine inmates, one a woman with an illegitimate child. One man is insane, and one man and two women are feeble-minded. Two of the inmates are boarders.

# SUDBURY.

## (Visited July 7, 1896.)

There has been no change at this almshouse since the last report, and it continues to be much in need of repairs. It is old and poorly arranged, not providing for any separation of the sexes. A bath-room should be fitted up and something done to make the place more comfortable and attractive.

There are six inmates, one of whom is insane and four are feeble-minded. The warden and matron receive \$375. Receipt of abstract of visitor's report acknowledged by Overseers of the Poor.

#### SUTTON.

## (Visited July 20, 1896.)

This almshouse is pleasantly situated, but is too small for the demands made upon it, and it is much overcrowded. An additional wing should be built, which would give a proper separation of the sexes and lead to a much better classification than now exists, the present condition in this respect being very objectionable. Too little money appears to be allowed by the town for the support of the almshouse inmates. More help should be allowed the warden and matron both for in-door and out-door work.

The inmates are seventeen in number, many of whom are defective mentally, and require much care at times. There are six

insane, seven feeble-minded, and one epileptic, among them. The warden and matron receive a salary of \$600. Receipt of abstract of visitor's report not acknowledged.

#### SWANSEA.

(Visited July 10, 1896.)

This almshouse, although it lacks a much needed bath-room and other conveniences, is well managed and provides satisfactorily for its inmates.

There are four inmates, all mentally defective, two being insane and two feeble-minded. The warden and matron receive \$375.

#### TAUNTON.

(Visited September 2, 1896.)

This almshouse presents an attractive appearance, but is poorly arranged for its present use. Its general appearance is disorderly but fairly clean. There are a large number of infirm inmates, many being confined to their beds. The large attics used as dormitories are an objectionable feature in their present condition. There is provision for separation of the sexes, but none for separation of the sane from the insane.

There are sixty-one inmates, including six children. Four are insane and two feeble-minded. The warden and matron receive a salary of \$900. The Overseers of the Poor acknowledge receipt of abstract of visitor's report, and express themselves as fully alive to the situation, and the necessity for improvements.

#### TEMPLETON.

(Visited August 27, 1896.)

There have been no repairs at this almshouse since the last report. The equipment is poor, and the furnace does not heat it thoroughly. There is no supply of water for the bath-tub. Tramps are accommodated in the portion of the house devoted to men. General repairs, both exterior and interior, are needed. The management is as good as the many structural inconveniences permit. Separation of the sexes by night is secured, but no special provision is made for the insane.

There are seven inmates, of whom two women are insane. Combined salary of warden and matron, \$750. Receipt of abstract of visitor's report not acknowledged.

#### TEWKSBURY.

# (Visited June 22, 1896.)

This almshouse is found in good order and under good management. The rooms are pleasant, the construction modern, and the inmates are provided with a comfortable home. Tramps are lodged in the basement, an arrangement which is objectionable. Complete separation of the sexes is made except at meals. Sane and insane are not separated.

There are five inmates. Two men and one woman are insane, and one woman is feeble-minded. Combined salary of warden and matron, \$450. Receipt of abstract of visitor's report not acknowledged.

## TOLLAND.

# (Visited June 25, 1896.)

The poor of this town are boarded in private families. Among them, an idiotic woman is boarded with her father at \$1.25 per week, and is well cared for.

#### TOPSFIELD.

#### (Visited July 31, 1896.)

The outside of the buildings has been painted and blinds put on the house, and there has also been some renovation of the interior. Aside from these repairs no changes have been made since the last report. A bath-room is needed. There is no separation of the sexes and no separate provision is made for the insane.

The inmates are five in number, all sane; one is a child. Combined salary of warden and matron, \$350. Receipt of abstract of visitor's report not acknowledged.

## TOWNSEND.

# (Visited June 25, 1896.)

Although entirely lacking in modern conveniences, this almshouse furnishes a comfortable home for its inmates, and the place is under good management. New floors have been laid since the last visit, but no other repairs have been made, although it is stated that improvements in the drainage are contemplated. The sexes, and the sane and insane, associate.

The inmates are eight in number. One man and five women are insane, one woman is feeble-minded and epileptic. Combined salary of warden and matron, \$450. Receipt of abstract of visitor's report not acknowledged.

## TRURO.

As this town has no poor, the almshouse has been closed.

#### TYNGSBOROUGH.

# (Visited May 1, 1896.)

This almshouse is in an extreme state of dilapidation, open to the weather, and wholly unfit for habitation. The interior is clean but disorderly. Most of the rooms are used for storage of farm products. The farm is productive and forms the basis of a business arrangement for the town. The niggardly economy on the part of the town gives the warden and matron but little encouragement in their work, but the place is reasonably well managed in the face of many obstacles.

There is but one inmate, a feeble-minded man. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

# TYRINGHAM.

# (Visited July 23, 1896.)

The poor of this town are supported in private families. Among them are a feeble-minded woman and a feeble-minded girl, both well cared for, the former at \$2 a week and the latter at \$90 for the year. The precaution has been taken to put the girl in a retired country place.

#### UPTON.

# (Visited July 28, 1896.)

This almshouse, built of wood, is new, but poorly arranged. It provides for no separation of the sexes or of the sane from the insane. There are good bathing facilities, and the house is well heated by a furnace. The sanitary arrangements are good, and the interior is clean and homelike.

There are four inmates, none of whom are insane. Combined salary of warden and matron, \$400. Receipt of abstract of visitor's report not acknowledged.

#### UXBRIDGE.

## (Visited July 21, 1896.)

This place is in ordinary repair, but under poor management. There are no bathing facilities and the house is heated by stoves. By intelligent management the structural provisions might permit of good separation of the sexes at night, but at present this is not attempted.

There are eleven inmates, including one child. One woman is insane, and one man and one woman idiotic. Combined salary of warden and matron, \$300. Receipt of abstract of visitor's report not acknowledged.

# WAKEFIELD.

# (Visited January 24, 1896.)

This almshouse has received some needed repairs within the past year. Steam heat has been introduced, and there are good bathing facilities, but some of the sanitary conditions are faulty. The management is good, and special attention is paid to the farm, which yields a good income. The sexes are not separated or the same from the insane.

There are nine inmates, among whom are a brother and sister, and an illegitimate child of the latter, all feeble-minded. The salary paid is \$650. Receipt of abstract of visitor's report not acknowledged.

# WALES.

# (Visited May 20, 1896.)

This town supports most of its poor who are not in State Hospitals in one family, at a weekly rate of \$2 for each. There are three aged insane women so cared for who have had hospital treatment. Better care could doubtless be secured at a higher rate.

#### WALPOLE.

#### (Visited September 11, 1896.)

This almshouse is past repair, but is kept as homelike as the condition of the building will permit. There is no bath-room, the house is heated by stoves, and the sanitary conditions are faulty. There is no separation of the sexes or of the sane from the insane.

There are three inmates, of whom two are idiotic. The combined salary of warden and matron is \$400. Receipt of abstract of visitor's report not acknowledged.

# WALTHAM.

# (Visited January 12, 1896.)

This comparatively new almshouse is well arranged, and provides good separation of the sexes and partial separation of the same from the insane. It is supplied with all modern appliances, and is well kept.

The number of inmates is thirty-seven, of whom eighteen are insane, two idiotic, and two epileptic. An insane woman who

has had hospital treatment receives \$100 from the city, with which, together with her earnings, she is able to maintain herself. The combined salary of warden and matron is \$900. Receipt of abstract of visitor's report not acknowledged.

#### WARE.

# (Visited May 18, 1896.)

This almshouse is old, out of repair, lacks bathing facilities, and is heated by stoves. The sexes are not separated, nor is any provision made to separate the same from the insane. The house is kept in good order, and the inmates are well cared for.

There are eight inmates, all sane. An idiotic man is boarded by the town in a private family, and is well cared for. The warden's salary is \$420. Receipt of abstract of visitor's report not acknowledged.

#### WARRHAM.

# (Visited October 19, 1896.)

This almshouse is pleasantly situated and in good repair, but lacks bathing facilities and is heated by stoves. There is partial separation of the sexes, but none of the sane from the insane.

There are eight inmates, of whom two are idiotic and one epileptic. The warden's salary is \$250. Receipt of abstract of visitor's report not acknowledged.

# WARREN.

# (Visited May 20, 1896.)

This almshouse is in good repair and is made homelike. It is steam heated, but lacks a good bath-room. The sexes are not separated, and the insane associate with the sane. The barns are in bad condition.

There are eleven inmates, of whom two are idiotic, one of the latter a child. The warden's salary is \$600. Receipt of abstract of visitor's report not acknowledged.

#### WARWICK.

## (Visited June 4, 1896.)

This almshouse, pleasantly situated, and in fair repair outside, is in a dilapidated condition within and poorly furnished. A part of it is in a disorderly condition. There is a lack of bathing facilities and other modern appliances.

There are three inmates, of whom one is insane and epileptic. The warden's salary is \$325. Receipt of abstract of visitor's report not acknowledged.

#### WATERTOWN.

# (Visited January 28, 1896.)

This almshouse has a pleasing exterior, but the interior shows cheapness of construction and is not kept in the best of order. It is well supplied with bath-rooms, is heated by steam, and has other modern appliances. There is good structural provision for separation of the sexes, but none for the separation of the sane from the insane.

There are ten inmates, of whom two are insane and one is epileptic. The warden's salary is \$500. The Overseers of the Poor acknowledged receipt of abstract of visitor's report, and stated that the condition of the almshouse was entirely satisfactory to themselves.

#### WAYLAND.

# (Visited August 14, 1896.)

This almshouse has been built but a few years, and was constructed without any provision for separation of the sexes or of the sane from the insane. There is a bath-tub, but it is not supplied with hot or cold water. The house is neat and clean, but the bedding is poor. The water-closets are badly situated and poorly ventilated.

There are four inmates, of whom one is insane. The warden's salary is \$350. Receipt of abstract of visitor's report not acknowledged.

#### WEBSTER.

## (Visited September 15, 1896.)

This almshouse is pleasantly situated and kept in fair repair, but is lacking in good bathing facilities and a method of general heating. It is kept neat and clean, but sufficient help is not provided. There is no provision for separation of the sexes or of the same from the insane.

There are seventeen inmates, of whom two are insane and one is idiotic. The warden's salary is \$600. Receipt of abstract of visitor's report not acknowledged.

#### WELLESLEY.

# (Visited January 29, 1896.)

This almshouse has a pleasant outside appearance, but is not well adapted to its present use. There are bathing facilities and the house is well heated by a furnace. There is no provision made for separation of the sexes or of the sane from the insane.

Of the eleven inmates, two belong to Needham. Three of the inmates are insane, and one is idiotic. There is one child, with its mother. The warden receives \$550. Receipt of abstract of visitor's report not acknowledged.

# WENDELL.

# (Visited August 26, 1896.)

This almshouse, which is a large, old-fashioned farmhouse, has had no change since last year, and is fairly clean and orderly. Two insane persons were removed to one of the lunatic hospitals at the request of this Board. The remaining inmates receive indifferent care, and a more efficient management is desirable. A different provision should be made for tramps, who are now lodged in the house. Complaint is made of an insufficient water supply. The location of the well is objectionable, as it is in a position to receive drainage from unwholesome sources.

There are two inmates, both old men, one of whom is insane. The warden and matron receive a salary of \$300 a year.

#### WESTBOROUGH.

#### (Visited May 26, 1896.)

This almshouse is very pleasantly situated, and appears to be efficiently managed. It is heated by steam, and the present objectionable water-closets are soon to be replaced by modern and approved ones. There is provision for separation of the sexes, but none for separation of the sane from the insane. The rooms are comfortably furnished, and the food is good and abundant.

There are fifteen inmates, of whom five are feeble-minded and two have epilepsy. The warden and matron receive a salary of \$500. The Overseers of the Poor report, June 24, that the proposed repairs and improvements have been made.

## WEST BOYLSTON.

#### (Visited May 18, 1896.)

This almshouse is pleasantly situated, and remains in the same satisfactory condition as at the time of the last report. It is kept clean and orderly; and although it is lacking in some points, the few inmates who are sent here receive good care. A bath-room is needed, and a different method of disposing of tramps should be provided, and is said to be under consideration. The farm is quite productive, and, chiefly from its dairy, yielded the town \$1,200 last year.

There is at this time but one inmate, a feeble-minded woman. The warden and matron receive a salary of \$500 per year. The Overseers report, under date of July 4, that no changes have been made.

# WEST BRIDGEWATER.

(Visited June 23, 1896.)

This almshouse, of comparatively recent construction, is pleasantly situated, and in general appearance shows an improvement since the last inspection. It is heated by steam, has good sanitary appliances, is clean and orderly, and the inmates appear to receive good care. Separation of the sexes is provided for, but none of the sane from the insane.

There are seven inmates, two of whom are insane and two feeble-minded. The warden and matron receive a salary of \$375. Receipt of abstract of visitor's report not acknowledged.

## WEST BROOKFIELD.

(Visited May 20, 1896.)

This almshouse, a comparatively new one, is constructed like an ordinary dwelling, and lacks some necessary appliances. A bathroom is especially needed, and bathing should be enforced. The house appears to be efficiently managed, and is kept in a clean and orderly condition. There is complete separation of the sexes at meals but not at other times.

There are five inmates, one of whom is insane. The warden and matron receive a salary of \$425. Receipt of abstract of visitor's report not acknowledged.

#### WESTFIELD.

## (Visited May 13, 1896.)

This almshouse is very well situated, and in many respects affords good accommodations for its inmates. The place is in a clean and orderly condition, and the management is efficient and satisfactory. Provision for separation of the sexes is made, but none for the separation of the sane from the insane. The detached brick building in the rear is an objectionable feature, and the in-

mates who now occupy it should be provided with other and better accommodations.

There are twenty-seven inmates, two of whom are insane, four feeble-minded, and one has epilepsy. The warden and matron receive a salary of \$700, and have served here nearly fifteen years. The Overseers report that some of the improvements suggested are under consideration.

# WESTFORD.

# (Visited June 24, 1896.)

This almshouse is a brick structure of two stories, with one wing. It presents a good appearance upon the exterior and is kept in a clean and orderly condition within. It lacks a bathroom, and suitable fire escapes. The inmates apparently receive kind care and treatment and are furnished with a plentiful supply of food of good quality.

There are eight inmates, two of whom are insane. Among the inmates are three old soldiers, who pay the town for their board. The warden and matron receive a salary of \$450. The Overseers report, July 24, that no changes have been made.

# WEST NEWBURY.

# (Visited September 25, 1896.)

There has been no change at this almshouse during the year. The construction is that of an ordinary dwelling house, and it would be improved by furnace heat and a bath-room, the latter being much needed. Bathing should be regular and should be enforced. The management is satisfactory.

There are four inmates, one of whom is insane. The warden and matron receive a salary of \$325. The Overseers of the Poor report, October 7, that no changes have been made.

#### WESTON.

# (Visited August 14, 1896.)

This almshouse was found in bad condition. Nothing has been done in the way of repairs, and little or no interest is shown in management, the interior being disorderly and dirty. Repairs and improvements are much needed, including a bath-room, better drainage, and a new water supply. The farm is productive and yields a large revenue to the town. Additional help is needed in the house.

There are three inmates, one of whom is feeble-minded. The warden and matron receive \$450 a year. The Overseers of the Poor report, October 6, that they intend to make needed repairs at an early date.

### WESTPORT.

# (Visited October 5, 1896.)

This almshouse is an old building, and arrangements are being made to improve its condition. Steam heat is to be added and also suitable bathing facilities, which are much needed. Additional help in the house would greatly assist in maintaining the proper order and cleanliness, many of the inmates being demented and untidy, and requiring much time and attention.

There are nine inmates, including one child: five of them are insane and three feeble-minded. The warden and matron receive \$450 per year. The Overseers of the Poor report, November 2, that they propose making some changes.

## WEYMOUTH.

# (Visited Feburary 12, 1896.)

This almshouse is well situated, but is entirely too small for its present use, and lacks some structural provisions which are important in a house caring for so many inmates. At present it is much overcrowded. The separation of the sexes should be made complete at all times, to avoid such unfortunate results as have already followed from the present arrangement. There is no separation of the sane from the insane. The general management is as good as could be expected under the existing conditions.

There are thirty-six inmates, including two children. Five are insane and five feeble-minded. The warden and matron receive a salary of \$850 per year. Overseers of the Poor acknowledge receipt of visitor's report.

#### WILBRAHAM.

## (Visited May 22, 1896.)

This town fully supports but one person, — an aged insane woman, who lives at her old home under peculiar and unsuitable conditions, she being cared for by neighbors and an old man who lives with her.

## WILLIAMSBURG.

# (Visited August 6, 1896.)

This town has no almshouse, and supports its one pauper in an excellent family, where she receives every necessary care and attention.

#### WILLIAMSTOWN.

(Visited June 30, 1896.)

The buildings used for an almshouse here are two, — the main dwelling occupied by the warden's family, and a second occupied by inmates. The conditions upon which this place is managed are peculiar, the warden renting the farm from the town for \$100 per year and receiving \$2 per week for each inmate. The warden also has a blacksmith's and wheelwright's shop. There are no bathing facilities in the inmates' part, and whatever water is used by them has to be carried in pails. The condition of the buildings and their surroundings is not creditable.

There are five inmates, one being feeble-minded.

#### WILMINGTON.

## (Visited June 16, 1896.)

This almshouse is kept in a clean and orderly condition, but a poor economy is manifested in an unwillingness to expend money for repairs or improvements. The only money allowed for repairs is derived from the sale of eggs produced on the place. There is no bath-room, and no provision for the separation of the sexes.

There are but two inmates, one being feeble-minded. The warden and matron receive \$375. Receipt of abstract of visitor's report not acknowledged.

## WINCHENDON.

# (Visited May 29, 1896.)

This almshouse is in good state of repair except in regard to windows, which should be replaced by new ones. The house is kept clean and orderly, and is provided with steam heat, and a bath-room which is not sufficiently used. There is no provision for separation of the sexes or of the sane from the insane.

There are nine inmates, two of whom are insane and one is feeble-minded. The warden and matron receive a salary of \$800. The Overseers of the Poor report, June 25, their willingness to make needed changes.

#### WOBURN.

# (Visited February 3, 1896.)

As usual, this almshouse was found clean and in good order. The water-closets should be improved. The inmates being largely men addicted to intemperance, five of them held under workhouse sentences, more rigid discipline is enforced than is usually necessary in almshouses. Parts of the basement are not suitable for occupancy, though needed for use. Separation of the sexes is very imperfect; for the insane there is no provision. Little useful labor is furnished by the inmates.

There are thirty-four inmates, one of whom is insane, and four are idiotic, one of the latter being also epileptic. A veteran warden is in charge, at a salary of \$650. The Overseers acknowledge receipt of visitor's report, and state their desire to improve the present unsatisfactory condition which permits a mingling of pauper and criminal elements.

## WORCESTER.

# (Visited October 28, 1896.)

This large almshouse, among the best in the State, is well equipped for its purpose, and maintains a separate department for the care of its insane, of modern and improved construction; it provides also for the complete separation of the sexes. The efficient management is shown in the order and scrupulous cleanliness found in every department. Regular medical inspection is provided, and paid help, to the number of thirty, are employed, insuring all needed attention to the inmates.

There are one hundred and eighty-one inmates, including six children, of whom eighty-four are insane, four feeble-minded, and three epileptic. The warden and matron receive a salary of \$2,000.

# WORTHINGTON.

## (Visited August 6, 1896.)

This town supports two people in private families,—an insane woman boarding with a relative who receives \$100 a year for her care, and a feeble-minded girl, for whom \$2 a week is paid. Both receive satisfactory care and attention.

## WRENTHAM.

# (Visited March 27, 1896.)

A number of improvements have been made at this almshouse since the last report. Steam heat, a bath-room, a new windmill affording an excellent water supply, and an improved condition of the cellar, are among them. The management is not efficient, as shown in the dirty and disorderly condition of the house. Additional help should be furnished.

There are eleven inmates, including three children; two of them are insane and two feeble-minded. The warden and matron receive a salary of \$300 per year. Receipt of abstract of visitor's report not acknowledged.

# YARMOUTH.

# (Visited October 22, 1896.)

This is an old almshouse, in fair repair, well kept, and homelike. There are no bathing facilities, and the house is heated by stoves. There is no separation of the sexes or of the sane from the insane.

There are eight inmates, among whom are six idiotic persons, and a girl, three years of age, the daughter of one of the idiots. The place is in charge of a matron who has served here many years, and receives \$300 salary. Receipt of abstract of visitor's report not acknowledged.

# REPORT OF SPECIAL VISITOR.

I hereby submit a report of my investigation into the condition of the insane and feeble-minded in the care of the cities and towns of this State. This work, which was begun March 1, includes visits to 1,547 cases, distributed among 244 cities and towns, as shown by Tables 1 and 2.

Although having organized institutions for the insane, the city of Boston has 93 defective cases in almshouse care, as shown by Table 3, and 80 of these are in association with the general population of their respective almshouses. These cases are in general well cared for and are either under medical management or subject to frequent medical visitation. The cases at the Marcella Street Home attend the schools with the other children. Those boarded out from this institution are in country homes, are generally well situated, and are visited regularly and frequently by the Superintendent of the Home and by a visitor from the Institutions Department of the city.

In 995 cases in cities and towns where no separate departments for the insane are maintained at the almshouses, individual case histories have been written. The previous history of many of these cases it has been impossible to obtain, but the prominent points in such information as was obtainable are set forth in Table 4.

Of the 595 insane cases included in this table, 292 have had hospital treatment; and it will be observed that 250 of these have been removed from the hospitals by the Overseers of the Poor. The cost to the towns of maintaining patients at the State hospitals is \$3.25 per week, while the average weekly cost of maintenance of almshouse inmates for last year was \$2.46 per capita. This difference of \$0.79 in per capita support has been the stimulus for the removal of most of these cases from hospital treatment to the inferior care of the almshouses. As a rule, the provision made for these cases is sufficient to insure reasonable care. They are fed, lodged, and clothed with general sufficiency, but medical supervision is practically entirely lacking, and in many of the cases emergencies may be expected that medical custody would anticipate, and either avert or properly provide for. There is a general failure to supply for these cases the discipline in regular habits that is regarded as so valuable at the asylums for the chronic insane, and while 562 of the cases visited are found able to work, the work which they actually perform is in many cases very insignificant; and in many of the cases of women it amounts only to making a bed daily or the occasional sweeping of a room. But few of the class under consideration can be expected to be competent to carry on any kind of work independently, and the resources of the almshouses do not permit of the employment of sufficient attendants to supervise the performance of organized occupation.

It will be noticed by reference to Table 2 that seven cities beside Boston maintain separate departments for their insane in connection with their almshouses; 459 insane and feeble-minded persons were found so provided for. A better organization is maintained in this separate provision than is reached in the ordinary almshouse, and the mentally defective are under better discipline, and in general are better cared for, than they are in the cities and towns where no organized departments for the insane are maintained. These institutions have an organization inferior to State institutions; only a few persons are employed, and in but few of them is there any systematic employment of the inmates.

It has been gratifying to observe the evidences of improvement in the methods of caring for the insane. In many almshouses there are still to be found strong cages that were formerly used for the close confinement of insane inmates. These have almost wholly gone into disuse, and but a small number of cases are subject to restraint or confinement. The latter number 51 altogether, as shown by Table 4. In but few of these is mechanical restraint resorted to, and in most cases where seclusion is required it is resorted to only in emergencies and employed for but short periods.

Illustrating what may be accomplished under intelligent management, I may cite the case of an insane man who was removed by the Overseers of the Poor from a State hospital to the town almshouse, where he had been kept for many years in apartments specially provided for his custody, and from which he was never allowed to go. Under a change of wardens, this man was in a few weeks enjoying the usual liberties of the almshouse premises, and, at his own solicitation, he was made a regular and intelligent worker on the farm.

In several cases where defective persons have been found improperly cared for, committals to State hospitals have been required, and the disposition of other cases is still pending.

Respectfully submitted,

LOWELL F. WENTWORTH.

# RELIEF OF SMALL TOWNS IN THE SUPPORT OF THEIR INSANE.

Under the Act of 1892, providing that towns having a taxable valuation of less than \$500,000 may be partly or wholly reimbursed for the support of their insane in the State Hospitals, forty-seven towns, viz.: Becket, Berlin, Bernardston, Boxborough, Charlemont, Chesterfield, Cummington, Erving, Florida, Granby, Granville, Greenwich, Halifax, Hampden, Heath, Holland, Leverett, Leyden, Mashpee, Middlefield, Monroe, Monterey, Montgomery, New Salem, Pelham, Peru, Phillipston, Plainfield, Prescott, Richmond, Rowe, Sandisfield, Savoy, Shutesbury, Sunderland, Tolland, Truro, Tyngsborough, Tyringham, Wales, Warwick, Washington, Wendell, Westhampton, Whately, Windsor, and Worthington, are now receiving relief in this The law leaves it to the Governor and Council to determine what proportion of the expense incurred shall be reimbursed; and, by their ruling, all towns having a valuation of less than \$200,000 are allowed their expenses in full, while the amount repaid for those of a higher valuation varies according to considerations both of valuation and of The whole sum actually paid back to the towns during the last official year was \$10,578.94, as against \$7,935.63 the previous year, \$6,552.13 two years ago, and \$4,825.75 three years ago.

# THE BOARD'S FINANCES.

The following table shows the Legislative appropriations for expenses under the direction of the Board for the calendar year 1895, the expenses for the same year, the appropriations for the year 1896, and the estimates for the year 1897. The expenses for the year 1896 are not completed, and cannot now be given, but excepting in the cases of the care and maintenance of indigent and neglected children, and the support of pauper infants, they will probably not exceed the appropriations.

It should be noted that, in regard to the last two items of expenditure in this classification, amounting to \$301,-381.87, the function of the Board is simply to ascertain whether the persons to whom payment is made are properly chargeable to the State, and also whether the charges are within the amount fixed by law; and that it is only the remaining expenses, amounting to \$205,657.27, which are actually within the Board's control.

Under the law authorizing advances to the disbursing officer of the State Board of Lunacy and Charity, the Clerk has received from the State Treasurer during the past official year, and advanced from time to time, to visitors and other agents of the Board, for travelling, transportation, and other necessary expenses, the sum of \$31,985.00, all of which has been accounted for in detail to the State Auditor, as a part of the Board's audit.

It is to be added that the Board has received, during the year, in the way of repayment from sundry towns and individuals, as follows:—

| On account of, —   |  |  |  |         |
|--------------------|--|--|--|---------|
| Sick State Poor, . |  |  |  | \$30 00 |
| Temporary Aid, .   |  |  |  | 2 10    |
| Pauper Infants     |  |  |  | 697 74  |

This has been transmitted to the Treasurer of the Commonwealth, and should be credited to the Board's account, although not available for the Board's use.

#### IMMIGRATION.

Under the contract entered into between the State Board of Lunacy and Charity and the Treasury Department of the United States March 28, 1894, and still in force, the State

is reimbursed for the support of such alien immigrants as have fallen into serious distress within one year after their landing. Until last June such reimbursement has been allowed only from the date of verification and full notification in each case, but an appeal to the Commissioner General of Immigration at that time secured a construction of the contract under which reimbursement is allowed from the date of first notification, however incomplete, if it subsequently proves to be an accepted case, under the Act of 1882, and the rules of the Immigration Bureau.

The following immigration statistics have been obtained from the office of the Commissioner of Immigration for Massachusetts.

In addition to the above, 19 alien immigrants who arrived at the ports of New York and Philadelphia were returned to

the countries from whence they came. In addition to the above, 2 males were relieved in hospital who landed at the port of Philadelphia, and 36 males and 22 females who landed at the port of New York.

Of the 118 aliens debarred from landing, 98 were males, 20 females. Of the 21 returned within a year, 11 were males, 10 females. There were also 42 aliens debarred from the Dominion of Canada, of whom 27 were contract laborers, one was insane, and 14 were likely to become public charges.

# Statistics of Immigration at the Port of New Bedford during the Year.

The whole number of passengers arriving was 247. Of these, 236 were taxable alien immigrants, — 235 Portuguese, and one English. Of the 236, 152 were males, 84 females; 15 were under fifteen years of age, 188 between fifteen and forty, and 33 over forty. Their destination was as follows: California 9, Rhode Island 50, Connecticut 14, New York 3, Pennsylvania one, Massachusetts 159. Their occupations: farmers 7, laborers 37, domestics 17, mariners 97, seamstresses 27, dressmakers one, no occupation 50.

# Statistics of Immigration at the Port of Gloucester during the Year.

The whole number of passengers arriving was 48. Of these, one was a taxable male immigrant, native of Italy, between the age of fifteen and forty. Destination, Massachusetts. Occupation, mariner.

The amount of Head Money collected at the Ports of Massachusetts during the year was as follows:—

#### PROCEEDINGS OF THE BOARD.

The Board here presents a summary of its official proceedings from the time of issuing the last Annual Report.

Regular Monthly Meeting, Saturday, January 4, 1896.

Report of Committee on Inspection of Institutions, showing visits made to the buildings of the Medfield Insane Asylum, the Westborough Insane Hospital, and the private asylum of Dr. Selling.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy; Monthly report of the Inspector of Institutions; recommendation adopted, ordering commitments of insane persons from Suffolk County to be made to Westborough Insane Hospital until farther order.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge of inmates of the State Farm, and children in the custody of the Board.

Action on petitions for licenses to maintain boarding-houses for infants.

Report of the Clerk and Auditor.

Voted, That a special visitor be appointed in the Department of the Inspector of Institutions, to investigate the condition and treatment of the insane and feeble-minded in the city and town almshouses.

Action on the matter of diphtheria at the Lyman School.

Regular Monthly Meeting, Saturday, February 1, 1896.

Report of Executive Committee: Appointment of William W. Foster as visitor in the Department of In-Door Poor, and assignment of Charles K. Morton as visitor-at-large in the same Department.

Report of Committee on Inspection of Institutions, showing a visit to the Lyman School.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy.

Monthly report of the Inspector of Institutions; recommendation adopted, ordering commitments of insane persons from Suffolk County to be made to Danvers Lunatic Hospital until farther order. Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm, and the custody of the Board, and eight adoptions of children.

Adoption of the following statement: The members of the State Board of Lunacy and Charity desire to record their sorrow at the loss, by sudden death, of their former associate member, Col. Henry Stone, and to testify to his unselfish devotion to his work during the period of his membership. In his change to an official position under the direction of the Board, by appointment of that body, the members gladly bear witness to his earnest endeavors to carry out the plans suggested by the Board, and his readiness to subordinate all personal opinions to its expressed purposes. As he had been loyal to his country in its hour of need, so after that need had passed was he loyal as a citizen of the State, as a public official, and as a friend; and the Board will cherish his memory as that of a man of unstained integrity, of intellectual ability, of humane nature, and of unselfish devotion to duty.

Action on petition for licenses to maintain boarding-houses for infants.

Report of the Clerk and Auditor.

Special Meeting, Saturday, March 7, 1896.

Appointment of Committee to represent the Board at the funeral of Governor Greenhalge, on the 9th inst.

Report of Committee on Inspection of Institutions, showing a visit to the State Farm.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted: (1) ordering commitments of insane persons from Suffolk County to be made to Taunton Lunatic Hospital until farther order; (2) providing for the selection of criminal insane persons for transfer from the State Lunatic Hospitals to the State Farm.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge of inmates of the State Farm and of children in the custody of the Board; two indentures, and eight adoptions.

Action on petitions for licenses to maintain boarding-houses for infants.

Appointment of Dr. Lowell F. Wentworth as special visitor in the Department of In-Door Poor. Transfer of William H. Brown from the employment of the Board to that of the Insurance Department.

Regarding a communication from Judge Utley, Central District Court of Worcester, addressed to the Governor and referred to the Board, it was

Voted, That report be made to the Acting Governor that, of the sixty Massachusetts magistrates, (thirteen of them from Boston), who responded to communications asking their judgment on the work of the Board's agents in their attendance at the trial of juvenile offenders and neglected children, and their efforts to protect the interests of or otherwise provide for said children, forty-eight were unqualifiedly favorable to such attendance, eleven were qualifiedly so, and one was unqualifiedly opposed to such attendance. In other words, one magistrate states that the Board's agents are of no possible service in determining the guilt or innocence of alleged juvenile offenders, or in determining the character and measure of the discipline to be awarded the guilty; eleven state that, while these agents are of no service in determining the guilt or innocence of alleged juvenile offenders, they are of great assistance in determining the character and measure of the discipline to be awarded the guilty; and forty-eight magistrates state that these agents are of very great service in determining the guilt or innocence of alleged juvenile offenders, as well as in determining the character of the discipline to be awarded the guilty.

Regular Monthly Meeting, Saturday, April 4, 1896.

The Executive Committee report that, at a meeting held by them on the 14th ultimo, action was taken as follows:

Voted, That hereafter no female ward of the state above the age of twelve years shall be released to her home, or placed in a family, until investigation into the propriety of such release or placing has been made by a salaried officer of the Board; and that said officer shall from time to time visit all wards so placed or released, for the purpose of securing their best interests.

Voted, That female officers of the Board shall attend the trials of all offending girls at the several Municipal Courts of Boston, to protect the interests of or otherwise provide for such girls.

The Committee also reported that they had appointed Mary A. Perrault and Annie E. Hancock visitors in the Department of In-Door Poor.

Report of Committee on Inspection of Institutions, showing visits made to the Danvers and Northampton Lunatic Hospitals, the Medfield Asylum buildings, the McLean Hospital, and the State Almshouse.

1897.]

Report of Committee on the removal of insane persons out of the State and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted: (1) instructing the Clerk to communicate with the Acting Governor, suggesting, in behalf of the Board, that when persons are committed to lunatic hospitals under the provision of section 10, chapter 222, Public Statutes, copies of the physician's certificate be forwarded to the hospital authorities, with the order of commitment, in order that said authorities may be in possession of important facts in the history of the patients in question which such certificates contain; (2) ordering commitments of insane persons from Suffolk County to be made to Worcester Lunatic Hospital until farther order; (3) instructing the Inspector to send abstracts of the reports of almshouse visitors to the Overreers of the Poor of the several cities or towns, soon after such visits are made; (4) providing for the transfer of certain criminal insane patients to the State Farm.

Voted, That the Board recommend that the application of Allan Mott Ring, M.D., of Arlington Heights, for a license to maintain a private asylum for the care and treatment of the insane, referred by his late Excellency to the Board for consideration and report, be granted.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm and the custody of the Board, and one adoption.

Action on petitions for licenses to maintain boarding-houses for infants.

Permanent appointment of Annette E. Barnes as clerk in the Department of In-Door Poor.

Special Meeting, Wednesday, April 22, 1896.

Appointment of Dr. William P. Derby as Superintendent of Out-Door Poor.

Report of Executive Committee that they had appointed Esther E. Elwell as temporary clerk in the Department of Inspector of Institutions and Nellie R. Bray as temporary clerk in the Department of Out-Door Poor.

Regular Monthly Meeting, Saturday, May 2, 1896.

Report of Committee on Inspection of Institutions, showing visits made to Taunton Lunatic Hospital, Worcester Lunatic Hospital, Northsmpton Lunatic Hospital, and Westborough Insane Hospital.

Hearing on a representation of the Trustees of Medfield Insane Asylum, and the Superintendent of that Institution, regarding the character of patients recently transferred to the Asylum.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted, (1) ordering commitments of insane persons from Suffolk County to be made to Westborough Insane Hospital until farther order; (2) providing for the transfer of certain criminal insane patients to the State Asylum for Insane Criminals at the State Farm.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted involving action on applications for discharge of inmates of the State Farm and of children in the custody of the Board, four adoptions, and the appointment of an auxiliary visitor.

Action on petitions for licenses to maintain boarding-houses for infants.

Report of the Clerk and Auditor.

Voted, That the Acting Governor be recommended to appoint such members of the Board as may be able to attend, and the Heads of its Departments, as delegates to the National Conference of Charities and Corrections, to be held at Grand Rapids, Michigan, June 4-10, 1896.

Voted. That the Superintendent of Out-Door Poor be informed that it is the general policy of the Board to discourage the permanent separation of infants from their mothers, and, in all cases of infants temporarily cared for by the Board, to secure from the mother, so far as practicable, the payment of at least some portion of the expense of such infant's support.

Adjourned Meeting, Saturday, May 9, 1896.

Action with regard to communications from the Superintendent of Danvers Lunatic Hospital and Massachusetts Homœpathic Society, and consideration of several matters relating to the State wards.

Regular Monthly Meeting, Saturday, June 6, 1896.

Annual election of officers. Mr. Johnson elected Chairman, and Mrs. Codman Vice-Chairman.

Stephen C. Wrightington elected Superintendent of In-Door Poor; William P. Derby, M.D., Superintendent of Out-Door Poor; Charles E. Woodbury, M.D., Inspector of Institutions; and John D. Wells, Clerk of the Board.

Appointment of Standing Committees.

1897.7

Report of the Executive Committee: Action on a case of adoption, and the passage of the following vote:

Voted, That the Superintendent of In-Door Poor be instructed to call the attention of the local authorities to any instances that may come to his knowledge, of neglect or insufficient care and treatment, in cases of minor children supported by any city or town.

Report of Committee on Inspection of Institutions, showing visits made to Worcester Lunatic Hospital and Worcester Insane Asylum, McLean Hospital, and the two branches of Boston Insane Hospital.

Action on petitions for licenses to maintain boarding-houses for infants.

Report of Committee on Removal of Insane Persons out of the State, and action thereon.

Report of Committee on Lunacy; Monthly report of the Inspector of Institutions; recommendations adopted: (1) providing for certain transfers of insane patients; (2) ordering commitments of insane persons from Suffolk County to be made to Taunton Lunatic Hospital until farther order.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm and the custody of the Board, one indenture, and ten adoptions.

Appointment of Auxiliary Visitors for the ensuing year.

Report of Committee on transfers to Medfield Insane Asylum.

Subscription for 75 copies of the Report of the National Conference of Charities and Correction.

Report of the appointment, by the Acting Governor, of Mr. Johnson, Mrs. Richardson, and Dr. Hildreth, as delegates to the National Conference of Charities and Correction at Grand Rapids, Michigan.

### Regular Monthly Meeting, Friday, July 3, 1896.

Report of Committee on Inspection of Institutions, showing visits to Worcester and Danvers Lunatic Hospitals, and Medfield Insane Asylum.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted: (1) ordering

commitments of insane persons from Suffolk County to be made to Worcester Lunatic Hospital until farther order; (2) instructing the Clerk to certify to the Treasurer of the Commonwealth the names of the cities and towns reported by the Inspector of Institutions as having failed to make the Annual Pauper Returns required by Sections 34 and 35 of Chapter 84 of the Public Statutes, within the month of April, 1896, together with the amount of penalty incurred in each instance under the provisions of Section 37 of the same Chapter, and also to forward to the Treasurer at the same time, certain letters of excuse and explanation from the Overseers of the Poor of several of the aforesaid delinquent towns; (3) providing for certain transfers of insane patients.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm and of children in the custody of the Board, and two adoptions.

Action on petitions for licenses to maintain boarding-houses for infants.

Report of farther transfers to Medfield Insane Asylum.

The Clerk submitted a copy of recent correspondence on Immigration matters, from which it appeared that an appeal to the Commissioner General of Immigration had secured the construction of the contract between the United States Treasury Department and the State Board of Lunacy and Charity, agreed upon between the Committee of the Board visiting Washington in February, 1894, and the Immigration authorities, but hitherto denied by the Boston Commissioner of Immigration. The letter of the Commissioner General of Immigration to the Clerk of the Board, dated June 9, 1896, concludes as follows: "When an immigrant is admitted into a hospital, or receives aid under the contract mentioned, it becomes your duty to at once notify the Immigration officials, and at the same time, or within a reasonable time, taking into consideration the condition of the patient and the regular mail service, to furnish them with all the information obtainable as to landing, etc.; compensation will then be allowed from the date of notification, if it proves to be a case under the Act of 1882 and the rules and regulations prescribed by this Bureau." Under the ruling of the Boston Commissioner, compensation has been allowed only from the date of the completed notification in each case.

### Adjourned Meeting, Thursday, July 9, 1896.

Voted, That the Superintendent of Out-Door Poor be instructed that it is the general policy of the Board to refuse applications for temporary aid, under the provisions of Section 18 of Chapter 84 of the Public Statutes, as amended by Chapter 90 of the Acts of 1891, excepting in cases where the need of such aid is not likely to continue beyond the period of four weeks in summer, or eight weeks in winter.

#### Regular Monthly Meeting, Saturday, August 1, 1896.

Report of Committee on Inspection of Institutions, showing visits made as follows: two to the Massachusetts School for the Feeble-Minded, and one each to the Worcester, Taunton, and Northampton Lunatic Hospitals, the Westborough Insane Hospital, the Worcester and Medfield Insane Asylums, the two branches of the Boston Insane Hospital, the State Farm, the Massachusetts Hospital for Dipsomaniacs and Inebriates, and the private asylums of Doctors Heald, Wiswall, Russell, Baker, Norton, Stedman and Paine, and Miss Cooke.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted: (1) providing for certain transfers of insane patients; (2) ordering commitments of insane persons from Suffolk County to be made to Danvers Lunatic Hospital until farther order.

Report of the Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm, and the custody of the Board, and the appointment of two auxiliary visitors.

Report of the Committee on removal of insane persons out of the State, and action thereon.

Action on petitions for licenses to maintain boarding-houses for infants.

Reports of the Clerk and Auditor.

## Regular Monthly Meeting, Saturday, September 5, 1896.

Report of Committee on Inspection of Institutions, showing visits made to Danvers and Northampton Lunatic Hospitals, the two branches of the Boston Insane Hospital, the McLean Hospital, and Dr. Bemis's private asylum.

Report of Committee on removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted: (1) providing for certain transfers of insane persons; (2) ordering commitments of insane persons from Suffolk County to be made to Taunton Lunatic Hospital until farther order.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm and the custody of the Board, one adoption, and the appointment of two auxiliary visitors.

Action on petitions for licenses to maintain boarding-houses for infants.

Action on a bastardy case.

Regular Monthly Meeting, Saturday, October 3, 1896.

Report of Committee on Inspection of Institutions, showing visits made to the State Almshouse, Lyman School, and Westborough Insane Hospital.

Report of Committee on removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted; (1) providing for certain transfers of insane patients; (2) ordering commitments of insane persons from Suffolk County to be made to Westborough Insane Hospital until farther order.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm and of children in the custody of the Board, seven adoptions, and the appointment of an auxiliary visitor.

Action on petitions for licenses to maintain boarding-houses for infants.

Reports of the Clerk and Auditor.

Action on petitions for increase of salaries of certain employés of the Board.

Recommendation that the application of Dr. Ellen L. Keith, for a license to maintain a private asylum for the insane in the town of Framingham, referred by the Acting Governor to the Board for investigation and report, be granted.

Regular Monthly Meeting, Saturday, November 7, 1896.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions; recommendations adopted: (1) ordering commitments of insane persons from Suffolk County to be made to Worcester Lunatic Hospital until farther order; (2) providing for certain transfers of insane patients.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor; recommendations adopted, involving action on applications for discharge from the State Farm, and the custody of the Board, two indentures and eight adoptions, and the appointment of an auxiliary visitor.

Action on petitions for licenses to maintain boarding-houses for infants.

Regular Monthly Meeting, Saturday, December 5, 1896.

Report of Committee on Inspection of Institutions, showing visits made to Taunton and Northampton Lunatic Hospitals, Medfield Insane Asylum, McLean Hospital, State Farm, and the buildings of the Epileptic Hospital at Monson.

Action on petitions for licenses to maintain boarding-houses for infants.

Report of Committee on the removal of insane persons out of the State, and action thereon.

Report of Committee on Charities: Monthly reports of the Superintendents of In-Door and Out-Door Poor: recommendations adopted, involving action on applications for discharge from the State Farm and the custody of the Board, four adoptions, and the appointment of two auxiliary visitors.

Report of Committee on Lunacy: Monthly report of the Inspector of Institutions: recommendations adopted; (1) providing for certain transfers of insane patients; (2) ordering commitments of insane persons from Suffolk County to be made to Taunton Lunatic Hospital until farther order.

Report of the Clerk and Auditor.

Miss Perrault and Miss Tyler constituted assistants to Miss Beale, for the visitation of the homes and court attendance.

Appointment of Grace L. Ordway as visitor in the Department of In-Door Poor.

Increase of salary of an employé of the Board.

Adjourned Meeting, Saturday, December 19, 1896.

Action on estimates for annual appropriations under direction of the Board.

Approval of the following estimates of the Trustees of the State Almshouse and State Farm for the year 1897, viz., for salaries and expenses at the State Almshouse, \$146,700; for salaries and expenses at the State Farm, \$127,400.

Approval of the following estimates of the Trustees of the Taunton Lunatic Hospital for extraordinary appropriations, viz., for construction of bay windows and enlarging of other windows, etc., \$6,000; for general repairs, \$5,000; for gate house, \$5,000; for painting, etc., \$3,000; for new laundry machinery, \$500; for new floors, \$500.

Approval of the estimate of the Trustees of Westborough Insane Hospital, of the sum of \$2,000 to cover the expense of improving the sewage.

On the estimate of the Trustees of Worcester Lunatic Hospital for a building for kitchen and work rooms, patients' rooms, help, etc., it was

Voted, That the Board approves of the erection of such a building, at a moderate expense.

In considering the estimate of the Worcester Lunatic Hospital for the building of two infirmaries at a cost of \$40,000 each, and the estimate of the Trustees of the Westborough Insane Hospital for a building for the treatment of acute cases at an expense not to exceed \$50,000, it was the general opinion of the members of the Board that, while fully approving the desire of the Trustees of these and other Institutions to make special provision for the care of the sick, and for the study and treatment of recent cases, and heartily sympathizing with every effort for the improved care of the insane, the Board should hesitate to indorse propositions for the immediate erection of separate buildings for such purposes. question of incurring the great expense involved in such an undertaking, and imposing a heavy burden on the tax payers of the State at the present time of financial stringency is a most serious one; and it is also to be taken into consideration that Medfield Insane Asylum is still unfinished and but little more than half filled, and that it is too soon to estimate the extent of the relief to the other hospitals which its establishment will finally afford. Moreover, it is an open question whether some other provision cannot be made for these classes of cases in the hospitals, built, as they are,

at great cost, and containing all the appliances necessary for the care and treatment of every form of insanity.

The suggestion was also made that, when the hospitals shall again have become crowded, (as must inevitably be the case at no very distant time), a more economical method of relief might be the erection on the grounds of the several institutions, or in their immediate vicinity, of inexpensive buildings, where a large number of chronic cases could be comfortably cared for at a rate so low that the Overseers of the Poor would find it to their advantage to place there the unfortunates now detained in the various town almshouses, — a change which would result in an improved condition of the almshouses as well as of the insane. It was therefore

Voted, That until the general policy of the Commonwealth in relation to the supply of increased accommodations for the insane shall be more definitely determined, it is unwise and inexpedient to incur additional expenditures for the erection of separate buildings for the purposes designated.

Adjourned Meeting, Wednesday, December 23, 1896.

Approval of the estimates of the Trustees of the Lyman and Industrial Schools, of \$27,000 for salaries, wages and labor, and \$36,975 for expenses at the Lyman School; and \$27,775 for salaries and expenses at the Industrial School. Disapproval of the estimates of \$4,000 for the boarding of boys and \$1000 for the boarding of young girls, the Board being opposed to the extension of this system. While approving of the erection of a new house for girls at the State Industrial School, the Board considers the estimate of \$18,000 for building and furnishing the same larger than necessary.

Adjourned Meeting, Monday, December 28, 1896.

Adoption and signing of draft of Annual Report.

Number and Location of Insane in Massachusetts.

Norn: - Under the head of "Extraordinary Expenses" are included \$64,883 for "Land or Improvements," and \$19,616 for "Miscellansous Expenses," which have sometimes heretofore been reported among the expenses of administration. The former amount covers the cost of new almshouses or of additions to old ones, improved systems of heating or water supply, and other conveniences; the latter amount covers expenses not perhaps in their nature extraordinary, but considered as not belonging exclusively to the current year's account. Of the total extraordinary expenses reported \$60,649 was mainly met by direct appropriations for improvements; the remaining \$23,850 has been paid from the common pauper appropriations, and probably for that reason has also been reported among ordinary expenses. The aggregate net expenditures on pauper account amount to \$2,261,169. Table I. -- Part II. -- Numbers Supported and Relieved -- Continued.

THE PAUPER ABSTRACT.

\* Distributed as follows: - Whole Number in School for Fechle-Minded, 175; in other institutions, 1,170; in private families, 976.

Number March 31, 1996, in School for Feebie-Minded, 162; in other institutions, 730; in private families, 773. Average Number in School for Feeble-Minded, 163.4; in other institutions, 604.3; in private families, 786.2.

† Really the mean between the numbers reported at midwinter and at midsummer.

Norm. - Of the 18,367 persons who received full support within the year, 864 died, 580 of them in the almahouses. Of the 60,664 persons (excluding vagrants) who received partial support, 26,114 are reported as children under 16 years of age; 13,431 had settlements in the towns where relief was given, 9,200 were settled in other places in the State, and 88,068 had no known settlement. Vagrants (acts of vagrancy) reported, number 227,466, and cost the community directly \$23,626, besides adding \$9.070 to the current expenses of the almahouses for entertainment of the 48,718 tramps todged therest. In this number, 861 women are reported.

Norm. - The average number receiving partial support represents the mean between the largest and the smallest number aided at different periode. It is not a dally average. Previous to 1882-4 the amounts reported under the head of administrative expenses doubtless contained considerable sums expended for permanent improvement at the almahouses; the figures given for 1893-6 are intended to show only current expenses.

### CENSUS OF PAUPERISM.

<sup>\*</sup> Approximate.

Note.—The figures for the State Primary School exclude children committed by the courts to the custody of this Board; for the State Almshouse and State Farm they exclude cases of town settlement. The totals for State Poor, and the general total, include for Rainsford Island Hospital (abolished in 1866), 144 in 1863, 35 in 1864, 121 in 1865, and 23 in 1866.

<sup>†</sup> Medfield Insane Asylum in 1896.

### AVERAGE NUMBER OF IN-DOOR POOR SINCE 1863-

Table VIII. — Average Number of the State, and the City and Town Poor in the Institutions Each Year from 1863.

<sup>\*</sup> For 34 weeks, equivalent to 18 for a year. 
† For 9 months, equal to 65 for the year.

† Medfield Insane Asylum in 1896.

NOTE. — The figures for the State Primary School exclude children committed by the courts; those for the State Almshouse and the State Farm represent only the *State* Poor, the insane at those institutions who have settlements being counted among the "Towns' Poor in Hospitals and Asylums." The totals for State Poor, and therefore the general totals, include for Rainsford Island Hospital, 116 in 1863, 88 in 1864, 68 in 1865, 101 in 1866, and 1 in 1867.

GENERAL SUMMARY SINCE 1879.

TABLE IX. — General Statistics of City and Town Paupers for Eighteen Years, with Number and Cost of Slate Paupers added.

• This applies to all the inmates at Monson and Bridgewater, also to the poor and neglected children in a special "Home," in Boston.
† None of the inmates at Monson and Bridgewater are here included, being given under the previous heading.

Approximate.

Nore. — The "State Poor Partially Supported" the "whole Number Partially Supported" of the city and town poor, in which also there are many duplications. Among the "state Poor Partially Supported" there are also many duplications in the unuber given for 1879. Among the "State Foor Fully Supported out of Almshonese" are included the children of the Massar-buscuts infinit Asylum, for whom the State pays. The cost of supervision by the State authorities is not included in this table; but the town almshouse expenses include, in part at least, the cost of general supervision.

VALUATION OF STATE INSTITUTIONS.

## FINANCES OF THE STATE INSTITUTIONS.

Table X. — Valuation of the State Institutions, Sept. 30, 1896.

NOTE.—The seven hospitals reported 28,771 discharges in the seventeen years; but in some of the earlier years the classification was incomplete. The latter remark applies also to the three following Tables, XXX., XXXI. and XXXII., in which only the classified cases are included out of the admissions of seventeen years.

## APPENDIX II.

Names of Persons sent from Boston out of the State, or to places within the State, by the Superintendent of In-door Poor, during the year ending September 30, 1896, under the provisions of Public Statutes, Chapter 79, Section 14, viz.:—

"SECT. 14. If a state pauper who has received a permit from the overseers of the poor of a city or town to become an immate of the state almshouse expresses a preference to be sent to any state or place where he has a legal settlement, or friends willing to support him, the board may remove said pauper, instead of committing him, if in its judgment the interest of the commonwealth and of the pauper will be promoted thereby; but no person shall be so removed, unless, in the judgment of said overseers and of the board, he will become a charge to the state for at least one year; and the board shall return, in its annual report, the names of all persons so removed, the places whence removed, and the cost of each removal."

# Commonwealth of Massachusetts.

# TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the Lyman and Industrial Schools respectfully present their annual report for the two reform schools under their control.

### LYMAN SCHOOL FOR BOYS,

AT WESTBOROUGH.

Fifty years have now elapsed since the Lyman School for Boys, formerly known as the Massachusetts State Reform School, was established by act of Legislature as a manual training school for the employment, instruction and reformation of juvenile offenders. Founded at the instance and with the financial aid of the Hon. Theodore Lyman, for whom the school was later named, it was a pioneer among institutions of its kind. Now similar establishments have sprung up in many other States, and the problems connected with this line of reformatory work command wide attention both from philanthropists and from students of social science. The methods now pursued at the Lyman School are therefore no mere accident nor the result of any snap judgment, but have been adopted in the light of much discussion of the subject by specialists and of careful observation and experiment on the part of those in control.

Commitments to the Lyman School are by sentence of the court for "any offence not punishable by death or imprisonment for life." The term is always for minority. This is in

effect a commitment to guardianship, and places upon the school the whole responsibility for the boy's readjustment to a normal relation with society.

The methods relied upon to accomplish this result are: first, a period of restraint and discipline, varying in length and in character according to the needs of each individual case; and, second, a period of partial freedom, when the boy, restored to a normal social relation, is still not wholly free, but is guarded from the temptations which his character is least likely to resist. Experience shows that for reformatory purposes this second period is of fully equal value to the first, and it is one which in most reform schools is far too little regarded; indeed, until recently it was far too little regarded at the Lyman School.

The main branch of the Lyman School is located upon the southerly slope of a hill sufficiently removed from the town of Westborough, and a newly instituted branch of the school lies some seven miles beyond, in the neighboring town of Berlin. The whole number of inmates in the two branches of the institution on Sept. 30, 1896, was 268, of whom 250 were at Westborough and 18 at Berlin.

The headquarters of the institution are at Westborough, and here all newly-committed boys are delivered. Each one on his arrival is examined by the superintendent, and all that can be learned either from the boy's testimony or from other sources is recorded. Since the branch school was opened last November newcomers under thirteen years of age and a few over thirteen whom it is judged appropriate to classify in the junior division are transferred to Berlin; \* the rest are assigned to one or other of the eight family houses on the grounds at Westborough.

At Westborough a well-systematized course of education, physical, manual and mental, has been gradually developed, each step having been tested by observed results. The superintendent Mr. Theodore F. Chapin has devoted himself for eight years past to developing methods, educational in the broadest sense and appropriate to the special needs of this special class of boys. The details of this educational system

Pains are taken that boys assigned to Berlin shall not come in contact, pending their transfer, with Westborough boys.

need not now be entered into at length, having been much dwelt upon in past reports. Suffice it to say that, as to the boys' bodies, by careful attention to daily personal hygiene and by a regular systematic course of physical development exercises they are brought into as normal a condition as they can attain. One who has an opportunity to compare the physical condition of an average lot of Lyman School boys with that of a similar set of boys outside cannot fail to note that, so far as a good, clean, well-developed body may be a helpful basis for sound mental and moral development, the Lyman School boy has a distinct advantage.

In more purely mental training, while the importance of the schoolroom is not underrated and much good work is accomplished there, the chief educational emphasis is placed upon the training of the mind through the hand and eye in the manual training shops. The educational value of manual training, now universally recognized and rapidly becoming an indispensable part of every public-school system, applies with special force to such boys as these. Their past lives have been of almost exclusively physical rather than mental activity, and they can therefore respond the more readily to educational methods which call into play and train their physical powers. As a whole they are greatly interested in this part of their work and make good progress in it. It proves an invaluable means of teaching how to use the hands in absolute obedience to the will and the wits, and conversely it is a means of training will and wits to profitably direct the hands. In a word, it reaches the reform-school boy where he is and develops and trains his higher faculties in a way that is agreeable to him and with which he can and does healthily co-operate. Such a willing partnership between the boy and the school can hardly be compared with the old relationship between a forbidding prisonlike institution and its sullen inmate.

While the Lyman School has nothing of the prison in its aspect or its methods, it is nevertheless a place of strict if not severe discipline. The boys are required to stand straight, to answer promptly, to step in line, to be busied at one task or another pretty much from early morning to night. They work, and they work hard, at household and farm labor, as well as in workshops, in schoolroom and in manual training classes.

The time of detention at Westborough can never be regarded as a holiday. Rather it is a period of strenuous exertion, calculated to send a boy out into the world inured to simple living and hard work. Certainly it will never tempt the slothful by offering a life of relaxation and ease.

A tangible outcome of the manual training teaching is visible in the recently completed barn, built entirely by boys' labor, under the direction of the engineer and two of the masters of the school. The timbers came in the rough, and were all planed and fitted together by boy labor. The building has a capacity for seventy-two cows, and is constructed according to the latest sanitary ideas.

A further improvement in way of buildings which is recommended is a central schoolhouse, where the school work, now carried on at a great disadvantage in the various family houses, can be concentrated. The trustees have long recognized the mistake of ever having tried to educate the boys according to family groups, and for several years past the strictly family system has been modified to the extent of sending some boys of each family to school in other households. This allows a certain amount of grading, but in many ways it is an awkward arrangement. A central school building would allow better schooling in every way, stimulating the boys by the keener competition of a larger group, allowing specialized and therefore more efficient teaching, and enabling the superintendent to have the schoolrooms under his own more immediate direction. Also it would enable him to meet the boys all together in a way that is now only occasionally possible. Outside of school hours, the boys would still eat and sleep and work and play in family groups, and thus it is believed that nothing valuable in the present system would be lost.

As before stated, all the boys have been committed to the school during minority. At Westborough a marking system is in use, under which a well-behaved boy can earn his release in fifteen months or less. Be the time longer or shorter, the name of each boy, as he attains his honor grade, is presented to the trustees, who must decide whether he may safely go to his own home or whether his chance of well-doing will be

<sup>•</sup> The average time of detention of boys sent out for a first trial last year was twenty-one months.

greater in new and more favorable surroundings. In the consideration of this most difficult and critical question the trustees are aided by the superintendent's knowledge of the boy's character and by the two Visitors of the school, one or the other of whom has personally investigated the home of the boy in question, and who know, if the home is rejected, what other openings may be available. Many times, of course, the merits of a case are easily determined; but again the pros and cons are so complex that, without the fine shades of evidence such as the superintendent and the Visitors can furnish, discriminating action would be impossible.

In any case, whether the decision is that a boy shall go home or not, he remains in the custody of the school until he is twenty-one, and is subject to recall or even to transfer to the Massachusetts Reformatory for bad conduct. The period of probation is far more effective than formerly now that Visitors responsible to the trustees and who have made the boy's acquaintance in the school follow him out into the world and bridge over the dangerous step from the strict rule of the institution to a state of complete freedom.

The Visitors, Mr. Walter A. Wheeler and Mr. Asa F. Howe, have both shown themselves admirably qualified for the work in hand,—a work that demands at once sympathy, decision and infinite discrimination. Some boys, weak and only kept steady by compulsion, must be held sharply under the school authority; others need simply a watchful interest and readiness to act if difficulties arise; while others, having demonstrated their ability to stand alone, may best be left very much to their own devices.

A sharp watch is always necessary in behalf of boys bound out to farmers. Usually the farmer has agreed that, if the boy is satisfactory, besides being clothed and fed he shall be paid fifty dollars when he is eighteen, or a proportional part of this sum in case he leaves before his time expires. It is needless to say that many a farmer is ready to find a boy unsatisfactory as pay day draws near, or to put him off with a promise; and without the Visitor to enforce the boy's rights they would be too often little regarded. Formerly these bargains were loosely made and very imperfectly enforced; now within this year the sum of \$1,175.87 was collected by the Visitors in

behalf of 43\* boys, and placed in bank to be paid over to them when they attain their majority.

The Visitors appear to have been uniformly welcomed by the boys, and parents have frequently expressed their gratitude for the help thus given them. In several cases when boys have been out of work and discouraged at their prospects in the city they have been glad to avail themselves of the Visitor's good offices to secure work upon a farm.

The report of the Superintendent of Visitation on page 94, gives the occupations of all the boys, no less than 508 in number, who were subject to visitation on Sept. 30, 1896, and gives also much other interesting information relative to this branch of the school's work. The number of visits recorded to probationers by the Visitors is 1,043, and the number of homes and places investigated 191; the number of visits by trustees is 74, and of investigations 15.

The activity of the visiting department and its value in the single matter of keeping the numbers to be maintained in the institution within anything approaching its capacity is shown by the following figures:—

```
1893-94, Released on probation, . . . . 114. Returned, 33 † 1894-95, Released on probation (18 boarders), 188. Returned, 60 † 1895-96, Released on probation (29 boarders), 212. Returned, 87 †
```

It will be seen by the above figures that in spite of the large increase in the number of returns (necessarily resulting from the fact that runaways from their places and those who otherwise misbehave are looked up and recalled to the school more sharply than ever before) there has been a net gain in the number of boys cared for outside the institution; *i. e.*, the increase of placings this year exceeded that of two years ago by 98, and the increase of returns by 54, giving a net increase of placings over returns of 44, — a number sufficient to fill one family house and to almost half fill another.

As a result of fifteen months' experience, the trustees are emphatically of the opinion that no more important advance in

Boys over 18 usually collect and spend their own wages while boys under 16 cannot earn more than board and lodging.

<sup>†</sup> These returns do not include runaways from the school who were brought back, or boys returned on transfer from the State Primary School.

reformatory work has been made in recent years than was inaugurated by the legislation authorizing the employment of these Visitors.\*

The present law is defective, however, in that the Lyman School Visitors are unable to act in placing out boys until, in addition to their own investigations, an investigation has been made by the State Board of Lunacy and Charity and a report of the same received at the school; also that probationer must in addition to school visitation be visited at least once a year by agents of the above State Board. The trustees recommend that these provisions, which are inapplicable to present conditions and involve a wholly unnecessary expenditure of public money, be so revised as to free the Lyman School Visitors from cumbersome restrictions and to allow the supervisory Board to exercise a wise discretion in its method of inspecting this branch of Lyman School work.

The branch school at Berlin has been open for only eleven months, and as its aims and methods are wholly different from those pursued at Westborough, it seems proper to describe this new departure with some detail. It grew out of the recognition that for some juvenile offenders institution training of any kind is unnecessary and therefore undesirable. boy of ten or twelve years old whose lawlessness presumably arises from the bad management or bad example of his parents or the seductions of life in the street, the trustees have long believed the best course would be to try whether new interests and the rule of a sensible woman whom he had never defied, as he has his mother, with impunity, would not suffice to bring the young rebel to terms. Accordingly when fifteen months ago on the closing of the State Primary School boys of from eight to twelve began flocking into Westborough, instead of seeking to erect another cottage there, the trustees began to board them out in carefully-selected farmers' families. while it was felt to be undesirable to associate these young children even temporarily with the older boys, and as all the cottages at Westborough were so overcrowded that some new quarters were imperatively needed, the Berlin farm with its

<sup>\*</sup> Chapter 428 of the Acts of 1895.

substantial buildings was acquired \* and set apart for the use of the younger class of children.

With the immediate object in view of fitting the boys placed at Berlin into families, its arrangements and methods are modelled as closely as possible on those of a natural household. The old-fashioned farmhouse itself has nothing of the formal aspect of an institution, and no attempt is made to hold the boys up to a rigid discipline; rather the motherly woman who is at the head of the establishment tries to get into the confidence of her little charges and to rule them as any wise mother rules her own children. She and the young farmer and his wife who help in the care of the boys live with them on the most informal terms; there is thus opportunity to pick out those who can safely be placed at board, while the more lawless ones can be somewhat tamed before being imposed upon a private household. It is gratifying to note how readily these rough little fellows yield to civilizing influences and become obedient and gentle, and ambitious to be counted worthy No doubt, however, the fact that Westborough, of trust. dreaded from the one night spent there all alone under lock and key, is known to be the fate of any persistently naughty boy, goes far to make severe discipline unnecessary at Berlin.

Of the 44 boys so far tried at Berlin, 3 were transferred back to Westborough on the ground that its discipline would be better suited to their individual needs, and 3 others were returned there from places; of these latter, one whose offence was slight will soon be tried in another place, while the rest will be required to earn their release as if they had been classified from the first at Westborough. It is intended that no boy who has misbehaved in a place shall ever go back to Berlin.

The way in which the discipline of Berlin and Westborough interact is illustrated in the case of a boy sent to the Lyman School by his widowed mother because he had gotten wholly beyond her control. After six months at Berlin he went out to a place with a full determination to rule his wilful ways; but with the first days of freedom his old wilfulness reasserted

<sup>•</sup> The Lyman fund was originally used to buy and fit up the Berlin property, the Governor concurring with the trustees that it would be injurious to these young children to defer making provision for them till the Legislature could act. Later when the Legislature met, the property was purchased by the State in behalf of the Lyman School.

itself, and the farmer wrote post haste to have the boy removed. He was removed,—but to solitary confinement at Westborough, and after five days was tried again in another place. There he has given satisfaction, and when he has continued to do well for a sufficient length of time he can go home and be a comfort to his mother. "If ever a boy was trying to get home, Fred is," is the record given him by the farmer.

In the case of another boy the mere name of Westborough was efficacious: during a three-weeks stay at Berlin he had conceived a great affection for the young house master, and when placed out he kicked and screamed to go back. When given to understand, however, that if returned it would be to Westborough, not to Berlin, he concluded to be good where he was, and he soon grew contented and happy. When seen a few months later by one of the trustees, his talk was all of the interests of the farm and of the kindness of the young farmer. "He is real good, he gives us lots to eat and he lets us ride the horse and sometimes he takes us to the store and we helped him plow the field," etc. This boy has miserable belongings, and he will probably live upon a farm until he is grown up.

The total number of boys boarded out since the experiment was initiated in August, 1895, or placed without board after a short stay at Berlin, is 47. Of these, there are now:—

| . 2  |
|------|
| . 5  |
| . 28 |
| . 10 |
| 47   |
|      |
| . 2  |
| . 1  |
| . 1  |
| . 1  |
| . 1  |
| . 2  |
| . 2  |
|      |

Two other boys, each returned twice for running away, are now again on trial.

Of the above 47 boys,\* 25 have so far given no cause for anxiety nor been the subject of complaint; only 4 have been runaways, and they were all brought back to Westborough. 2 of them however to be soon given another trial. Only 7 others have as yet been guilty of any serious misconduct. But of course it will not be till a typical group of these children are grown up that one can pronounce with certainty as to the outcome of the boarding system.

The question of returning these children to their own homes on probation is one as to which the trustees can only feel their way. In the attempt to decide this and similar questions the trustees take pains not only to acquaint themselves with the individual children while in the school, but to visit them in their boarding-places and to follow them up personally when they go home.† In several cases before a child was sent back one of the trustees has formed the mother's acquaintance in the hope of securing her co-operation in the management of her boy.

Tony used to be called a bad boy by the police; but his home, though poor, is respectable, and his heart is very tender toward his mother. He is a manly little fellow, and bore his homesickness like a hero. After six months at board he went home; he brought back his farming interests to the city, and takes great pride in the little garden he has planted in the front yard. His teacher says that he shuns all his former bad companions and that there is not a better boy in her school.

Georgie, ten years old, was a terror in his neighborhood; but four weeks at Berlin showed him to be a well-meaning, honest-hearted and particularly lovable child. He is now boarded with people who call him an unusually good boy and who will probably give him a permanent home.

Frank, whose father used to find him wholly unmanageable, has been an obedient and exceptionally good boy both in Berlin and in his boarding-place. As his home is respectable, it is to be hoped that when he gets older he may go back and have no mortrouble.

Louis, after two months at board, was taken away because an uncle offered him a good home; but he and his caretaker had become so attached that both cried heartily at parting. "It seems as if I couldn't let that boy go," the farmer's wife exclaimed.

"Leander is my right-hand man," is the record of another little boarder whom the police had called "a dreadfully bad boy." He is home again now and it remains to be seen whether or not his old habits will reassert themselves.

Willie, with a very bad record at home, is now trused with money to trade at the shop, and has never once betrayed his trust.

Benjy, however, cannot be taught to tell the truth, and he has stolen from his kind caretakers; but they forgave him, because he confessed with genuine penitonce, and he promises he will never do such a mean thing again.

Tom and Georgie, the latter only ten years old, seemed both to be as bad as hoy-could be, and, showing no improvement after ten months at board, they were recalled to Westborough and will stay there for a considerable season.

The following details as to individual children will illustrate their varying characters and fortunes:

<sup>†</sup> Besides the boarders who have gone home, 4 have gone direct from Berlin.

During the first months of the boarding experiment the expense was borne from the Lyman fund; since January, 1896, the expense has been met from an appropriation of \$3,000 granted for the purpose by the Legislature.\* A slightly increased appropriation will be needed to carry on the work another year.

The total equipment at Berlin cost \$8,500; of this, \$5,250 was for the purchase of the property (there are some ninety acres of land in the estate) and \$3,250 for repairs and furnishings.† This is less than half what a new cottage at Westborough would have cost.

The running expenses of the Berlin farmhouse are inconsiderably greater than if the little family were located in a separate cottage on the grounds at Westborough. So far \$60 is the total spent for farm labor there, and the crops, planted, tended and harvested by boy labor, have been abundant. All the supplies not raised on the place are given out on requisition from the storeroom at Westborough the same as to the other cottages. Three officers are all that are needed at Berlin, the washing and most of the baking being done at Westborough. There is no question that, were the State called upon to make provision for this whole group of little boys, boarders included, in new quarters at Westborough or elsewhere, the expense would be very much heavier than under the present arrangement. The Berlin farmhouse is amply large for all probable demands upon it. The houses at Westborough, on the other hand, have remained overcrowded in spite of the relief granted by the Berlin annex and of the unprecedented number placed out, and it is possible that it may be necessary to ask for another cottage.

<sup>•</sup> The rates paid for the present boarders are: -

| 4 children,  |  | \$2.00 a week and clothing extra.                         |
|--------------|--|---|
| l child, .   |  | 2.00 a week and clothing by caretaker.                    |
| l child, .   |  | 7.00 a month and clothing extra.                          |
| 17 children, |  | 1.50 a week and clothing extra.                           |
| 5 children.  |  | 1.00 a week during school term and clothing by caretaker. |

All but 4 of the above are under thirteen years old, and 11 are under twelve. So far there has been no dearth of boarding-places, but places without payment for boys under thirteen are scarce.

<sup>†</sup> Many of these were bought from the old State Primary School property.

The Lyman School opened the year with 264 inmates and closed with 268, of whom 18 were at Berlin. The whole number of individuals in the school within the year was 458; the average number was 264. The number newly committed was 144 and the number placed out on probation 212, of whom 87 went to their own people, 96 to be self-supporting in places and 29 were boarded. The number returned to the school from their homes or places was 87, and 7 runaways were likewise returned. There were 8 transfers to the Massachusetts Reformatory.

The total number of boys whose names are upon the books of the school Sept. 30, 1896, as under twenty-one years of age is 985. Of these, 268 were in the school and 46 had been discharged as unfit subjects, returned to court as above the age limit when committed, placed in the Massachusetts School for the Feeble-minded, or died, leaving 671 outside the institution but still in its custody, of whom 508 are on probation and subject to the care of the Lyman School Visitors, while 163 have for all practical purposes passed beyond control. pages 39-41 is an elaborate set of tables, showing, so far as possible, the moral condition of the above 671 boys. planned that hereafter comparative tables on these lines will be carried along from year to year. Fuller sets of statistics than ever before as to the inmates and the finances of the school will be found on pages 38-49 and 65-78.

The appropriations for the Lyman School were: for salaries and wages, \$27,000, for current expenses, \$40,000, - total. \$67,000 for the institution; to be expended outside the school. \$5,000 for visitation and \$3,000 for boarding. The expenditures in behalf of the institution from Oct. 1, 1895, to Sept. 30. 1896, were \$63,793.48. Approximately \$2,500 of this appropriation was spent on boys outside the institution; i. e., on outfits or other clothing, on railroad fares, etc. The per capita cost of the school was \$4.61; the per capita expense of visitation was about 17 cents a week. The whole sum spent in behalf of the boys under the care of the school either as inmates, probationers and boarders, was \$69,276.42, or approximately a per capita of \$1.76.

The comparison of the per capita of the school for the last six years shows:—

| 891, |   | • | • |    |   |   |   |   | \$4 44 } | <b>e</b> 0 10 |
|------|---|---|---|----|---|---|---|---|----------|---------------|
| 892, | • |   | • |    | • | • |   |   | 4 75     | • • 13        |
| 893, |   |   |   |    |   |   | • |   | 4 31 }   | 9.06          |
| 894, |   | • |   |    |   | • | • |   | 4 75     | 9 00          |
| 895, |   |   |   | •  |   | • | • | • | 4 46 }   | 9.07          |
| 896, |   | • |   | ٠. |   |   |   |   | 4 61 \$  | 9 01          |

By thus grouping the figures it is apparent that the per capita cost has fallen of late rather than risen. The average for six years is \$4.55. This is no doubt a high rate; but if the Lyman School shall succeed in reinstating a goodly number of sometime law-breakers as honest, law-abiding citizens, the money spent in bringing this result to pass will be amply repaid the Commonwealth.

# THE STATE INDUSTRIAL SCHOOL FOR GIRLS, AT LANCASTER.

The purpose of this school is to secure for young offenders, whether reckless or simply misguided, a season of absence from temptation, and, that which is still more important, a year or more made up of well-filled days, each hour having its assigned duty, which is made, if possible, an absorbing occupation. Immediate recognition of good conduct is given, and frequent inducements to deserve such recognition are furnished; so that almost invariably the year in the school brings about cheerful acquiescence in its requirements, with an improved condition of health and intelligence.

The trustees fully understand the objection to bringing together, even in groups of twenty-five, girls who have had experience or at least a knowledge of evil from which girls better born and bred are sheltered. They would be very glad to find virtue enough in a girl's own home or in some other home to

secure her reformation without commitment to any institution. Unfortunately, the girl's own home is the very place from which she has been removed, and no other home can be secured for a girl who has been "idle, vicious or vagrant," until industry and other softening influences shall have replaced bad habits by good habits, and little by little developed in her some womanly instincts and capacity for earning her way by the domestic arts and labors.

There are in the Lancaster School five separate households, very carefully classified according to the character of the girls before commitment, and there is no promotion from one family to another and no association between these different groups of girls except as they sit beside one another in chapel, or meet, after having advanced to the roll of honor, at the occasional festivities, in which the officers kindly take part. Separation of one group from another is of the greatest importance in a school for the reformation of girls who are more often guilty of offences against good morals than of offences against person or property. While some of them have lost character, others have simply been in danger of so doing, having been arrested upon complaint of parent or guardian, in order to rescue them from bad companions outside, and the trustees appreciate the responsibility laid upon them to keep the more innocent from contamination by the more degraded.

The matron of each household consults with her assistants as well as with the superintendent as to the most suitable ways of disciplining, training and interesting the special group she has in charge; while the ultimate aim of all the officers is to bring the girls to a fresh stand-point, a broader outlook, a more sensible view and a purer ideal of the outside life to which they are soon to return, equipped with skill enough to earn an honest living.

The State Industrial School deals with three sets of girls: (1) those whose circumstances have been so discouraging as to account in great measure for their misconduct; (2) those whose innate tendency to evil and lack of interest in things good and pure would seem likely to set at naught any effort to bring about a real reformation of their lives; (3) those whose lack of intelligence is so marked as to render them incapable, if placed out, of ever protecting themselves, and

who must therefore be considered unfit subjects for a course of training the whole purpose of which is to prepare the pupils for earning their way where their work is in constant demand, in families out in the world. We have lately heard of a girl of defective intellect, from another institution, who before the age of twenty-six years had borne six illegitimate children. course of training could avert from her such dangers nor secure the community from the unwelcome burden entailed upon it by her feeble-minded offspring. Seven girls, originally committed to the Lancaster School, defective in intellect as well as vicious in their tendencies, have spent more or less time in Tewksbury Almshouse this year, one of them being an epileptic, one becoming insane, one having borne and a second about to bear her second illegitimate child. There is no legal restraint which could hold such persons in the almshouse past their twenty-first birthday nor prevent a recurrence of their misconduct; they cannot be held responsible for their conduct because it is not in their power to behave otherwise when subjected to temptation; and, even if transferred to Sherborn Prison, they would be at large upon completion of minority. There is need of further legislation in their behalf. We do not refer to idiots, but to those who are at once feeble-minded and vicious.

We have mentioned the three sets of girls who come to the school. While the distinction is often quite marked, there has been found no key to character by which the magistrate, the State agent or the superintendent of the school can in every case decide in advance that for one girl there is hope; for another, no hope. The work of reclaiming young offenders is full of surprises, and must be undertaken with patient acceptance of its difficulties.

The gymnastic exercises in which the girls are now trained are such as are used in the public schools, and are giving to minds and bodies that are inert and undisciplined just the stimulus they need.

During the long illness and slow convalescence of the superintendent, her staff of officers carried on the school with a loyalty that is above all praise. Accustomed as they had been to assume the responsibility for their several households and to being accredited with the fruits of their thought and labor, they continued upon the same general lines which Mrs. Brackett had laid down for and with them, the trustees lending a hand, but all agreeing that they could not fully carry out Mrs. Brackett's work, because they could not fully grasp her aims and methods. The officers of the visiting department of the State Board of Lunacy and Charity have also exerted themselves to the utmost to help on the placing out of the girls who were candidates for places.

Two cases of hysterical temper have severely taxed the officers of the school, — one a girl of almshouse inheritance for generations, the other belonging to a family one member of which has just been committed to a hospital for the insane. The former has been much improved by the healthful out-of door work under the care of Miss Morse, our invaluable assistant farmer, with whom groups of girls may be seen, daily, dropping seeds, weeding, cutting corn or gathering in fruits or vegetables. The other hysterical patient has learned to exert so much of self-control as to give hope for her future.

Among the triumphs of the year is to be counted that of a very intelligent girl over her own haughty, wilful disposition, until she has become so efficient as to fill a place in a family where she can begin to earn by housework the means necessary for carrying on her education.

If to be forewarned is to be forearmed, it is a good sign to find a girl on the way to her first place, saying to the Visitor, "Now the temptations will begin." Unfortunately, all does not rest with the girl herself. There are too often complicated conditions to be met; sometimes relatives who, through mistaken kindness or less good motives, will prevent the girl from carrying out the good resolutions she may have formed. Again, there are evil-minded men and women in every neighborhood, and occasionally, though rarely, some former schoolmate to lead her astray.

Sometimes there is lack of wise management on the part of the employer. As a rule, we find the mother of a well-ordered household glad of the opportunity to befriend the hired girl; but there are exceptions to this rule, some employers giving too much liberty, others forgetting that the hired girl needs young companions quite as much as her own daughter needed them when of the same age.

The trustees cannot sufficiently thank the Visitors, paid and

unpaid, for their willing help. Last year a young woman came to one of the trustees to ask for work for her husband, who had accidentally lost his steady employment. One could hardly recognize, in the fresh, healthy wife of a respectable workingman, the once troublesome girl over whom the Visitor had worked hard and of whom she had at one time almost despaired. A girl who is soon to receive her honorable discharge writes of her Visitor, who has lately died, "I should never imagine I should be so lonely without her. I almost forget, sometimes, that she is dead, and, before I think, will say to Auntie, 'I guess I will go to see Mrs. D.'"

It is the earnest wish of the trustees that, for the sake of the girls placed out from the Lancaster School, the system of local volunteer Visitors, initiated and developed under the State Board of Lunacy and Charity, may be long continued and so directed as to be kept in a state of highest efficiency. believe that women of well-recognized position in their districts will always be found willing to devote a portion of their busy lives to helping these young strangers to win such respect and friendship as their conduct may deserve. These volunteers have in countless ways extended hospitality to the girls, letting them come to their houses on their days out. securing social and other privileges of the place and co-operating with their employers in managing them when indiscreet or otherwise troublesome. There is little danger that this good work will be overdone. Until a girl is well fitted into a new place she needs to feel that she has a friend within reach, and the Visitor should be glad of this opportunity to make acquaintance with the girl. Again, when social relations outside the family are developing, such a Visitor is especially needed. for she can incidentally gather information and quietly keep watch over the girl without danger of calling too much attention to her affairs; she can, through channels not open to an outsider, discover the dangers that lurk under cover of respectability among the people of her own town. From the first investigation of an application to the final decision whether or not a girl shall remain an inmate of the family, a good local Visitor has, for girls between fourteen and twenty-one years of age, advantages over any outside investigator. Meantime this local volunteer stands in need of warning and of criti-

cism, as well as of encouragement, until she becomes fully awake to the dangers and perplexities inseparable from such work. If earnest in her endeavor, she would surely welcome frank criticism and suggestion, brought to her own door by some one equally in earnest in this difficult enterprise, - the caring for other people's children. A volunteer, if invited to take part in such work, should be charged with full responsibility, and then held so strictly to her duty that whenever she may become preoccupied by other cares she may feel herself bound to lay her visiting aside. The development of the work of carrying these young girls safely through their minority will be found worthy of the best study by college graduates, among whom some of the best Visitors have already been found, while these new recruits should be trained to follow in the footsteps of our pioneers, and, like them, be ready to render the humblest, homeliest service whenever such may be needed to bring them into helpful relations to a lonesome girl, so that by force of sympathy and persistent moral strength they may help her to bear her homesickness, conquer her ill temper, stamp out her evil inclinations and become helpful as well as virtuous.

The trustees have, for the past four years, stated, in the following tables, the outcome of the State's efforts to reform the girls through this school and the visiting outside. While the figures vary from year to year, the proportion of girls who, at majority or other discharge from custody, are known from recent reports to have become honest and respectable, has varied from 62 per cent. to 72 per cent., or from two-thirds to somewhat less than three-quarters, while less than one-quarter are known to be behaving badly. This year 68 girls went out of the school's care, of whom 18 had been married and were behaving well, while 3 had married and behaved badly.

Of the twenty-four girls not married whose conduct was good at expiration of minority, one who had everything to contend against has come out a good, trusty girl, and is engaged to a reliable man; another has been adopted; and a third, a graduate from the High School, has been honorably discharged; while those who are simply earning their living by housework deserve much credit for self-control. Men and women who have a rich inheritance of worthy ancestry and the world be-

fore them can hardly understand the struggles of these young lives, with no background and very little outlook.

Among the commitments to the school are a few children, in some cases as young as eight years old, who are very properly sent there because their vicious experiences have made them a danger to other children, yet who often readily respond to the reformatory influences of the school and become fit for placing, and whom it is desirable to place out as soon as their minds are sufficiently purified. It was to meet the needs of such cases that an appropriation of \$500 was asked last year, because unless boarded out these children might have to be kept in the school until they grew old enough or competent enough to earn their way at housework. Last summer two promising little girls of eleven were placed at board for \$2 a week and another of thirteen for \$1 during school term, and with all these the boarding experiment is succeeding admirably. Two older girls, one a deaf mute and the other of somewhat defective intellect, are also at board, but these do not seem to be profiting by the advantages of family life, and the trustees may decide to place them in almshouses. A small appropriation will be asked to carry on the boarding out work.

The farm of one hundred and eighty-eight acres has yielded large crops of hay, vegetables and fruits. The families have thus been supplied with an abundance of fresh farm products.

By the careful utilization of domestic fertilizers and by additional purchase, the tilled land is being brought into a higher state of productiveness.

The test of a year has shown that the new reservoir can be relied upon for an abundance of water for all needed purposes.

As asked for in our report of last year, \$2,060 was granted for the extension of facilities for protection from fire. Additional hydrants have been provided and a hose house has been built, where a hose carriage and needed appliances for putting out fires are quickly available in case of alarm.

The \$900 voted for a piggery has furnished a healthful domicile for our large swine family.

The improvement of the sewage disposal of the school has been the subject of much thoughtful attention. With the kind advice of officers of the State Board of Health, satisfactory arrangements have been made.

The average number of girls in the school was 120. The appropriation for salaries and expenses was \$27,775. The total expenditure from Sept. 30, 1895, to Sept. 30, 1896, has been \$26,049.86 and the average number 120, making a gross per capita cost of \$4.17. Deducting \$580.20, which was paid into the State treasury, the net per capita cost was \$4.08.

During the past twelve months an unusually large number of girls has been committed to this school, 86, nearly three times the number committed in 1880. Overcrowding is a serious hindrance to good work in such an institution, and it is possible that another cottage may be needed.

#### Respectfully submitted,

#### REPORT OF THE OFFICERS

OF THE

### LYMAN SCHOOL FOR BOYS

ΔT

WESTBOROUGH.

1895-96.

#### SUPERINTENDENT'S REPORT.

To the Trustees of the Lyman and Industrial Schools.

The average number present for the year ending Sept. 30, 1896, has been 7 per cent. greater than that for the preceding year. While the number of newcomers is not so great as last year by 21, yet the total for the two years, 311, is largely in excess of any other two consecutive years for a long time. Leaving out of account boys boarded, the number released to parents and to approved homes is 8 per cent. greater than last year and 40 per cent. greater than the average of five preceding years.

The average time spent in the school by those placed on probation, exclusive of boarded-out boys and those who have been tried on probation once before, is 21<sup>1</sup> months. The boarded-out boys spent an average of 4.4 months in the school.

The percentage of boys recalled to the school from place has been considerably larger than in former years. This undoubtedly is due in some measure to an increase in the rate of placing out, but the main cause is a more active and vigorous discipline exercised over these probationers, a discipline rendered possible by the recent legislation. Seventy-four individuals were brought back from probation. In 2 cases the offence was so serious that the culprits were transferred to the Massachusetts Reformatory; in 35 cases the conduct was bad enough so that they are still detained in the school; 2 were placed out again after a few weeks' detention; and for the remaining 35 the cause of recall was of such a nature that they were speedily placed out again.

The work of visitation has been ably conducted and its results have been highly gratifying. Its relation to the internal work of the school has been eminently satisfactory. The Visitors have established an acquaintance with the boys previous to placing out which has not only been very helpful in fitting the boy to his place, but important in maintaining an influence over him until he has become settled in his new surroundings.

The current of life within the institution itself has been full and buoyant. Every department has seemed vigorous and successful.

T

The subjoined reports of the heads of the various departments s The corps of officers and teachers have wo together harmoniously and enthusiastically. The swing of the sci room work has been fuller and stronger than ever. The manual t ing has reached nearly every boy capable of taking the course profit, who had not had it previously. A larger number than eve fore has been employed on labor about the institution, for the acplishment of which skilled mechanics have usually been called Nearly all repairs and betterments have been made wholly or in ! part by the labor and skill of boys, under direction of officers of the tages to which the boys respectively belong. In addition, a hay and cow barn has been erected and completed, above the fou tions, by boy carpenters under similar direction. It may fairl said that the needs of the institution are being used as far as pos to serve the ends of education, and nothing by the doing of w a boy can be rendered more skilful and capable is turned over hired mechanics.

The new primary department at Berlin has now been open eleven months. Only boys under thirteen years of age are pl Such a boy upon arrival at the school is examined, his his noted, and then he is taken with the least possible delay to the B farmhouse. In no way does the boy come in contact with the bo the life in the main institution. Aside from the fact that the dist precludes daily visits of the superintendent, and that therefore greatering responsibility must be laid upon the cottage officers, this department treated the same as any other cottage of the school. The officers sist of a manager and teacher, who is a woman, a man who is fa and assistant to the manager, and a housekeeper. A telephone is about to be installed, connecting the cottage with the sup tendent's office, thus obviating much of the present inconvenience to distance. This widely separated family has this great advanthat the younger boys committed to the care of the school ma there quietly and discriminatingly observed without contact with boys, and those who seem of proper disposition may early be p in some good family in the country, or, in case of unfavorable d opment, the boy returned to the main school for more rigid Forty-four boys have thus been treated, a thorough discipline. has been found necessary to return only 6 to the main scho I subjoin the reports of the cottage manager as the farmer, which will give additional details.

The question most frequently asked of me by those whose int in the work is greater than their knowledge of it is, "What pathese boys do you really reform?" and my uniform reply is don't know." Reformation is like education, in that we can j

of it only indirectly by its apparent effects of available power in the individual. Our public schools give a deal of instruction, but education is quite another question. With the acquisition of knowledge usually comes mental power in varied degrees, and not necessarily at all in proportion to the amount of knowledge crammed in.

The boys of the Lyman School are plied with every incentive which the combined ingenuity of its corps of workers can devise to induce normal will activity and the building up of correct ideals; the mind is stimulated, the hand trained, the waking hours filled literally full with useful activity of mind and body, and withal a persistent effort is made to carry forward this activity until it results in fixed habits of mind and body. Now, to what extent this reform process is mechanical and perfunctory can no more be determined by present conduct than mental power can be determined by a written examination in arithmetic or geography, or spiritual regeneration by public profes-Table No. 3, on p. 39, shows interesting facts; but I should hesitate to accept deductions based upon its percentages as of any great significance bearing upon the degree or kind of reformatory work done. When I read that 476 boys out of 670 are doing well, that 50 are lost sight of, while so many have gone behind the bars, I am thankful the record is no worse. When I read that, of boys who have been out two years, 63 per cent. are doing well and of those completing their twenty-first year before Oct. 1, 1896, 46 per cent. only are doing well, I recall that when eighteen years old the boy understands that he has wider liberties and I expect some to abuse them, and not until the youngster has passed through this trying period of adolescence and shown an incorrigible disposition to be an Ishmaelite, am I disposed to count him out of the list of potentially reformed.

When it is seen, that out of the 144 boys committed this year, over one-third had intemperate parents, that two-thirds and more had been devoted to the deadening cigarette, that more than one-half had lost one or both parents or the parents had separated, that one-third came from families out of which some members had a police record, and add to this that over half were idle when they got into trouble, do you wonder that they are here, and will you wonder, when a year or two hence, they try again the freedom of our American society, if a large number, in spite of their training here, fail to win the approbation of their neighbors and employers?

That the most serious want of Lyman School is a central school building, is a conviction rendered only stronger by the lapse of another year. The teaching force cannot be used economically with the present system of cottage school-rooms, and it compels the maintaining of a larger teaching force than is necessary. The attempt to

maintain a graded system necessitates the breaking up of the boys of each cottage into several groups, to go to as many different cottages to find their proper grade; and this wastes valuable time, which must be robbed from their already too brief school hours or from the coveted short recreation period. Neither superintendent nor principal can render the efficient service to the schools which he ought, because of the loss of time and strength in going from one school-room to another, and also because of the impossibility of regrouping the boys of like grade occupying widely separated recitation rooms. It is precisely like trying to run a graded school with the class rooms half a It is an arrangement neither business-like nor sensible. If I were running the school as a business enterprise, I should regard such a disposition of my forces as extravagant and absurd. ever cogency an argument for cottage school-rooms may have once possessed has been overcome by the change wrought in conditions by the work of the past eight years. Over and above the benefit to the purely educational work of the school by the proposed change, the discontinuance of the cottage school-rooms would add a most valuable auxiliary to the cottage life in the shape of a family sitting No such thing now exists. Boys cannot be room for the boys. taught to be home keepers and home lovers without learning how to use and enjoy in a suitable manner an hour that is not devoted to appointed tasks and duties; and if such a thing is not taught here, one of the safeguards to their future is neglected, and the door of their future home left a little wider open toward the saloon.

A gymnasium and playroom, however excellent for their purpose, carry no suggestion of a home sitting room, where the family gather for a little while every day to enjoy what each likes best, — reading or music or games or conversation. A school-room with its paraphernalia and associations is not calculated to leave any ideal in the boy's mind by which to guide his notion of home building by and by. If these cottages are not to be models, so far as the successful conduct of them will permit, of a home toward the possession of which the boy may aspire when he becomes a man, they signally fail at a vital point by neglecting the boy's social education.

The so-called cottage or family plan in vogue in most reform schools in the United States is too much like a collection of small institutions on a somewhat modified plan of the old congregate school. This is not the fault of the so-called family idea, but of a failure to grasp its essential meaning, and devise a feasible plan of carrying it out acceptable to the tax payer. The sitting room is an appliance in the right direction, and when the size of the cottage is reduced to a capacity for twelve boys under two cottage officers only, and with separate sleeping rooms for the boys, we shall be a good

deal farther on the road towards the ideal institution family than we are now; and the running of an institution so organized need not be greatly, if at all, in excess of the expense of conducting the Lyman School at present.

It may be deemed necessary, in view of the increase of the size of the school, to ask that another cottage be erected; but I should much prefer considerable discomfort from overcrowding to longer going without so necessary an adjunct to the efficiency of the school as the central school building would be.

The subjoined tables of statistics will be found to be somewhat enlarged from former years, and it is hoped by so much improved.

Respectfully submitted,

T. F. CHAPIN.

<sup>\*</sup> As this work is not educational, no boy is so employed exclusively.

#### REPORT OF PRINCIPAL OF SCHOOLS.

To the Superintendent of Lyman School for Boys.

It has been said that it is easier to wear an old coat than a new of because it becomes adjusted to the form of the person. So, m teachers prefer to follow along in well-beaten paths rather than attempt any new line of work. However, I have not found this t the case with our efficient corps of teachers. On the contrary, have always seemed ready cheerfully to undertake any change of a ject, to make use of improved methods of teaching, and to adopt system which tends to stimulate the boys to greater effort, to his ambitions and to loftier, nobler purposes. Hence, although the s subjects as of the preceding year have been pursued, they have become threadbare; for each teacher has "adopted, adapted used with skilful individuality the best methods that the profes has developed in the matter of instruction." As a result, in even department of the school work a very commendable spirit has h manifested on the part of the boys; there have been increased inte and more earnest work, followed by far greater advancement than previous years. Especially is this true of the higher classes, show that as the mind is trained the memory is strengthened, and power to comprehend language and grasp thoughts is greatly creased. At the close of the school year forty boys were prepared for promotion to the Advanced A Class, — the largest number in class at any time since I have been connected with the school.

We are encouraged and cheered at times by the fact that some of boys, but recently inmates of our school, have done so well since to went from here. One, who was considered by no means a briggood boy, has continued his studies till he is now attending a school, and has an ambition to prepare for the legal profession. other, on returning to his home in Boston, at once entered the Leschool. During the last few months of his stay here he was direct in the study of Latin so that he pursued it during play hours, a with an occasional recitation and frequent criticisms of his writwork, he made fair progress. This instruction and its value to he appreciated sufficiently to send a letter of thanks soon after

entered the Latin school. He also expressed his intention of taking a college course in the future. Though these cases represent only a minority, yet all such stimulate us to redouble our efforts to lead those under our care in right paths, to instil into their minds loftier ambitions, to broaden their mental horizon and to teach them lessons of good morals and purity, having full confidence that the foundation work begun here will bear much good fruit in the future.

Even greater effort than heretofore has been made to teach the boys to read intelligently, and to interest them in books containing useful, ennobling thoughts expressed in choice language. The fact that many boys who enter the school cannot read at all, or but very poorly, renders it extremely difficult for them, in their comparatively short stay here, to learn to read well. Their vocabulary, except of street jargon, is very limited; so that only those engaged in this work can appreciate the difficulties with which both boy and teacher have to contend.

The enthusiasm of the boys in the study of insects has not seemed to wane in the least during the past year. Many specimens have been added to the already large collection made and mounted.

The interest in drawing has seemed rather to increase than to diminish. This has been noticed especially in the color work and original designing. One has said that "Picturing is one of the simplest expressions of the imagination, and the exercise of imagination lies at the root of all our intelligence and our creative arts." Believing this, we aim to give the boys perfect freedom in illustrating and designing, while we simply guide them in the exercise of the imaginative faculty.

The specimens of penmanship shown at the close of the year were very creditable, convincing me that each boy had striven to improve.

As usual, we have observed the various holidays of the year with appropriate exercises, which in every instance have been educational in their character, and the boys have entered into them with a zest beyond our expectations.

During the greater part of the year literary and musical exercises were rendered in the chapel every Wednesday evening, which proved very profitable and pleasant to the members of the school. So great was their enthusiasm that every boy was desirous to take some part, and each week they gladly memorized some selection given and recited it in concert. In addition, about one hundred and fifty selections were committed and recited by as many different persons. These were all of a nature to aid greatly in moulding the thinking and reading of subsequent life and be helpful in the formation of character. Of these fully a hundred were "adapted to the awakening and strengthening of a deep and lasting love of country and an enthusiastic devotion to American institutions." Many of the officers

#### PRINCIPAL'S REPORT LYMAN SCHOOL.

**52** 

also kindly took part in these exercises, thus increasing the intended teaching the boys by example.

Of the number, 144, committed to the school the past year, 2 hardly speak or understand English, 3 could not read and 5 neither read nor write; while 42 entered the D Class, 42 the 6 the B, 14 the A and 5 the Advanced A Class.

While we have not accomplished all that we wished, yet we be that some advancement has been made in the right direction that the future will reveal results for which, in our weak faith hardly dare hope. We can only sow the seed, water and tend fully; God must give the increase.

Respectfully submitted,

MARY L. PETTIT,

Princij

#### REPORT OF INSTRUCTOR OF SLOYD.

To the Superintendent of the Lyman School for Boys.

One thousand and sixteen names have been enrolled in the Sloyd record books since its introduction seven years ago. Counting the boys admitted since, and those in the school at the time Sloyd was introduced, I find 1,109 boys. Allowing for 44 who have gone to the primary department at Berlin the past year, and as many more new boys who have not been in the school long enough, besides a few incapable ones, it will be seen that almost every boy who has attended Lyman School has had the opportunity for this training.

The plan of the past year has been similar to that of the previous year. Working drawings have preceded the Sloyd work, and so helpful are they that the boys prefer to make their own drawings rather than to work from dictated directions. After the drawing has been made, only a glance now and then is necessary to give the boy a perfect understanding of the successive steps. There have been 412 two-hour lessons given; 149 boys have been in attendance and 48 are in the room at the present time.

One boy completed the entire course, and made seven pieces of extra work, among which was a small table; 65 completed twenty-seven of the thirty-one models and 21 finished twenty-five of the same total. Of the remaining 14 boys, 4 went away, 6 lost the class by reason of sickness, 1 from inability, 1 transferred to another department and 2 had had the work before coming to the school.

During the year not a boy belonging to the Sloyd classes has attempted to escape from the school.

I still believe individual instruction yields the best results; but "greatest good to greatest numbers" calls for class work here, and my individual work is carried on in any spare moment as I go about the room. In testing a class of 50 who had no instructions as to the proper position of the hand for grasping the knife to whittle, only 5 grasped the knife correctly, binding the thumb over the fingers, thus showing the very limited knowledge of tools the boys have with which to begin. The course involves the use of 47 tools and represents 72 different exercises.

#### SLOYD REPORT LYMAN SCHOOL. **54**

The exercises of Sloyd are so varied that mental activity up part of the boy is always required. If he relaxes his care, he awakens to find his plans marred, and the model bearing his image and reflecting it so vividly that he cannot avoid the obje son about himself. Again, if a boy has drawn a coat hanger by using forethought, carries out his plan, he realizes that he power within himself which gives birth to hope and courage f future. Thus the hand training becomes intellectual training, ing the boy how to think.

Those boys who have never been taught obedience find dif with Sloyd, but gradually yield to its demands.

Respectfully submitted,

ANNA L. WILCOX

# REPORT OF INSTRUCTOR OF ADVANCED MANUAL TRAINING.

To the Superintendent of the Lyman School for Boys.

Since the report of last year (1895) 32 boys have entered and completed the course in advanced manual training, which consisted of twenty-four models in carpentry and wood turning, also eighteen models in forging,—the last four being of steel, in order that they may derive an understanding of tempering and the difference between working iron and steel. The boy completes this entire course in twenty-two weeks, devoting four hours a week each to wood turning, carpentry and mechanical drawing, and eight hours to forging, allowing him time (in the wood work) for his drawings from which he makes his model. In the forging he is provided with a blue-print from which to make his model.

Each exercise is finally developed into a complete object. This affords the boy the opportunity of producing a useful as well as sometimes ornamental piece of work upon the completion of his model. This also affords him considerable in the educational line, as, having some definite object in view, he is stimulated to attain the completion of this object by steady, earnest and interested application, and thus to advance. We value this educational part even more than the work exhibited.

It might be stated here that, although we do not claim to send forth a boy fully qualified to enter upon the carpentering and forging trades, yet, in several cases during the past year, boys have left Lyman School and are now succeeding in their work in this line.

Aside from the regular class work, the boys have turned on the lathes 150 mortise pins, 80 pieces for the ornamentation of posts, 75 staging bracket bolts, door pull and latches, pipe hooks and various minor pieces now in use at the new barn. They have also furnished the bakery with a fire tool rack of wrought iron, newly pointed and sharpened pickaxes, and ground and repaired the lawn mowers used at the different houses. The latter has been done by

### 56 MANUAL TRAINING LYMAN SCHOOL.

the boy in charge of the boiler and engine, and mention might made of a blue-print drawing case made by this same boy.

During the past year we have received the very helpful addition a power grindstone and an emery wheel.

Respectfully submitted,

JAMES D. LITTLEFIELD, Instructor of Advanced Manual Trains

# REPORT OF THE INSTRUCTOR OF THE CLASS IN PRINTING.

To the Superintendent of the Lyman School for Boys.

The past twelve months have been fruitful of some satisfaction on our part and a good degree of progress on the part of the boys.

The effect of our influence, example, teaching for good or ill upon the future lives of those in our care is a mighty matter, ever present in our mind, and demands our most careful consideration, for we all know that good boys, good men, good citizens are of far more importance to the home, the State and the country than good printing.

A new blocking machine has been put into the office, which is not only a convenience but enables us to furnish the school with blocks of paper at a less price than they can be bought ready made, and also to use up odd sizes of paper that could hardly be used to print on.

There has been considerable printing done during the past year, and no doubt the printing office is a very convenient auxiliary to the school. There are five boys at present in the printing office. One, a small boy, is also in the class in manual training two hours each day. It takes all of the time of this boy to keep the office in good shape and sort over type, print wrappers and assist in mailing the "Enterprise." Another boy, perhaps the largest in the institution, who was put into the printing office on account of his muscle, turns the crank on the cylinder press, sets up the Sundayschool lessons in two versions, prints and distributes the type, and sometimes prints the chapel service. Another boy does most of the small job printing, directs the wrappers and mails the "Enterprise," with some assistance, and distributes the jobs when printed. This leaves us two boys to set and distribute the type on the "Enter-Prise," and they sometimes assist in the printing and mailing of the paper also.

Eight hundred copies of the paper are printed at each issue. Every boy in the school has a copy to read, after which it is sent to his home or to some friend, as he may direct.

Simple and unpretentious as our work may seem to some, it easy matter to edit and print such a paper as is expected of us we love the work, and are trying to do the best we can und circumstances.

Twelve boys in all have been in the printing office since (1895, and we believe the experience and training have been a lithem; while the paper has been a welcome visitor to the hur of other boys in the school, and much appreciated by many out the school.

Thanking you, sir, for all your kindness, we most respessibilit this report.

M. E. HOWARD, Teacher of Prin

#### PHYSICAL TRAINING DEPARTMENT.

To the Superintendent of the Lyman School for Boys.

Gymnastic lessons have been given five days a week during forty weeks of the past year. The teacher was engaged in special duties for the school during the twelve weeks when gymnastics were not taught, with the exception of two weeks' vacation. In all about sixteen hundred lessons have been given, representing nearly two hundred changes of programme, — a new lesson for nearly every day. Instruction is given to eight classes every afternoon and evening, the exercise occupying twenty to twenty-five minutes. There are on an average thirty-one boys in each class.

The arrangement, which was spoken of briefly in my last report, places the teacher in a position where he comes in contact with every boy every day, so that the slightest change for better or worse is easily detected. Physically the boys are this year in much better condition than a year ago. What may be the cause does not appear. The change from city to country life, the diet, the open-air exercise, the physical training, constant oversight, — all these work together for good.

The gymnastic drill which is used here consists of free movements on the floor and apparatus work in all but two schools, which demands the contraction and relaxation of every muscle to its fullest extent, from the muscles of the ankle joint to those of the neck. The movements in an exercise follow each other in the order followed by teachers of Swedish drill, which has been outlined in a previous report. The whole scheme may be described briefly:—

Use every muscle to its fullest extent. For instance, the order is given, "Arms upward stretch!" This means to extend the arms perpendicularly upward until the highest point is reached, by complete extension of elbow, wrist and finger joints.

Use only necessary muscles. Avoid bending the body forward, backward or sideways, or in any way changing its position while executing the movement described above.

Use sufficient power only. The arms being in position at the sides, the order is given, "Arms sideways fling!" which means that the

arms are to assume a position horizontally sideways, at right angles to the position of the body, as quickly as possible. If more than sufficient power is used, the arms are carried higher than was intended by the pupil. Herein lies the meaning of the phrase, "Gymnastics teach self-control." By a constant endeavor to use only necessary power in assuming any position is this achieved, and in many cases to a limited extent only.

This is the basis upon which the teacher is working, — not to teach a certain number of movements, but to train the energies to their highest development with as much surplus of power as possible.

The general effect is a better appearance of the schools when they are assembled together. Interested visitors speak of the improvement in marching, which is due to more individuality and less of the machine.

The special effect may be seen in a few cases of boys with local weaknesses who have wonderfully changed by application of massage treatment, in addition to personal attention of Dr. Corey, all under his direction. Gymnastics have done much for our boys, and can do still more.

Fourth of July games were arranged by the teacher, and, while they afforded amusement for all, very good work was done by those who took part in the races.

In closing this, my fourth annual report, I must thank you and the masters for most hearty support in carrying on the work.

Respectfully submitted,

ALLISTON GREENE,

Teacher.

### PHYSICIAN'S REPORT.

To the Trustees of the Lyman and Industrial Schools.

In the year ending at this date, 835 prescriptions have been made for boys with minor ailments as out-patients.

The hospital has been occupied 955 days by 76 different boys, making an exceptionally high average confinement, which is accounted for by a number of chronic cases and the precautionary detention of those recovering from contagious diseases.

Throat troubles were most numerous, 31; indigestion, 17; sores, 8; accidents, 8; neuralgia, 6; synovitis, 3; eczema, 3; abscess, 2; conjunctivitis, 2; and 20 other disorders furnished 1 case each. Of these last appendicitis seemed to threaten one boy's life, and Dr. Homer Gage of Worcester was summoned, who removed the offending organ and the patient recovered. A case of scarlet fever gave considerable anxiety for a time, but the boy got well and the disease did not spread. One boy is still suffering from chronic hip disease who has been in the hospital 166 days; he will probably be an invalid for the next two years.

Since the school was established on its present location, throat diseases, especially tonsillitis, have been exceedingly common. Many cases have been severe enough to excite temporary alarm and raise the question whether they were not genuine diphtheria; but, as all recovered without serious effects, we became confident in our diagnosis. In October 7 cases occurred, which was unusual for that month, and, though none were fatal, there were features in the convalescence of some not usually observed, which excited suspicion. A request was made that all boys afflicted with sore throats be sent to the hospital on the first complaint, and the nurse was directed to apply active treatment at once. Those who came improved so rapidly that a positive diagnosis could not be made by inspection alone, therefore cultures from several throats were submitted to bacteriological examination, and the diphtheria bacillus found in 6. Reviewing the cases which occurred in the first three months of the year in the light of subsequent developments, there are reasons for believing that 10 boys were infected by diphtheria. That all recovered without grave symptoms or serious after-effects, unaided by antitoxin, was due, in my judgment, to the early use of both local and general antiseptics.

To illustrate the difficulty of distinguishing diphtheria from tonsillitis by inspection in the early stages, I will relate that two throats were tested by bacteriological examination the same day; the one having by far the gravest symptoms was pronounced tonsillitis, while the other, having a very mild appearance, was certified diphtheria.

A thorough and systematic disinfection of all the houses was done with the kindly co-operation of the Boston health department. Immediately the effect was apparent, and from that day to this there has been no sign of diphtheria, and only six short and mild cases of pharyngeal and tonsillar disease.

Trying as was our experience, if it serves to impress the importance of early treatment and thorough disinfection, we can only be thankful for it.

Respectfully submitted,

F. E. COREY,

Physician.

# REPORT OF THE MANAGER OF BERLIN FARM-HOUSE.

To the Superintendent.

We trust that this first report of the primary work at Berlin Farm will demonstrate the wisdom of the trustees in making such a work possible.

Disconnected as we are from the main school, and isolated, so far as neighbors are concerned, we have been able to give our boys nearly the same freedom that a farmer would give his own sons. Most of these boys are from city homes, and they have found this farm home, with its orchards of fruit trees and its fields of grass and flowers, very attractive. As soon as the first feeling of homesickness had been conquered, they quickly identified themselves with the place, became interested in its industries, and warmly attached to the numerous pets which the boys have been allowed to gather about them. Not until a boy feels at home do we consider him really ready for the home influence with which he is here surrounded, and from which we expect so much in the way of reformation.

Since Nov. 1, 1895, 44 boys have been placed with us. Of those 18 are still here. There were:—

### 64 FARM-HOUSE REPORT LYMAN SCHOOL. [Oct.

Of the 25 dismissed, 6 are now in the Lyman School at Westborough, 5 have been returned to their homes and 14 are in boarding places.

| Average time of detention of all | boy | s dism | iss | ed, . |     | 106 days. |
|----------------------------------|-----|--------|-----|-------|-----|-----------|
| Average time of detention of bo  | yв  | placed | οι  | it or | re- |           |
| turned to their homes, .         |     | •      |     | •     |     | 117 days. |
| Average time of boys now here,   |     | •      |     |       |     | 84 days.  |
| Whole number of boys received,   |     |        |     |       |     | 44        |

Having the children so short a time, the apparent results from work in the school-room must necessarily be small. Especial attention has been paid to reading and orthography, and by making use of histories for reading books and frequent reference to our maps. globe and the world of nature around us, a great deal of information has been gained on many subjects. The morning session of one and one-half hours has been given to this work and the afternoon session of two hours devoted to language and arithmetic, which we have endeavored to make thorough and practical.

Our evenings have been spent in the boys' sitting room. Quiet games were played by those who were so disposed, and good use has been made of our large library of interesting books. All were ready, however, to leave games and books at sound of the piano. We think no hour of the day has been more enjoyed by the boys or more helpful to them than this last hour, given to song and praise, with a word of thanks to Him who now, as of old, blesses little children.

Our school being small in number (at no time numbering more than 23), we have found it possible to get very near the hearts of our boys; and, while endeavoring to quicken the intellectual faculties, we trust we have stimulated a healthy moral growth.

Our thanks are due to you for the confidence and trust reposed in us, as shown by placing no hindrances in the way of carrying out our plans, yet being ever ready with counsel and encouragement when needed.

Respectfully submitted,

EMILY L. WARNER.

### FARMER'S REPORT.

To the Superintendent of the Lyman School for Boys.

1896.7

I respectfully submit the following report for the year ending Sept. 30, 1896.

A very pleasant and successful year for us has just ended. Our crops have all been good and our fruit crop especially heavy.

We have for a long time badly needed more suitable farm buildings, and now we seem in a fair way to obtain what we need. A new barn which will furnish ample and healthful accommodations for seventy-two cows has just been finished, and there is good prospect of our soon having a much-needed piggery and hen houses. In order to put only perfectly healthy cows into the new barn it was necessary to dispose of several and replace with new ones. About fifteen or twenty cows are still needed to bring the number of our herd up to what it should be.

Much team work has been done in preparing for the foundation of the new building and in grading about it. Another pair of horses is really needed in order to do the large amount of team work required, or, if it is not thought best to have a pair, one horse could be used to good advantage for drawing in green crops for the cattle, for planting, cultivating, etc.

I am well satisfied from my observations the past year that we could use considerable commercial fertilizer as top-dressing for grass, profitably; but in order to use it economically we should have a machine for broadcasting it evenly.

In conclusion, I wish to thank all for the kind support and assistance I have received.

Respectfully submitted,

C. S. GRAHAM.

Farmer.

### [Oct.

# REPORT OF THE FARMER AT BERLIN FARMHOUSE.

To the Superintendent of the Lyman School.

Taking into consideration that this branch was a new feature in every line, I think the boys have made a very good showing.

The unavoidable delay in settling, together with the clearing up of the rubbish and arrangement of fixtures, took us well into the winter. Spring opened with lawns and roads in a bad condition, but by earnest and faithful work we have succeeded in improving the general appearance of the place. We were fortunate in having a very fine gravel pit on the farm, from which the boys drew no less than two hundred loads for the filling in of the driveways. The boys did all the work in connection with the spring planting, with the exception of the ploughing, and also the haying (fifteen tons), with the exception of mowing.

The crops have been good, considering the exceedingly dry weather. We have had an abundance of pease, beans, radishes, corn, tomatoes, etc., for table use, besides cucumbers enough for several barrels for winter use. We have dug and pitted one hundred and fifty bushels of potatoes, ten bushels of beets, cabbage, squash, etc., for winter use.

A large asparagus bed was laid out in the spring, strawberries and blackberries planted, also pear, plum, quince and cherry trees started. The apple orchards, of about three hundred trees, have supplied eating apples since early August. The apples are particularly fine flavored, as is all fruit grown on the farm. The melon patch has been a great delight to the boys, musk-melons, cantaloupes and water-melons being raised in great abundance. Blueberries have been very plentiful; besides all we could eat and can, more than ten bushels were picked; some sent to Lyman School, five dollars worth exchanged for fireworks at Fourth of July.

Aside from the regular farm work, a pond has been drained and dug out for the purpose of finding running water. This work was very hard for the boys, especially such little ones, but it was both well and cheerfully done.

This being our first year, we hope to add much to our reports for future years.

Respectfully submitted,

IRA G. DUDLEY,

Farmer.

# REPORT OF THE SUPERINTENDENT OF VISITATION.

To the Trustees of Lyman and Industrial Schools.

The report of last year, written, as it was, after less than three months of actual work, could hardly be more than a prospectus defining principles and lines of operation. We are able this year to report definitely and in detail, and respectfully submit the same to your honorable Board.

By reference to the report of the superintendent of the Lyman School you will notice on page 39 that 717 is given as the number of boys under twenty-one years of age in custody outside the school; but analysis of this number will show that 159 of these were classified as died, discharged, inmates of other institutions, out of the State or in the army or navy, leaving the number of boys for which this department is responsible 558. Of this number, 50 boys are classified as whereabouts unknown. There were 83 such boys Oct. 1, 1895. We have, therefore, reduced this number during the year over 39 per cent. Of this 50, 18 disappeared in 1895–96, the remaining 32 being old cases which we found in assuming the work a little more than one year ago.

· We account for the boys in our charge as follows: —

| In various employments, |   |   |   |   |   | 455        |
|-------------------------|---|---|---|---|---|------------|
| At board,               |   |   |   |   |   | 28         |
| Recently released,      |   |   |   |   | • | 4          |
| Out of employment, .    |   |   |   |   |   | 17         |
|                         |   |   |   |   |   | 4          |
| Whereabouts unknown,    | • | • | • | • |   | <b>5</b> 0 |
|                         |   |   |   |   | - |            |
| Total,                  |   |   |   |   |   | 558        |

The following table shows the various employments of the 455 boys under twenty-one years of age either at place or with their parents, mentioned above, and the number in each occupation:—

| -                  |      |   |     |                            |   |    |

| Furniture store, . |      |   | 1   | Tailor,                    |   | 1  |
| Foundry,           |      |   | 2   | Teamster,                  |   | 17 |
| Glass works, .     |      |   | 2   | Telegraph messenger,       |   | 1  |
| Hatter,            |      |   | 2   | Train boy,                 |   | 1  |
| Ice wagon,         |      |   | 2   | Tanner                     |   | 1  |
| Iron works, .      | •    |   | 7   |                            |   | 1  |
| Job wagon, .       |      |   | 1   | Watch factory,             |   | 2  |
| Janitor,           |      |   | 2   |                            |   |    |
|                    |      |   |     |                            |   |    |

An analysis of this table shows that about  $33\frac{1}{3}$  per cent. are on farms; 9 per cent. employed in mills, either cotton or woolen; 5 per cent. are employed in shoe shops; 2 per cent. are carpenters; 18 per cent. are in various mechanical pursuits not mentioned above;  $4\frac{1}{2}$  per cent. are self-supporting and attending school, either high or common, the entire year; 4 per cent. are teamsters; 3 per cent. are assisting parents, and 21 per cent. may be classed as miscellaneous.

The number of boys placed in their homes, . . . in 1895 was 72

" placed in their homes, . . . in 1896 was 87

| The number | of boys | placed with   | other   | 8,    |  | in 1895 was 98 |
|------------|---------|---------------|---------|-------|--|----------------|
| 66         | 44      | placed with   | other   | 8,    |  | in 1896 was 96 |
| 66         | 44      | boarded,      |         |       |  | in 1895 was 18 |
| 44         | **      | boarded,      |         |       |  | in 1896 was 29 |
| 44         | 44      | recalled to t | he scl  | nool, |  | in 1895 was 60 |
| 16         | 44      | recalled to t | the scl | hool. |  | in 1896 was 85 |

The increased number of recalls in 1896 over 1895 may be in part accounted for in the fact that many boys were placed out the past year because they were eighteen years of age, had no homes to which they could be sent, and it was deemed best to give them a trial. A few others were placed out sooner than their merits demanded, on account of the crowded condition of the school the first half of the year.

In keeping the records of the boys in our charge we use what is known as the card and envelope system. Each boy has an envelope plainly marked and kept at the Lyman School in a case made expressly for the purpose, and the various reports of his condition and conduct from time to time are put therein and arranged in the order of his visits. The report cards are made to suit the envelope, and are of three distinct colors. The boys doing well are reported upon white cards, those whose condition is doubtful and who need especial attention are given a colored card, while still another color designates those who are doing badly. The envelopes in which these cards are placed are perforated, so that the color of the card and hence the status of the boy can be seen at a glance. We believe that this method not only has the advantage of convenience, but that it appeals to the ambition and pride of the boy, who is anxious not to forfeit his white card if his conduct be good, and to gain a white report if for any reason he has been given a colored card.

Besides the visits made by this department, we must acknowledge the substantial aid which individual members of your Board have given in finding places for the smaller boys and in visiting and caring for them in place. Should that aid be continued, we could doubtless perform the ordinary work, but should it be dropped, other assistance in this department would probably be required.

In several localities where boys are placed we have voluntary helpers whom we designate as "sources of information." They are given a blue card, containing the name of the boy whose report is desired and with whom he is placed. They also submit the following questions, which are returned to us on a specified date:—

This enables us to see our boys as others see them, and to learn their reputation in the town. These helpers are not known to be such in the community in which they reside, and are not given authority to settle disputes or even to make an official call upon a boy. Their reports show an active interest and a philanthropic spirit.

According to the reports by the above classification, of the 508 boys on our visiting list, 449, or 88 + per cent., are "doing well;" 23, or 4 + per cent., are doing doubtfully; 19, or 4 - per cent., are doing badly; 17,\* or 3 + per cent., not reported. It must be understood that boys whose conduct has been so bad as to demand transfer to Concord Reformatory are not included in this list, as they are beyond our visitation.

The total formal visits made by this department to boys and reported to the Lyman School is 1,117. Of these, 289 were to 198 boys over eighteen years of age, and the balance, 828 visits, were to younger boys. This, however, does not include the informal calls, which are many and are not reported.

Besides these visits, we have written in round numbers five hundred letters, mainly to boys and their employers or relatives.

Fifty-four days have been spent at the school, interviewing the boys and becoming acquainted with them, attending to the weekly reports and correspondence, and in conference with a committee from your Board.

Besides the visits to boys mentioned above, we have investigated and reported upon 167 homes, in cases where parents or relatives had made application for the release of boys from the school. The most of these homes had been previously reported upon by an agent of the State Board of Lunacy and Charity, and our chief reason for doing it again is that, knowing the particular boy whose release is under consideration, knowing his record, his characteristics and trend, and being held responsible for his behavior after his release, it is quite necessary that we should have personal knowledge also of the home and surroundings where it is proposed he should spend his probation. Thus it sometimes happens that a home considered doubtful on general principles for a boy is considered as worth trying for the peculiar characteristics of the particular boy. Other than the boys' homes, one hundred and six places have been investigated by this department during the year. Here, again, we think it important to know the people before selecting and placing the boy. The above number does not include our visits while seeking places, nor our visits to places where no formal applications have been made, but

Many of this number have been recently released or placed, and no report has been made since such release.

where we have been requested to call and for any reason have not placed a boy. Such cases have been numerous.

During the year there has been collected and paid over to the Lyman School the sum of \$1,175.87 for the services of 48 boys. This sum is placed in the bank to the boys' credit.

The relation between the boys and those who visit them continues to be of the most friendly character. Our welcome also to the homes where our boys are on probation is marked, and we are regarded, as we wish to be, as the boys' helper and friend.

In this connection it is proper to say that it is our opinion that we are doing too little rather than too much visiting. The better we know our boys and the more attached they become to us, the more readily will they take our advice and the more good we can do them. One or two visits a year may suffice to gather statistics, but hardly to understand the boy and to minister intelligently to his needs.

In closing this report, it would be unjust not to especially mention the efficient service of Mr. Asa F. Howe, Visitor, whose experience, genius and sympathies admirably fit him for his duties. Also I wish to express the obligations due the superintendent of the Lyman School for his constant support and aid, and to the masters and other officers who have aided us in seeking information concerning boys under this charge, nor the least to your honorable Board for the most constant and helpful interest and counsel in our work.

Respectfully submitted,

WALTER A WHEELER, Superintendent of Visitation.

#### APPENDIX.

Appended are circular forms used with parties taking boys as employees and as boarders:—

The attention of those taking boys from the Lyman School is called to the following directions, which it is expected will be faithfully observed:—

- 1. The boy is to be a real member of your family, and is in general to receive the care and training consequent upon such a relation.
- 2. Clothing must be comfortable, suitable to the season and kept in good condition.
- 3. Boys must be sent to school as the law requires (Massachusetts law requires thirty weeks each year for boys under fourteen years of age), and a monthly report of the deportment, attendance and progress in school must be sent to the Lyman School (blanks will be furnished). Older boys should attend school winters, unless there are special reasons for not so doing.
- 4. Boys should be trained in habits of industry, doing such work as is suitable to the age and strength of the individual. The compensation for such service will be according to agreement.
- 5. Obedience, honesty, strict adherence to the truth and purity in act and speech are to be insisted upon.
- 6. Such moral and social advantages as the community affords, and are suitable to the boy's condition, should be allowed him, and some good reading furnished him.
- 7. Boys should have some recreation. Your judgment is solicited as to the kind and time.
- 8. Should the boy run away, you will use every reasonable effort to bring him back, and notify the school at once.
- 9. Should the boy fail to do well or prove unsuitable for his place, communicate at once to the undersigned or to the superintendent of Lyman School.
- 10. On no account should the boy be allowed to leave you to go to another place without the consent of the superintendent of the school, or the trustees or their agents Boys may be returned to the school by the order of the superintendent of the school, the trustees or their agents, or by the agents of the State Board of Lunacy and Charity.
- 11. Letters of boys to their relatives when so requested must be sent to the Lyman School to be forwarded.
- 12. If a boy is taken seriously ill, call in a physician and telegraph at once to the Lyman School, Westborough, for further instructions.

#### COMMONWEALTH OF MASSACHUSETTS, LYMAN SCHOOL FOR BOYS.

| T. F. Chapin, Superintend<br>Asa F. Howe, Visitor. | lent; Walter | r A. | Wheeler, | Superintendent                                     | of Visitation; |
|--|--------------|------|----------|--|----------------|
|  |              | is   | to-day   |  | 189            |
| placed at board with                               |              |      |          |  |                |
| P. 0   |              |      |          | · <del>- · · - · · · · · · · · · · · · · · ·</del> |                |
| on the following conditions.                       | (Signed)     |      |          |  |                |
|  |              |      |          |  |                |

This boy is entrusted to you that he may become a member of your family and receive all the care and training which ought to grow out of such a relation.

We desire him to be trained in habits of industry, to be instructed in good morals and to have the privileges of the ordinary boy in the community.

We be peak your patience with his failings, both your love and firmness in his government, and at all times your kindly interest in his welfare.

He must be punctual at school and constant in attendance. No cause but illness will justify any absence during school term. A monthly report of his attendance and progress must be sent to the Lyman School.

Compensation for board will be according to above agreement, but it must always be understood that he shall become self-supporting as soon as possible, when a free home will be found for him.

He comes to you well clothed, and except in special cases no allowance for clothing will be made for the first quarter. Afterward, itemized bills for clothing not exceeding six dollars per quarter will be honored. Extra bills must not be incurred without authority.

You are expected to see that he is neatly dressed, that his clothes are mended as economy demands and that he is cleanly in person.

No severe corporal punishment will be allowed. If he needs other than mild corrections, or in cases of serious misdemeanor, notify the superintendent of the Lyman School.

He shall be allowed to write to his parents or near relatives once a month, but all such letters must be sent to the Lyman School to be forwarded.

In case of his running away, use your best efforts to return him and notify the school immediately.

If he should be taken seriously ill, call a physician, and telegraph to the school for further instructions.

At the end of each quarter fill out the report card herewith inclosed and send it to the Lyman School.

## REPORT OF THE OFFICERS

OF THE

# STATE INDUSTRIAL SCHOOL FOR GIRLS

AT

## LANCASTER.

#### SUPERINTENDENT'S REPORT.

To the Trustees of the Lyman and Industrial Schools.

I submit to you a brief report of the State Industrial School for Girls for the year ending Sept. 30, 1896.

On my return from my absence of several months, on account of illness, I was much gratified to find the school still running so smoothly. It appeared that each one in charge had been at her post of duty, that the ranks had been closed up and the march had been steadily onward. The officers had been faithful and loyal to the school, working with unity of purpose, and yet each one responsible for her own special good work. Experience has shown that the only way to secure good results is to hold each person in charge responsible, and then leave her to work more or less in her own individual way.

The various occupations which the girls are taught in the school have often been given in former reports; it therefore seems useless to repeat it, except to say that we are trying, without any special method, to make good housekeepers and good citizens. The hand and mind must be constantly employed and interested. It is also important that the girls should have wholesome recreation, frequent and varied, in order that their lives may be made happy and not too monotonous, for it is "the merry heart that doeth good like a medicine."

The Ling system of gymnastics, introduced last year through the winter months, was experimental at first, but the effect in many ways was so favorable that it now seems to have become a necessary part of the training; even in the farm work Miss Morse finds the girls more prompt and wide-awake.

The numbers in the school are larger than in former years, although the girls have been placed out as fast as seemed practicable. It is seldom wise to place a girl in a family till she has had time in the school for thorough discipline and training.

Thanking you for your kind co-operation in the work, especially for your vigilant assistance in the care and oversight of the school during my absence, I am,

Respectfully yours,

L. L. BRACKETT,
Superintendent.

### PHYSICIAN'S REPORT.

To the Trustees of the State Industrial School.

During the year we have had two cases of typhoid, — the first that have occurred under the present administration, — both cases among our officers.

Last September the matron of Richardson Cottage, our new house, returned from her vacation in a weakly condition. In a short time typhoid symptoms developed, and the patient was quite ill for three months. When the disease was fully recognized, the patient was too sick to be removed, so we could only isolate her thoroughly.

In January Mrs. Brackett began to show signs of breaking down. A trip to Old Orchard was decided upon, in the hope that change of air would help her; but upon her arrival there she was stricken down with typhoid, and it has taken her seven months to fully recover.

This severe illness of our beloved superintendent, which at first seemed so great a misfortune, has proved a blessing in disguise. Utterly worn out, physically and mentally, by her ten years' continuous service, a prolonged rest was imperative; and this rest she was compelled to take in the weeks of slow convalescence, when she was too weak even to think. Then, too, it has given an opportunity of proving that these years of honest effort in institutional work have not been in vain. During her long absence of seven months, without a substitute, our school, with its varying interests, ran on without a jar. Every officer was loyal to duty, and our girls showed a sense of gratitude highly satisfactory.

Last winter we had a long run of la grippe. In one case peritonitis set in, and the girl was transferred to a hospital, where she has just undergone a surgical operation.

With the exception of these girls, the health of the school is all that could be desired.

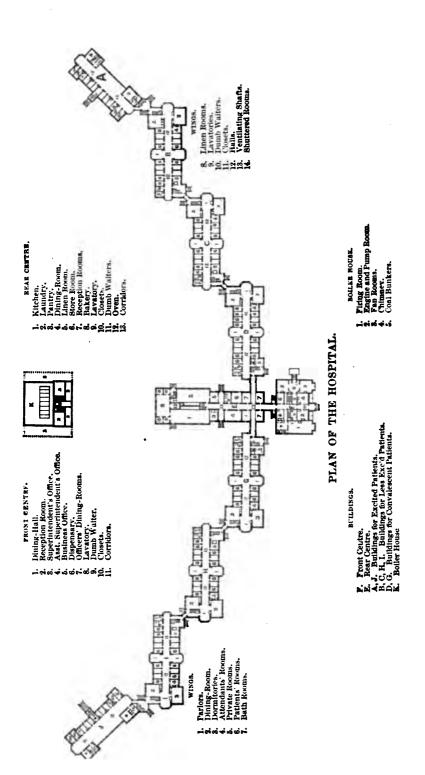

Respectfully,

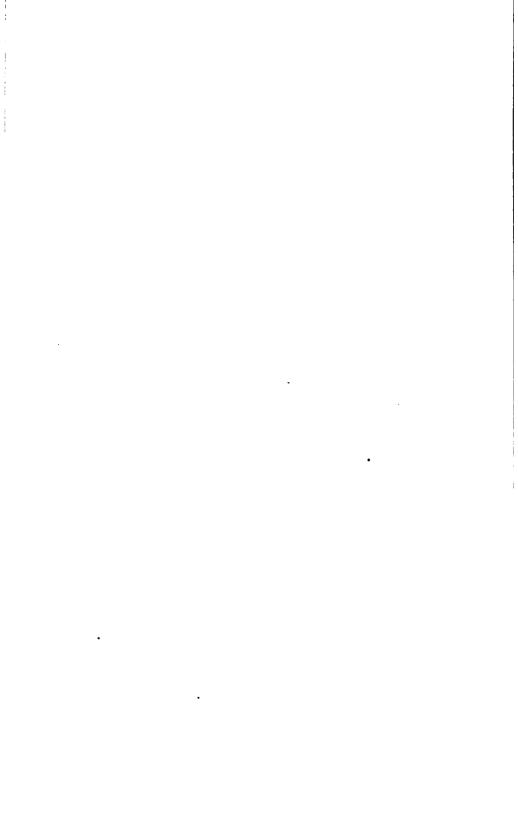

M. V. O'CALLAGHAN, M.D.

## TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the Danvers Lunatic Hospital present this their nineteenth annual report, and submit herewith for your information the reports of the superintendent, treasurer, Board of Consulting Physicians and required statistics.

As appears from the reports of the superintendent and treasurer, a large amount has been expended for repairs during the past year. For many years we have been able to meet the expenditures required for repairs, as well as all the other expenses of the institution, from the income of the hospital, without asking for an appropriation by the Legislature; but the condition of the roof of the main building is such that it seems absolutely necessary to make a larger outlay, in the near future, in order to put it in a proper condition, than can be met by our ordinary receipts; we shall therefore ask the Legislature at its next session to provide by a special act the funds needed for doing the required work. The amount expended for "construction" is larger than usual. It has been principally used upon the new dining room and corridors connecting it with the wings of the main building. They are now approaching completion, and when finished will enable the officers to make some very desirable changes in the administration of the hospital affairs.

It has been a very busy year in and about the hospital, in making repairs inside and out, reconstructing the roads, reclaiming land and building the new dining room; and the trustees feel that what has been done could not have been accomplished without the untiring efforts of the superintendent and the co-operation of all working with him.

The farm has yielded good returns under the care of the new farmer; but the vegetable garden, which is another department, has in some respects failed.

The efforts of the gardener to furnish about the hospital building a pleasing display of beds of flowers, foliage plants and ornamental shrubbery, though somewhat interfered with by the building operations which have been going on, have been in the main successful, and the results have afforded much pleasure to the patients and others.

It is evident to all who are interested in the treatment of the insane that every hospital should have special and suitable buildings for the treatment of acute cases; and we feel that the time has come when the State should appropriate a sufficient sum to allow the trustees of this hospital to erect buildings for that purpose, and also a home for nurses. We would call your attention to the remarks of the superintendent and the Board of Consulting Physicians upon this subject in their respective reports, and we shall ask from the Legislature an appropriation of a sum sufficient for constructing the buildings.

For all matters relating to the care of the patients we would refer you to the superintendent's report, which we commend to We would also acknowledge our continued confidence in the superintendent and his staff officers and employees, and our satisfaction with the management of the several departments coming under our supervision.

Respectfully submitted,

ORVILLE F. ROGERS, FLORENCE LYMAN, WILLIAM B. SULLIVAN, ZINA E. STONE. HARRIET R. LEE, SOLON BANCROFT. SAMUEL W. HOPKINSON.

Trustees of Danvers Lunatic Hospital.

## SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Danvers Lunatic Hospital.

Herewith is presented the annual report of the operations of the hospital for the year ending Sept. 30, 1896.

There were 948 patients in the hospital Oct. 1, 1895. During the succeeding twelve months 429 were admitted and 520 were discharged.

The highest number present upon any one day was 984 and the lowest number was 791. The hospital year closes Sept. 30, 1896, with 857 patients.

As far as could be ascertained, but 157 of the 429 admitted were natives of Massachusetts and only 230 were born in the United States.

The cause of the mental disorder was attributed to intemperance in 52 cases, to dissipated and immoral habits in 10 cases, to epilepsy in 19 cases, to old age in 25 cases and to heredity in 46 cases. There were 33 cases of general paralysis, 84 cases of dementia — primary, secondary, senile and post-paralytic — and 92 cases of primary delusional insanity. There were two voluntary commitments and two patients were not insane.

Within the year 520 were discharged. Of these, 59 were classed as recovered, 59 as much improved, 56 as improved, 240 as unimproved, 4 as not insane and 102 died.

The ratio of recoveries, while up to our average for the past ten years, seems low; but the figures, as reported, do not accurately represent the remedial work of the hospital.

Regarding the question of recovery, very much depends upon the personal equation of the physician who makes the diagnosis of the case and tabulates the result of treatment. Again, the rules under which his decisions are made may restrict his action. For example: we discharged as "improved" and "much improved" 114 cases; of these, 12 cases were so nearly restored to normal health that ultimate recovery seemed

assured in a short time without further hospital care and treatment,—as a matter of fact, it is known that several of these cases did make a most satisfactory recovery. Yet with none of them has the hospital claimed the credit of a cure, because a final judgment at the time of discharge is required by the rules of the State Board of Lunacy and Charity. Subsequent revision is not allowed, as such changes would cause discrepancy between our annual report and the records kept at the office of the State Board.

Then 25 more of the cases, that were not classed as recovered, exhibited no positive evidence of insanity at the time they were discharged; and yet the hospital gets little if any credit in regard to these cases, because the diagnosis recorded against them — primary delusional insanity for the greater number — and a knowledge of their previous history forbade an optimistic view of their improvement. We could but fear that their apparent recovery was merely a temporary amelioration, pretty certain to be disappointing in the end, and speedily so under special adverse circumstances, such as ill health, the use of liquor, want, etc.

Had our opinion coincided with the opinions of the friends of discharged patients, instead of 59 recoveries during the year we should have claimed 96.

There were 21 escapes, without ensuing calamity, so far as we could learn, and attempts to trace each escaped patient were made.

One hundred and two patients died. General paralysis was the cause of death in 26 cases, cerebral apoplexy in 14 and old age was the chief factor in at least 18 cases. There were but 5 deaths from phthisis pulmonalis.

One man committed suicide. He was a victim of hypochondriacal insanity, and had been in the hospital eleven years. The tone of his vagaries changed from time to time, but during the greater part of his residence here he had been regarded as a suitable subject for parole privileges. On Dec. 6, 1895, he fell, or threw himself, through an open window in the boiler house, landing on the brick pavement, fifteen feet below. Striking on his head, he sustained a comminuted fracture of the skull. While not under observation immediately before the accident, his fall attracted attention and he was

removed to his room immediately. He lived five days without recovering consciousness. During much of that time he was very festless, and it became necessary to restrict the movement of his hands with a leather muff, to prevent removal of bandages and dressings which were applied to his wounds. The medical examiner was summoned, and a notice of the suicide, with explanations in detail, was forwarded to the State Board of Lunacy and Charity.

#### ACCIDENTS.

Three accidents, resulting in broken bones, have occurred. One man fell from a step-ladder while washing the ward, and sustained a Pott's fracture. One woman, while alone in her room, fell in a fit and broke both bones in her left fore-arm. Another actively excited woman was being firmly held by two nurses, when from a standing position she suddenly threw her whole weight backwards in such a manner that her humerus was broken. A careful investigation led to the conclusion that the bone was abnormally brittle, and that the nurses were exercising reasonable caution in handling the patient. In due time all these patients recovered use of their limbs.

#### RESTRAINT AND SECLUSION.

Except in the case of the suicide who survived in a restless and unconscious condition for several days after his skull was fractured, no style or semblance of mechanical restraint was used in this hospital during the year. The seclusion of patients — which is understood to mean locking a patient in a room alone during the day time — has been reduced to a minimum, especially in the female wards. Nine individual female patients were secluded for short periods. The total number of hours of seclusion for the whole number was eighty-six, which would average less than ten hours for each patient. Thirty-nine male patients were secluded for periods varying in duration from one hour to twenty-five days.

This record, with 1,377 patients under treatment during the year, indicates the degree of intelligence and devotion with which the nurses perform their trying and almost thankless work. Restraint and seclusion are avoided in proportion to the intelligence, self-possession, patience and tact exercised by the nurse or attendant.

#### TRAINING SCHOOL.

Each year the time and labor put into the training school increase. At the close of the seventh year of the school there were 4 graduates and 17 in the senior class. Hattie Rutherford, Sarah McKelvie, Zula Norcross and Annie Finlayson were given the school diploma. In all, 28 pupils have graduated from the six classes that have now completed the two years' course.

If the number of graduates were a significant index of the results, we might feel discouraged, as a deal of extra, continuous and systematic work is necessary to maintain an efficient training school. But we are satisfied that the hospital is amply repaid for this special work, through the better service of the pupils and their elevating influence upon the whole body of hospital employees. It seems wiser to maintain a high standard of requirements in the school rather than to bestow its diplomas upon a large number of poorly instructed graduates. At the same time, it cannot be expected that the ordinary attendant, when he enters the service of the hospital, is in any proper sense qualified to assume charge and control of insane patients: therefore all new-comers engaged in ward work are required to purchase and study certain books on nursing, and attend the regular class work and lectures for at least one year. Compliance with this requirement, however, does not signify that one is a pupil in the training school. A voluntary agreement to take the special two years' course is required of all who become pupils.

Mrs. Dudley is obliged to spend so much time in connection with the school work that the services of a second assistant supervisor have been required.

Two married female graduates of the training school have been transferred to the male wing, where they assist their husbands, who have charge of wards. The presence and labors of these nurses in the men's wards have been most salutary and beneficial.

#### PATHOLOGICAL DEPARTMENT.

While Dr. Worcester has not been able to enter upon elaborate research in the pathological department, owing to the unfinished condition of the building early in the year, and the

regular ward work he has done, substituting for Dr. Cary, considerable work of a scientific and practical nature has been accomplished there throughout the year, and during the past three months he has devoted his whole time to this department. Dr. Worcester summarizes his work as follows:—

Thorough post-mortem examinations have been made of all the cases, thirty-six in number, in which permission could be obtained. With exception of a few cases in which it was not allowed to open the head, the brain has been examined in each case, and a microscopical study of its substance made. Histological examination has also been made of other diseased organs whenever they promised interesting results.

The systematic examination of urine, with reference to the connection between renal disease and insanity, begun last year, has been continued. Apart from my service on the lower floor of the female department, I have made frequent visits to the wards, have examined and made notes on cases of special interest, photographed patients and pathological specimens, examined blood and sputum microscopically, and in general have endeavored to contribute, to the best of my ability, to the study of the various morbid conditions found among our patients during life, as well as after death.

During the year I have published reports of "A case of general paresis of long duration," in the "American Journal of Insanity," and of "A case of Acromegaly," with Autopsy, in the "Boston Medical and Surgical Journal." A paper on "Paraphasia, with Word-Deafness," read at the meeting of the American Medico-Psychological Association, will appear in the forthcoming number of the "American Journal of Insanity." A paper on "The Pathology of Insanity," prepared at the request of the State Board of Lunacy and Charity, is ready for publication, and papers on other pathological subjects are in preparation.

Before leaving the hospital, Dr. Frederick L. Hills analyzed above five hundred specimens of urine, to ascertain the amount of urea and uric acid in each. His tabulations were given in a paper which also explained the relations between varying amounts of uric acid and the clinical symptoms of patients under his observation. This paper has been published within the year in the "Boston Medical and Surgical Journal."

Dr. Geo. P. Sprague has taken up a careful study of the blood. He has written an article, "The diagnostic value of blood examination," based upon his examinations of blood

obtained from patients under his care. His article was also published during the year in the "New York Medical Record."

While yet in its infancy, we are already reaping substantial benefits from the new pathological department.

#### CONSTRUCTION AND REPAIRS.

Repairs and construction have progressed steadily, but not as rapidly as we expected a year ago. The laboratory and the laundry are completed, and have been in daily use for several months. The large dining room and covered approaches to it are nearly finished. The serving room and the central bath room are well advanced, and can be finished within two or three months.

The floors in several wards have been wholly replaced, and several other wards can never be put in a satisfactory condition until they are repaired in the same way.

Twenty-one hundred tons of broken trap-rock have been purchased, and used in repairing the macadam roads around the hospital and in the grounds. This work nearly completes necessary repairs upon our roads and walks, which have cost the hospital more than \$10,000 within four years.

Experimental repairs have been made upon small sections of the hospital roof. The conditions found to exist and the success of the alterations made will aid in deciding how best to repair our extensive and defective roofs.

### REQUIREMENTS.

As soon as the rain bath and douche room are ready for general use, the plumbing in the ward bath rooms must be replaced by new fittings.

Removing 177 chronic patients to the Medfield Asylum affected our ward conditions but slightly. Previous to the time of transfer about 150 patients slept in the attic dormitories. There have always existed grave objections to the use of the attics for such a purpose; consequently, the fourth-floor dormitories were discontinued, and their occupants were assigned to the ward cots vacated by the transfer. As a result of this change, there is less confusion in managing the patients, who now sleep in spacious, well-ventilated halls, and are under constant watch and guard throughout the night.

More than one-half of the twenty-four wards of the hospital are now under supervision at night, as well as during the day time, because day rooms are converted into associate dormitories at night by the use of movable cot beds. So long as the ventilation of the day room is under positive control, I hold that this double use of the space is not only economical but is far from being objectionable; especially is this the case under conditions that exist here.

There is no escape from the conclusion that this hospital will always have to provide for a large number of chronic cases, and this cot-bed system will no doubt remain a permanent feature of our management. The chief objection to this practice is its unfavorable influence upon acute and curable cases; and I am more than ever convinced that a separate ward or building, constructed with special regard to the requirements of acute cases, must be built to perfect the hospital feature of this institution.

Then I must again urge upon your attention—and for the third year—the pressing need of a detached building for the nurses. Besides the demand for more rooms, which arises because we now have twice as many nurses as in the early days of the hospital, the standards of care and nursing have been raised; and this expanded idea of the nurses' duty and office should be met with a parallel improvement in the nurses' accommodations and surroundings. It is impossible at present to provide the training-school pupils with such quiet and comfortable rooms as their important services merit.

#### COST OF MAINTENANCE.

Construction of the new dining room and the extensive repairing done this year have cost more than the hospital earned above ordinary running expenses; consequently, we have cut down our working capital about \$16,000. This deficiency would have been reduced one-half had not the income of the hospital been greatly cut down the last quarter in consequence of the large transfer of patients to Medfield the last of June.

The treasurer returns the cost of maintenance per week as \$3.55.

#### Entertainments and Donations.

Patients had opportunity to attend thirty weekly dances and the usual holiday entertainments.

Rev. C. M. Geer of Danvers gave a course of five lectures on subjects connected with Europe and the east.

We have been favored with a large number of dramatic entertainments exceptionally well performed.

The Vincent Dramatic Club, Mr. William V. MacGill, Cambridgeport, manager, has given the following list of plays—embracing comedy, comedietta and farce—in a most artistic manner: "Lords of Creation," "Lord Chumley," "Poor Pillicoddy," "Sarah's Young Man," "Simpson & Co.," "A Happy Pair," "A Bad Penny," "A Quiet Family," "Six to One," and "Mr. Bob,"

Mr. Gillette's "Private Secretary" was most successfully given by Mr. Benj. W. Foster of Jamaica Plain and his friends. "Once Upon a Time" was also well rendered by the Salem Dramatic Company.

The annual concert was given by Mr. Geo. Bridgham and his friends.

Readings, and lectures with stereopticon views, legerdemain, etc., have filled the programme for several other evenings.

A large number of Christmas presents were furnished by Miss Harriet R. Lee of Salem and Miss Florence Lyman of Boston; Mrs. C. C. Dunbar of Boston supplied Christmas presents for the patients in one ward.

Interesting reading matter, such as books, illustrated English and American papers, magazines, pamphlets and newspapers have been generously contributed by Miss Harriet R. Lee, Miss Annie Gray of Boston, Mrs. Henry Saltonstall of Lynnfield, Mrs. Peter C. Brooks of Boston, Mr. J. G. Brown of Andover and the Exchange News Room, Peabody.

The hospital has received gratuitously each number, as issued, of the "Georgetown Advocate," the "Rosary Magazine," and the "Massachusetts Ploughman." The J. C. Ayer Company contributed five hundred almanacs.

Mrs. C. C. Dunbar of Boston set up, at her own expense, a marble head stone to mark the grave of a deceased patient in whom she was much interested.

#### Officers.

After four years of faithful and efficient service here as assistant physician, Dr. Frederick L. Hills resigned in May last, to accept a more desirable position at the Asylum for Insane, Concord, N. H.

To complete the medical staff, Dr. Harry H. Colburn, who had been house physician at the Salem hospital for a year, was elected July 1.

Dr. David E. Allen has been employed several months as medical interne.

As the new dining room will increase the duties of the house-keeper's department, it is thought best to make some changes at once; accordingly, we shall commence the next year with Mrs. John N. Lacey as housekeeper and Miss Abby C. Clapp of Reading as assistant housekeeper.

Mrs. Margaret J. Hamilton has been promoted from head attendant on A 1 to assistant supervisor, and Miss Kate R. Murray from night watch to night supervisor.

In the death of Dr. A. H. Johnson of Salem, chairman of the Consulting Board of Physicians, the institution sustained a great loss. For years he had taken such a keen and sympathetic interest in our work, especially in the training school, that employees as well as officers looked upon him as a true friend and wise counsellor.

The sudden death of Mr. Charles H. Dudley, who has been connected with the hospital for eighteen years, and was assistant supervisor for seventeen years, was a great shock to all, and his many friends will long regard his death as a personal loss.

No one can recognize and appreciate more fully than I do the excellent and important service rendered by my associate officers and many other individual workers in this active hospital community, and I am deeply grateful to your Board for the constant encouragement and cordial support received the past year.

CHARLES W. PAGE.

### REPORT OF CONSULTING BOARD.

To the Trustees of the Danvers Lunatic Hospital.

Gentlemen: — It is but fitting that this Board, whose province it is to endeavor to promote the general welfare of the inmates of the hospital, and therefore to be on the watch for deficiencies in management and supply, should once more, while still calling attention to certain needs, acknowledge its general satisfaction. In the words of one of its members, it finds "the air in the buildings pure, the food of good quality, improvements in the nursing and care of patients, and an active interest on the part of the staff in the pursuit of scientific study calculated to improve knowledge in regard to the insane."

The Board is glad to note the excellent health of the inmates, the continuing energy on the part of the officers of the hospital, the partial relief and improvement from the removal to the asylum at Medfield of some of the overcrowding patients, and the exhibition in general of a wise administrative faculty.

It regrets to observe, also, the continued existence of certain faults, to which it has from time to time called attention, part of them no doubt less easily remediable than others.

For example, there is still need of a wider separation of the acute from the chronic cases, the curable from the incurable, to the advantage of both. The present condition of things is a manifest injustice to the former, especially.

Again, it is still a matter of difficulty to discern the attendants from the patients in the male wards. It is a belief that has been reiterated by the Board, that there should be worn by the male attendants a uniform, or, in default of that, a badge of such size and prominence that the distinction could be readily made. It seems to us that a uniform of itself serves to create an authority that might be otherwise lacking, and certainly to add emphasis to what may be already present.

It is a fair matter for consideration, too, whether there might not be increased facilities for the employment and amusement of the insane, as, for example, by the introduction of bowling alleys.

It has been suggested in some quarters that there has been an excess of "restraint" in the management of patients at Danvers. This Board has failed to observe it. Rather, it has inclined to the belief that Danvers has been among the most noteworthy institutions in doing away with undue "restraint" and in promoting the freedom that is one of the most marked features of the modern method in dealing with the insane.

The training school, one of the most important agencies connected with the institution, deserves the heartiest support; and, if there are any measures that will tend to popularize it with the nurses or assist in making their attendance easier, they should be adopted. Difficult and wearisome as the task of caring for the insane must often be, it would be a matter for deep regret did the nurses fail to avail themselves of any opportunity for self-improvement.

It is with unusual regret that the Board is called upon to note the loss by death of one of its oldest and most valued members, Dr. A. H. Johnson of Salem, who had been connected with the Board ever since its formation, and its chairman since the resignation of Dr. Cushing. Dr. Johnson was a man of wide intelligence, of scholarship, of professional enthusiasm and of eminence among his fellow practitioners, having been honored with the presidency of the State medical society. He had an unfailing and hearty interest in the hospital, and was perhaps better acquainted with the minuter details of its management than any other member of the Board. He was one of a small class of men whose unsalaried services are worth something, and whose associates desire to freely and sincerely acknowledge them.

In behalf of the Board.

MAURICE D. CLARKE,

Chairman.

# Commonwealth of Massachusetts.

### TRUSTEES' REPORT.

To His Excellency the Governor of the Commonwealth and the Honorable Council.

The forty-first annual report of the trustees of the Northampton Lunatic Hospital is hereby presented for your consideration, it being the report for the year ending Sept. 30, 1896. contains a brief statement of the changes in population, the results of treatment, the changes and improvements which have been made in the year past, and the financial condition of the hospital. The number of patients in the hospital at the beginning of the year Oct. 1, 1895, was 546, -275 men and 271 Two hundred and nine patients were admitted within the year. — 95 women and 114 men. Ninety-seven men and 99 women were discharged, in all 196, including 46 deaths. Thirtysix patients were discharged as recovered, 14 as much improved, 39 as improved, 60 as unimproved, leaving 559 persons in the house at the end of the year, - 292 men, 267 women. Fourteen persons were removed out of the State, 49 were transferred to other institutions and 90 returned to their homes.

The largest number of persons in the house on any one day was 583, the smallest 544. The daily average number for the year was 560.49. The increase in the daily average number of patients was 33.93. This is the natural increase of regular commitments from this district, and it is reasonable to suppose that there will be a similar increase in years to come. The hospital is now overcrowded. The hospitals in the eastern districts will undoubtedly be filled with patients from that part of

the State. Patients generally have friends here who desire to visit them and who often object to their being removed out of this district.

Transporting patients to and from other institutions involves considerable trouble and expense. It would seem desirable that provision should be made here for all the patients in the western district, and to do this additional buildings should be erected in the near future. This hospital has a farm, heating and lighting plant, water supply, kitchen, laundry and chapel large enough, with some small changes, for an institution containing a thousand patients. Building materials of all kinds are near at hand, and the average cost of such materials is less here than in other parts of the State. The necessary buildings could be provided at a very reasonable expense.

The improvements and changes in the male wing of the hospital, mention of which was made in the last year's report, have
been carried on through the year, and will be completed this
year. Additions have been built to each of the three sections,
and iron staircases in each section, fire walls, new water-closets,
bath-rooms and drying closets; new bays in each of the nine
halls; one hundred and twenty-five large windows have been
put in the bays, corridors and dining-rooms; new ceilings,
floors and wood finishing throughout.

Other contemplated improvements in the central building will be made as rapidly as the funds of the hospital will allow.

The necessary current expenses of the institution are gradually increasing as the number of recent cases increases. More special attendance day and night is required; special diet, care and all the means used in hospital work.

The report of the treasurer gives the following: -

| Cash assets S  | - |   |   |   | • |   |   |             |
|----------------|---|---|---|---|---|---|---|-------------|
| Liabilities, . | • | • | • | • | • | • | • | 16,528 11   |
| Balance.       |   |   |   |   |   |   |   | \$11,800 87 |

The amount of purchased supplies on hand is valued at \$10.429.62.

The products of the farm on hand are estimated to be worth \$9,524.

The amounts charged for the different classes of patients for the year are as follows:—

| State patients, .   |   |   |   |   | \$13,662 30  |
|---------------------|---|---|---|---|--------------|
| Town patients, .    |   |   |   |   | 68,935 89    |
| Private patients, . | • | • | • | • | 19,459 70    |
| Total,              |   |   |   |   | \$102,057 89 |

The official staff of the hospital remains the same as last year, no change having occurred. It gives us pleasure to recognize officially the continued fidelity of the officers to their various trusts, and to commend them for their faithful work.

A. C. DEANE.
SARAH A. WOODWORTH.
SARAH M. BUTLER.

There were in the hospital at the beginning of the year 546 patients, - 275 men, 271 women; 114 men and 95 women, 209 in all, were admitted within the year. One hundred and ninety-six cases were discharged, - 97 men and 99 women, including 46 deaths, leaving 559 persons in the house at the end of the year. — 292 men and 267 women. The daily average number in the hospital was 560.49, which is 33.93 larger than it was last year. The largest number of patients on any one day was 583, the smallest 544. The total number of cases under treatment was 745, - men 384, women 361. Of the patients discharged 90 returned to their homes, 29 were removed to the Medfield Asylum, 1 to Westborough Hospital, 14 were removed out of the State, 6 to the criminal asylum at Bridgewater and 13 to almshouses. The increase in the number in the house is 13. One man and 4 women were discharged and readmitted, 4 men were admitted, discharged and readmitted, making 465 persons under treatment. The number of persons admitted was 204. The number of persons admitted for the first time was 168, second admissions 31, third 6, fourth 3 and fifth 1.

### STATUS OF PATIENTS.

This hospital was established for the benefit of all classes and nationalities. The number of American born patients at the end of the year was 380, of foreign born 179. The number of Americans admitted within the year was 132, of foreigners 72.

A large proportion of the patients treated here are not natives of this State. Of the 204 patients admitted within the year 87 were born in Massachusetts. The number of State patients in the house at the beginning of the year was 77, town 396, private 73. Seventy-five State patients remained at the end of the year, 405 town and 79 private.

The following table gives the weekly average of the different classes of patients: —

|                   |  |  |   |        | 1894-95. |         |        | 1895-96. |         |

| Private patients, |  |  |   | 30.96  | 89.46    | 70.47   | 82.12  | 42.08    | 74.16   |

#### RECOVERIES.

Thirty-six cases were discharged as recovered. The percentage of recovered on the number admitted was 17.22. The percentage on the whole number discharged was 18.46. percentage of the whole number discharged as recovered, much improved and improved on the number admitted in the year was 44.58, on the number discharged 45. Of the 209 cases admitted within the year, in 61 cases only is there any reasonable prospect of cure, and many of these are very doubtful. Many will improve and be as well as they have been for years. There is no royal road to the cure of insanity; a large part of the treatment must be physical. It is somewhat remarkable how closely connected physical and mental improvement are. For some years past a record of the weight of patients at the time of admission and discharge has been kept in this hospital. This record was kept in 425 cases which have left the hospital. One hundred and sixty-seven of these were discharged as recovered; 142 of these gained in weight while in the hospital, 16 remained stationary and 9 lost. The average gain of the 167 was 11 39 pounds, the average time of residence was 4184 months. The largest gain recorded was 56 pounds. The 9 who lost were cases that recovered in a short time and were gaining when they left. Sixty-two cases were discharged as much improved. The average gain in weight was 1311 pounds, the average residence was 823 months. Ninety-one were discharged as improved. The average gain was  $9\frac{1}{91}$  pounds, the average residence was 9 nd months. One hundred and five were discharged as unimproved. The average gain was 102 pound, the average residence 11,88 months. It will be seen from these figures that the gain in weight corresponded closely with the mental improvement, taking into account the period of residence. It does not follow that mental improvement always accompanies gain in weight. On the other hand an increase in weight and physical vigor generally accompanies mental improvement.

#### DEATHS.

Forty-six deaths occurred within the year, in most cases from chronic causes. A large number of very feeble cases have been admitted. Five deaths occurred within a week of admission and several others within a short time. Consumption was the cause of death in 11 cases, enteritis and Bright's disease in 3 cases. Two persons each died from the following diseases: exhaustion of senile dementia, chronic brain disease, organic brain disease, apoplexy, paresis, paralysis, epilepsy, heart disease and cancer; and one each from exhaustion of acute mania, exhaustion of organic dementia, tetanus, erysipelas, uramia, intestinal obstruction and pelvic abscess. Four persons died of old age, no disease being apparent. The percentage of deaths on the whole number under treatment was 6.09, on the daily average 8.27. In 32 of the deaths the disease existed when the patient was admitted to the hospital. In many others the disease was the direct result of enfeebled conditions which existed at the time of admission.

Deaths and their Ratios, from Sept. 30, 1858, to Oct. 1, 1896.

#### WORSHIP AND ENTERTAINMENT.

The services on Sunday afternoons and the assemblies in week-day evenings have been continued regularly through the year. The new, commodious and beautiful chapel has contributed to the successful conduct of these exercises. organ also has been a source of pleasure to all. The average attendance on Sunday was 346 persons. The largest number on any one day was 384. For the past twenty-seven years, since I have been connected with this hospital, these exercises have been maintained regularly. On every Sunday afternoon, without omission, religious services have been held by some clergyman. The average number of assemblies for that period is 308 each year. It is with special pleasure that I look back over that time and bear witness to the good results which have followed these exercises. The assembling together in an orderly manner is an excellent means of discipline. Many persons will come there and sit quietly who are restless and talkative in the halls. It is a means of education. Various subjects are presented. The attention is drawn to them and the percep-The discussions and observations upon tions are stimulated. the sermons and readings show that they are often well comprehended. Patients whose minds have long been clouded and who are struggling back to a more natural condition find help

there. Others whose thoughts are upon themselves are diverted and find relief in new subjects of thought. The education of the insane is a subject which needs more attention.

#### FARM.

The season has been favorable for the farm, with the exception of a drought in the spring months, which lessened the crop of hay. The other crops are abundant and good. A large supply of vegetables, apples and milk have been brought in for use in the house. The quantity and good quality of the farm products are a great convenience to the hospital, and a large source of income.

The farm is in an excellent state of cultivation and requires much less expenditure to keep it in good condition than formerly. A considerable number of patients is employed on the farm at some sort of labor, with advantage both to themselves and to the hospital. Thirty-nine thousand five hundred and sixty gallons of milk were produced on the farm within the year, or 432 quarts per day. One-third of this amount is reckoned in the table of products, the other two-thirds being allowed for the cost of the animals and the food they consume.

The stock on the farm Sept. 30, 1896, was 3 bulls, 7 oxen, 59 cows, 18 heifers, 2 steers, 9 calves, 13 horses, 250 swine and 175 poultry.

The annexed table gives the annual product of hay: -

| 1864, estimated, |   |   |     | 40 tons. | 1891, weighed, |   |   |   | 213 tons. |

#### FINANCES.

The income of the hospital depends mainly on the products of the farm and the board bills of the patients.

The amount paid for board of State, town and city patients is \$3.25 per week. This sum covers all expenses, except as stated in chapter 87, section 45, of the Public Statutes, which provides that "No pauper shall be discharged from the State hospitals without suitable clothing, and the trustees may furnish the same at their discretion, together with such sums of money, not exceeding twenty dollars, as they may deem necessary. Such money and cost of clothing, the expense of pursuing such lunatics as may escape therefrom, and the burial of such as die in the hospital shall be reimbursed to the trustees by the places of legal settlement of city and town paupers, and by the Commonwealth in the case of State paupers."

The cost per week of each patient for the past year was \$3.16. The daily average of State patients for the past year was 81.57. The price of board for private patients is arranged at the time of admission with the friends. The daily average of private patients for the year was 75.77. The average price paid for all private patients who were in the hospital Sept. 30, 1896, was \$4.96 per week. Clothing and damages are not included in this sum.

#### Cash Assets on Hand Sept. 30, 1896.

The extraordinary and necessary repairs cost \$16,000.70. Of the appropriations made by the Legislature \$38,914.75 was expended.

The total sum expended for improvements and repairs within the year was \$54,915.45. The sum of all appropriations made by the State for construction, repairs and improvements in the hospital, from the passage of act in 1854, authorizing its erection, to October, 1896, is \$615,690.48.

#### ACKNOWLEDGMENTS.

The hospital has received during the year two copies of "New England Staaten Zeitung," one copy of the "Christian Register" and many contributions of miscellaneous reading matter. It is indebted to the various clergymen in the vicinity for services on the Sabbath and at funerals; to Dr. T. W. Meekins, who gave several stereopticon exhibitions; to various parties for several enjoyable concerts. Mr. Frank's orchestra furnished music for the dances.

The number of changes among the employees was larger than usual. The cause may be found mainly in the trying and difficult character of the work. The service has been in general efficient and satisfactory. I am especially indebted to my associates for their ready help, and to your Board for their appreciation and support.

EDWARD B. NIMS.

# DIETARY OF THE NORTHAMPTON LUNATIC HOSPITAL.

[There are two bills of fare, the first of which is supplied to the tables of about two hundred persons, and the second to those of somewhat over three hundred.]

#### BILL OF FARE No. 1.

#### BREAKFAST.

- Monday. Tea, coffee, broiled beefsteak, potatoes, warm rolls ("biscuit"), bread and butter.
- Tuesday. Tea, coffee, fried tripe,\* potatoes, warm rolls, bread and butter. Wednesday. Tea, coffee, broiled beefsteak, potatoes and warm brown (rye and Indian) bread.
- Thursday. Tea, coffee, broiled beefsteak, potatoes, warm rolls, bread and butter.
- Friday. Tea, coffee, fried tripe,\* potatoes, warm rolls, bread and butter.
- Saturday Tea, coffee, either fried fish-balls or liver, meat hash, hot corn cake, bread and butter.
- Sunday. Tea, coffee, cold corned beef, potatoes, warm rolls, bread, butter and fried Indian corn pudding.

#### DINNER.

- Monday Roast beef, potatoes and one other vegetable, bread, butter, boiled rice with syrup or sugar.
- Tuesday. Vegetable soup, roast or stewed veal,† potatoes and one other vegetable, brend, butter and baked Indian pudding.
- Wednesday.—Either fried or baked fresh fish or boiled mutton, potatoes and one other vegetable, bread, butter and berry or apple pudding, with sauce 1
- Thursday. Vegetable soup, corned beef, potatoes and one other vegetable, bread, butter and boiled suet pudding with syrup.

<sup>•</sup> Tripe is replaced in winter by sausages, and in spring by fried ham and eggs, except in the season of shad, when that fish is given once each week instead of ham and eggs, and once instead of beefsteak.

<sup>†</sup> Substituted in winter by fresh pork ribs, roasted.

In spring, maple syrup is used as sauce for puddings.

Friday. — Either boiled or roasted mutton\* or stewed or roasted veal, potatoes and one other vegetable, bread, butter and tapioca pudding or raisin pudding of either rice, bread or cracker.

Saturday. — Baked beans, corned beef, potatoes and one other vegetable, pickles, bread, butter and baked bread pudding.

Sunday. — Cold corned beef, potatoes, warmed baked beans, pickles, bread, butter and pies, the kind varying with the season.

#### SUPPER.

Monday. — Tea, bread, warm corn cake, butter, hard gingerbread and a relish.†

Tuesday. — Tea, white bread, graham bread, butter, soft gingerbread and a relish in the warm season, substituted by buckwheat cakes in the cold season.

Wednesday. — Tea, bread, butter, cookies and ginger snaps and a relish.

Thursday. — Tea, bread, butter, pie (the kind varying with the season) and cheese.

Friday. — Tea, bread, butter, cake (the kind varying) and a relish.

Saturday. - Tea, bread, butter, doughnuts and cheese.

Sunday. — Tea, bread, butter, cookies and ginger snaps and blanc-mange or corn starch.

Extra.— In the winter and spring months hulled corn at supper, once in two weeks, on Saturdays.

#### BILL OF FARE No. 2.

#### BREAKFAST.

Monday. - Coffee, cold corned beef, potatoes and bread.

Tuesday. - Coffee, cold roast beef, potatoes and bread.

Wednesday. — Coffee, meat stew, potatoes and warm rye and Indian corn brown bread.

Thursday. — Coffee, picked codfish cooked in milk, potatoes and bread.

Friday. — Coffee, cold corned beef or meat stew, potatoes and bread.

Saturday - Coffee, hash, either of meat or fish, and bread.

Sunday. - Coffee, cold baked beans, potatoes and bread.

Butter is used in two halls in the morning.

#### DINNER.

Monday. — Roast beef, potatoes and one other vegetable, the boiled hominy with molasses and bread.

Substituted by stewed oysters in winter and spring, with some kind of roasted meat for those who prefer it.

<sup>†</sup> This term, used for the want of better, includes dried beef, berries, baked apples, apple sauce and canned fruits, all of which are supplied, and each according to the season.

<sup>‡</sup> Except two months in the spring.

Tuesday. — Vegetable soup, potatoes and one other vegetable,\* baked Indian pudding † and bread

Wednesday. — Boiled fresh fish with drawn-butter sauce, potatoes and one other vegetable,\* boiled hasty pudding with molasses and bread.

Thursday — Vegetable soup, potatoes, cabbage or some other vegetable, boiled rice with molasses; and bread.

Friday. — Boiled codfish with drawn-butter sauce, potatoes, beets or some other vegetable, boiled hasty pudding with molasses and bread.

Saturday. — Hot baked beans, potatoes, baked Indian or bread pudding, pickles and bread.

Sunday.—Cold corned beef, potatoes, pies (the kind varying with the season) and bread.

#### SUPPER.

Monday — Tea, bread and butter.

Tuesday — Tea, bread, butter and soft gingerbread.

Wednesday. - Tea, bread, butter and some kind of relish.

Thursday. - Tea, bread and butter.

Friday. - Tea, bread, butter and soft gingerbread.

Saturday - Tea, bread and butter.

Sunday. - Tea, bread and butter.

#### EXTRAS.

In August and September these tables are furnished at supper with either berries, tomatoes or baked apples, as many as five times a week.

In four halls, sauce, of either fresh or dried apples, is furnished as often as three times a week for the rest of the year.

#### EXTRAS FOR THE WHOLE HOUSEHOLD.

All persons have roasted turkey at dinner on Thanksgiving Day, and either turkey or chicken on one other day in the year.

From four to five bushels of green sweet corn in the ear is consumed in its season, daily, with the exception of Sunday.

Tomatoes, cucumbers and melons are furnished in liberal quantities in their season.

In the spring, cowslips and dandelions are largely used as greens, and horseradish as a condiment.

During eight months of the year, a barrel of apples is distributed, daily, among the patients.

Beef tea, chicken broth, mutton broth, scalded milk, arrow-root gruel, oatmeal gruel, milk punch, cracked wheat, oatmeal porridge, dry toast, milk toast, toast with dropped egg and boiled eggs, for invalids and all who are not able to take the regular fare.

<sup>·</sup> Except two months in the spring.

<sup>†</sup> All baked puddings for the whole household are made with milk.

<sup>1</sup> Maple syrup is furnished, in place of molasses, three or four times in the spring.

#### TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

In the accompanying reports of the superintendent and treasurer, and the statistical tables appended, will be found the details of the general condition of the hospital and its inmates and the progress made during the past year.

On Oct. 1, 1895, there were 846 patients, — 416 men and 430 During the year 432 cases have been admitted, - 222 men and 210 women, - the largest number ever received in a single year, with one exception. The whole number under treatment, 1,278, is a total unprecedented in the history of the hospital. The movement of the hospital population has been also greater than ever before. The number discharged was 479, -253 men, including 54 deaths, and 226 women, including 57 deaths. The daily average number of inmates resident in the hospital was 819.37, -398.66 men and 420.71 There remained on Oct. 1, 1896, 790, — 386 men women. The unusually large number of patients disand 404 women. charged is accounted for by the transfer to the Medfield Insane Asylum of 121, and the resulting gain in comfort to those remaining by this relief from overcrowding has been very noticeable. The increased ease in administration also, whereby their requirements are more readily met, is a decided advantage. We had hoped that this long-looked-for reduction in our number would prove to be more lasting than is indicated by the fact that there are already but 50 less at the end of the year than at the beginning.

The usefulness of the new infirmary buildings has been still further shown in their facilities for the isolation of cases of contagious disease. What promised to be a serious outbreak of diphtheria was confined to three cases, largely by the arrangements of the isolating quarters. In addition to the usual precautions taken a physician practising outside the hospital was given entire charge of these cases.

It is becoming more evident each year that no further advance that is radical in the treatment of the insane en masse can be made in this hospital, or in other large institutions of the kind, until the acute insane can have separate treatment. The attempt has been made for some time past to meet this requirement here by using one of the hospital wards for this purpose, and four-fifths of this class are now treated together there. They are cared for as well as possible under existing conditions, but these are far from adequate, and we hope that special accommodation for the acute insane in a building especially adapted for and devoted solely to that purpose will soon be forthcoming, as a necessity both from the point of view of humanity and of public economy.

The financial condition of the hospital is better than ever before and we now have a surplus large enough for a working capital, but still falling short of enough to provide for general repairs. As, however, a larger exchequer has only been possible at the expense of greatly overcrowded wards, it is not an unmixed blessing.

A well-appointed laboratory, with autopsy-room, mortuary and the modern appliances for pathological work, has just been completed. The hospital has heretofore been without this important adjunct for the advancement of medical science. The appointment of an expert pathologist as a member of the hospital staff, who shall devote his whole time to pathological work, is in contemplation.

The industrial building, the appropriation for which was made in 1894, has been completed this year and affords increased facilities for the employment of patients, the great desideratum in the care of the chronic class. The chapel and amusement hall, heretofore the smallest by far in any of our lunatic hospitals, has been so enlarged as to double its seating capacity. Its completion is expected in a few months.

The oldest wards which adjoin the administration building, built on plans now out of date, are very forbidding to the sight, and to the patients living in them cheerless in the extreme. They would be far more comfortable and healthful with a sufficient supply of light and fresh air. To remedy this evil, and add to the appearance of the hospital, bay windows should be thrown out from the rear on each ward of the two middle wings to correspond to those on the front, and other windows should be enlarged. This change will require an appropriation of \$6,000.

The hospital is now well in the city limits. This is an advantage in some ways, to be sure, but not without its drawbacks, among which is the constant annoyance from tramps and other trespassers. We have long felt the need of a gate-house or lodge to do away with this nuisance and would recommend an appropriation of \$5,000 for that purpose.

It is very necessary to have the entire outside wood-work of the hospital painted. This has not been done for seven years. For this an appropriation of \$3,000 is asked.

The worn-out laundry machinery needs replacing and a number of new floors should be laid. Each of these items call for an appropriation of \$500.

The general repairs of the hospital will involve an expense of \$5,000, which our earnings are not sufficient to meet. The items for which the trustees would respectfully ask appropriations are, in short, as follows:—

| Construction of bay window   | s, e | nlargii | ng   | the ot | her v | windo | ws a | nd |                |    |
|------------------------------|------|---------|------|--------|-------|-------|------|----|----------------|----|

| General repairs,             |      |         |      | •      |       |       |      |    | 5,000          | 00 |
| Gate-house or lodge at front |      |         |      |        |       |       |      |    |                |    |
| Painting outside wood-work   |      |         |      |        |       |       |      |    |                |    |
| New laundry machinery,       |      |         |      |        |       |       |      |    |                |    |
| New floors,                  |      |         |      |        |       |       |      |    |                | 00 |
|                              |      |         |      |        |       |       |      |    |                |    |
|                              |      |         |      |        |       |       |      |    | \$20,000       | 00 |

The hand of death has once more been laid upon the Board, and has removed our esteemed fellow-member, Simeon Borden. We desire to record our deep sense of the loss we have sustained and to pay that tribute to his memory which is justly due. His devotion to the interests of the hospital at all times,

his conscientious regard for all of its affairs, his sincere sympathy for the unfortunate inmates, his faithful attendance at the meetings, his wise counsel in all the vicissitudes and difficulties that have to be met in the management of a great institution like ours, made him a most valuable and important member of our Board. His genial nature and heartiness of manner bound him very closely and endeared him to all of his fellow-trustees.

Mr. Milton Reed of Fall River was appointed to fill the vacancy thus made.

Much to the regret of the Board Mr. John J. Russell, its highly valued adviser and associate, declined a reappointment, owing to the pressure of other duties. Mr. Gerard C. Tobey of Wareham was appointed his successor.

The vacancy caused by the resignation of Dr. Copp and the promotions of Drs. Goss and Coon was filled by the appointment of Dr. F. S. Ward, a graduate of Dartmouth College and Medical School, with hospital experience.

The devoted work during a particularly arduous year of the hospital staff under Dr. Brown's careful supervision and wise guidance has our hearty commendation.

Trustees.

TAUNTON, Oct. 15, 1896.

#### SUPERINTENDENT'S REPORT.

To the Trustees of the Taunton Lunatic Hospital.

I herewith submit to you the forty-third annual report of the superintendent for the year ending Sept. 30, 1896, including the usual statistical tables.

At the beginning of the year there were in the hospital 846 patients, —416 men and 430 women. There were admitted during the year 222 men and 210 women, which makes the whole number under treatment 1,278, and which is 87 more than the preceding year, and a greater number than has ever been cared for before in the hospital in any one year. The movement of population has also been greater than for many years, 432 having been admitted and 479 having been discharged, which makes 810 that have come and gone. This amounts in numbers to nearly a total change of population in one year. This fact emphasizes the extent and character of the year's work, as the greater the movement, the greater and more exacting the labor in caring for the rapidly changing population. The daily average was 819, the highest number 890 and the lowest 725.

Sixty-five patients have been discharged as recovered, 45 as much improved (including 6 women who were habitual drunkards), 47 as improved, 210 as unimproved and 111 died, leaving in the hospital at the end of the year 799 patients, — 386 men and 413 women. It may be noticed that the list of much improved is greater than the year before and that of recovered is less. This may mean the exact face of the statement, or it may mean more conservatism or more care in reporting recoveries and results of treatment; but whatever personal factor, if any, may have entered into it, it was thought best to place all doubtful recoveries in the list of much

improved and to the credit side of common honesty in making up hospital statistics. Nothing is gained to medical science by attempting to conceal or by refusing to acknowledge unwelcome truths, however discouraging or depressing it may be to one's professional zeal or vanity. Of those discharged recovered 28 had been insane less than one month before their commitment, 9 less than six months and 2 less than twelve months. The whole duration of insanity in  $68\frac{9}{15}$  per cent. of those who recovered did not exceed one year.

One hundred and twenty-one of those discharged were transferred by the State Board of Lunacy and Charity to the Medfield Insane Asylum, 6 to the State Almshouse at Tewksbury, 10 to the Asylum for Insane Criminals at Bridgewater, 9 to the Boston Lunatic Hospital, 1 to the Danvers Lunatic Hospital, and 55 were removed from the State, having no settlement in Massachusetts, 4 were discharged to the commissioner of immigration to be sent out of the country, and 12 were discharged to the overseers of the poor. Ten men eloped, —3 returned voluntarily, 3 were returned by their friends, 2 were kept at home and 2 are still at large. The latter were much improved and were at work assisting the painters when they left.

The number of deaths was greater than it had been for many years, and the rate of mortality was unusually large. percentage on the whole number under treatment was 8.6 and on the daily average 13.5. Some of the more noteworthy causes of death were organic diseases of the brain, pneumonia and phthisis. Twenty died of paresis and other forms of organic disease of the brain, 10 of pneumonia, which was confined mostly to the old and feeble, and at one time during the winter seemed to be almost epidemic on certain wards. Seventeen died of phthisis, which was a large number although the percentage of deaths from this disease was not greater than in many previous years. Most of the cases developed in the old parts of the hospital, where the breathing space is less and the overcrowding more apparent. In 8 of the cases the disease was contracted before admission to the hospital. Five deaths occurred from acute mania, 4 of them assuming the form of delirious mania, which progressed rapidly to a fatal termination. Nine died from acute melancholia, and several

of them were brought to the hospital in a moribund condition, death ending the scene within a few days, in spite of all efforts to save them. An unusual number of feeble and exhausted patients, some of whom should have been cared for at home, were brought to the hospital as a last resort, and most of them died within a few days, —19 having died within fifteen days of their commitment.

No death was caused by suicide and it has now been above nine years since a suicide has occurred in the hospital. This is quite unusual in a large institution, where so many suicidal patients are received and cared for, — 88 having been received during the past year. Our exemption for so long a time has been due, undoubtedly, in great measure to the careful supervision of the patients by night as well as by day, and this we have been able to do by reason of the increase in the number of night nurses, who are under the direction of night supervisors.

There have been three cases of diphtheria during the year, two nurses and one of the physicians, but none of the patients. Its introduction into the hospital seems to have been as follows: on June 15 a female patient was received from the city hospital in Boston, who, a short time before, had recovered from diphtheria. A few days after she was admitted some clothing was sent to her from the house in Boston from which she had been removed, and which, as was afterwards learned from the testimony of her husband, had not been disinfected. days after the reception of the clothing, the nurse, who took it to the laundry to be sterilized, came down with diphtheria. As she had not been exposed to any other source of infection it seemed probable that she became infected by handling the clothing which had been worn by the patient before she was removed to the hospital in Boston. About ten days later the woman physician who had the care of the case was taken ill with the disease. They were both isolated in the infirmary, and made good recoveries without any unfavorable results. Antitoxin was used in each case. Seven weeks after their recovery, about the middle of September, one of the nurses who had assisted in taking care of them, and who seemed to have escaped all danger of infection, became ill with the disease, but she has since recovered and resumed her work.

Two convenient rooms in the basement of one of the wings have been fitted up for autopsies and other pathological work, and correspondence has been had with several leading men in the specialty with reference to obtaining a pathologist (who should be competent to organize and develop this important department of future hospital work), but as yet no suitable candidate for the position has been found.

Twenty-one autopsies have been made during the year and the results in some of the cases have been very satisfactory in determining the causes of death, and the pre-existing mental symptoms.

Essentially the same methods of treatment have been followed as in former years. There is no specific for insanity, and in that respect it is not unlike many other diseases. Most of our patients, coming from manufacturing cities, are poorly fed and badly nourished before they are sent to the hospital, the insanity in many cases resulting from that cause. In the treatment of these cases we depend more upon nourishing food than the materia medica, milk and eggs, with stimulants, when indicated, being more freely dispensed than any form of drugs.

A greater number of patients than heretofore have been employed in the various departments of the hospital, and some new industries have been developed. Besides repairing all the boots and shoes worn by the patients, slippers of excellent quality for men have been made, the cost of the material being about one-half of the cost of the slippers when purchased, and more kinds of clothing for men have been made in the tailoring department.

A considerable number of women who were not able to go to the sewing room have been employed on the wards, knitting and sewing, under the direction of a special attendant who had charge of the work, going from one ward to another encouraging and assisting such patients as seemed to need it. This has meant more than the mere work accomplished, and the benefit to the patients in many cases has been very apparent, but the amount of work done, which has been tabulated and may be found on page 69 of this report, has exceeded our expectations.

The training school for nurses has made a good beginning. All of the attendants are required to become members of the school and take the first year's course. Many of them manifest a considerable interest in the work, and those who do not pursue the full course and graduate will receive some benefit and be more useful while they remain in the service.

Repairs to the out-buildings and other improvements for which appropriations were received have been made as follows: an extension of eighteen feet has been built to the straw barn, which makes it sufficiently large for the purpose for which it is used, and the roof of the large well-house has been slated with the best grade of Maine slate, which has taken the place of shingles that had become decayed. About seventy-five feet of concrete has been laid, connecting the industrial building with the centre and the male wings, and the old concrete walks in the rear of the centre building and the walk to the stable have been recoated, making them as good or better than new. The industrial building has been completed, and the one-story wooden building, formerly used for a bowling alley, but more recently for a mattress shop, has been removed to a location below the barn, where it will be useful as a storehouse for various things. Its removal from the rear centre, where it had stood for more than forty years, opens up a wide expanse of lawn, which greatly improves the outlook in that direction from the main building. The industrial building has been completed within the appropriation of \$12,000 which was made for it by the Legislature of two years ago. It is well constructed and proves to be very satisfactory and well adapted to the purposes for which it was built. It has four large workrooms, one of which is used for a paint shop, one for upholstering, one for various kinds of work which was formerly done by patients in the brush shop in the rear centre, such as brush making, making and repairing shoes and men's clothing, and repairing furniture. One room in the second story is now unoccupied, awaiting the development of some new industry or the further extension of those which are now being carried on. The basement has three large rooms, one of which is used for storage of paints and oils, and is practically fire proof, and the others can be used for workrooms if there is a demand for The attic has been finished into lodging-rooms for employees, with bath-room, water-closet and lavatory, and hot and cold water. The building is heated by steam directly from the boiler house.

The old brush shop in the rear centre has been made into a library room, and rooms for employees, with bath-room, water-closet and lavatory. Provision is being made for the library in the room above referred to, and an adjoining room connected with it, which will make ample space for its future growth.

The rooms in the rear centre, formerly occupied by male employees and now occupied by women, have been painted and otherwise renovated, the plumbing in the bath-room has been changed, with new material and new furnishings, and the room has been lighted by a window and light-shaft from the roof.

The plumbing in the water-closet and lavatory for the sewingroom has been renewed and a modern flushing closet put in, and a bath-room and water-closet has been built for the attic rooms of the middle centre.

The new chimney for the kitchen, and other work preliminary to enlarging the chapel, were commenced about the first of May and the chimney was completed about the first of June. work on the chapel is still in progress, and it is hoped it will be completed before Christmas. It is now sufficiently advanced to enable one to see that the final result will be very satisfactory and better than was anticipated. The audience room will be seventy-four by forty feet and will have, with a gallery double the width of the old one, a seating capacity for four hundred and fifty people. There will be two systems of heating the chapel, - the direct, by leaving the old radiators in the room, and the indirect, by radiators in the basement to heat fresh air from outside to be carried up to the chapel through galvanized iron flues. The room will be ventilated by two large flues under the platform extending to the attic and delivered into a ventilator above the ridge of the roof. A steam radiator will be placed in each flue in the attic to heat and rarefy the air and thus force a circulation from the room below. The stage will be the same size as heretofore and all its arrangements the same. The ceiling above the stage is planked and tinned, and sheet iron has been used for laths on the walls, which will greatly lessen the danger from fire. A new ceiling of steel is being put up in the main hall. The completion of the chapel, with its increased capacity and its improved system of heating and ventilation, will bring more pleasure and happiness, and I may say more benefit, to a greater number

of patients (to say nothing of the rest of the household) than has any other change in the hospital for many years.

A new boiler of the same size and pattern of the other boilers has been procured and set in the boiler house, and the steam plant is now adequate to all the demands that will be liable to be made upon it for some time to come.

Considerable painting has been done during the year. two infirmaries are being painted throughout and the upper ward of the Brown Infirmary is completed. Much of the painting in the old wards should be renewed as soon as practicable, and the outside wood-work of all the buildings should be painted the coming year, for which an appropriation of \$3,000 from the Legislature will be needed. An appropriation of \$5,000 will be needed for general repairs; for laundry machinery and for laying new floors \$1,000. It has seemed to me for some time that some changes should be made in the two middle wings to introduce more light and air, to make them more cheerful and healthful for the inmates. When these wings were built, forty-five years ago, sunlight and fresh air were not considered as essential to health and happiness as they are at the present time. The desired result could be accomplished by enlarging the present windows, and projecting bay windows from the middle of the west side of each wing, commencing from the foundation and building up three stories. change would raise these wings to the present standard of hospital requirements at a comparatively small cost, especially when it is considered that the health, comfort and happiness of 200 patients would be promoted by it. The cost of the whole work completed, including the repainting of the wards, would be about \$6,000.

The hospital is becoming more and more embarrassed every year, from its location in the centre of a populous city, by irresponsible and lawless persons coming into its grounds through the front gate or over the wall near the gate. To lessen this evil, if it cannot be wholly remedied, a gate-house or lodge should be built opposite the front entrance and occupied by a family in the employ of the hospital, whose duty it should be to guard the entrance and this part of the grounds from trespassers. A house of suitable size and architectural design for this purpose and location could be built for about \$5,000.

The report of the treasurer shows that the apparent surplus at the close of the year was \$27,400.15. This is \$7,245.56 greater than that of the previous year, and has been caused by the extreme overcrowding of the hospital and the low price of provisions and other supplies, which can hardly be expected to continue through another year.

#### ACKNOWLEDGMENTS.

The "Daily Mercury," the "Old Colony Memorial" and the "Taunton Evening Herald" have been sent to the hospital free of charge.

Several entertainments have been given to the patients in the chapel by kind friends from the city, to whom thanks are due. A concert by the Juvenile Brass Band of Whittenton, under the direction of Malcolm Duffy. A comedy by the Parish House Society of St. John's Church, Whittenton, entitled "A Limb of the Law," with vocal and instrumental music. A miscellaneous entertainment by young ladies from the Church of the Immaculate Conception, Whittenton. Two excellent vocal and instrumental concerts by quartettes from Taunton, the expense of which was paid by an unknown friend of the insane through the kindness of Dr. H. R. Stedman. As usual, the hospital is under obligation to the Bristol County Agricultural Society for free admission to its annual fair. Other entertainments were given through the winter and spring as heretofore by members of our own household: once in two weeks, views of home and foreign scenery, illustrated by the stereopticon; once in two weeks, a social dance; and once each week, light gymnastics with music.

Christmas, as usual, was celebrated by Christmas music and a Christmas tree in the chapel, at which Santa Claus appeared bringing or sending a present to each inmate of the hospital. No other day of the year brings more joy in anticipation or is more fruitful of pleasure in its realization.

During the summer two picnics in the grove were given to the men and the same number to the women, which were greatly enjoyed.

Several changes have occurred in the medical staff and other officers of the hospital. In January Dr. Frederick S. Ward, a graduate of Dartmouth College and of the Dartmouth Medi-

cal School, was appointed to the position of third assistant, which had been vacant for several months. Dr. Gates having completed the year's service for which she had been engaged July 1, and Dr. Brimmer not being able to return at that time, as was expected, the vacant position on the staff was filled temporarily by Dr. F. B. Jewett, who continues in the service at the present time. Mr. Herold Thomas resigned as male supervisor and was succeeded by Mr. H. G. Ripley, who had been an attendant in the hospital for several years. Miss A. M. Harris resigned as head nurse and supervisor of the Howland Infirmary March 1, and was succeeded by Miss B. S. Holt, a graduate of the Hartford, Conn., Training School for Nurses.

I cannot close this report without referring to the great loss the hospital has sustained in the death of Mr. Simeon Borden, the senior member of the board of trustees. Mr. Borden, by reason of his sound judgment, genial nature and conscientious regard for the feelings and rights of all with whom he was associated, was especially fitted to discharge the duties of trustee, and his kindly sympathetic nature made him always a welcome and helpful visitor to the hospital. His interest in the patients and all the affairs of the institution was constant, and never lessened by length of service. As a wise counsellor and true friend he will be greatly missed and long remembered.

The official visits of Mr. John J. Russell as trustee have been greatly missed, and it was a source of much regret to all connected with the hospital that he declined a reappointment at the expiration of his term of office.

It gives me pleasure to say that all associated with me in carrying on the work of the institution have been loyally active and efficient in the discharge of their duties and are worthy of commendation. In this recognition I would include the non-medical officers and many of the attendants, whose labors have been more arduous by reason of the crowded condition of the hospital. To the trustees for their cordial support and the valuable assistance they have rendered me I return sincere thanks.

JOHN P. BROWN, Superintendent.

#### JOHN KITTREDGE.

Treasurer.

173 68

8 84

TAUNTON, MASS., Sept. 30, 1896.

And the average weekly cost of

The foregoing account of the treasurer for the year ending Sept. 30, 1896, has been carefully examined by me and compared item by item with the books of original entry and the vouchers, and found to be correctly cast and properly vouched.

Dividing this sum by 819.37, the average number of patients,

we have the annual cost of each patient,

GEO. M. WOODWARD,

Auditor.

TAUNTON, MASS., Oct. 12, 1896.

#### FINANCIAL STATEMENT.

Of the appropriation made by the Legislature of 1895 for the erection of a building to be used for a paint shop, upholstering and working rooms for patients, for general repairs, for additional fire-escapes and fire apparatus, laundry machinery, concrete walk and sundry other improvements:—

| Amount of appropriation,   |      |      |  |             | \$20,500 00        |

## TRUSTEES' REPORT.

To His Honor the Lieutenant Governor, Acting Governor, and the Honorable Council.

The trustees of the Worcester Lunatic Hospital respectfully submit this sixty-fourth annual report, and also the report of the superintendent and treasurer, with statistical tables which explain in detail the affairs of the institution.

In our last report mention was made of the fact that plans were under consideration for enlarging the scope of the medical work of the hospital, in adding a training school for the assistant physicians and a limited number of internes, - young men who might wish to perfect themselves in a knowledge of This was deemed a step in the right direcnervous diseases. tion, and was cordially approved by the trustees. are now in a large measure perfected, and the new department will be opened with the beginning of the official year under the especial charge of Dr. Adolf Meyer, who entered upon his service at the hospital early in November. During the summer Dr. Meyer visited Europe, accomplishing an incredible amount of work, and bringing back with him the latest results of the progress made by students in the old world. He selected much apparatus for the new laboratory, which has been fitted up and which will no doubt prove a very useful adjunct in the daily work of the hospital.

For many years the hospital has been so crowded with patients that the officers have been overwhelmed with routine duties. The material wants of the large colony—equal to the whole of Massachusetts in early Colonial days—have made it impossible to give to individual cases the special care and attention which would have been gladly devoted to them. The internes will assist in the laboratory and aid in clinical work,

thus relieving the regular staff of physicians from much routine labor, and enabling them to devote more time to special cases. Increased opportunities bring increased wants, and public institutions should keep pace with the march of improvement. In order that we may do this, we must solicit aid from our guardian, the State. Among so large a number of people, either in or out of the hospital, there is always more or less acute illness. Insanity often arises from mere physical weakness. The wards primarily intended for such cases are of limited capacity and are now entirely outgrown, so that sick persons are found in almost every hall. All such cases need to be treated as they are in a general hospital, - with special care, special nursing and special diet. It is scarcely possible for an attendant to take proper care of a sick person in a ward, where the conditions cannot be controlled. Therefore, we must have a new infirmary ward. This was referred to in the superintendent's report for 1894.

The medical work, as now provided for, requires that all cases received into the hospital should be under close observation and critical examination, before being assigned to their respective classes. In the new infirmary this will be provided for.

As one part of an institution is outgrown, so is another. Thus, the kitchen and executive department no longer afford necessary facilities. Originally designed for a far smaller family, all the space is more than occupied. The time has now come when it is absolutely necessary to have more room for carrying on the work of this all-important branch of the institution in a successful and economical manner. This change can be made in connection with the other additions now contemplated, and will give ample space for the help employed, and give us work rooms for patients. The rooms formerly so used have been taken for dormitories, on account of the crowded condition of the hospital.

Appliances for making work attractive to the patients are greatly needed. The central thought of the institution is how best to treat and cure the demented. The successful solution of the question touches a most important problem. Congenial work is the basis of contentment. "Something to do" stimulates the mind and gives zest to life. If the thoughts of the insane can be diverted away from self, and they can become

occupied in some form of manual labor, a great advance will be made towards restoring their mental balance. For many, alas, there is no cure; and for many there can only be unrest and discontent until the tired brain ceases to act. Hospital or palace, alike, would fail to satisfy them. There are others, however, who respond to a proper stimulus, and will gladly avail themselves of an opportunity of agreeable employment.

As to the cost of these desired changes and improvements; the matter has been carefully looked into by the trustees, the superintendent and the heads of the various departments, with the result of having obtained plans which will meet our needs. The expense has been carefully estimated, and we feel certain that an outlay of \$160,000 will cover the cost of erecting the additions and kitchen, besides furnishing them. We therefore respectfully ask that the Legislature grant the sum for the needed additions, thereby greatly increasing the capacity and usefulness of one of its most vital institutions.

The hospital has been managed with great efficiency by Dr. Quinby and his able corps of assistants. There has been no epidemic, and no more sickness than is usually incident to so large a community. The perfect neathess, order and cleanliness of the entire establishment are to be highly commended. That, with so changeable and erratic a family, every corner, closet and drawer should bear inspection, is a marvel of house-keeping which may well be admired.

Dr. Laure Hulme has resigned, after seven years of faithful service, and her place has been filled by Dr. Margaret A. Fleming, whose kind and sympathetic influence is felt by the patients.

The year was saddened for us by the loss of our honored and lamented governor, who took a personal interest in the prosperity of the hospital and the comfort and welfare of its unfortunate inmates.

## Respectfully submitted,

## ALBERT WOOD,

Treasurer.

Ост. 1, 1896.

WORCESTER, MASS., Oct. 23, 1896.

I hereby certify that I have this day compared the treasurer's statement of disbursements for the year ending Oct. 1, 1896, with the vouchers on file at the Worcester Lunatic Hospital, and believe it to be correct. I have also inspected the securities representing the invested funds of the institution, and find that their market value is as stated.

GEORGE L. CLARK,

Auditor of Accounts.

#### SUPERINTENDENT'S REPORT.

To the Trustees of the Worcester Lunatic Hospital.

I herewith respectfully submit the following report of the hospital for the year ending Sept. 30, 1896, it being the sixty-fourth annual report.

There remained at the hospital Oct. 1, 1895, 961 patients, -455 men and 506 women. During the year 281 men and 295 women were admitted, 303 men and 266 women were discharged and 56 men and 51 women died, leaving at the end of the official year 861 patients, -377 men and 484 women. this number, 133 were supported by the State, 474 by cities and towns and 154 by friends. Of the 569 discharged, 107, including 9 habitual drunkards (women), were reported recovered; 82 were much improved; 91 improved; and 288. including 1 habitual drunkard (woman), not improved; 1 woman was discharged not insane. Fourteen men and 11 women were removed by the overseers of the poor; 38 men and 31 women were discharged to the care of the Board of Lunacy and Charity, to be removed from the State; 5 men and 37 women were transferred to Tewksbury; 2 men and 1 woman to the Boston Lunatic Hospital; 21 men to the State Farm: 110 men and 64 women were transferred to the Medfield Insane Asylum; and 1 woman was boarded out. One man was discharged by the superior court and 1 woman was returned to the Reformatory Prison for Women. Seven men escaped, and were not returned to the hospital at the end of the official year.

There were 64 more admissions than in the previous year and 4 less deaths, but owing to the large number of discharges there were present at the close 100 less patients than at the beginning of the year.

The daily average number was 956.25. The highest monthly average was 1,037.06, and the lowest 840.16.

The percentage of recoveries, calculated upon the average number of the discharges and deaths, was 15.85; calculated upon the number of admissions, it was 18.58.

The death rate was 11.19, calculated upon the average number of patients; and 6.96, calculated upon the total number under treatment.

The number of deaths is slightly less than last year. There has been the usual large fatality among those suffering from general paralysis, 25 of this class having died from exhaustion or from some complicating disease, as lobar or bronchopneumonia, which, separately, were the cause of death in 5 cases of paresis and in 7 cases of other chronic brain disease. Phthisis was the cause of death in 13 cases, the same number as last year. One man committed suicide by hanging. This patient had been an inmate of the hospital fourteen years, and was not considered suicidal.

At the beginning of the last official year preliminary steps were taken towards reorganizing the entire medical work of the hospital. This was to include an exhaustive examination, after a uniform method, of each patient upon entrance; fuller and more accurate records; the more careful observation of recent cases; and the employment of laboratory methods as aids in diagnosis and treatment, — methods which have proved so useful in general hospitals.

As there is, at present, no medical school in this country which gives its students anything more than the most elementary training in nervous and mental diseases, our assistants, however well instructed they may be in general medicine, come to us with but little knowledge of the principles which underlie one of the most complicated of specialties. After coming to the hospital, the assistants, in their daily rounds of the wards with the superintendent or the junior assistant, gain, it is true, much information as to the various forms of insanity, the general management of patients and the discipline and supervision of the wards; but, as these rounds are often hurried and frequently interrupted, little opportunity is given for more detailed instruction, for a minute examination of each case and for the weighing of separate symptoms with reference to their bearing

upon the diagnosis. These points they are obliged to work out for themselves, and this cannot be done without a great deal of study and research on their part; and later on, when they come, as they are sure to do, to find their time more and more occupied with routine duties, they are apt to neglect their scientific promptings and content themselves with the proper performance of their ever-pressing clerical and household duties. It seems essential, therefore, to establish, at the outset of our undertaking, a training school for assistants; and the immediate supervision of this work was placed in the hands of Dr. Adolf Meyer, who, as mentioned in my last report, entered upon service at the hospital, as assistant, November 15.

During the winter a series of lectures upon the nervous system were given to the assistants, and much time was also spent in the wards, instructing them as to methods of case taking, and in concise and accurate recording at the bedside of the results of their observations. They were also instructed in methods of preserving and examining the nervous tissues, and had the opportunity of being present and assisting at some twenty or more autopsies, and of attending a series of nine lectures given at the hospital by Dr. Meyer to the students of Clark University, in his capacity as docent to that institution. Meanwhile, much time was devoted to organizing the laboratory, determining the scope of the work to be undertaken therein, and in deciding as to what methods were best suited to render it supplementary to the clinical work of the wards. Much attention was also given to plans for rearranging the duties of the assistant physicians, that they might be relieved, either wholly or partially, of certain of their routine duties, such as correspondence with the friends of the patients, keeping records, etc., - and additional time might thus be gained for their more strictly professional work. In pursuance of this plan, the old method of keeping the records has been abandoned, as much valuable time was consumed in compiling them, they being, after all, of little practical value, except as they noted the time of admission and discharge of patients and their general condition while at the hospital. Made up, as they were, from the assistant's recollection of the case, and written out days and sometimes weeks after the occurrence to be noted had passed, they failed to give anything like an adequate medical picture of the disease, or to furnish any exact data upon which to found a diagnosis or from which the method or result of treatment could be gathered. Hereafter, the record keeping, so far as the assistant physicians are concerned, will be confined largely to notes dictated at the bedside during their daily rounds. Arrangements have also been perfected to reduce the labor of correspondence to a minimum.

Notwithstanding these efforts to economize the time of the assistants and to limit their duties, as far as possible, to strictly professional work, it has been found that much of the day was still of necessity occupied with the discipline and oversight of the wards, in devising methods for the employment and recreation of the patients, in seeing that their material needs were provided for and in interviews with friends, - duties which neither could be neglected nor delegated to others. The assistants still lacked time for that minute personal observation of their patients, necessary for the careful working out of each individual case after the exhaustive plan which we have undertaken. It thus became evident that additional help was needed. and it was decided that this want would be best satisfied by the appointment of a corps of internes, whose duties should be to compile and record an exhaustive history of each case upon entrance; accompanying the assistant on his medical rounds; take notes of cases at his dictation; make urinary analyses, bacteriological tests and examinations of the blood and sputa when indicated, and assist at autopsies and the general work of the laboratory. They should share in the instruction given the assistant physicians, and have time and opportunity afforded them to do special laboratory work. Such a plan would no doubt prove of great advantage to the institution, as it would furnish material from which to select assistant physicians already trained for the work. With the approval of your Board, an announcement was sent out early in the summer, stating that four internes were wanted at the Worcester Lunatic Hospital, the same to be selected after a competitive examination. number of letters received (some forty or more) in reply to this announcement was satisfactory in the extreme, proving, as it did, that there are enough young men anxious to avail themselves of such an opportunity, and that we should have no difficulty in filling these places. Although many of these would-be

applicants were deterred from appearing at the competitive examination by the conditions imposed (that they should have had a collegiate and full medical education and a reading knowledge of French or German, or both, and preferably some general hospital experience), we were able to select four men possessing the necessary qualifications, and these, after having passed a satisfactory examination, received their appointment and began work October 1.

In April Dr. Meyer went abroad in the interest of the hospital. He visited first the most noted Italian hospitals for the insane and neurological laboratories; the clinics of Professor Bianchi in Naples; the large hospital at Reggio-Emilia, under the direction of Professor Tamburini; the clinics of Morselli (Genoa) and Lombroso (Turin), and the new asylum at Quarto near Genoa; further, the neurological and physiological laboratories of Professor Mingazzini and Professor Luciani in Rome. Professor Fano and Dr. Bottazzi in Florence, Professor Giacomimi and Professor Mosso at Turin, and the pathological laboratory of Professor Golgi at Pavia. Six weeks were spent at Heidelberg, at the clinic of Professor Kraepelin and in the laboratory of Professor Arnold; and a visit was paid to the new clinics at Giessen (Professor Sommer), Würzburg (Professor Rieger) and Strassburg (Professor Fürstner). On this occasion the laboratories and methods of Professors Goltz and Ewald in Strassburg, Professor von Kölliker at Würzburg and Professors Weigert and Edinger at Frankfurt-am-Main were studied. During the month of July Dr. Meyer worked in the laboratory of Professor von Monakow and the clinic of Professor Forel at Zurich. He next visited Professor Dejerine at the Salpêtrière in Paris, and several of the English and Scotch hospitals; Professor Mott's new laboratory for the London County Asylums; Dr. Robertson in Morningside, Dr. Alexander Bruce in Edinburgh, Dr. Yellowlee in Glasgow, Dr. Rorie in Dundee and Dr. Hyslop at Bethlem Hospital. Owing to the courtesy of the men mentioned, a fair picture of the present status of methods, etc., was obtained. He returned to the hospital early in September, and the time since his return has been occupied in arranging the laboratory and further perfecting our plans, so that now everything is in order, and we are ready with the opening of the official year to begin work after the new methods.

The interest and enthusiasm manifested by every one concerned argues well for the success of the new enterprise. rooms have been fitted up in the basement of the executive building, near the general office and easily accessible therefrom. One of these rooms is to be especially devoted to the use of the internes and the medical staff, and will furnish a place where they can get away from the bustle and confusion of the general office for the purpose of reading and study. In this will be placed the reference library and its accompanying card catalogue. The adjoining room has been fitted up as a general microscopical room, and is equipped with necessary microscopes, the latest and most approved instruments for enlarging and drawing microscopical preparations and a complete apparatus of photo-micrography. A dark room with running water and all the necessary appliances for photography connects the microscopical room with the general work room, in which are the usual freezing apparatus and the necessary microtomes for cutting both small and large brain sections. Separated from the general work room by a corridor is the chemical room, with sterilizing apparatus and appliances for bacteriological and chemical investigations. It has been our purpose to exercise due economy in fitting up the laboratory, and to buy only such instruments as will meet our immediate needs; but there will be added, from time to time, whatever appliances may be found necessary or useful for the work in hand.

The present working plan lays the chief weight on a careful study of the symptoms and needs of the patient, and upon the laboratory as a help for doing justice to the daily increasing complexity of diagnostic and therapeutic problems, without which clinical medicine is unable to exist and much less to progress. The lines of work in the laboratory must be suggested by the work in the wards, and, in order to achieve this, the idea of having a special pathologist out of contact with the clinical work was not deemed to be adequate to the needs of the institution. In order to have a uniform and methodical working plan, the supervision of the purely medical work in the wards and of the laboratory has been united in the hands of Dr. Meyer. We have expended in this work, including the outlay for the library, some \$3,000. The increased salaries and the necessary running expenses can be easily met from the current income of the institution.

We still lack a training school for nurses, a feature which has justly come to be regarded as necessary in every properly appointed hospital. That such a school has not already been established here is through no lack of appreciation on our part of its necessity, but was due partly to the feeling that this other work which we have long had in mind and which is now so happily inaugurated might justly claim the precedence, and partly to the fact that the crowded condition of our house for the past four or five years has made it impossible for us to find proper room for our attendants or to give them the time and quiet necessary for study. Now, however, that the hospital is relieved of the pressure of overcrowding, and is likely, as we are happy to believe, to remain so for some time to come, we shall hope to have such a school in the near future; the need for which will be still more imperativa if we add hospital wards to our present accommodations, as we hope to do during the coming year. I may be allowed in this connection to quote from my report of 1894, in which I called attention to the fact that: -

Our wards are so large and our numbers so great that it is difficult to secure always the isolation and special care which recent cases demand, unless the friends of the patients are able to provide them extra attendants and private quarters. Patients are from necessity often brought into intimate contact, at the most critical period of their disease, with the turbulent and with those whose minds are full of morbid notions in regard to themselves, the hospital and their treatment; and the example and influence to which they are thus subjected tend largely to counteract the best efforts of the physician and attendant, and no doubt frequently retard or even preclude recovery. Our present sick ward was planned to meet the wants of a limited number of patients, and we have now entirely outgrown its capacity, and are obliged to place many of our acute sick on wards not arranged for such cases. With our present number of inmates we should have a hospital ward distinct from the main building, conducted upon the lines of a general hospital, with a corps of trained nurses and all modern appliances for the treatment of nervous diseases. With a view to supplying this want in the near future, your Board has authorized me to procure plans for the necessary buildings, together with an estimate of the cost of the same.

Such plans have now been perfected and have met the approval of your Board. They provide for two buildings, one to be devoted to men and the other to women; each is four

stories high, and is to be built in front of, and as an addition to, the wards nearest the executive building, but entirely separated therefrom. These additions are to be sixty-two feet deep, and will conform, as to the exterior, to the present architectural features of the building. Each story will contain an infirmary ward for ten patients, together with two rooms for isolating acute and noisy cases, and the necessary toilet rooms. By making slight alterations, that portion of the old ward immediately adjacent to the new building can be utilized as a part of the latter, and in this will be located the day rooms, clothes rooms and service rooms. An easy exit from the wards is furnished by an iron staircase, and there is on each story a balcony, properly protected, for the use of such sick and infirm patients as are unable to otherwise enjoy the open air. Each building will accommodate forty-five patients. and will cost \$40,000. This will include the necessary alterations in the old ward and the building of an iron staircase in place of the present one.

It is very desirable that the recent cases and all those whose condition requires daily or more frequent observation on the part of the physicians should be within easy reach of the general office and as little scattered as possible. This requirement can be readily provided for in connection with the new infirmary ward.

The necessity for increased facilities in our general kitchen and for more room in the department devoted to outside help has been long recognized; but we have hesitated in taking any steps towards remedying this, on account of the material expense that it of necessity involved, since no adequate relief can be gained except by enlarging and entirely remodelling both of these departments. The time has come, however, when such a change is imperative. Our ovens and all of our cooking utensils are now run up to their utmost capacity, and even then it is often with the greatest difficulty that we can provide sufficient food for our large family, or distribute it to the various wards with that promptness which is necessary to insure its coming to the table in a hot and palatable condition. Run at this high tension, one or more of our ovens or any of our cooking utensils is liable to give out at any time, and place us in a serious dilemma.

The increase in our medical staff necessitates additional servants, but we no longer have any place where we can accommodate them. The dining room is already overcrowded, and many of the living rooms are barely tenantable, especially in the winter months, on account of dampness caused by the steam from the pipe ducts in the basement condensing upon For these and for many other reasons which it is unnecessary to enumerate here, we feel that we should be doing injustice to the institution and those for whom we have undertaken to care if we should allow these defects to go on longer without making an effort to remedy them. therefore drawn up plans of such alterations and additions as seem to meet the necessities of the case. This building will be 99 by 80 feet, four stories high, and of fireproof construction; and besides the kitchen and bakery, which will occupy the whole upper story, there will be additional store-rooms, rooms for help, and two large work rooms, 24 by 76 feet, in which provision will be made for the employment of patients. It is estimated that this addition, including the building of a temporary kitchen, will cost \$72,000.

The new farmhouse has been opened and occupied by patients nearly a year, and has proved quite as much of a success as was anticipated. On account of the absence of locked doors, grated windows and the other safeguards usual in hospitals, it was feared that it might be found impracticable to here provide for all those willing to work upon the farm, and that it would still be necessary to lodge some of our farm hands at the hospital, on account of their turbulent character and disposition to wander away; but we have thus far found little or no difficulty in either of these directions. All the patients seem very much pleased with their new quarters, and have caused no disturbance, and but two have attempted to escape.

As regards the income from the farm, no just estimate can be formed by comparing this year's report with that of previous years, for the reason that the cost of support of the patients there employed appears in this year's farm account, as it has not done heretofore. Everything bought for the farm or used at the farmhouse has been charged to the farm account (except the clothing issued to the patients), and everything produced thereon has been passed to its credit at a fair market value.

The expenditures for the past year exceed the receipts by \$1,468.79; deducting from this the supplies on hand and paid for, there remains a net deficit of \$1,087.24. The season, however, has been an unusually poor one for all farm products, and our income has been correspondingly small. Another year we can reduce somewhat our running expenses at the farmhouse, and, with the income which may be relied upon in the average season, the farm can no doubt bear the charge of the support of the patients working thereon, and still show a balance on the right side.

The current expenses for the year, less the amount received for articles sold, have been \$163,040.43; dividing this by 956.25, the daily average number of patients, gives \$170.50 as the annual cost of support, which is equivalent to a weekly cost of \$3.27.

The only change in our medical staff during the year is the resignation of Dr. Laure Hulme, who had been seven years in the service of the hospital as assistant physician. The vacancy thus occasioned was filled by the appointment of Dr. Margaret A. Fleming, who entered upon her duties Dec. 11, 1895.

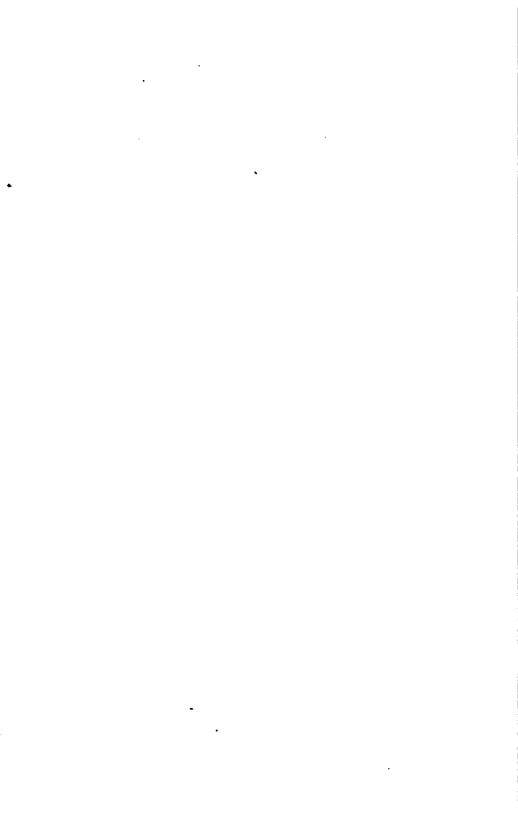

We are indebted to the publishers of the "Worcester Daily Spy," the "Worcester Evening Gazette," the "Fitchburg Sentinel," the "Essex County Mercury," the "Lynn Transcript," the "Christian Register," "Zion's Herald" and "White Ribbon" for copies of their papers.

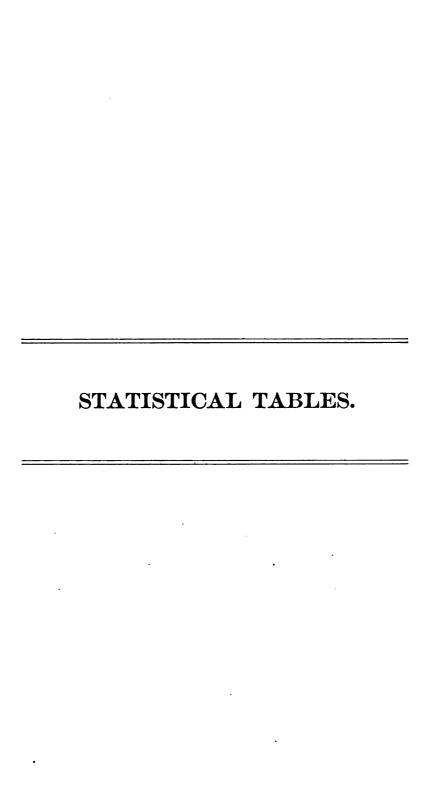

The addition during the year of such a large number to our official family made many changes necessary in our household arrangements, but these changes have been for the most part cheerfully acquiesced in, and each has shown a disposition to concede something for the mutual good. This attitude on the part of the assistants, the evident interest with which they have entered upon the new work, together with the uniform encouragement and support which I have always received from your Board, has made my work a pleasure rather than a task.

H. M. QUINBY,

Superintendent.

WORCESTER LUNATIC HOSPITAL, Sept. 30, 1896.

#### TRUSTEES' REPORT.

To His Honor the Lieutenant Governor, Acting Governor, and the Honorable Council.

The trustees of the Worcester Lunatic Hospital, having the care of the Worcester Insane Asylum, present the nineteenth annual report of the institution, together with statistical tables prepared by the superintendent.

The additions that were commenced last year in the northern part of the building on the women's side are nearly completed and portions are already occupied. By the changes made in the past two years the character of the old building, which was dark and cheerless, has been entirely altered, and is now as bright and attractive as a modern hospital. Thus to increase the capacity of a long-established institution is a practical way of providing for the insane, at a comparatively small cost per bed per patient, as our experience proves.

The personnel of the staff continues the same as last year. Dr. Scribner and his assistants have evinced the same interest in and assiduous care of the inmates as heretofore. In their earnest endeavor to treat all as though cure were possible, they have been rewarded, notably, in the case of a patient who had been a sufferer for fifteen years, and has been discharged. Such results are encouraging, and we trust that the cure is permanent.

The management of the house has been most satisfactory; neatness, order and cleanliness prevail, and the conditions are conducive to health and comfort.

SARAH E. WHITIN.

## Respectfully submitted,

### ALBERT WOOD,

Treasurer.

WORCESTER, MASS., Oct. 1, 1896.

WORCESTER, MASS., Oct. 24, 1896.

The undersigned has this day carefully compared the treasurer's statement of expenditures for the year ending Sept. 30, 1896, with the vouchers which are on file at the Worcester Insane Asylum, and finds it to be correct. He has also compared the amount of bills rendered for the board of patients with the estimated earnings of the institution for one year, and finds them to agree.

GEO. L. CLARK,

Auditor of Accounts.

## SUPERINTENDENT'S REPORT.

To the Trustees of the Worcester Lunatic Hospital, acting for the Worcester Insane Asylum.

I respectfully submit to your board the nineteenth annual report of the superintendent of this institution.

Oct. 1, 1895, 447 persons were inmates of this asylum,—225 men and 222 women. There have been admitted since 20 women, making a grand total of 467 cases under treatment,—225 men and 242 women. There have been discharged 1 woman recovered, 2 men and 2 women improved and 2 women not improved. Death has removed 16 men and 19 women, making a combined total of deaths and discharges of 42 persons,—18 men and 24 women. Sept. 30, 1896, there remained 425 patients,—207 men and 218 women. Of those admitted, the whole number, 20 women, came from Westborough. Of those discharged, 1 man was removed by an officer of the city of Boston, 1 man escaped and was never returned, 1 woman was sent out of the State by the Board of Lunacy and Charity, 1 woman went on a visit and was not returned, 2 women were transferred to the Medfield Asylum and 1 woman recovered.

The small number of patients admitted during the year renders it difficult to draw any specially valuable deductions from this source. Some estimate as to the prospect for final recovery in these cases can be made when we learn that the average duration of insanity, before admission here, was nearly eight and one-half years. Epilepsy and heredity lead in the assigned causes of disease, a finding, perhaps, not so surprising in cases of such long standing, when we remember that these patients are the accumulation of other institutions, and a selected accumulation at that. Of this number, considerably over 50 per cent. were hopelessly demented and 25 per cent.

were epileptic. Three or four were inclined to be somewhat helpful, and an equal number were quite as inclined towards destructiveness. The average age was that of middle life, and there was less than the usual proportion of extremely feeble cases.

One woman recovered, and was discharged to the care of her This was a case of mania, with occasional outbursts of excitement. She had been insane for about fifteen years. Five years ago she was discharged to the care of her brother, as much improved. It was thought then that she might continue to improve in her new surroundings, and eventually complete her recovery without a return to a hospital. It proved, however, that she had not regained sufficient mental stability to endure the strain of personal responsibility, and she was very soon returned to an institution, a little later being again transferred here. After a more or less eventful experience she again improved to such an extent that she was once more discharged to the care of her brother, this time as recovered. She has now remained well for some months, and possibly may continue so, though the probability of relapse in recoveries from mental disease of long standing is greater than in acute Recovery from mental disease may be complete, so far as any evident manifestation is concerned, and yet the predisposition remain, and be even strengthened, rendering a relapse perhaps probable, and from slighter provoking causes than in the case of the first attack. Bearing this fact in mind, it has been claimed that a continued high rate of recovery among the insane would eventually exert an unfavorable influence upon the increase of insanity, by returning to the ordinary walks of life persons whose impress upon posterity would lead to the perpetuation of an unstable mentality.

Some special investigation has been undertaken during the past year, looking to establish the value of certain remedial measures in their influence upon the course of chronic mental disease. The somewhat striking success which has followed the administration of the thyroid extract in certain forms of acute insanity has led to the hope that something might also be accomplished by its use in the chronic stage of disease. A thorough trial of this remedy has given, in my hands, nothing

but negative results, a finding not wholly unexpected. Much more of promise has seemed to attend a more careful regulation of the diet, and an attempt to correct faulty digestive processes, - a fact which shows the importance of always providing good, wholesome and nutritious food for the insane. slight success which too often follows treatment in the chronic class should prove rather an incentive to renewed investigation than a discouragement to further effort. The large and constantly increasing numbers of these most unfortunate people demand that every measure shall be taken which gives any hope of relief. The establishment here of a laboratory furnishing increased facilities for the study of disease and for the scientific investigation of the medical problems of the institution would greatly further the work of the hospital, and increase its efficiency for the relief of its patients. Though the study of disease in its chronic forms is not usually as attractive as in its acute manifestations, I believe that the results of investigation are more than sufficient to reward the effort. of mental disease into acute and chronic forms is, to a certain extent, artificial, as many acute cases are practically incurable when admitted, while, on the other hand, many cases of long standing are susceptible of improvement, or even recovery, as the experience of this institution shows.

The policy has been continued of granting as great personal liberty to patients as seemed consistent with the proper management of the institution. This freedom has been very generally appreciated by our people and abused by but few, as is evidenced by the fact that only one successful escape occurred during the year. Notwithstanding the fact that the more helpful patients are seldom transferred here, much valuable work has been accomplished, nearly two-thirds of our number having been profitably employed during the greater portion of the time. Pecuniary result has not been the sole measure of effort, and many persons have been encouraged to work solely for the benefit which would accrue to the individual, sometimes at a direct money loss to the institution. Recognizing, also, the fact that out-of-door exercise is an essential requisite for the proper maintenance of health, constant effort has been made to keep our patients as much as possible in the open air.

Ratio of Deaths from the Opening of the Asylum to Oct. 1, 1896.

The death rate, reckoned upon the daily average number of patients, is lower than it has been before at any time for fourteen years. I ascribe this to three causes: a less number of feeble cases than usual having been received during the year; the fact that the weaker ones of our old cases had earlier succumbed to the ravages of disease; and, finally, the constantly improving sanitary condition of the institution. There has been very little acute disease in the house. The chief cause of death has, as usual, been phthisis. There has been a remarkable freedom from those annoying cases of severe tonsillitis which were formerly so prevalent among the help, a fact doubtless due in great measure to the admission of more air and sunshine to the wards.

The new building, which was in process of construction at the time of my last annual report, is nearly completed, and for some time has afforded sleeping accommodations for patients. The water section alone remains unfinished. This building not only increases the capacity of the institution, but also furnishes

water-closet and bathing facilities for three of the old wards. The construction is of the most substantial kind. The entire water section and the stairway are fireproof; the remainder of the building is slow-burning construction. Provision is made for the rain bath on every floor, a room of moderate size being set apart for this purpose in each ward. This arrangement is adopted in preference to one large room for all, as being far more convenient and securing greater privacy and personal attention for patients. I doubt the expediency of bathing large numbers of the insane at the same time in the same room.

The opening of this new building has afforded almost complete relief from the crowding which has existed here for so many years. The numbers in the female department are now nearly at the normal capacity and in the male department a few vacant rooms exist. The very favorable showing as to per capita cost in the erection of this building would seem to indicate that the enlargement of already existing institutions furnishes, to a certain limited extent, an economical and efficient way of providing for a future increase of the insane. When, however, numbers greatly in excess of one thousand are grouped under one administrative head, the wisdom of a still further enlargement of that particular institution seems to me problematical.

It is greatly to be regretted that we have not as yet been able to equip the asylum with electricity for lighting purposes. Our revenues have not been sufficient to complete the work already in hand and to undertake so expensive an operation as the installation of an electric plant. The experience of other institutions leads me to believe that the change from gas to electricity would be productive of most desirable results, both in a sanitary and a financial way, and would give a lighting agent far safer and easier to control. Our new building has already been equipped with iron-armored conduit for the passage of electrical wires. The engine which furnishes power for the laundry and for the general purposes of the hospital has been long in service, and is of an antiquated type. While, under our present conditions, it is fairly efficient in operation, it is wasteful of steam, and, with the introduction of the electric light, would probably not respond in a satisfactory manner to the added burden of a dynamo. This engine should be replaced with a modern

machine at such early date as the finances of the institution will warrant.

The work of enlarging the windows in the older wards has been continued slowly, and much general work of repair has been accomplished. Several changes have been made in the wash room of the laundry building, which have added greatly to the efficiency of the service. The last of the old wooden washers has been discarded, and replaced with a modern metallic machine. That portion of the plumbing which was beneath the floor has been removed, heavy iron being substituted for the old cement pipe, which has been in place for many years. Some necessary furnishings have been added to the public reception room and the business offices.

Earnest and faithful work has been done by the officers of the institution, and the employees, with few exceptions, have shown an attention to duty which has been commendable.

The usual services and amusements have been held in the chapel. Our winter entertainments have been eagerly looked forward to by the patients, and largely attended.

I desire to thank your Board for the cordial support which has been at all times given to me.

E. V. SCRIBNER, Superintendent.

#### TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the State Almshouse and State Farm, in compliance with the requirements under section 3, chapter 88 of the Public Statutes, herewith present their forty-third annual report, which, with the reports of the superintendent and medical director herein submitted, shows the condition of the State Farm at Bridgewater for the financial year ending Sept. 30, 1896.

Under the provisions of chapter 62 of the Acts of 1896, the sum of \$114,900 was appropriated for the payment of salaries, wages and labor, and for other current expenses at said institution for the present calendar year. For a detailed statement of the expenditure of the same see report of the superintendent, hereto annexed, which has been examined and verified by the trustees.

Although it is barely possible that the expenses of the institution can be kept within the amount appropriated for the present year, yet with the large number of commitments of the criminal insane a much larger sum will be necessary for the ensuing year, in consequence of an additional number of officers and attendants being required for the safe and proper management of said department.

Under chapter 89 of the Resolves for the year 1896, the sum of \$34,200 was appropriated for the following purposes, to wit: for an extension of the prison department, and a workshop, heating, plumbing and furnishing included, and all necessary yard and connecting walls for the same; for increasing the administration accommodations of the asylum for insane

criminals, renewing the plumbing in the east and west wings, and enlarging the hot-water system of said asylum; for additional laundry machinery and a sterilizer; for extending electric lighting and a system of arc lights for the yards, and one additional boiler for the same. All of the foregoing improvements and additions, for which provision has been made, are in process of construction and near completion.

It is unnecessary for the trustees to repeat in their report what is contained in the reports of the superintendent and medical examiner hereto annexed, as they contain full information in relation to the condition and management of the institution, and the disposition of the money appropriated and expended for its maintenance. There will also be found in said reports important suggestions and recommendations which have been carefully considered by the trustees, and it is recommended that a sufficient appropriation be made to carry the same into effect.

The question of sewerage has been considered by the trustees and superintendent, and a plan or system for said purpose will be presented to the Legislature, and an appropriation is recommended therefor. The superintendent has fully set forth in his report to the trustees the importance of said project.

It is recommended that appropriations be made for the erection of a new cow barn, in order to provide additional accommodations for a larger number of cows, as the quantity of milk now produced is not sufficient for the needs of the institution; also for building a new piggery, for additional concreting, for painting a portion of the institution buildings, and for the purchase of additional land for pasturage and other purposes, when the same can be obtained for a reasonable consideration.

It is also recommended that additional cells be constructed for sentenced criminals, instead of having so large a number occupying dormitories as at present.

The recommendations made last year for a new infirmary building, also for a spur track from the New York, New Haven & Hartford Railroad to the yards and coal bins connected with the institution, are again renewed.

The farm is under a good state of cultivation. The excessive drought during a part of the summer affected some of the

crops. Several acres have been reclaimed and cultivated the past year from land recently purchased, and the result has been satisfactory and will soon be a source of profit, the labor on the same being principally performed by inmates.

In the workshop, inmates who are able to perform labor have been employed in chair-seating, as formerly; sewing, tailoring and cobbling are also carried on, to a limited extent.

The annual inventory, as required under section 7, chapter 79 of the Public Statutes, has been taken, and an appraisal made of the real and personal property connected with the institution and belonging to the Commonwealth, by David G. Pratt, Esq., of Middleborough, whose report is hereto annexed.

It is unnecessary for the trustees at the close of another financial year to again speak in words of commendation in relation to the faithful and efficient services rendered the institution by the superintendent, H. M. Blackstone, and the officers under his charge. While it is a pleasure to the trustees to know personally that the institution continues in the same excellent condition as in former years, it is also a satisfaction to know that others, whose official position requires a general supervision of the same, have also spoken words of highest approval in regard to its management.

The trustees fully recognize the valuable services of Dr. Arthur H. Harrington, medical director of the insane criminal department, who has been eminently successful in the discharge of the varied and responsible duties devolving upon him.

Respectfully submitted,

J. WHITE BELCHER.
JACOB H. HECHT.
PAYSON W. LYMAN.
WARREN E. RICE.
LEONARD HUNTRESS, M.D.
ANNA F. PRESCOTT.

BRIDGEWATER, Oct. 30, 1896.

#### SUPERINTENDENT'S REPORT.

To the Trustees of the State Farm.

I herewith present the following report of the State Farm for the year ending Sept. 30, 1896, the same being the forty-third annual report.

With a special commission authorized by the last Legislature to report upon a revision of the public institutions of the Commonwealth, it would seem best to refrain at this time from speculation in new theories of management and progress, and rest for the present on the development already made,—simply content with warming over the suggestions of the past which are matters of record, and dealing for the time being with current matters of interest and the more common needs of the institution.

Comparison of numbers with last year show 90 more inmates remaining at this date than one year ago. The admissions have been 1,669,—an excess of 228 over last year; the discharges have been 1,579,—an excess of 178; the average number has been 1,098,—an increase of 96 over last year.

The per capita expense has increased 11 cents per week gross and 14 cents net over last year. The increase is accounted for principally in the more expensive care of the Asylum for Criminal Insane, made necessary by the reception of acute cases and the transfer from all the other State hospitals of the whole class of criminal patients. The excess of the net cost over the gross is accounted for in the reduced income from the labor of inmates.

While there is no division of accounts between the departments, there are some items easily discernible, such as salaries and wages, of which nearly half the whole amount appropri-

ated is expended for the Asylum with little more than one-fourth the whole number of inmates.

Scant help in this department would be false economy, and a disproportion of expenditure is well defended in the record of good order maintained there, which reports but one successful break or escape for the year.

Concerning the general conditions of the asylum department, I have nothing to suggest not in full accord with the recommendations of our last annual report. While its affairs have gone along without friction and with apparent success, I yet believe that complete separation is desirable from every point of consideration, and cordially hope such action may result from the examination now being made of the State institutions system.

The improvements for the asylum authorized by the last Legislature are well under way, and will be fully completed within the year. There are still other improvements very necessary, all of which are referred to in detail in the report of the medical director. For the proper care and treatment of acute cases of insanity, important changes had to be made in the north-west wing; and, as this expense was not otherwise provided for, it had to be made from current expense account, and for this reason we made only such changes as would answer the demands for the time being. The rest of this wing should be changed and renovated to meet the certain demands in the same direction.

The necessity for greater and closer classification of patients in the asylum has become strikingly apparent since the whole class of criminals have been collected into one institution. A percentage of the so-called criminals are not only of unsound mind but incorrigible and dangerous. They should be allowed but limited liberty, and none whatever in common with the majority of the patients. Their presence on the open wards and yards is a constant menace to the good order and happiness of all concerned, — an exposed danger not easily defended if attended with serious results. They should have a ward so situated as to molest the rest of the wards least, and yet be as accessible as possible to conveniences of care and administration. Probably a ward of twelve to fifteen rooms would meet the demands for several years. For the necessary out-

door exercise and recreation of the patients generally during the winter months all the walks of the airing yards and courts of both asylum and hospitals should be paved in asphalt or cement. All the improvements mentioned are necessary and imperative, and appropriation recommended. The central bathing house and store-room asked for last year are again requested.

The insane department has been now more than a full year under the direction and control of a physician, in accordance with chapter 390 of the Acts and Resolves of 1895. The wisdom both of the legislation and the selection of Dr. A. H. Harrington as the medical director are no longer matters of question. His management has been both conservative and able.

The workhouse or prison department has maintained its record of increasing numbers yearly. Although the number remaining in this department at this date is but 4 more than one year ago, there have been 262 more inmates committed. Of the 1,332 committed, 395, or more than 25 per cent. of the whole number, had been former inmates, — not a few of them many times recommitted. I do not know that the number is out of proportion with the records in other institutions caring for this class of misdemeanants; but, whatever the results elsewhere, I am impressed that the percentage is altogether too great.

An inquiry by the committee on prisons in the last Legislature, under an order offered in the Senate, as to the cause of the great number of commitments to the State Farm, resulted in a bill being offered for all commitments here by indeterminate sentence, of which the following is a copy:—

#### AN ACT RELATIVE TO SENTENCES TO THE STATE FARM.

Section 1. When a convict is sentenced to the state farm the court or trial justice imposing the sentence shall not fix or limit the duration thereof. Whoever is so sentenced for drunkenness may be held in the custody of said state farm for a term not exceeding one year; and whoever is so sentenced for any other offence may be held in such custody for a term not exceeding two years.

SECT. 2. When it shall appear to the trustees of said state farm that any person so sentenced is reformed, they may issue to him a

permit to be at liberty for the remainder of said sentence upon such conditions as they shall establish; and they may revoke said permit at any time previous to its expiration.

- SECT. 3. When any permit issued as aforesaid has been revoked, said trustees may issue an order for the return of the holder thereof to said state farm; and said order may be executed by any officer authorized to serve criminal process. The holder of said permit when returned to said state farm shall be detained therein according to the terms of his original sentence, and the time between his release on permit and said return shall not be considered as any part of the term of the sentence named in this act.
- SECT. 4. All acts and parts of acts inconsistent with this act are hereby repealed.
  - SECT. 5. This act shall take effect on the first day of July in the year eighteen hundred and ninety-six.

This bill was introduced late in the session, and shared the fate of many other late comers, by reference to the next General Court.

This form of sentence had been earnestly advocated and recommended in our annual report, and was expected to have been considered and reported by the joint committee on public charitable institutions, to whom the document was referred; but by a misunderstanding on the part of this committee the recommendation failed of consideration by them. Had the bill been reported earlier in the session, in due course of business I believe it would have become a law last year. Every argument in its favor can be made with even greater force now, and I earnestly hope that this form of sentence may be enacted not only here but in all other prisons as well.

In our workhouse plant more than two-thirds of the prisoners are cared for in dormitories, there being but 225 cells and rooms, with a population varying from 500 to 700. It would seem that the normal or average number of this department would continue not less than 500. For the safe and proper care of this number there should be at least from 200 to 300 more rooms or cells. I recommend the rooms as cheaper, and much better adapted for such care than the regulation prison cell, and urge an appropriation for their construction. The dormitories thus vacated will be needed for workshops. There is much time now squandered in the yards and so-called loafing rooms,

which could be more profitably employed in their rooms during a portion of their leisure time. The loafing rooms and dormitories afford too great opportunity for evil development, and should not be continued.

Our agricultural interests are extensive, and, so far as we can estimate, fairly successful; if not so, it is our own fault, for we not only raise the product but furnish the market for its consumption, and it is all consumed. The cultivation is wholly within these limits. The crops have been for the most part satisfactory, less in some lines and more abundant in others, but on the whole a good average.

Reclaiming waste land goes on and thirty acres of valuable land have been added to the acreage this year. My faith in reclaiming waste lands hereabout is still strong. Moderate additions from time to time I believe to be good policy.

Our barn capacity is not equal to the requirements. More milk stock is needed, to meet the demands of an enlarged hospital and increasing asylum. I recommend that a new barn be built, and an appropriation be made for the same, also a sum sufficient to repaint all the agricultural buildings.

In connection with our reclaiming land, there is an abundant harvest of stone. From some of the surplus we have made on Conant Street about one-quarter of a mile of macadam road. I suggest that we investigate, with the State Highway Commission, a proposition to develop this public work in our locality (in the towns of Bridgewater and Middleborough), and refer with pleasure to the piece made as a sample of genuine State road.

The question of our sewage disposal has been considered somewhat by the State Board of Health. Their engineers have made several examinations, and have found but one location where the sewage could be disposed of by filtration without the aid of pump or siphon. The adoption of this plan appears at the present time to offer the simplest as well as the least expensive solution of the difficult problem. It will involve the purchase of land and diverting the present outlet to it by about five thousand feet of new main of sufficient capacity. It is possible that some portion of the sewage matter might be disposed of by irrigation on the proposed line during the open season. We have a letter on file from the local board of health,

protesting against the present outlet. It is imperative that the improvement be commenced at the earliest moment possible, and provision made for the same.

Religious services have been continued twice daily on Sundays through the year, except during summer vacation. The afternoon services have been favored with many exceptionally interesting addresses by clergymen of eminence and ability, and I am sure deep and abiding influences for better and truer living have been received with sober and serious thought by those enjoying these opportunities.

Rev. Father J. H. O'Neil, who had been our faithful and energetic attendant upon the Catholic interests for more than five years, denied us the further pleasure of his amiability and wide-awake presence by resigning his pastoral work in early summer. Five years of unbroken service between officials of differing faiths without clash or friction proves that jealousy of creeds found no place in the spiritual pursuits of this institution. The innate modesty of the writer accords all credit to the Rev. Father for this millennial state. He has the best wishes of all his late associates for his continued prosperity.

Through the medium of the attending priest and visiting clergymen we have been provided with much valuable reading matter. We are also indebted to many thoughtful friends in Bridgewater for donations weekly of periodicals and magazines, also to Geo. Henry Shaw, Esq., of Middleborough, and to Rev. P. W. Lyman of your own Board for a valuable set of bound periodicals and frequent packages of miscellaneous reading matter.

The stability of our official force, particularly in the prison department, is worthy of comment. The nature of the asylum work is such as to make permanency less inviting on the part of the employed; but even there the records show a large majority whose service is registered in years instead of months. Good wages and men of character and responsibility are quite as necessary in the care of insane men as any other class. Judgment, discretion and forbearance are highly essential qualities in the make-up of officers entrusted with the care and responsibility of directing men suffering penalties in restrained or convict life. Complaints of excessive bossing or domineering manner of officers are rare indeed, and their duties gen-

erally have been very satisfactorily performed. It gives me great pleasure to commend the force as worthy of your highest confidence.

The encouraging influence of the Board of Trustees and uniform approbation of our work by all visitors and inspectors in authority is a stimulus of no uncertain value, and its acknowledgment here is not mere ceremony, but a full appreciation of the fact.

Respectfully submitted,

H. M. BLACKSTONE,

Superintendent.

BRIDGEWATER, Oct. 1, 1896.

#### HOSPITAL REPORT.

To the Board of Trustees of the State Farm.

I herewith present the following report of the hospital department for the year ending Sept. 30, 1896.

| Number rem   | aini | ing it | the i  | hosp  | ital C | et. 1, | 189 | 5, . |   |  | 34   |
|--------------|------|--------|--------|-------|--------|--------|-----|------|---|--|------|
| Whole numb   | er a | dmit   | ted di | ıring | the    | year,  |     |      |   |  | 696  |
| Discharged,  |      |        |        |       | •      | •      |     |      |   |  | 615  |
| Deaths, .    |      |        |        |       |        |        |     |      |   |  |      |
| Remaining S  | ept. | 30, 1  | 896,   |       |        |        |     |      | • |  | 64   |
| Largest num  |      |        |        |       |        |        |     |      |   |  |      |
| Daily averag | е,   |        |        | •     | •      | •      |     |      |   |  | 56.2 |

Of the 51 who died, 12 were prisoners, 30 were paupers and 9 insane. The percentage of deaths to admissions to the hospital is 7.3. The percentage of deaths to the average population of the whole institution is 5.

Of the 51 deaths, 21.5 per cent. were from tuberculous affections.

While the appended tables show the number and variety of diseases treated in the hospital, yet they do not convey a proper estimate of all the work accomplished by the medical assistants, for several hundred cases are treated annually among the prison and pauper population without admission to the hospital. Although the affections treated in this way are not of a serious nature, as a rule, yet they require time and careful attention.

One object constantly kept in view in the handling of our population from a medical stand-point is the early discovery and to a certain extent the isolation of all persons showing signs of tuberculosis. Every person admitted to the prison and pauper departments, though apparently in good health, is subjected to a careful physical examination. Our pains have

been rewarded in bringing to light a considerable number of cases, not only of incipient phthisis, but of other affections, which would have escaped notice until the individuals either complained or were obviously ill. The classification of those suffering from tuberculosis in any form, the placing of them under hygienic conditions and especially their separation from the general population, are matters needing special attention here. The completion of the infirmary building as provided for in the original plans would give us very satisfactory facilities for accomplishing such classification and separation.

In line with the suggestion of last year, that the amount of acute sickness met here requires a high grade of excellence in hospital methods, especially nursing, a female graduate of a general hospital training school has been placed in charge of the wards, the general ward work being done as formerly by inmates. The presence of even one female nurse upon the wards is proving valuable. In times of unusual amounts of sickness it would be well to employ additional female nurses. The surgical dressing is done by an experienced male nurse. These additions to the employed force of the hospital allow the assistant physicians more time for strictly clinical work.

Several instruments to aid precision in diagnosis have been purchased and some facilities for pathological work have been furnished. The apparatus for sterilizing clothing, bedding, etc., for which an appropriation was granted, will probably be installed and in operation the coming year.

Two of the hospital wards have been renovated and remodelled, with reference to the heating and ventilation and the relocation of the sanitaries. There are four other hospital wards which need alterations and repairs.

Dr. James F. Blair continues as assistant to the hospital. Dr. F. B. Colby has filled the position of interne the past year. The Consulting Physicians to the hospital, whose names appear at the beginning of this annual report, have promptly responded when called.

Very respectfully,

#### ARTHUR H. HARRINGTON.

Resident Physician.

TABULATED REPORT OF CASES TREATED IN THE HOSPITAL DURING THE YEAR ENDING SEPT. 30, 1896.

# REPORT OF THE MEDICAL DIRECTOR OF THE STATE ASYLUM FOR INSANE CRIMINALS.

To the Trustees of the State Farm.

The following report of the State Asylum for Insane Criminals for the year ending Sept. 30, 1896, is respectfully submitted.

The number of patients present at the beginning of the year was 244; at the close there are 300. The whole number of cases under treatment during the year has been 344. The daily average has been 267.04. There were 100 admissions and 44 discharges. Of the 100 cases admitted, 50 were transferred from State Lunatic Hospitals; 46 were committed directly from penal institutions and the courts; 4 were received from the Almshouse Department of the State Farm, by order of the State Board of Lunacy and Charity. Of the 44 cases discharged, 7 were recovered, 2 were much improved, 3 improved, 20 unimproved, 3 were not insane. There were 9 deaths.

Further information may be found in the statistical tables published with this report.

During the past year the State Board of Lunacy and Charity have, I believe, with few exceptions, transferred all the criminals who were in the several State lunatic hospitals to this asylum, so that we may now say that all the criminal insane of the State are collected here. At this point it seems well to emphasize the fact that the total number of the criminal insane is 212, the remaining 88 inmates of the asylum being those who are still left of the pauper class with which this asylum first opened, or who have been committed from time to time from the Almshouse Department of the State Farm. The only source from which we now receive any patients who are not of

the criminal class is the Almshouse Department of the State Farm. If we did not from year to year receive these cases, the non-criminals would in time be eliminated from our insane population. It would be well if such inmates of the Almshouse Department as become insane were committed to the State Lunatic Hospitals, as the practice of committing them to this asylum vitiates the legislation which aimed at a separation of the criminal and non-criminal insane.

This year has been the first complete hospital year under the new law providing for direct commitments to this asylum. Unfortunately, we are unable here to furnish precise data for judging how many direct commitments we may expect annually, as through lack of information probably, commitments which should have been made to this asylum continued for some time after the new law took effect to be made to the State Lunatic Hospitals.

The year has passed without serious accident. Only one patient escaped and he was found and returned after an absence of four weeks.

# RESTRAINT AND SECLUSION.

Of the 344 cases under treatment during the year, mechanical restraint has been used for short periods, with one exception, upon 13 different persons. Seclusion has been used, for short periods with few exceptions, in the care of 98 different persons.

#### EMPLOYMENT.

The caning of chairs is carried on as an industry in this asylum. The shop has been in operation 253 days out of the 365. The average number employed daily has been 81. The working hours are from 7.15 a.m. to 11 a.m. and from 1.15 p.m. to 4 p.m. for five and one-half days of the week. There have been caned this year 29,905 chair seats and 8,220 chair backs.

An average of 25 patients has been employed daily on the farm the past summer.

# AMUSEMENTS.

Four entertainments were given in the amusement hall during the year. For one of them we are indebted to a local organization, "The Ladies' Sewing Society."

# ADDITIONS AND IMPROVEMENTS.

The new north building was completed and occupied the first of last March. This is a strong building, containing 80 single rooms, connecting by corridors with two day rooms. This building raises our estimated capacity to 325.

A portion of the north-west building has been renovated, most of the plumbing has been renewed and such changes made as would adapt it to the treatment of acute cases. The wooden sheathing has been removed from the walls of some of the rooms in this building, and the partitions plastered with Portland cement coated with Keen's cement.

The renewal of the plumbing in the east and west buildings is being carried forward as fast as the conditions will allow.

The asylum has been equipped throughout with a system of electric signal and alarm bells.

A recreation yard of sufficient size for baseball and football was completed the past summer. It is a noticeable fact that the conduct of the patients has been much better since this large yard was opened to daily use.

The work upon the house intended for a physician's residence, for which an appropriation was granted by the last Legislature, is progressing favorably.

#### SUGGESTIONS AND RECOMMENDATIONS.

My conviction of the desirability of the shower bath for bathing patients remains the same as expressed in the annual report of last year. The lack of proper storeroom for clothing still subjects us to great inconvenience. I therefore repeat the recommendation of last year,—that a two-story structure, about 20 by 40 feet, be erected at the junction of the northwest corridor with the main asylum building, that the lower floor be provided with the modern rain bath and the second floor be used as a storeroom for clothing.

I also repeat the suggestion of last year, that a portion of the grove west of the asylum be fenced about and used as a resort for certain patients. Our yards are necessarily barren of trees, the only shade being that afforded by the shifting shadows of the buildings and enclosure walls. The feeble and more trusty patients would experience a great deal of comfort during the hot season, if this suggestion were adopted.

The bringing together of all the insane criminals of the State under one roof gives rise to problems which have to be met as we go along. A few object lessons have shown the necessity for a more complete classification of dangerous patients than can be had on wards where at least 40 persons have to be congregated. I therefore recommend that a building to accommodate not over 15 patients be constructed, and so arranged that those cared for in it shall be isolated from the rest of the inmates.

The proportion of attendants to patients is still too small.

I think it desirable to revise the diet, with a view to giving it greater variety.

There are 34 rooms remaining in the north-west building, the walls of which, as originally constructed, are sheathed with wood. As the acute and uncleanly cases will have to be cared for in this building, and as it is impossible to secure cleanliness where the wood sheathing remains, it is recommended that in as many of these rooms as practicable the walls be plastered and coated with hard cement, as has already been done with a few of them.

It is recommended that the recreation yards be laid down with ample concrete walks. On account of the present surface conditions in these yards, there are four or five months in the year when patients are confined in-doors. This confinement is a source of irritation, which expresses itself by various disturbances, which largely disappear with daily open-air exercise.

A library, furnished with two hundred volumes of history, fiction and biography, would be a great boon to many of our patients.

#### APPOINTMENTS.

Henry A. Roberts, M.D., was appointed assistant physician and entered upon his duties in November, 1895. His resignation soon takes effect, as he has accepted an appointment to another institution. In this connection I will say that, in order to retain capable medical assistants, their salaries must be placed on a par with the salaries of assistants who hold corresponding positions in other institutions in the State.

Edward Wyllys Taylor, M.D., has accepted from your Board the appointment of Consulting Pathologist, otherwise the Asylum Consulting Board remains unchanged. We have been visited by its members, and have received suggestions from them for our consideration. These suggestions are especially valuable, as they come from physicians thoroughly acquainted with asylum management.

Finally, I will say that the changing character of this asylum, in consequence of the recent legislation relating to it, the increased number of patients, the admission of acute cases and the consequent addition to the force of attendants, has called for more organization and the duties required from all have become more exacting. There has, as a rule, been a ready response to these additional requirements on the part of officers and employees with whom I have been connected, and I take this opportunity to commend them to your Board for their work the past year.

I desire to thank your Board and the Superintendent for the confidence shown me, the continuance of which I hope to merit in the future.

Very respectfully,

ARTHUR H. HARRINGTON,

Medical Director.

BRIDGEWATER, MASS., Oct. 1, 1896.

# Commonwealth of Massachusetts.

# TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

In compliance with the requirements of section 3, chapter 88 of the Public Statutes, the undersigned, trustees of the State Almshouse and State Farm, submit their forty-third annual report. The report of the superintendent and resident physician accompanying shows in detail the condition of the State Almshouse at Tewksbury for the financial year ending Sept. 30, 1896, and its present most urgent needs.

The records presented herewith show that 3,604 persons have been admitted to the different departments of the institution during the past year. This makes a total of 107,859 persons admitted during the forty-three years since it was established, and a yearly average of 2,508. The weekly average for this year has been 64 greater than that of last year and the number of admissions 533 greater.

Under chapter 61 of the Acts of the Legislature for the year 1896, the sum of \$33,100 was appropriated for the payment of salaries, wages and labor, and for current expenses the sum of \$100,000, a total of \$133,000 for the maintenance of said institution for the present calendar year. For a detailed statement of the expenditures of the same we refer to the report of the superintendent, hereto appended, the expenditures having been examined and approved by us month by month.

Under chapter 73 of the Resolves of the year 1894 and chapter 56 of the Resolves of 1895, authority was given for the erection of a chapel, at a cost not exceeding \$12,000, and a corresponding appropriation was made. The building thus

authorized is now in process of construction, and it is expected to be ready for occupancy early in the coming year.

Under chapter 56 of the Resolves of the year 1895, the sum of \$50,000 was appropriated for the erection of a new building for insane women. Plans prepared by John A. Fox, architect, of Boston, were accepted by the trustees. Bids for construction were submitted by several responsible builders. The contract was awarded to Staples Bros. of Lowell, early in the year. The work is drawing near to completion, and the structure will soon be ready for use.

Under authority given in chapter 92 of the Resolves of 1896, the farm area has been enlarged, and additional summer houses have been constructed and concrete walks laid in the yard for insane women. A brick wall therein authorized is now being constructed. Other work contemplated in the said resolve remains to be done.

For still other improvements made during the year the trustees refer to the paragraph of the superintendent's report describing the same.

The annual inventory, as required under section 7 of chapter 79 of the Public Statutes, has been taken, and an appraisal made of the real and personal property connected with the institution and belonging to the Commonwealth by Charles H. Littlefield of Lawrence, whose report is herewith presented.

Under the intelligent and careful oversight and direction of the superintendent and his subordinate farm officers, the farm is undergoing constant improvement and is contributing materially to the support and comfort of the inmates and to the economical administration of the institution. The product of the farm and garden for the season now closing has been unusually heavy.

The trustees invite attention to the statistical tables submitted by the superintendent and resident physician, giving a full and detailed statement of the facts relative to the inmates admitted and discharged during the year, the number now remaining in the different departments, the appropriations and receipts, the average weekly cost, the expenditures and disbursements under special or general appropriation, the products of the farm and garden, the articles manufactured and the persons employed during the year.

The superintendent in his report outlines improvements needed. His recommendations have been considered and approved by the trustees, and the needful appropriations are asked for in carrying out the same.

The trustees feel that in the superintendent, Dr. Herbert B. Howard, the Commonwealth has a faithful and efficient official, who can be relied on to fulfil the trust reposed in him with a just economy, and at the same time with a broad humanity. The excellent condition and record of the institution give satisfactory evidence on this point.

# Respectfully submitted,

J. WHITE BELCHER.
JACOB H. HECHT.
ANNA F. PRESCOTT.
PAYSON W. LYMAN.
LEONARD HUNTRESS.
WARREN E. RICE.
SARAH D. FISKE.

TEWESBURY, Oct. 30, 1896.

# SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

This is the fifth time I have had the honor of presenting to you the annual report. The State Almshouse has taken care of 4,672 people during some part of the year; 3,604 of these have been admitted during the year. The smallest number present at any one time was 1,066, on the second day of October; and the largest number was 1,547, on the twenty-seventh day of February. The weekly average has been 1,231, or 64 more than last year. The cash disbursements for the year were \$138,762.04, making the gross weekly per capita cost \$2.17. During the year \$1,569.05 have been turned over to the State treasurer for articles sold, etc. The in-door poor department has collected \$386.50 for the United States cases boarded here and \$31,002.04\* for city and town cases, leaving the net outlay for running the institution \$105,804.45.

It has been a productive year for the farm and garden; statement No. 5 of the annual report will testify to this. Although the hay crop was short, we raised 600 tons of ensilage which ought to carry us through, even with the addition of ten or twelve cows. The apple crop was especially heavy, 1,146 barrels; and there were 4,348 quarts of strawberries. The abundance of these and other fruits adds much to the success of the hospitals and asylums of the institution.

#### HOSPITALS.

There have been treated in the hospitals during the year 3,106 patients. Two hundred and seventy-two deaths have occurred, 39 of which were among the insane. Contagious cases have been almost entirely absent during the year, not a single case of diphtheria having occurred among the inmates.

The men's hospital is overcrowded, and it would seem as though something would have to be done to relieve the wards during the next year; perhaps a cottage for consumptives adjacent to one of our groves would produce the desired result.

There have been 105 confinements during the year; 72 of the children were illegitimate. Twenty-nine of the mothers were born in the United States, 35 in Ireland, 17 in the British Provinces, 10 in England and 14 in other foreign countries.

The medical staff has met with several losses during the year. Dr. John M. Gile, assistant superintendent for nearly five years, left in September, to become lecturer on theory and practice at the Dartmouth Medical School. Dr. Elizabeth Newcomb, after over four years of service, left the first of September, to become lecturer on physiology and director of the girls' gymnasium at Oberlin College. Dr. J. F. Edgerly, who came to fill out the year, was called to the Pennsylvania Hospital for Insane as one of their assistants. They all have gone to more lucrative positions, and have left with the best wishes of this institution for their success.

Our interne service on the men's side has produced plenty of good candidates to fill vacancies occurring in the staff; I would like to recommend like service on the women's side, hoping to produce a similar result. At the present time, Dr. Charles S. Little is senior interne and Dr. William F. Kernan junior interne.

The constant increase of patients both in the hospitals and the asylums has brought us to the point where we need at least one additional assistant physician, and a bacteriologist to assume the direction of the work in the laboratory.

#### ASYLUM FOR THE INSANE.

The asylums have received during the year 78 patients. The daily average number was 475; 474 cases remain at the end of the year. The classification in this department will be much better when our new building is completed; at that time we can take 40 more patients, and we shall need at least 2 more attendants.

# TRAINING SCHOOL FOR NURSES.

During the year four of our nurses have passed the required examinations and have received diplomas, — Misses Lillie Fletcher, Albina M. Manning, Heathy Stewart and Nellie S. Redmond. Applications for entrance have never been so numerous as at the present time. Bringing the men's hospital more directly under the charge of the superintendent of nurses, Mrs. Clara Stevens Glidden, we expect will be of advantage to the hospital as well as to the training school. This will give our nurses experience in the care of men, women and children, of lying-in cases and of the insane.

## IMPROVEMENTS MADE DURING THE YEAR.

The old cellar holes in the yard have been filled; summer houses built in the women's asylum yard; more concrete walks laid in both yards; Gegenstrom shower baths have been introduced in the women's asylum; four arc lights have been added to the out-door service; a telephone system has been completed throughout the institution; several pine groves have been cleaned up for the use of the insane and consumptives during pleasant weather; an ambulance service has been established, and one of our internes accompanies the ambulance to the station to meet every stretcher case; a quarter of a mile of macadamized road has been built between the station and the institution, and we hope to complete the road during the coming winter; the stone crusher plant installed last winter has proved very useful; the new asylum for women is approaching completion; and the chapel, we hope, will be roofed before cold weather.

#### IMPROVEMENTS SUGGESTED.

After the new asylum for women is completed and occupied will be a favorable time to renovate the old asylum for women at the south end of the yard.

The maternity ward still needs the changes referred to in former reports. A storehouse for the products of the farm and garden, connected with a small cold storage plant, would be a valuable adjunct to the economical administration of this institution. A cottage for consumptives has been referred to.

The land beyond the village is not well located for institution purposes, and, if a reasonable price could be obtained for it, I think it would be better to dispose of it.

At different times there has been talk about changing the name of the institution to something that would give a better idea of its true character; if such a name can be found, perhaps it would be well to do it.

I have accompanied my report to you with two tables of statistics extending over the past twenty-five years; one is confined to the financial statements, the other is about the inmates.

I wish to thank our chaplains for their untiring attention to the sick during the year and for their hearty good fellowship both in regard to the welfare of the inmates and to the interests of the institution. A great many books and papers have been contributed during the year by our outside friends, for which we wish to thank the contributors and to renew the offer of the institution, — to always be ready to pay the express on papers or literature of non-sectarian character to be distributed among its inmates.

Thanking you for your continued confidence, your wise counsel and untiring support during the past, I remain,

Very respectfully,

HERBERT B. HOWARD,

Superintendent and Resident Physician.

### SYNOPSIS OF THE PROCEEDINGS

OF THE

# ANNUAL MEETING OF THE CORPORATION.

South Boston, October 14, 1896.

The annual meeting of the corporation, duly summoned, was held today at the institution, and was called to order by the president, Samuel Eliot, LL.D., at 3 P.M.

The proceedings of the last meeting were read by the secretary, and declared approved.

The annual report of the trustees was read, accepted, and ordered to be printed with the usual accompanying documents.

The treasurer, Mr. Edward Jackson, read his report, which was accepted, and ordered to be printed.

The corporation then proceeded to ballot for officers for the ensuing year, and the following persons were unanimously elected:—

President — Samuel Eliot, LL.D. Vice-President — George S. Hale. Treasurer — Edward Jackson. Secretary — Michael Anagnos.

Trustees — William Endicott, Jr., Charles P. Gardiner, Joseph B. Glover, J. Theodore Heard, M.D., Henry Marion Howe, Edward N. Perkins, S. Lothrop Thorndike and George H. Richards.

# 16 INSTITUTION FOR THE BLIND. [Oct.

Miss Clara Thorndike Endicott of Boston was afterwards elected a member of the corporation.

The meeting was then dissolved, and all in attendance proceeded, with the invited guests, to visit the various departments of the school.

MICHAEL ANAGNOS,

Secretary.

1896.7

### REPORT OF THE TRUSTEES.

Perkins Institution and Massachusetts School for the Blind, South Boston, October 14, 1896.

To the Members of the Corporation.

Ladies and Gentlemen:—We have the honor to present for your consideration the sixty-fifth annual report of the institution. It contains a brief account of the work of the school for the financial year ending August 31, 1896.

We are confident that the results exhibited in this communication, as well as in the reports of the treasurer and of the director hereto appended, will justify us in saying that steady progress has been made, that the pupils have been well taught and carefully trained, that the finances have been successfully managed and that the institution continues to be in a prosperous condition.

At the date of our last annual report the number of blind persons connected with the institution in its various departments was 244. Since then 40 have been received and 23 have been discharged, making the present number 261,—an

[Oct.

increase of 17. This record includes all changes which have occurred up to the first day of October.

The pupils have enjoyed good health. There have been a few cases of measles and one of diphtheria, but happily these diseases did not become epidemic in the school. We regret to report the death of Mr. Thomas Carroll, a former graduate of the school, who had been employed for many years as assistant instructor in the boys' section of the manual training department. Mr. Carroll was an honest, upright, faithful man. Highly esteemed by his co-workers and dearly beloved by his pupils, he will be missed by all. We grieve also to say that one of the pupils, Alphonse Ratte, died of heart disease at his own home, and that one of the younger boys died of measles in the city hospital.

We have great satisfaction in expressing our appreciation of the manner in which the teachers and all other officers have performed their respective duties.

As has been repeatedly stated in these reports, the work of the school aims to develop the physical powers and mental faculties of the pupils and to bring out the capacities with which nature has endowed each individual, so that when he goes out of the portals of the institution, instead of gravitating (as would be certain in many cases) into the ranks of the helpless dependents, he may

be able to take his place among the active and useful members of society.

## THE CURRICULUM OF THE SCHOOL.

The institution was never in a better condition or more satisfactorily organized and adequately equipped to meet the requirements of the recipients of its benefits and to do its work in a thorough manner than it is at present.

The plan of study as now adjusted is broad and many-sided. Beginning in the kindergarten, it advances through the elementary and secondary grades and terminates in a post-graduate course, which, when completed, brings our students to the gates of the best American colleges and universities and enables them to gain admission thereto without further preparation. The study of the theory of music and its practice, vocal and instrumental, and manual training, especially according to the sloyd method, are included in this system and constitute integral parts thereof, while physical training forms its foundation and is carried on under the direction of competent and devoted teachers with vigor and efficiency.

# IMPROVEMENTS AND POST-GRADUATE COURSE.

During the past year the plans for affording to the blind an opportunity of acquiring an academic education have been carried into effect.

In the boys' department a partial post-graduate course was established two years ago. This has now been extended so as to form a complete and well-organized preparatory course for college, and our library has been enlarged so that it is now thoroughly equipped for the new demands made upon it. The acquisition of the Bradford estate, situated at the north-west corner of the premises of the institution and comprising 3,250 square feet of valuable ground, will enable us to offer equal advantages to the girls. Upon this convenient site a commodious and thoroughly equipped cottage has been erected, with a kitchen in the basement, a dining-room, reception-room and sitting-room on the first floor, while the second, third and fourth stories contain convenient and well-arranged chambers, each large enough for two persons. The house will accommodate in all from twenty-eight to thirty inmates. improvement consists in the doubling of the capacity of the Howe building. The basement of the enlarged structure is to be used for sloyd, while on the first floor is an assemblyroom in the rear and a room in the front for sewing as a feature of manual training; on the second story are four spacious and well-lighted school-rooms, conveniences being provided in one of these for classes in science; the third floor is entirely occupied by the music department, arranged with practice-rooms on each side of a

central corridor. There are fourteen of these rooms, with a musical library and head teacher's apartment on the east side of the building. The top floor is used for storage.

The above-mentioned changes and improvements have happily rendered possible the accommodation of those applicants who were formerly denied admittance, owing to want of room, and to whom, in common with all our pupils, the opportunities of the advanced course are now freely offered.

### THE HOWE MEMORIAL PRESS.

The operations of the printing office have been carried on with as much activity as the limitations of its accommodations would allow, and the following works have been published during the year: Don Quixote, in three volumes; German Grammar, by William Eysenbach, in two volumes; German Vocabulary, in one volume; the first volume of the Latin-English Lexicon; Cicero's Orations, in Latin, in one volume; White's Beginner's Greek Book, in three volumes.

In addition, seven pieces of music, comprising 236 pages, have been printed.

We have now in press the second volume of the Latin-English Lexicon, the fourth volume of White's Beginner's Greek Book, Xenophon's Anabasis, Homer's Iliad and Greek-English Vocabulary.

22

The efficiency of the printing department is very much restricted for want of sufficient room to carry on its work in a satisfactory and economical manner.

## WORKSHOP FOR ADULTS.

The results of the operations of this department during the past twelve months may be condensed from the balance sheet as follows:—

The total amount of receipts has been . . \$19,673 44
The total current expenses have been . . 19,212 61

After deducting the sum of several accounts that have to be charged off, the gain for the year amounts to \$190.34.

Our lease of the building No. 37 Avon place, which we have occupied since 1876, will expire on the first of January next, and, as its renewal for another term of years could not be secured without a large increase of rent, we have decided to transfer our salesroom and office to some desirable place, where they may be permanently located.

We earnestly hope that this change will cause no inconvenience whatever to the patrons of our workshop nor any decrease in their number, but, on the contrary, that it may help to enlarge the list of our customers and open a wider market for the products of the industry of the blind.

### FINANCES.

The financial condition of the institution is exhibited in the report of the treasurer, which is hereto appended, and which may be briefly summed up as follows:—

| Cash on hand September 1, 1895,    |    | • |   | \$30,300  | <b>82</b>      |
|------------------------------------|----|---|---|-----------|----------------|
| Total receipts during the year,.   |    | • |   | 303,620   | 17             |
|                                    |    |   |   | \$333,920 | 99             |
| Total expenditures and investments | ι, | • | • | 271,988   | 78             |
| Balance on hand August 31, 1896,   |    |   |   | \$61,932  | <u>-</u><br>21 |

The report of the treasurer is accompanied by various detailed statements relating thereto.

The auditors have examined the accounts regularly at the end of each month, and have certified that the same have been properly cast and correctly kept and that all entries have been authenticated by vouchers.

# BEQUESTS.

During the past year the institution has received the following legacies:—

Thirteen thousand seven hundred and seventy dollars (\$13,770) from the executors of the will of the late Miss Margaret Capen. This amount is to be invested and kept in perpetuity as the Stoddard Capen Fund.

Ten thousand dollars (\$10,000) from Messrs.

George White and Francis C. Welsh, trustees of the estate of the late Mrs. Ann White Vose. The whole amount of this bequest is also to be held intact as a permanent fund, and only the income is to be expended for the purposes of the institution.

Two thousand dollars (\$2,000) from the estate of the late Samuel Elwell Sawyer of Gloucester, Mass.

One thousand dollars (\$1,000) from the executor of the will of the late Albert Glover, from whose estate an equal sum has been given to the kindergarten for the blind. Both these amounts are to be held for all time to come, and to be known as the Albert Glover Fund.

These bequests bear abundant testimony both to the deep interest of the generous testators in the work of the institution and to their confidence in its management. In paying a tribute of profound gratitude to the memory of these departed friends of the blind, we cannot refrain from expressing the hope that many others may be inspired by their benevolence and stimulated by their thoughtful liberality to follow in their footsteps and do likewise.

# PURCHASE OF ADDITIONAL REAL ESTATE.

The property belonging to the heirs of the late Daniel L. Bradford, and comprising 3,250 square feet of land, has been bought by the

institution for the sum of \$7,500. It lies contiguous to that side of our grounds which is occupied by the girls' department. The accommodations of this branch of our school have long been inadequate, and the acquisition of this estate has enabled us to enlarge them. The frame house which was on the site has been removed to a vacant lot in the rear of our property on Fourth street, and in its place has been erected a commodious cottage, four stories in height, and facing on Broadway. In the rear of this house has been built an addition to the Howe building, which doubles its capacity.

Moreover, we have recently purchased on the corner of Fourth and H streets 5,900 square feet of land, with three good frame houses on it. Of the entire square, which is bounded by Fourth, H, Fifth and G streets, the institution owns at present fully three-fourths. By far the greater part of this land is occupied by thirty-three dwelling houses,—twenty of brick and thirteen of wood,—and only an area of 18,171 square feet is set aside for the use of the workshop and the stable with its sheds.

# COMMENCEMENT EXERCISES.

The commencement exercises were held in the Boston Theatre on June 2, 1896, in the presence of a throng which taxed the resources of the building to the utmost. The weather was per-

fect, and everything favored the success of the occasion.

The pupils from the parent school and the children from the kindergarten were so arranged on the stage as to present a very attractive appearance, with the picturesque rural scenery in the background. The exercises began with a stirring overture of welcome, played by the band in the spirit of true musicians. Their performance was highly appreciated by the audience. Dr. Samuel Eliot, president of the corporation, then made the following introductory address:—

The band has given you welcome to the exercises of this afternoon. We are very glad to see so many of our friends and helpers who are interested in the work at South Boston and Jamaica Plain, and you will all have cause for thanksgiving, I may say, as the exercises of this afternoon exhibit the work of every day in the year. You have come here primarily to witness what is done for the training of these children, and you will have ample evidence that the training given them is of a very high character. You will also have evidence that a great deal is done to make them happy. The happiness of our pupils is one of the first objects of our teachers and of all who have any influence over them, and you will see how many reasons the children have for being happy. I read the other day of a little girl who was seen gathering sunlight in her hands with which to bathe These children seem to me to be like her; they are all gathering sunlight from the beginning of their school year until the end; they are bathing their faces with it, and they are filling their hearts with it, and when you go away from here you will carry with you the impression that these children are the happiest you ever saw.

I want to acknowledge in public the great kindness and liberality of Mr. Eugene Tompkins. This theatre he has placed at our disposal as freely and generously as he can do, and we are all very grateful to him for doing it.

Now, we begin exactly where we ought to begin, with the kindergarten children, and their exercises are all set down upon the programme which you have in your hands.

Owing to the constant occupation of this building for other purposes, it has been found impossible to give the children a rehearsal for these exercises. You know how constant and frequent are rehearsals in preparation for public exercises of any school, any college or other institution. These little children have had no rehearsal at all.

When Dr. Eliot's remarks were concluded the kindergarten exercises took place, a full account of which is given elsewhere. While these were still in progress Dr. Eliot introduced to the audience the private secretary of Acting Governor Wolcott, Col. Henry A. Thomas, with the following words: "The programme announced that His Honor, Acting Governor Wolcott, would grace the occasion with his presence. We had hoped for it, but he is prevented from coming. His private secretary, Colonel Thomas, is here, and bears some message of sympathy and goodwill."

#### REMARKS OF COL. HENRY A. THOMAS.

Mr. President, Ladies and Gentlemen: - Governor Wolcott had hoped, up to an hour ago, to be present and speak the message of the Commonwealth on this occasion, but pressure of public business is such, so many matters from the Legislature are coming before him, that he finds it impossible at the last moment to be present, and I am here to say that he regrets very much the circumstances which prevent his coming, and to extend in his name the greetings and good wishes of the Commonwealth. Certainly there is no one who has more at heart the misfortunes of humanity or more interest in the sick and enfeebled than the man who today is the Acting Chief Magistrate of Massachusetts; and not only he but his good wife as well are interested in its various charities and in all good work which elevates and helps humanity. And Massachusetts herself, with all the proud things which she calls her own, above her public buildings, her loyalty, her statesmen, her historians and her orators, I think is prouder today that her people are engaged in this grand work of helping humanity than of anything else; and when we see these little children here today, and how happy they appear to be, it brings one or two lessons to us, and I think if the Governor were here he would say that it suggests to us who are blessed with all the senses of life, who can see and hear and enjoy the happiness and beauty all about us, that it would be well if we complained less and thought better of our lot. would rejoice that if these children cannot see the light of day there can yet come into their souls much happiness, into their minds bright thoughts, and they can enjoy these beautiful things which are being taught them; and it is for us, for the people of Massachusetts, and for the country as far as possible to lend their help in this direction, and sustain this beautiful work of charity and humanity which God himself must smile upon.

I thank you for this opportunity to say a word, and in behalf of the Governor extend the congratulations and greetings of the old Commonwealth.

When the enthusiasm excited by these words had subsided, a class of boys stepped forward, and explained, in clear and concise language, the prominent characteristics of the ocelot, eagle, loon and duck-billed platypus, stuffed specimens of which creatures were placed before them in full view of the audience. A vocal selection, Spring Flowers, was then sung by Sarah E. Tomlinson, with violin obligato by Theodore C. Leutz. A number of younger boys now performed a series of gymnastic movements with commendable vim and accuracy, and were followed immediately by some of their older comrades, who went through military evolutions. The latter, under the direction of Col. John H. Wright, displayed exemplary skill in the rifle drill, and marched with remarkable precision and admirable alignement. An exercise in algebra, carried out by Elizabeth Caulfield and Etta Walcott, showed mathematical ability of a high order, as well as the power of thinking logically under rather trying circumstances. A glee entitled The Bugler was then sung with pathos and expression by some of the boys, the bugle effects being beautifully rendered on the cornet by Reuel E. Miller. The graduating class then stepped to the front of the platform, and diplomas were conferred by Dr. Eliot
on the following pupils: Frank A. Clark, Reuben
G. Dayton, Neil J. Devlin, William C. Ellis,
John H. Giesler, John Henley, Theodore C.
Leutz, Sarah E. Tomlinson and Merle E. Tracy.
Dr. Eliot, in presenting the diplomas, uttered the
following words of advice and good cheer:—

MY DEAR YOUNG FRIENDS:—You are here to receive your diplomas, in the face of a very large congregation of men and women deeply in sympathy with you. You feel, I think, the sense of encouragement and delight which these kind people are here to express, and in the emotions of this occasion to offer their wishes for your prosperity. It is a dividing line that you are to cross this afternoon, undoubtedly; it separates school life from the after life; and yet it is not a line which separates one principle from another principle, or any elements of success or honor from any other elements of success or honor.

You have reason to be proud of your school, of its character and of its names. What better name could you enlist under than that of Perkins,—a man whom you have known only by far-off memory, but whom I knew, and a great many others present I have no doubt knew,—who was the very soul of generosity and honor? Then there is the sacred name of Massachusetts,—a name so dear to every one of us, a name that stands for all that is highest and holiest in our history, a name which when not profaned, as it sometimes is, is like that glee which you have just sung, the bugler's call to victory. There are other names than Perkins and Massachusetts, not written upon the title of your institution, the name above all others of Howe, of Howe's wife, of

Howe's children, of Howe's son-in-law especially, who took up the work where it fell from his hands and carried it forward until it is a nobler and broader work than when Howe left it. How much there is in all this to inspire you as you enter upon your new experiences, bright and beautiful and happy! You are old enough to know the principles that enter into life and conduce to its best ends; you have experienced them yourselves; I need not tell you of them. You know that patience in life is one of its noblest attributes. You know that we have to bear, to endure, to be steady under trial, and that nothing short of absolute fortitude is sufficient to carry us through the different temptations and different adversities we meet. You know also the glory of living. You know there is an enthusiasm in failure as well as in success. You know that whatever you do with all your might you have a right to be glad in and to be proud of, even though it does not come into issues that are visible to the eyes of men. You know that even for the blind it is possible, as Mrs. Browning said of a blind friend,

> Permitted with his wandering eyes, light-proof, To see fair visions.

It is in your power to see fair visions, fairer perhaps than we see with our eyes. May God grant that you see them! May you see them every day of your life, may they crown every morning, and make every evening consecrated! May they help you to help others, for that is the highest thing a man can do, — helping his fellow creatures. A writer on Nature through a sudden visitation lost his sight. He published a book about the same time, and one of his critics said: "Let him not lose courage. If sight has failed him, he has passed it on to others who but for him might have remained blind." Remember that you have it in your power to do many things, to join in many works, to achieve many

triumphs, which will enable those of us who see to see more clearly, and those of us who do not see with the physical vision to see more deeply and more intelligently with the spiritual vision.

You do not want advice; you have had it all through your school life. You come here today to receive the token that you have acted upon that advice, and you are about to be crowned with the highest honors of the school. Your director, your teachers, your trustees, in the presence of this great audience assembled here, the representative of the Governor of the Commonwealth,—the mother of all the schools within her borders, the helper of schools, the glory of schools,—all join in giving you these diplomas, which I now hand you: Frank Alman Clark; Reuben Gilbert Dayton; Neil Joseph Devlin; William Cleve Ellis; John Henry Giesler; John Henley; Theodore Cornelius Leutz; Sarah Emma Tomlinson; Merle Elliott Tracy.

Now, my dear young friends, you go, and you do not go; you leave the school, but you still remain members of it; and may every opportunity that you have of standing for it and of helping it be availed of to the uttermost, I plead with you, in behalf of all these friends who are here.

The exercises then came to an end with the rendition of *The Miller's Wooing*, by a chorus of mixed voices.

We desire to express in this connection our sense of obligation to Mr. Eugene Tompkins, proprietor of the Boston Theatre, who again granted to our school the use of his magnificent theatre free of charge, and readily afforded every needful facility to render our commencement ex-

ercises an entire success. This favor, together with the numerous invitations to attend the operas given at his theatre, which, following in the footsteps of his honored father, he invariably extends to our students, is thankfully acknowledged by our board and highly appreciated by the blind of New England.

## BRONZE MEDAL AND DIPLOMA.

We received last spring the bronze medal and the diploma, which were awarded to the institution by the commissioners of the World's Columbian Exposition three years ago. These testimonials bear witness to the excellence of the work of the school in general and of that of the kindergarten in particular, and set the seal of official recognition upon the long and efficient service rendered by our establishment to the education of the blind. We take great pleasure in copying the following extract from the diploma:—

# EQUIPMENT, METHODS, AND PUPILS' WORK.

AWARD. — For excellent collection, showing its long and efficient service for the blind, in teaching them conduct, letters and industry. For effective kindergarten work and improved methods in teaching letters, work in wood, and with the needle and in knitting, and for valuable collection of books and embossed type, together with embossed maps for the blind.

### IN MEMORIAM.

COL. HENRY STONE AND MR. GEORGE WASHINGTON WALES.

We have sustained a sad loss in the death of Col. Henry Stone, which occurred on the 18th of January, 1896, and in that of Mr. George Washington Wales, which took place on the 7th of July, 1896.

Colonel Stone was made a member of our board by Governor Russell in 1893, and has rendered valuable service to the institution. Very seldom, if ever, absent from our meetings, he discharged his duties as a trustee so loyally and with such signal fidelity and wisdom, that he rightly held a foremost place in our confidence and affection. His interest in everything pertaining to the prosperity of the school and the welfare of the blind was unfailing. The memory of his manly character and nobility of disposition will long be cherished by his associates.

At the regular quarterly meeting of our board, held April 1, the following resolutions were unanimously adopted: -

Whereas, The board of trustees of the Perkins Institution and Massachusetts School for the Blind has been deeply pained by the unexpected intelligence of the decease of one of its most respected and useful members, Col. Henry Stone, who for more than two years has been our honored associate and coworker, therefore be it

Resolved, That, in common with the whole community, we mourn the death of an accomplished scholar, a brave defender of the Union at the time of its peril, a public-spirited citizen and a high-minded gentleman, one who was beloved, revered and honored by all classes of people.

Resolved, That as a board we feel that in the death of Colonel Stone we have each experienced a personal bereavement, and that the institution has been deprived of a sincere friend and earnest helper, one who in his capacity of trustee was always ready to do everything in his power to advance the interests of the school.

Resolved, That these resolutions be entered on the records of the board, and that a copy be sent to the family of the deceased.

It is with inexpressible regret that we have to record the death of another member of our board, that of Mr. George Washington Wales, who served as trustee from 1875 to the last day of his life.

Mr. Wales is a very great loss, not only to our two institutions but to innumerable other benevolent organizations, in which he took an active interest. He was always the good citizen, ever foremost in all enterprises aiming at the cultivation of the public taste, the development of the fine arts, the amelioration of the condition of the afflicted members of the human family, and the promotion of the moral, social and spiritual welfare of the community. His hands were invariably open to the needy and the poor, and his personal sympathy and purse alike ready for the furtherance of any deserving cause which was

properly brought to his attention and notice. His life's record was in every way praiseworthy, and for public and private reasons his removal from our midst leaves a great void.

As an expression of our affection for our departed colleague and of our high regard for his character, and as a loving tribute to his memory, the following resolutions were unanimously adopted at our last quarterly meeting:—

Whereas, We have learned with deep sorrow of the death of George Washington Wales, for twenty-one years trustee of this institution; therefore

Resolved, That, as members of this board, we are called upon to mourn the loss of a beloved associate and valued friend. It is a source of sincere grief to us to feel that the enjoyment of his genial and sympathetic companionship is no longer within our reach.

Resolved, That we desire to place on record our profound appreciation, derived from long association with the deceased, of his courteous demeanor, his inflexible integrity, his personal worth, his high sense of honor, his devotion to the cause of the education of the blind, and of the purity, simplicity and nobleness which adorned his character and shone forth in all the relations of his useful life. But, while we feel his removal as a personal bereavement and a public loss, we yet recognize the fact that, like ripened grain, he has been gathered full of years and honors to his rest.

Resolved, That the secretary be directed to enter these resolutions upon the records of the board and to transmit a copy of the same to Mrs. Wales as an expression of our sympathy with her in her great affliction.

### MEMBERS OF THE CORPORATION.

During the past year, in addition to the loss of Col. Henry Stone and George Washington Wales, the institution has been deprived by death of twenty-four of its valued and most highly esteemed corporate members. The list comprises the following names:—

Hon. OLIVER AMES, ex-governor of Massachusetts, died October 22, 1895. He was an honest and upright man, who as a citizen commanded honor and respect, as a successful and sagacious manufacturer enjoyed deservedly high repute, and as the chief magistrate of the commonwealth made a governor worthy of respect, having brought to the discharge of his official duties the ripened judgment of a man of affairs.

Mrs. Anna Sears Amory, widow of the late William Amory, died November 29, 1895. She was a "noble woman, nobly planned," imbued with the spirit of benevolence and possessing many beautiful qualities of mind and heart.

Mrs. Ellen M. Baker, widow of the late Richard Baker, died in Newport September 20, 1896. She was a woman of rare thoughtfulness, kindly, generous and true-hearted, distinguished alike by sweetness of temper and by grace of manners. She was always devoted to the cause of the little sightless children, and even during

her last illness she did not fail to think of it and to send to it her annual contribution.

THOMAS TRACY BOUVÉ died June 3, 1896. He was a broad-minded and large-hearted man, and in his death Boston has lost a citizen prominently known in mercantile, literary and scientific circles for half a century. He is held in grateful remembrance by the friends of the blind for the faithful service which as trustee he rendered to the institution for ten years.

Miss HELEN CURTIS BRADLEE died June 4, 1896. She was a most generous and kindhearted woman, entirely unselfish, possessed of a peculiarly sweet and amiable disposition and imbued with the spirit of true philanthropy. She was moulded after the choicest and the best type of American womanhood. Her charities were very numerous but unostentatious. She was ever ready to assist liberally every effort aiming at the amelioration of the condition of the suffering members of the human family, and in her decease the cause of the education of the blind loses a stanch supporter, and the community a woman who exhibited in her daily living the characteristics that command the admiration, the love and the respect of all.

Hon. Martin Brimmer died January 14, 1896. He was one of the most widely known and highly respected citizens of Boston, famous

as a scholar, philanthropist, merchant and patron of literature and art. In spite of the prominent position which he occupied in the community, he was distinguished by the modesty of his bearing, as well as by his earnest, resolute spirit. He was indeed a man whose instincts were always true to what is highest and best. Mr. Brimmer was chosen president of the corporation of the institution in 1870 and served until 1873, when he declined a reelection and was succeeded by Dr. Samuel Eliot.

THOMAS CUSHING died December 18, 1895. In all his social and business relations he was the incarnation of kindness and honesty, and his genial character caused him to be generally beloved.

Hon. Lucius B. Darling of Pawtucket, R. I., died January 4, 1896. He was a man of probity and integrity, and won the confidence and esteem of a large number of people.

Mrs. ELIZABETH ELIOT VOSE FIELD, widow of the late Capt. George P. Field, died in Milton July 20, 1896. Mrs. Field strewed her pathway in life with acts of kindness and deeds of benevolence. She took a deep interest in the education of the blind, and was a loyal friend and constant helper of the kindergarten.

Rev. Octavius Brooks Frothingham died November 27, 1895. He was a man of rare scholarly attainments and of broad, liberal views. His work will always be remembered for its virility, its freshness and its power. He has been closely identified with what is noblest and best in Boston society, and no one could meet him in private life without being attracted by his genial manners, his ripe intellect and his interest in high ideas.

Miss Caroline L. Glover died April 2, 1896. She was a woman of gentle, sympathetic and sincere nature. Like her brothers and sister, she was noted for numerous acts of kindness to the blind and for the generous interest which she manifested in everything pertaining to their education and welfare.

Dr. RICHARD MANNING HODGES died February 9, 1896. He ranked as one of the foremost surgeons of his time, and was beloved and respected by all who knew him.

JOHN McAuslan died January 15, 1896. He was associated with one of the most prominent business houses in Providence, R. I., and also with many charitable organizations of that city.

JOHN T. OSBORN, who was well known in the neighborhood of the institution, died April 20, 1896. He was of a very amiable and peaceful disposition.

EBENEZER FRANCIS PARKER died at Nahant August 15, 1896. He was one of the noted mer-

chants and large importers of Boston, and a man of integrity, probity and great business ability.

Mrs. Mary E. Pierson of Windsor, Conn., died March 12, 1896. She was a worthy woman, who knew how to sympathize with the blind on account of her own loss of sight.

George Sampson died of pneumonia January 30, 1896. He was a man of clear head, warm heart and generous impulses, who has made the world happier and better by having lived in it.

Hon. John P. Spaulding died January 11, 1896. His generous heart and liberal disposition caused him to be highly appreciated, while his charities to the deserving and the needy were innumerable and far reaching.

John Ebenezer Troup died January 18, 1896. He was held in warm regard in the community of Providence, R. I., as a generous and public-spirited citizen. It was through his influence that the members of the mercantile firm with which he was connected became contributors to the printing fund.

Rev. Alfred Foster Washburn, son of the late ex-governor, Emory Washburn, died September 4, 1896. By the untimely decease of this young clergyman not only his parish but the community at large have been deprived of the ministry of a man who combined in a rare degree the virtues of generosity, gentleness, cour-

[Oct.

tesy of manners and compassion for all suffering creatures. Verily he was the worthy son of an honored father.

Mrs. Mary Moulton Webster, widow of the late John Gerrish Webster, and sister of our former matron; Miss Maria C. Moulton, died on the 18th of September, 1896. She was a woman of enthusiastic nature and of many excellent qualities, one whose kindness and hospitality drew all hearts to her. Her good deeds were always performed in a quiet way, and many are living who are able to bear testimony to her generous assistance.

WILLIAM GORDON WELD, a member of one of the very wealthy families of Boston, died April 16, 1896. He was a man of sterling integrity, courteous in manner, genial in his bearing, kindly in feeling, direct in character, anxious that no wrong should be done to any man, and strictly faithful in the discharge of his duties.

EDWARD WHITNEY of Belmont died May 26, 1896. He was the head of one of the foremost business firms of Boston, and a very prominent man in financial circles. To his generosity and to that of his sisters the blind owe a great debt of gratitude.

Dr. EDWARD WIGGLESWORTH died January 23, 1896. He was a scion of one of the most benevolent families of Boston, and a sterling,

honorable, generous man, whose career was characterized by unostentatious liberality and whose professional services were freely given to the poor and needy.

All which is respectfully submitted by

# REPORT OF THE DIRECTOR.

Thus year by year, with breathless haste, Swift time speeds nimbly by; The ages creep, the centuries walk, While years take wings and fly.

-A. B. RUSSELL.

[Oct.

# To the Board of Trustees.

Gentlemen:—In the closing hours of a year it is well-nigh impossible to call up its various activities and events in detail and prepare a full record of what has transpired during its course. The best we can do is to give a brief account of the general tendencies and special features of the work of the school, and to add to this such suggestions and recommendations as a careful consideration of the education of the blind in its diverse aspects and far-reaching effects brings to mind. If we would keep abreast with the times we must aim at continual improvement.

The past year has not been signalized by any very striking or novel occurrence affecting the general interests of the establishment.

In nearly all the items, the sum of which constitutes prosperity, the school has made satis-

factory progress during the past twelve months, and in several of the most important particulars its advancement has been very great. Although in no respect has its improvement equalled the desires of its friends, yet what has been accomplished is ample recompense for past labors and encouragement for future efforts.

## REGISTRY OF BLIND PERSONS.

Here through this gate, I count each one.

- SHAKESPEARE.

At the beginning of the school year under review there were 244 blind persons registered in the various departments of the institution as pupils, teachers, employés and work men or women. Since that time 40 have been admitted and 23 have been discharged, making the total number at present 261. Of these, 184 are in the parent school at South Boston, 64 in the kindergarten at Jamaica Plain and 13 in the industrial department for grown-up persons.

The first class includes 171 pupils, 10 teachers and other officers and 3 domestics; the second class comprises 64 little boys and girls; and the third, 13 men and women employed in the workshop for adults.

The completion of the spacious new brick cottage, which has just been built on the site where stood the frame house of the late Daniel L. Bradford, has settled the question of the enlargement of our accommodations in the girls' department in the best possible manner. It is hoped that this addition will enable us to keep our doors wide open for some time to come, and to receive promptly all suitable applicants who

## HEALTH OF THE INMATES.

are eager to gain admission.

Ah! what avail the largest gift of heaven,
When drooping health and spirits go amiss?
How tasteless then whatever can be given.

- THOMSON.

[Oct.

It affords me very great pleasure to be able to report that during the year just closed a high standard of general health has been obtained in every department of the school.

There has been nearly complete immunity from the infectious diseases which have been quite prevalent in Boston and the neighboring towns, the exceptions being a single case of diphtheria and four cases of measles. I am grieved to say that one of the latter ended fatally. Cornelius McDevitt, an interesting and amiable boy, died in the city hospital, to which the little patient had been removed with his fellow-sufferers, in order that they might have the benefit of medical treatment and of the ministrations of trained nurses.

With the exception of these cases, we have been free from illness of a serious character. It is true that in the middle of the winter, owing to constant changes of the weather, we had our full share of ailments of different kinds and of varying degrees of severity; but during the last three months of the school term there was much less than the usual amount of sickness.

### THE DEPARTMENTS OF THE SCHOOL.

I have sent books and music there, and all Those instruments with which high spirits call The future from its cradle, and the past Out of its grave, and make the present last In thoughts and joys which sleep, but cannot die.

- Shelley.

The institution has been steadily improving its organization, and is now well prepared to do much in every way towards educating thoroughly those who come within its influence and equipping them adequately for the discharge of the duties of life. The aim and end of its curriculum are to develop the physical powers of every pupil and to train his remaining senses to keenness and fineness; to awaken and discipline his mental faculties, so that he may become able to observe accurately, to reason correctly, to imagine vividly, to think independently and to express his thoughts and ideas clearly; to cultivate his

moral nature and æsthetic tastes; to nurture his native endowments and special aptitudes and render them productive of good results; to foster his constructive and creative instincts; to enlarge his sphere of activity and his capacity for enjoyment, and thus to fit him to be an intelligent, useful and respected citizen. Bodily exercise, literary and scientific studies, music, manual training, all form inseparable parts and valuable factors of this curriculum, and are made to serve a high purpose, namely, to lay the foundations of a broad and well-rounded education, to overcome as far as possible the great disadvantages caused by the loss of sight, and to build up character. which is the sum and substance of true manhood and womanhood and the supreme crown of achievement.

The school is divided into several coordinate departments, each of which has its own specific sphere of action, but all are united as equals in the one great institution. That none of these has approached the goal of completeness it is hardly necessary to say. Nevertheless, we are on the road of progress and reform, and it behoves us in our thoughts and plans to bear constantly in mind the idea of improvement, and to devise and accomplish such things for every section of the establishment and in behalf of each branch of study as will bring it nearer to the summit of excellence.

## DEPARTMENT OF PHYSICAL EDUCATION.

There's nothing ill can dwell in such a temple: If the ill spirit have so fair a house, Good things will strive to dwell with't.

- Shakespeare.

For educational and ethical reasons, no less than for hygienic, recreative and remedial purposes, physical training holds a foremost place in our curriculum, and the daily exercises of the gymnasium form an essential part of the school life,—a part which can be neither shirked nor slighted.

The declaration of the ancient Greeks, that a vigorous and well-balanced intellect can only be nurtured and thrive in a perfectly sound and symmetrical corporeal dwelling, is no longer considered as a mere assumption. It is an established fact, proved by experience and confirmed by history. Thinkers and writers on education, of all ages and of various schools of thought, subscribe to it, and Jean Jacques Rousseau, the master spirit of a new departure in education, whose Emile was called by Goethe the "gospel of nature," and assumed the dignity of a "pedagogic testament" of the eighteenth century, affirms, with an emphasis peculiar to himself, that bodily weakness and infirmity are a constant source of moral indisposition and a great danger to character, while health and vigor give

[Oct.

mental serenity and impart strength and firmness to the will.

Rousseau's aphorism, that un corps débilé affaiblit l'âme, was preceded by the tremendous emphasis laid by Locke on Juvenal's famous maxim mens sana in corpore sano, which has now become a truism, and is in the mouth or at the point of the pen of almost every tutor of youth.

In our day it is universally conceded that both the power and degree of the activity of the mind and the realization of its potentialities are to no mean extent determined by physiological conditions. On this point there can be but one opinion. A vigorous intellect cannot exist and be adequately supported in a sickly abode or sterile soil, nor can it perform its highest functions or do its best work with clumsy and frail instruments. It needs a healthy body for its tool no less than for its home. Intellectual energy can only be secured and sustained when the respiration is free, the air taken into the lungs fresh and uncontaminated, the digestion good, the assimilation perfect and the circulation vigorous. Nay, more. Even the zest with which we appropriate the bestowments that reach us from the realms of the beautiful, the true and the good, is more or less influenced by the kindling which it receives from the material frame.

The brain is unquestionably the seat of the operations of the mind. It is the "dome of thought and the palace of reason." It is the chief ruler in the domain of action, and the natural instrument for the manifestation of the intellectual faculties and of sensation. But is it not an undisputed fact that this marvellous organ is directly dependent for its nourishment upon the amount of blood which is sent to it by the circulatory system, and that the condition of this vital fluid is greatly affected by its unrestricted flow to all parts of the body, as well as by its oxidization?

But let us look a little further into the nature or constituent elements of man. By applying to the study of mankind the same methods which have led to truth in other departments of investigation, we find that the notion of the duality or trinity of a human being is one of the imaginary things and exploded theories of the past, and that the individual, instead of being a bundle of dissevered fragments, is a concrete unit in thought as he is in life. Indeed, spirit and matter are coexistent, inseparable. Or, as Lucretius expresses it, the mind is born with the body, it grows with it, and also ages with it.

Gigni pariter cum corpore et una Crescere sentimus pariterque senescere mentem.

The two are bound together in a union so close

[Oct.

that "there is no disjunction to be made." They are coordinate parts of a whole, and their development and cultivation should be not only simultaneous but of equal thoroughness and proportioned to their value, so that they may grow harmoniously and be fitted to perform in concert the journey of life. Any attempt at bisecting and dichotomizing them, or at lavishing care upon the one to the neglect of the other, will certainly prove very detrimental, if not fatal, to both.

In the light of these truths it is evident that, on account of the indivisibility of mind and body, the functions of the former are closely interwoven with the actions of the latter. Therefore, in order to attain the best physiological conditions for intellectual achievement and moral excellence, the corporeal organism must be freed, so far as is possible, from all irregularities and imperfections, and its integrity secured. physical training becomes an absolute necessity and a prime and significant factor in the plan of work of all educational establishments, but especially of those which are founded and supported expressly for the benefit of defective The reasons for this distinction are children. too obvious to need demonstration or explanation.

In view of these facts, bodily exercise is insisted upon in this institution with unyielding persistency, and forms the corner-stone upon

which the work of the school is based. The pupils are required to go regularly through a series of gymnastics, which are calculated to cure nervous debility, to supply the demands of a robust health, to govern and further the play of the bodily movements, to give strength and suppleness to the muscles, to expand the chest, facilitate the performance of every function by accelerating the circulation of the blood, develop the physical energies, render the corporeal organism fit for action and able to resist fatigue and disease, cultivate habits of order and decision, remedy such unsightly idiosyncrasies as are peculiar to the blind, and finally to impart vigor and alertness to the mind.

The results obtained from the work of our gymnasium are manifest in the health, the appearance, the erect carriage, the easy movements, the mental elasticity and the manners and morals of our pupils, and bear ample testimony both to the efficiency and beneficence of our system of bodily training and to the ability and exemplary devotion of the teachers who are in charge of it, and to whose unremitting efforts and wise enthusiasm its success is wholly due.

In a northern climate like that of New England it is utterly impossible to find better and more reliable means for regular and systematic daily exercise than those afforded by a series of educational gymnastics, carried on in a com-

modious and well-furnished building, under the direction of competent and experienced instruc-Nothing can supersede these and take their place. But even these, admirable and most valuable as they are in every respect, do not cover the ground of physical training so thoroughly as to preclude the necessity of play out of doors. Far from it. On the contrary, in order that they may become productive of lasting benefit, they are supplemented by sports in the open air, where the pupils are required to spend the latter part of every hour from eight o'clock in the morning to six in the evening, abandoning themselves to the frolics of their age, running and leaping constantly, shouting merrily, skipping and frisking about joyously, and engaging in all sorts of sports and games, which cause the blood to course vigorously, bring vermilion on the cheeks, tone up the system and infuse animation into it, dissipate timidity and fear, promote steadiness and self-control, call forth exuberance of spirits and render mind and body strong and confident.

Before leaving this topic and passing on to another I cannot refrain from stating that, with all the progress which has been made in this direction, the science of physical education is still in its infancy. Its scope is broader and its influence wider than is commonly supposed. It does not concern itself solely with the choice and performance of gymnastic exercises and athletic

games, but goes to the root of things. based upon the philosophy of human life, and presents problems which are at once most interesting, important and difficult. It includes the study of the structure and functions of the human body; the understanding of the laws of health, usually called hygiene; and, furthermore, the theory and practice of such forms of exercise as will not only be sufficient for the harmonious growth of all parts of the body, but will assist in the development of skill, speed, self-control, accuracy, grace, endurance, automatism, tenacity of purpose, mental vigor, moral fibre, courage, will power, character. Man is a complex organism of various powers and activities; and the true office of scientific inquiry is to determine the mechanism, the modes and the laws of its Hence the question of movements for action. the simultaneous development of body, mind and morals, and especially of their relation to cerebration, has to be decided not by arbitrary processes and guesswork but by the exact methods of the laboratory. When this is accomplished the solution of the serious problems involved in the science of physical culture will then and only then become feasible, and the answers given thereto must form part of the foundation of all education.

It is to be most deeply lamented that, by the sudden death of Baron Nils Posse, which occurred on the 18th of December, 1895, the cause

of physical education, founded on rational principles, has been deprived of one of its greatest champions, truest apostles and most enlightened advocates and promoters in America, - one whose mind and heart and soul were wholly in his work. Next to Louis Agassiz and Francis Lieber, to Carl Schurz and Otto Dresel, Baron Posse was one of the brightest and most helpful men whom the wave of immigration carried from the eastern to the western shores of the Atlantic. He was a rare leader and an ideal reformer in his chosen field of labor, and he brought to his work a devotion, an understanding and an enthusiasm which were as uplifting as they were productive of remarkable results. His efforts to place physical education on a purely scientific basis and to make it a factor in the complete development of the individual and in the acquirement on his part of the highest possibilities of usefulness were so strenuous and unceasing that they -

Pressed him down to his timeless grave.

## DEPARTMENT OF MANUAL TRAINING.

Labor is life; thought is light.

- VICTOR HUGO.

Unless our system of education is so planned as to meet the special requirements of the pupil and to provide for the development and cultivation of his body and mind in every particular, it will fail lamentably in its main purpose.

In order that our graduates may be able to become helpful to themselves and useful to the communities in which they live, they must be well taught, carefully disciplined, evenly balanced, rationally educated men and women. They need to be thoroughly trained both physically and mentally in order to develop the largest possible areas of nerve cells, which, together with an inner substance consisting of nerve fibres, compose largely the outer layer of the brain. Intellect is nothing but a function of this organ.

The cells of the brain are of two classes, sensory and motor. The former receive the different impulses which come from the special senses, from the skin and from the internal organs of the body, while the latter generate the nerve energy which causes the muscles to contract. Thus it is evident that the brain is not only the instrument of the mind, but also a battery in which is generated the nerve force that moves the body. Hence, in order that this organ may be properly trained, not only should its sensory activity be adequately cultivated, but the centres which preside over all muscular movements should be developed so as to possess functional energy and to attain a high degree of efficiency. The large motor area in the brain, governing the infinitely varied and complex movements of the upper extremities of the body as well as the fine adjustments and delicate combinations of their muscles, shows that the hand is by far the richest source of motor ideas, and especially the five fingers and their many sensitive muscles and joints. Indeed, this is a sense organ, somewhat like the eye and the ear,—an additional avenue of the mind.

From this it follows that nothing is so well calculated to develop the motor centres in the brain as manual training, which is but another form of mental cultivation. The aim of this training is not only to make the brain and the hand work together, but to contribute to a fuller and more extensive development of the former through the exercise of the latter. The practice of manual training in its different forms comprises a variety of "motor movements," and each of these, whether it be in the manipulation of soft or rigid materials, in the fashioning of clay or in the carving of wood, causes a corresponding action in the cerebral region. As a consequence, these movements stimulate the growth and development of the brain to such a degree as to render it the master and guide of the hand, and that is what we are seeking. As Dr. C. Hanford Henderson aptly remarks, the strongest argument in favor of manual training is not the practical value of the skill which it develops, nor even the significance of the moral sturdiness which it inculcates, but it is something which includes these and the other ends of culture,—it is the increased intellectual power, which is the necessary physiological result of such training.

But manual training, in order to reach the largest possible areas of sensory and motor centres, and, by establishing a coordination between them, to become productive of good fruit, must be systematically arranged and founded upon such principles as are indicated both by physiology and psychology.

Science shows that the muscular movements involved in the handling of tools are of great educational import as long as they are made by nerve energy, which comes from the brain, but they cease to have any such value when they become automatic through the reflex action of the spinal cord. From this it becomes obvious that the so-called trades which are taught in the schools for the blind in a haphazard, mechanical way, are of very little account from an educational point of view. Now and then they help an individual to eke out a meagre livelihood, but they are not beneficial in a high degree to the great mass of children of both sexes. Their worthlessness was manifest in the exhibits which were prepared for the world's fair held in Chicago in 1893, and were anything but instructive or helpful. Through a great variety of articles

the leading European and American institutions for the blind, our own included, showed what they had been doing in the line of manual occupations without clearly understanding the principles on which they labored. Some of their work was well finished, more was merely harmless, much was positively useless and none inspiring. The whole affair was a matter of show, pure and simple. There was in it no indication of scientific principles, no hint of systematic grading, no suggestion of cause and effect.

Thus far the only form of manual training which seems to meet all the conditions and answer the principal requirements for mental development and the acquisition of intellectual force is sloyd.

This system is very methodical in its arrangements, and includes a series of progressive exercises which are carefully graded. It not only embodies universal pedagogical principles, but rests upon them; and consideration of these alone determines the means that are employed for the attainment of definite educational ends. It tends to establish a coordination between the sensory and motor parts of the brain, and to bring its conceptive and executive centres into harmonious cooperation. It instils a love for work and begets respect for labor. It exerts a most favorable influence upon the health and vigor as well as upon the will and upon the

character. Finally, it involves a great variety of exact movements, which promote the habit of accuracy. We can hardly overrate the importance of this point when we bear in mind the fact that clear and correct thinking can never result from vague and inaccurate sense perception, whether of the eye, of the ear or of the hand.

Through the sloyd system the knife, the ripsaw, the jack-plane, the drill-bit, the chisel, the spoke-shave and twenty-two other tools have taken their place in our school by the side of reading, writing, arithmetic, geography, history, natural science and the rest of the studies which compose our curriculum, and are the object of a rational and systematic instruction. They appeal directly to the accessory muscles and to the finer adjustments of these, and in their handling accurate "motor ideas" and delicate muscular coordinations are required. Each of these tools represents a particular kind of thought, and the pupils are taught and trained to use all of them through a series of graded exercises, which help to develop large areas of motor nerve cells in the brain and to promote logical thinking and an exhilarating consciousness of growing power. By means of this practice the learners acquire the mental force which is needful for the direction of the hand, and with it they attain a high degree of manual dexterity, which will ever be serviceable to them both in the rest of their studies and in whatever they may afterwards undertake, and which will hold them in readiness now and always for any kind of apprenticeship.\*

We have already taken the necessary initial steps to reorganize the manual training department and base its functions as far as possible on the principles of sloyd. Miss Mary B. Knowlton is to give in the future the whole of her time to the boys, who are now divided into six small classes instead of three large ones. A new teacher, Miss Anna Hanngren of Sweden, has been added to the corps of instructors. She is a graduate both of the normal training seminary at Nääs and of Miss Hulda Lundin's normal class in sloyd knitting and sewing at Stockholm, and has taught for one year in the public schools of the latter city. Assisted by Miss Frances M. Langworthy, who took last winter a full course of sloyd in knitting and sewing, she will devote herself entirely to the girls' section. Through these changes the roots of this branch of the department have been auspiciously planted in sloyd soil, from which they will draw suitable

<sup>•</sup> In writing the foregoing pages of this section we have had frequent recourse to several works on the subject, but we are especially indebted to Dr. Thomas M. Balliet of Springfield, whose admirable address, delivered before the Teachers' Association at Worcester, Mass., is one of the best and most lucid treatises on manual training.

nutriment for growth and expansion. It now remains to find ways and means for a similar transformation of the boys' section, so that we may be able to dispense with all the mere mechanical methods and unvarying routine processes which are commonly in vogue, and which tend to engender automatism and to hinder cerebral development.

The work of reform has been greatly facilitated through the kindness of Miss Anna Molander of Helsingfors, Finland, to whom both the blind of New England and those of London owe a vast debt of gratitude. Yielding to our urgent request, this good friend has prepared a system of knitting, based on the fundamental ideas of pedagogical sloyd. The course which she has arranged, starting from the kindergarten, goes through the primary and grammar grades of schools and covers a period of ten years. Miss Molander is now working on a supplement to this, which she expects to finish very soon, and if she could be induced to go further, and prepare a system of sewing as comprehensive and as varied as that of knitting, she would complete a plan of manual training which would be of inestimable benefit to children and youth, both seeing and blind, and a lasting monument to her industry and sagacity.

It is with sincere regret that we record the death of one of the assistant instructors in this

[Oct.

department, Mr. Thomas Carroll, who had been connected with the institution as pupil and teacher for thirty years. The immediate cause of Mr. Carroll's decease was an attack of pneumonia; but, as he had been suffering for some time past with Bright's disease, combined with an affection of the heart, his life could hardly have been prolonged for many weeks. Modest, unassuming, strictly honest, loyal to his alma mater, true to his friends, upright in all his relations and amiable in his disposition, Mr. Carroll won the love of his pupils and the high esteem of his associates in the work of the institution. A former pupil of our school, Mr. Elwyn C. Smith of Taunton, has been appointed to fill the place made vacant by the death of Mr. Carroll.

We are greatly indebted to the Wheeler and Wilson Sewing Machine Company of Bridgeport, Conn., for the generous gift of three new No. 9 improved sewing machines, which they were so very kind as to send to us entirely free of charge. The president of the company, Mr. Samuel H. Wheeler, takes a deep interest in the work of the institution, and is as good a friend to the blind as was his late father, Nathaniel Wheeler.

#### LITERARY DEPARTMENT.

"To know"

Rather consists in opening out a way, Whence the imprisoned splendor may escape, Than in effecting an entry for a light Supposed to be without.

- Browning.

During the past year the operations of this department have been carried on with great efficiency and thoroughness, and earnest efforts have been constantly made in the direction of finding means and devising measures for larger work in the future.

There has been a steady improvement in our methods and processes. We have continued to extract the chaff from the wheat, to do away with antiquated and fossilized practices, to check or uproot all tendencies to mechanical routine and to plant in its place better seed.

There has been a healthy growth all along the line. Most of the teachers have been feeling their way by constant experiment to a better system of instruction and training. Their desire has been to stimulate the self-activity of the pupil and render his education entirely rational and more like the unfolding of a flower from some power within; to make him from the very beginning an investigator, so that he may be able to find out facts and discover truths for himself;

to develop his faculties for observation; to encourage him to think instead of merely committing to memory what others have thought, and to let him feel the essential relation between cause and effect. Knowledge acquired in this wise is real to its possessor, because it is part of his experience. It is only by such training that the blind can come to know the great outer world and to find themselves of it.

The developing and laboratory methods of instruction now employed in several branches of study have come to our school not only to stay permanently but to grow and expand steadily, until they cover those parts of the field of knowledge to which they may be applicable. have already taken firm root, and are beginning to raise the standard of the mental training of the pupils by bringing these in contact with nature, and enabling them to observe, investigate, discover and test its secrets. These new methods tend to emphasize Froebel's immortal maxim of "learning by doing," which is the original and true source of accurate knowledge, and to secure mental activity in the most direct, definite and helpful manner. They are opening the way to independent work, awakening thought and increasing the resources of the individual. They have been making "hot inroads" into the citadel of the text-book, and their effect upon its arid pages is similar to that produced by the

rising life of a new spring upon the dead leaves of a tree. Indeed, this venerable repository of second-hand knowledge and of ready-cooked mental food has been confined to its legitimate uses, and its place has been occupied by a rational mode of teaching from objects, which aims not at stuffing the mind of the scholars with unimportant names and dates and meaningless definitions and deductions, but at developing and disciplining its faculties, so that it may be led to make its own comparisons, judgments, inferences and reasonings, and, as Aristotle puts it, to perfect itself by activity. The beneficial results already obtained from the workings of system are very conspicuous, and the proofs of its superiority to the rote methods so numerous as to justify the belief that it is destined to supersede the hide-bound practice of memorizing and reciting glibly the contents of the text-books, and to bring about a more satisfactory order of things.

Doubtless the entire elimination of the ordinary methods of instruction and the substitution of scientific ones in their stead will involve not only a considerable increase of expense but the formation of a corps of instructors noted for intelligence and capacity and for sound scholarship and high professional attainments. But, on the other hand, it is certain that an immense gain would accrue to the pupils both in mental devel-

Under these circumstances we are bound to push vigorously the work of reform in this direction to its utmost limit, to dispense unhesitatingly with such features of the ways and processes of teaching as are apt to effect a mechanical training of the mind, fit only for parrots, to remove all obstacles from the road of progress and to engage and retain in the service of the institution persons of great ability and high intellectual culture, whose faces are steadily turned toward the east, and who, imbued with the spirit of Froebel, are in perfect accord with the principles of modern pedagogy and fully competent to put them in practice.

Special prominence has been given to the study of literature. It is not saying too much to state that only in this branch can the blind find those ideals of life which are essential to the nurture and healthy growth of every human soul. Next to a broad and all-round education, the most urgent demand is a course of training that shall give the pupils a taste for reading good, solid and clean books. Above all, let us teach them to love the poets.

The importance of object teaching has been more or less recognized by the leading educators and thinkers of the past. Comenius, Locke, Rousseau, Basedow, Rochow and others based their schemes of education upon it; but the merit

of introducing it as a special method of instruction belongs to Pestalozzi. It was he who made it the great fundamental principle of his grand pedagogical system, which aims at the natural, progressive and symmetrical development of all the powers and faculties of the human being.

The efficiency and value of this sort of teaching could not escape the keen observation of the illustrious founder of this institution. Dr. Howe saw its superior qualities at the very beginning of his career, and became at once one of its ardent advocates and most earnest promoters. In this matter, as in many others, he was an acknowledged leader; and, although his directing voice was stilled twenty years ago, he continues to be a guide to his successors and disciples, and his spirit is ever with them, helping and urging them to go forward. made a good beginning in gathering sensible objects of various kinds and in putting them into daily use in the school; but during the last seventeen years his work has been constantly supplemented and enlarged, and the nuclei of his collections have been increased and enriched by the addition of numerous specimens, models and materials of all sorts belonging to the animal, vegetable and mineral kingdoms. Thus our pupils are now provided with unsurpassed facilities for obtaining knowledge directly from the things themselves and not from the faint and shadowy images called up by verbal descriptions, which, even in their most vivid and elaborate form, fail to convey clear ideas and exact representations of the originals.

Painted flowers may be full fair,
But their fragrance on the air
We must be content to spare.
And the utmost of a thought
Cannot into words be brought,
Subtly though the words be wrought.

Nothing, not even the highest achievements of art, can replace the work of nature. The famous grapes, painted by Apelles with ideal perfection, looked exactly like those which grow on the vines; yet the birds that mistook them for the real fruit and pecked at them could find neither juice nor flavor there.

Objects in a concrete form stand foremost in the mind of the learner, and upon them he exercises his mental faculties, sharpens his senses and trains the powers of apprehension and conception. Substantial, tangible things concentrate more readily than mere words the undivided interest of a child and stimulate his self-activity, which is to be fostered first, last and at all times. They supply him with such concepts as are calculated to form the groundwork of his intellectual strength and to furnish the material for his thoughts and reflections. Even the foundations of his abstract reasoning rest upon them.

Furthermore, in the hands of a skilful teacher objects become subjects of valuable lessons, and afford the best means for the acquisition of clear, definite knowledge as well as for moral training.

There has occurred only one change in the corps of instructors during the past year. Miss Lillian W. Patten, who had rendered very acceptable service in the boys' department for thirteen months, declined a reelection at the close of the school term, and has since entered the holy estate of matrimony. The vacancy was filled by the appointment of Miss Ellen B. Ewell, a graduate of the State normal school at Bridgewater. The enlargement of the course of instruction has made it necessary to employ an additional teacher in the girls' department, and Miss Ella J. Spooner, who graduated last summer from the State normal school at Framingham, was engaged for the new place.

At the close of the summer vacation both pupils and teachers returned promptly to their respective duties, much refreshed and invigorated by the long rest, and the work of the year was taken up with energy and zest.

## MUSIC DEPARTMENT.

Music can noble hints impart,
Engender fury, kindle love,
With unsuspected eloquence can move,
And manage all the man with secret art.

- Addison.

Music is a language so full of meaning and intensity, of idealism and beauty, that it is sure to affect and fascinate those who penetrate into the depths of its significance and understand fully its profound meaning. It cultivates the love of the beautiful, gratifies the feelings, mollifies the passions and excites the noblest emotions of the soul. According to Beethoven, it is our teacher of harmony and the mediator between the spiritual and the sensual life. elevates the mind and gives it a taste for what is fine and exquisite. It has the gift of urging the scholar to activity by an agreeable excitation, and exerts over his mental condition an influence which makes it a potent instrument of education and one of the surest and most salutary means of discipline which can be employed. In the case of the blind it represents the æsthetic phase of their education.

But, like any branch of learning, music can only be made to dispense its highest blessings and confer its greatest benefits when its study is founded on a rational, scientific basis. Purely

rote and mechanical methods must be entirely avoidéd, and practical exercises must be vivified and rendered effective by knowledge of theory. It is well and good that due attention should be paid to the proper use of the hands or of the voice and to every one of the mechanical details of playing and singing; but, at the same time, no teacher should fail to attend from the very beginning to phrasing and expression, and also to put forth such strenuous efforts as will help to arouse vital interest in his subject, nurture the artistic spirit and imaginative qualities of his pupils, enlighten their understanding, develop and train their musical sensitiveness and cultivate their faculty of perceiving and appreciating the holiness of the beautiful. It is in this wise alone that he will succeed in bringing out clearly and effectively the æsthetic elements of music and in reaching a high standard of general excellence in his work. In his estimation every learner should stand not as an automaton or as a living mechanism, fit for certain conventional uses and formal performances, but as a possible artist. This consideration will prove helpful and stimulating in many respects. More than any other class of children the blind need to be led to the temple of real art patiently yet persistently. Here they will find spiritual light and solace and joy.

The study of music, requiring, as it does, a

clear head and intellectual force of no mean degree, must go hand in hand with such literary exercises as are calculated to secure a steady development and discipline of the mental faculties and to strengthen the judgment. Of these points no musician can afford to be neglectful; for a broad and many-sided culture is no less essential to his professional career than natural talent or refined and discriminating touch. can hardly repeat too often or emphasize too strongly the fact that the mind is the commander and guide of the hand, and not its tool, and that, according to the teachings of psychology, it must obtain its conceptions and shape their images before calling in the aid of the fingers for their interpretation. Hence the ability of the mind to concentrate and control readily all its powers is one of the most potent elements which enter into the playing of an instrument and which may lead to a high level of attainment. A perfect technique, or facile manipulation and digital agility, gained through long and tedious practice or by means of mechanical contrivances, do not make the real artist or the true musician. It is the awakened and vitalized spirit and the cultivated and illumined mind, together with the energized native endowments, that do this, and not the tactile gymnastics and physical exertion. nique is extremely helpful if it is kept in its proper place and used as a means and not as an end in itself; but great results can be achieved only when the brain is fully developed and thoroughly prepared to cooperate with the other functions. The words of Ignatz Moscheles, "train your mind more than your fingers," form the best advice which can be given to a young student who aspires to become something more than merely a key-board manipulator or a prosaic mechanician, whose playing will be as totally devoid of any inspiring qualities as that of a music box.

The educational influence of music, that is, its immediate effect on the minds and characters of the pupils, is of permanent weight and should be placed far above all other considerations. Verily this is the highest mark at which we should aim, while all other advantages, whether utilitarian or social and festive, should be held as secondary in importance.

Owing to its refining, ennobling and elevating qualities, music continues to hold a prominent place in our scheme of education, and its serious study as an art is of much greater importance than the technical mastery of an instrument or of a method of singing.

During the past year good progress has been made in both sections of this department. The work has been carried on in a systematic and spirited manner, and a high degree of excellence has been attained in some branches. Efficient

management and energetic direction have kept things moving on very smoothly, and there has been nowhere irregularity, confusion, disregard of rules, lack of order or waste of valuable time. The teachers have attended diligently and faithfully to their duties. The scholars have been required and stimulated to perform their tasks with promptness and zest, and their playing and singing have been characterized by unusual vim, precision, harmony of spirit and steadiness of action. Taking all circumstances into consideration, we are entirely satisfied with what has been done since the rearrangement took place, and we have good reason to anticipate a constantly increasing improvement, as those now in charge of the two sections of this department become better and more fully acquainted with the details of their work and with the special requirements of the pupils.

The following items relating to the operations of the boys' section have been furnished by its principal teacher, Mr. Edwin L. Gardiner:—

The total number of pupils registered in this branch of the music department during the year was 54. Of these, 48 have studied the pianoforte, 5 the organ, 6 the violin, 16 the various kinds of brass instruments, 11 the clarinet, 1 the flute and 2 the snare drum. Eleven have taken private lessons in singing. There have been six classes in harmony and one in theory of music.

Our band has made satisfactory progress, having learned during the year a number of overtures, waltzes and selections from the works of the best composers. In addition to the brass band we have now the nucleus of an orchestra, which was organized in January, with 16 members. The boys are deeply interested in this new work, and, considering the very limited amount of time available for rehearsals, their advancement is commendable.

The class in part singing has made a creditable record. Its members have learned a number of part songs, glees and the like, and also one chorus with cornet obligato and with baritone solo.

Thirty-eight public exhibitions have been given in the hall during the year, consisting of vocal and instrumental music.

We are greatly indebted to the managers of the New England Conservatory of Music for having kindly consented to allow a number of our advanced students the privilege of attending the lectures which are to be given in that institution during the coming year by Mr. Louis C. Elson. This opportunity will be of special advantage to our boys, particularly to those who are preparing themselves to teach music.

Miss Mary C. Wheeler, a graduate of the New England Conservatory of Music, and a young woman of earnest purpose, has been employed as teacher in place of Miss May E. Stetson, who declined a reappointment at the expiration of the school year, and, in obedience to the following behest of Chaucer,—

Boweth your nekke under blissful yok . . . Which that men clapen spousaile or wedlok,

has since become Mrs. Gardiner.

In order to complete the equipment of the new music rooms which have been built for the girls' department, six upright pianofortes have been purchased at reasonable terms of Messrs. George Steck & Co. of New York. Our collections of brass, reed and string instruments have also been replenished and increased by the addition of several new ones.

The necessity of having the principal teacher in the girls' section live constantly with the pupils and devote the whole of her time to the work of the institution had become so evident that a change was unavoidable. Consequently, at the close of the school term the engagement of Miss Mary Phillips Webster, who had served for three years with great ability and faithfulness, was not renewed, and Miss Lena E. Hayden, an accomplished graduate of the New England Conservatory, was chosen to fill her place. It was with keen regret at being obliged to lose the services of such an efficient teacher that we parted with Miss Webster; but the importance of having the heads of the various departments of the institution reside in our own buildings or in the vicinity of the school is so great that we could not do otherwise.

Miss Hayden has written the following statement of what has been done in the girls' section during the past year:—

The number of pupils enrolled as students of music was 44. Of these, 40 have taken lessons on the pianoforte, 2

on the violin, 1 on the pipe organ, 11 in singing and 12 in harmony.

There has been one class of 7 pupils in analysis and musical form. There has also been a large chorus, the members of which met three times each week for drill and rehearsals.

In the course of the past year an additional supply of music for the pianoforte, the orchestra, the band, the cornet, the class in part singing and the chorus has been printed in the Braille raised characters from brass plates made on the Hall stereotype maker. In the selection of musical works to be embossed for the purposes of our school the teachers have been strictly enjoined to invariably give preference to those which are of a high order of merit and have a permanent worth. It is of the utmost importance that our pupils should be taught from the very beginning to admire and appreciate the works of the best masters, and that they should not be encouraged to acquire a liking for the popular trash, which is so eagerly sought after and which debases the musical susceptibilities, corrupts the taste and vulgarizes the sentiments. In order to keep our collection free from everything that is not up to the mark, we have recently discarded both the copies and the plates of several pieces of music of a very inferior character, which, if good judgment and sufficient

care had been exercised in making a selection, would not have been stereotyped and printed.

The varied and valuable advantages for musical culture which Boston affords to those who live within its limits can hardly be over-estimated. They form one of the principal attractions of the city, and do great credit to the artistic sense and refinement of its inhabitants. Through the unstinted liberality of Mr. Eugene Tompkins, proprietor of the Boston Theatre, and of the many other generous helpers of the blind, not a few of these facilities for musical culture are rendered accessible to our students. For these opportunities, as well as for several entertainments given in our own hall by artists of great merit, we are profoundly grateful to the kind friends, whose names are thankfully recorded in another part of this report, and through whose thoughtful remembrance the members of our school are favored every year with the means for æsthetic culture and given a vast amount of pleasure.

# TUNING DEPARTMENT.

They chant their artless notes in simple guise;
They tune their hearts, by far the noblest aim!

— Burns.

Reflection and experience combine to show that the art of tuning and repairing pianofortes affords one of the most profitable and helpful employments for the blind. It opens to them a wide field of activity and usefulness, and enables a large number of our male graduates to enter the arena of competition with their seeing fellowcraftsmen on almost equal terms, and to earn the means of self-support and become independent through their industry and skill.

Thus, whether it is considered from an economic and social or from an industrial and utilitarian point of view, the art of tuning is of such immense importance to the welfare of the blind as to justify the attention which is paid to it in this institution.

The department devoted to the study of tuning as an art and to its practice as a profession is admirably equipped to do work of a superior character, and it is due to its manager, Mr. George E. Hart, to say that its affairs have been conducted with marked ability and assiduity, and that its various interests have been attended to with intelligence and promptness.

Twenty-two pupils have received instruction in tuning during the year, and two pianofortes have been added to the stock of instruments used for practice.

Mr. Hart has spared no pains in giving to the students a thorough knowledge of the art of tuning, and in training them to use tools and to make repairs. This latter feature is one of the strongest points in his teaching, and promises to bear good fruit in the near future.

Last spring the pupils connected with the tuning department, directed by their master, undertook the execution of a piece of work which afforded to them an unusual opportunity to make practical application of the theoretical knowledge which they acquire in the course of their training, and also served as a test of their skill and mechanical ability. It is very gratifying to be able to state, at the outset, that the task was performed in a very creditable manner, and that the results were exceedingly satisfactory in every particular.

The pianoforte from the Canterbury street school at Roslindale was sent to our shop for repairs, to be restrung and put in good condition. Work of this kind is seldom attempted outside of a factory, and, owing to the fact that the instrument was of a fashion that prevailed forty years ago, the ordinary difficulties of such an undertaking were greatly increased in this case. Nevertheless, the action was thoroughly overhauled, such portions of it as were found to be worn or defective were repaired, and all its parts were carefully adjusted to interdependence and put in good working order. In trying to overcome the obstacles which presented themselves in the course of their work, the pupils

had to exercise much ingenuity and not a little perseverance; but the experience that they were to gain was deemed to be so valuable that they toiled with ardent zeal, and their efforts were crowned by a measure of success which was praiseworthy, and of which a fair idea is given in the following extract from a letter written to Mr. Hart by one of the teachers of the Canterbury street school, Miss Elizabeth Kiggen, under date of the 22d of April, 1896:—

The piano which you repaired was returned to this school yesterday, and the teachers are very much pleased both with its appearance and with the improvement in the works. It seems almost as good as a new one.

Several old instruments belonging to the institution are now undergoing similar treatment, and are to be made somewhat serviceable at a very moderate cost. It is true that the supervision and management of this work, added to the regular duties of the instructor, render it necessary for him to avoid minding other people's business, and to confine himself exclusively to his own and to the advancement of the interests of the apprentices. Why should he desire to do otherwise? He is employed and paid liberally for these purposes, and there is no valid reason why he should not devote himself wholly to matters pertaining to his department, instead of

attempting to attend to all sorts of things which lie outside of it, and for which he has neither the natural endowments nor the requisite training.

#### EDITH M. THOMAS.

A full, rich nature, free to trust, Truthful and almost sternly just, Impulsive, earnest, prompt to act, And make each generous thought a fact.

- WHITTIER.

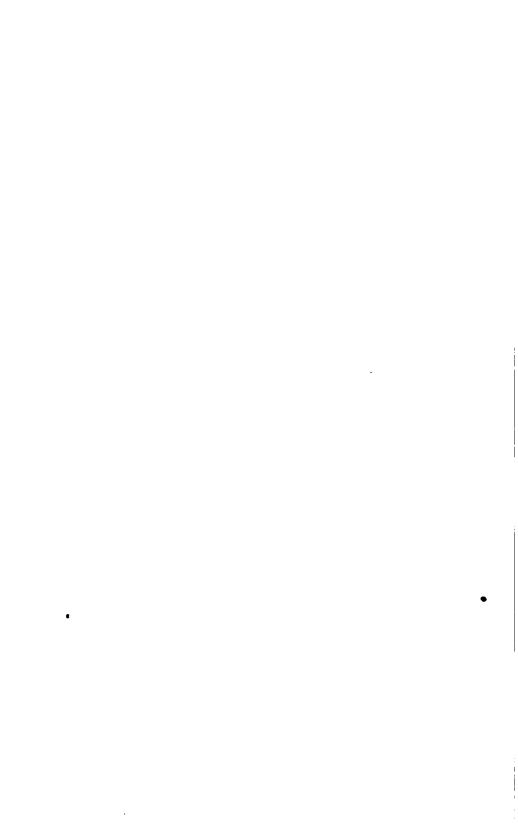

During the past year no radical change has been made in any of the essential parts of the arrangements adopted some time ago for the education of this most interesting girl. Nearly the same methods of instruction, which were fully described in former reports, have been substantially followed, and the results have been in almost every respect truly remarkable.

Aided by her private tutor, Edith has pursued the studies of her class with strict regularity, and, with the exception of arithmetic, has made excellent progress in all. Arithmetic, unlike geography, is still far from being a studium gratum at her mental court. In all her efforts for the acquisition of knowledge and for general improvement she has persevered with puritanic pertinacity, and has given fresh proofs of the resolution, intrepidity, self-reliance, undaunted hardiness and moral stoutness which form such striking elements in her character.

EDITH M. THOMAS.

Edith has shared with her classmates in the instruction designed to teach the use both of the mind and of the fingers. While expected to do as much as possible, she has been taught to work independently, to seek and find, to investigate and discover, to think and to express her thoughts simply and correctly, to strive and learn, to plan and execute, to originate and create. By means of this training her fingers have become accurate interpreters of her mental processes; her physical powers and intellectual faculties have been symmetrically developed, and the best kind of seeds have been planted in her mind and heart, which are permeating her character and beginning to bear fair fruit.

As is well known to most of our readers, Edith has a positive sort of mind, sustained in all its activities by a wondrous power of will; but she possesses no marvellous natural endowments of any kind. Therefore, what she has already accomplished in the field of knowledge is chiefly due to the vigilant care and unwearying attention which have been bestowed upon her education and to the modes of training which have been pursued in her case. Moreover, she has been invariably surrounded by such healthful and elevating influences as tended to bring out what is best in her, to ennoble her sentiments, to sweeten her disposition, to foster her instincts of sincerity and to heighten her sense of honor and her love

of veracity. No artifice or guile of any sort has been allowed to take root in her heart, nor has she ever shown any inclination to insincerity or to be led to say or to do by others anything which is not strictly right and which does not have the approval of her conscience.

Edith belongs to that class of persons who are tremendously earnest in all their undertakings, and who prize independence far above everything else. Her life affords a valuable lesson of self-discipline, self-control, right-mindedness and Truth is the background of her self-reliance. being and the vital motive of her conduct. thoughts and actions are governed by it, and no power on earth could tempt her to deviate from its promptings so far as to consent to claim as her own the literary work of others. So scrupulous is she upon this point that she could not be brought to consent to use even a phrase which did not emanate from her own mind or which had been already employed by others. Of her strictness in this respect the following instance affords a striking illustration: —

Last autumn she received a cordial invitation from a kind friend, asking her to pay her a visit. This pleased Edith very much; nevertheless, she was inclined to be dilatory in acknowledging it, giving as an excuse for her procrastination that she did not know what to write. Although it was deemed perfectly proper to make a few suggestions to her of a general character as to what she should say, she rejected the assistance proffered at once, saying, "these are your words and not mine."

Would that every child who, like Edith, is deprived of two of the royal avenues of sense could be so fortunate as to be favored with the exceptional educational advantages which Edith enjoys, under the loving care and wise supervision of teachers whose superiors either in ability and devotion or in probity and high-mindedness can hardly be found anywhere!

These ladies are doing a very great work in developing and disciplining the mind and in moulding the character of Edith. They are enriching her life to the utmost with the useful, the sweet, the elevating thoughts which run like threads of gold through their words, and the effect of which is intensified by their constant example and daily practice of what they teach. They watch over her and guard her with tender solicitude, and —

Their tendance hovering over her Fills all the genial courses of her blood With deeper and ever deeper love.

We are again under lasting obligations to one of our teachers in the girls' department, Miss Frances S. Marrett, who, yielding kindly to our earnest request, has cheerfully devoted much of

her time to the preparation of a full statement of Edith's education during the past year. This account is one of the best written by Miss Mar-She has spared no pains in thoroughly sifting the materials placed in her hands, in scrupulously seeking for the truth, in stating the result correctly, and in avoiding the use of exaggerated expressions and of glowing colors, which might mar the simplicity and accuracy of her work. Like its predecessors, this sketch is written in her luminous and attractive style, and is replete with instructive facts and incidents which cannot fail to be helpful to teachers and to prove no less interesting to general readers than they will be to scholars, thinkers and to men of science. Here is Edith's story, as told by Miss Marrett: —

The record of the education of Edith Thomas during the past year, taken as a whole, shows that she has made steady progress. Along the line of arithmetical duty there has been characteristic loitering, but not a sufficient manifestation of the truant spirit to merit the opprobrium of the phrase, "below class standard." English, reading, arithmetic, geography and articulation comprise the branches of study in which Edith has received instruction in the literary department of our school. She has also taken daily exercise in the gymnasium, and her industry and proficiency in the province of manual training are attested by many admirable specimens of sewing, knitting and crocheting.

Language. Edith has never won any laurels in the field of language work, which is "naturally uninteresting" to her. She is satisfied if her thoughts are understood by those to whom they are communicated, and there is therefore no strong incentive to ease and accuracy of expression. Although Edith thus lacks the enthusiasm which is necessary to call forth her best efforts, she has performed, with a fair measure of success, the work required of her English class.

The lessons during the year have chiefly consisted of a study of the most essential principles of rhetoric and their application to words, sentences and paragraphs. They have also included a careful study of figurative language, and an initiation into the delights of literature through the medium of Longfellow's poem of *Miles Standish*.

One of the most noteworthy signs of Edith's progress is the constant enlargement of her vocabulary. Her present attitude toward new words is that of eagerness to know their meaning, and to improve the first opportunity for their use.

During a reading exercise, her fingers encountered the word "thunderstruck." She immediately paused to learn its significance, and, later in the day, she surprised her teacher by saying: "I am thunderstruck when strangers ask me if I like arithmetic."

One of her compositions contained this sentence: "He was small of stature." The source of the concluding word was readily traced to the following lines from a recent reading lesson:—

Of stature tall, and slender frame, But firmly knit was Malcolm Graeme. In the course of a conversation with her room-mate, Edith asked Etta if she had heard her saying her prayers the previous night, and then added: "Oh, I prayed mightily, yes, mightily!" This fervent statement induced a question concerning the origin of the word "mightily." "That," responded Edith with an air of pride, "is one of my new favorites." A few days afterward, when she had been told that the school's weekly deportment record contained a very large number of marks, she said, "I do wish the girls would try to do better, I try; I am mightily stirred about this."

There has been, for the past few months, a notice-able subsidence of Edith's energy in the writing of original stories as a means of diversion. It is evident, however, that the present cessation of literary achievement is only temporary, since she has prepared, for her future use in narrative composition, the following list of subjects,—The Little Queen.—The Ruler of the Mighty.—The Angel and the Sinner.—My Favorite Birds and Flowers.—The Historical Story of the Armenians.—The Little Maiden and the Flowers.—Children Lost in the Thickets.—Kind Words and Noble Deeds.—Teaching of the Bible to the Heathen.—Eternity and Spiritual Truths.—Let not He that Putteth forth His Hand to the Plough Look Behind Him.

READING. During the past year Edith has read in the class-room the following selections from the first volume of American Prose, — Rip Van Winkle, The Great Stone Face, The Snow Image, Drowne's Wooden Image and The Boy Captives; three stories from the

Arabian Nights' Entertainments, - the ever-fascinating story of Aladdin, Sinbad the Sailor and Prince Ahmed. She has also read The Land of the Pyramids, Hiawatha, The Lady of the Lake and several other poems. Although the greater part of the literature included in this list was not at all acceptable to Edith's practical nature, she exhibited toward the assigned lessons a spirit of unusual tolerance. chanced that, as a story progressed, Edith's attention would be held captive until deepening interest kindled a glow of genuine enthusiasm, and a marked development of the power to understand and appreciate imaginative thought must be recognized as the richest fruit which the reading lessons have bestowed upon Edith. She particularly liked The Snow Image. When she read of the magical effect wrought by the kisses of Violet and Peony in imparting a rosy tinge to the lips of the little snow-maiden, she turned to her teacher with words and smile expressive of her pleasure in the exquisite poetry of this idea.

While studying *Hiawatha* she said: "What beautiful thoughts Longfellow had!" Soon she announced her intention of committing to memory these lines:—

Love is sunshine, hate is shadow, Life is checkered shade and sunshine, Rule by love, O Hiawatha.

Edith could not read the story of Aladdin fast enough to satisfy her eager curiosity. She made a novel attempt to increase her speed by placing one hand upon the first paragraph of the lesson and the other hand upon the succeeding paragraph, in the hope of gaining

time by using them simultaneously; but her ingenuity could not, in this instance, be made to serve her purpose, and she was forced to return to the old, reliable method. Edith's keen delight in the mystical account of Aladdin was explained when she said that it reminded her of the Bible miracles, in which she has always been deeply interested.

She welcomed The Lady of the Lake as "a poem about real places," with which she had become fondly familiar through the medium of the geography lessons; but the difficulty of eliminating the plot of the narrative from the perplexing labyrinth of its poetical setting proved so formidable a task that her enthusiasm was soon quenched. Words and phrases quite unknown to her appeared with exasperating frequency, and it was often necessary for her to read a sentence several times in order to grasp its meaning.

She was asked how Ellen reached the shore where she is represented as standing during Scott's delightful words of introduction. "I think she must have grown there, as she belonged to the lake," was Edith's stolid response. A more careful study of the stanza was then required, and this led to Edith's discovery of the boat as a most essential feature of the rural picture. Upon another occasion, when requested to interpret a somewhat obscure passage, she said, with considerable emphasis: "It is too dry for me to explain, this story does not agree with me; it is one of those that I naturally do not find interesting." Edith's feeling of disappointment was, however, occasionally brightened by beautiful thoughts which awakened a glad echo from her own heart. "I like poetry about flowers, I love

Nature's children," was the sentiment which she expressed after reading the first stanza in the fourth canto of the poem.

The ideas which she had obtained concerning metrical expression are indicated by the following lines, descriptive of a child, created from Edith's own imagination:—

Sweet was she to kiss,

Blue were her pair of eyes,

Golden curls had she; they were hanging down
her shoulders.

What cunning hands and feet!

Bright was she, a smile was on her face

Everyone she met was pleased to see her.

She was like an angel,
Childlike and sweet was she.

In conversation Edith frequently shows her enjoyment of a departure from conventional forms of speech. "I am trying to be poetical," was her explanation of the extraordinary greeting: "How do ye this noon?"

There are a few books which Edith reads again and again for her own pleasure. The favorite one is *Bible Blessings*, made dearer by a sacred association and a happy sense of ownership, because the volume which she now enjoys came to her upon her last birthday, and had formerly belonged to Laura Bridgman.

ARITHMETIC. As in previous years, the daily record of Edith's work in arithmetic contains no mention of very praiseworthy effort or achievement. Her attitude in the class-room is one of placid submission to an invincible foe, and, as yet, no ambition has been

manifested to adopt the course, so wisely pursued in the old fable, of seizing the adversary by the horns in order to make progress. One day Edith was told that she worked very slowly. "I know, I like to be slow," was her only response. In surprise Miss Torrey asked: "Do you really like to be thought slow?" "Yes," said Edith, "in arithmetic, because I am." It was much the same feeling that led her to say, as a report of a term's work was being read to her class: "Even a good mark would not please me, because it is arithmetic!"

An example which Edith was required to perform was as follows:—

Two men are 40 miles apart, and both travelling in the same direction; the second man gains upon the first 6 miles a day; in how many days will be overtake him?

When Edith insisted that she could not understand this problem, she was given a cushion with pins to indicate the miles, and stilettos to represent the men. She was told to make the men walk, and to put a pin into the cushion for each day that they travelled. By means of this practical illustration the required result soon became evident, and such a lively interest had been created by the operation that Miss Torrey was induced to ask if Edith had enjoyed the problem, whereupon Edith answered promptly: "I liked walking the men along, but I never enjoy examples."

One day, during a few moments of freedom from the baneful type slate, she said to her teacher, in full surrender to a mischievous impulse: "I know everything." In her eagerness to demonstrate the truth of her assertion she performed more examples than upon any previous day of the term. The drudgery of the work was for once forgotten, and she clearly proved how much she could accomplish every day with willing effort.

GEOGRAPHY. When Edith had studied geography but a few months she said: "I like geography best of all my studies. I think it is the greatest, because it tells all about God's great world. I think sometimes when I am studying it that I am seeing the great forests and rivers." This sentiment would find a very strong echo in Edith's heart today, for her devotion to her prime favorite has been unwavering.

She has learned a great deal about the eastern continent from the geography lessons of the past year. With clay in hand to mould the mountain chains and river systems, and with a tangible means of locating the important places along the route, she has made the tour of Europe, Asia, Africa and Australia with all the enthusiasm of the genuine traveller. Her imagination has been stimulated by vivid descriptions derived from geographical works in embossed print or from books in ordinary type, her teacher interpreting the latter to Edith by means of the manual alphabet.

In journeying through the Alpine region its famous tunnels had a novel interest for Edith, and were graphically represented upon her board map by her own skilful excavations in the clay representation of the mountain range of which they form a part.

After the class had finished the study of Switzerland, each pupil was required to write in her own language a description of the country. Edith responded

[Oct.

with alacrity, and her interest in the assigned task is indicated by the following statement, which succeeded a short period of vigorous application, — "I have written three pages, and still I have more to say."

This exercise is given in full below, and also one which her teacher required her to write as a test of the knowledge gained from a study of France.

#### SWITZERLAND.

Switzerland is a land of peaks, it is crossed by the Alps, Bernese Alps and the Jura Mountains. The highest peaks in the Alps are Mount Matterhorn and Mount Rosa. The other directly north of Mount Rosa in the Bernese Alps is the Jungfrau.

There is another peak near the Alps on the southern boundary between Switzerland and Italy and France, called Mount Blanc. The Jura Mountains north of the Bernese Alps, on the French frontier, extend northeast into Germany.

There are some passes in the Alps Mountains which lead from Switzerland into the Italian valley of the River Po, they are St. Gothard, Simplon, St. Bernard and the Grimsel passes.

There are some rivers flowing through Switzerland; the Rhone, starting north of the Alps, flows south and turns west into Lake Geneva, enters France, and empties into the Mediterranean Sea.

Lake Geneva is in Switzerland near the French boundary where the Rhone leaves it. In the northeastern part of Switzerland is another lake which the Rhine flows from. The Rhine flows west between Switzerland and Germany and then turns north flowing through Germany into Holland, and empties into the North Sea.

Switzerland has a few small cities but no large ones; because of the difficulties of the mountains. On Lake

Geneva where the Rhone leaves it, is the city of Geneva where Miss Lilley went. A little distance from Geneva is Berne, the capital of the Republic. Lucerne is on Lake Lucerne in the eastern part of Switzerland. The city of Zurich is on Lake Zurich north of Lake Lucerne. On Lake Constance, in the northern part of Switzerland, is the old city of Constance which belongs to Germany. On the northern boundary between Switzerland and Germany, where the Rhine turns northwards is the city of Basle. Switzerland has muslins, thread, paper, jewelry, and ribbons. Geneva has more watches than in any other place in Europe except Paris.

#### FRANCE.

France is separated from Spain on the southern boundary by some mountains called the Pyrenees. There is a little of the Alps Mountain region on the eastern boundary of France partly separating it from Italy. There is also a high peak in the southeastern part of France called Mount Blanc and at the foot of it, is the vale of Chamouni.

There are some other mountains which extend through France, the Jura and the Vosges. The Jura are in Switzerland and Germany, but they also extend into France. The Vosges start in the southwestern part of Germany and extend through Germany and Switzerland and France.

In the southeastern part of France are some mountains running from north to south called the Cevennes Mountains. The system of the Cevennes is broken into small ranges.

On the north of France is the English Channel, which separates it from Great Britain. And the Bay of Biscay is on the western. And the Mediterranean Sea is south of France.

There are some rivers in France flowing into the Mediter-

ranean Sea, the Atlantic Ocean and English Channel. The Garonne River rises in the Cevennes Mountains and flows west and empties into the Bay of Biscay. The Loire rises in the same direction and flows westward and empties into the Bay of Biscay. The Seine rises in the eastern part and flows northward and empties into the English Channel. The Rhone has its source in Switzerland. It flows through Lake Geneva, and enters France, and flows southward into the Mediterranean Sea. There is another river connected with the Rhone called Saone. There is a little river called the Scheldt, which rises in the eastern part and flows northward into the North Sea.

The city of Bordeaux is situated on the Garonne River. Lyons is on the Rhone near the Swiss border. West of Lyons is the city of St. Etienne. Marseilles is on the Mediterranean. Rheims and Lille are near the Belgian border. Havre, Rouen, and Paris are situated on the Seine River. Paris is the capital of France.

The manufactures of France are, silk, porcelain, thread. cotton, linen, woollen and lace.

The productions are beets, grapes, figs, oranges, truffles, mushrooms and prunes. France also has mineral productions, iron, coal, marble, slate.

Edith's study of geography has aroused in her mind a deep interest in all that pertains to foreign countries. Last November, when she returned from a visit to the Mechanics' Fair, one of the first things which she mentioned, in recounting the special joys of the afternoon, was the fact that she had shaken hands with a Danish lady whom she had seen making lace.

Edith often seeks entertainment in conversations with herself by means of the manual alphabet. One day it was noticed that she formed the letters with unusual rapidity and animation. Her teacher touched her gently, and Edith, recognizing at once who it was, said: "I am talking real French with an imaginary French lady." (Edith has received some instruction in French, in response to her eager desire to know something of a foreign language, and she is already familiar with many simple French sentences.)

One day, when in a thoughtful mood, she said: "I wish I could go to Rome to visit the Pope!" adding afterwards: "I am interested in him because he is so noted, and I should like to know how he rules the Catholic church."

ARTICULATION. The following statement of Edith's shows her dominant attitude toward her articulation lessons: "I have decided to talk with my mouth the rest of my days, and never give it up." Unfortunately, however, her ambition is only to speak well enough to be understood. She does not appreciate the importance of the long and arduous training necessary to produce distinctness of utterance and modulation of tone, and it is difficult to induce her to go through the requisite drill in pronouncing the elements of word structure, or indeed of single words. It cannot be said that Edith has made marked progress in articulation during the past year; but it is hoped that she may come to realize that patience, perseverance and sustained effort are essential to attain even a fair measure of success in this difficult undertaking.

No account of Edith's school life would be complete without a mention of incidents which, though trivial in themselves, serve to illustrate a personality which is deeply interesting to those who watch Edith's development from day to day and from year to year.

She has a strong spirit of self-reliance which finds expression in many ways. To allow others to do for her what she can do for herself is a surrender contrary to a cardinal principle of Edith's nature. A friend offered to supply for her the loss of a button. "I can sew it on myself, thank you," was the quick response, in which one could easily detect an element of just pride.

One day Edith received a note of invitation from a lady with whom she had no acquaintance. Her heart was gladdened by this token of loving thought for her pleasure; but she showed unusual hesitation in her attempt to write a response, urging, as her excuse, that she did not know what to say to a stranger. To smooth the way a little, a few sentences were suggested for her use; but she promptly rejected them, saying to her teacher: "Those are your words, not mine," then with a sudden determination she applied herself to the task, which was soon finished in a thoroughly creditable manner.

A new watch which was given to Edith last January is counted among her choicest possessions. Its mission is certainly an important one; for by the messages which it communicates to her questioning fingers it must insure her prompt attendance upon the duties of each school day.

Unfortunately, the style of Edith's best gown made the addition of a watch pocket difficult; but she could not endure the thought of being deprived of her trustworthy companion even on Sundays and holidays, and she said to her teacher, who was examining the dress: "I must have my watch pocket even if you have to cut a hole in front."

The fact that Edith is occasionally oppressed by the monotony of the routine of school life is thus amusingly illustrated. One morning, after her usual greeting to her teacher, she said: "I have been trying to think of something new to do today; but the only new thing I could think of was to put two kinds of perfume on my handkerchief instead of one."

Edith is often animated by a spirit of bewitching playfulness,—the sparkling effervescence of genuine good nature. A few bits of conversation generated by these moods are here given.

When about to take leave of a group of school friends in order to perform her regular task of washing the dinner dishes, she said: "My dishes are waiting for a swim, good-bye." A dear friend presented Edith with the bulb of a Chinese lily, which at first floated upon the surface of the water in which it had been placed; but as the period of growth began it sank to the bottom of the jar. When Edith discovered the change in the position of her carefully guarded treasure she ran to Miss Torrey with this mysterious message: "My poor Chinaman is drowned!" After Edith had critically examined one of her gowns which was fast approaching a state of "shreds and patches," but which she continued to wear, she said to her teacher with an expression of mock seriousness: "I guess I had better be put into the rag bag, don't you think so?"

Edith stoutly refused to accede to a proposition that

each member of the family of Brooks Cottage (her home at the institution) should give in turn a quotation at the dinner table. When she was told that she was the only one who was unwilling to share in this form of entertainment, she responded with much emphasis: "I don't care, I prefer to be the sheep that goes astray."

One of the methods which Edith has devised to secure the companionship of some particular friend, during a recess period, is the following. Upon being dismissed from her class-room she hastens to the dressing-room and stands directly in front of the hook upon which are hung the hat and cloak of the friend of whom she in quest. One of the girls who found Edith thus waiting for her said in a spirit of fun: "Who are you?" Edith replied: "I am Edith, and very visible, too."

Edith's deportment record for this year has been marred by three demerit marks. As a punishment for the misdemeanors which occasioned these marks, she was obliged to surrender her freedom for one Saturday afternoon. That evening she said with true repentance: "I have been a long time in the right path; but I came to a stump and saw it not and found it was a stumbling block. I find it hard to get back again; but I hope to find a new path with no stumbling blocks in my way."

One day when Edith was thoroughly conscious that she was controlled by a bad mood, she said: "I am not real Edith. You know I was born with a changeable nature and I cannot make it different."

There is a particular corner of Edith's room to which she always resorts in times of sorrow or indignation. Here, upon a low seat, she awaits a change of feeling. Her first act, however, upon entering the room in an uncomfortable state of mind, is to open wide the window. This is done even in the coldest weather, and we may easily conclude that the current of fresh air has been found to be of great efficacy in producing a return of good nature.

It is delightful to think that Edith has had the privilege of spending much of her summer vacation in the country. This pleasure she was able to enjoy through the kindness of her dear friend and former teacher, Miss Markham. It is of such joyous visits that Edith says, out of the fulness of her heart: "I love the country, everything is so much more beautiful than in the city. I like farms, and I always have such jolly times."

A trip to Andover last Thanksgiving day is one of Edith's pleasantest memories in the events of a glad year. Her stay there included a visit to Abbot Academy, which brought her for the first time in contact with an atmosphere of school life differing from that to which she had been accustomed. This experience proved a source of great pleasure to her, as well as of much profit.

Edith has not yet reached the point where she is willing to meet the requirements and accept the responsibilities of her years. She continues to claim many of the privileges of childhood to which she is conscious that she has no very valid right. Upon one

occasion a teacher who had cause to censure Edith for very childish behavior, which led to serious difficulties, said to her: "You know that you are seventeen years old, and that you are expected to behave more like a young lady." Edith responded with decided emphasis: "I do not want to be seventeen." This remark cannot fail to elicit the sympathy of those who know Edith Her education did not begin so early as that of the ordinary child, and her progress during the first years of her mental and moral training was so slow as to seem little more than a gradual awakening. was not the beautifully symmetrical unfolding of the threefold nature which characterizes the normal developinent of child life; but each new year now means for Edith a positive advance, and is fraught with hope for the future.

Miss Evelyn Torrey, who has served as Edith's tutor for one year, declined a reappointment last June, and has since married. She made an excellent teacher, and faithfully recorded the daily work of her pupil in a diary, which is a model of accuracy and order, and in which it is hardly possible to find an incorrect statement or a careless remark. The vacancy caused by the resignation of Miss Torrey has been filled by the election of Miss Edith Moultrie Thurston, a recent graduate of the normal school at Framingham.

## THE SAMUEL ELIOT COTTAGE.

Thereon I built it firm.

-TENNYSON.

Dr. Howe, wishing to pay a deserved tribute of gratitude to the memory of the earliest and most distinguished friends and patrons of the institution, decided to dedicate to each of them one of the four buildings which were erected on Fourth street and occupied by our girls in 1870. Thus the first house was named Fisher Cottage, after Dr. John D. Fisher, who conceived the idea of establishing a school for the blind in Boston and worked assiduously for its foundation; the second, Brooks Cottage, for Peter C. and Edward Brooks, both of whom were presidents of the corporation for many years, the latter serving also as trustee and was considered as one of the fathers of the institution; the third, May Cottage, after Samuel May, who served first as trustee and afterwards as president of the corporation from 1862 to 1870; and the fourth, Oliver Cottage, after William Oliver of Dorchester, who in the forties was the greatest benefactor of the blind, and whose legacy to the institution, amounting to more than \$40,000, was much larger than the market value of the house in Pearl street given by Col. Thomas H. Perkins.

Carrying out the idea of Dr. Howe, the fifth

[Oct.

house, which has been recently built, we have named the Samuel Eliot Cottage, after the esteemed president of the corporation. This recognition of Dr. Eliot's long and valuable services to the school is an act of simple justice and strict propriety. He was a member of the board of trustees for ten years previous to 1873, when he was called to preside over the affairs of the corporation, and from that day to this he not only has held the office with commanding dignity but has attended to its duties with unvarying cheerfulness and exemplary regularity. For more than a whole generation he has been one of the warmest friends and most eloquent advocates of the education of the blind, and has given a goodly share of his time to the advancement of the interests of the institution.

The new cottage is worthy of the honored name which it bears. Constructed of brick, in the most substantial manner, the interior finished in hard wood, supplied with all needful appliances and modern improvements, tinted in fine colors and fitted with every desirable convenience, this building is one of the very best owned by the institution. The inside is tastefully arranged and neatly furnished, and its appearance suggests the home of an intelligent and well-to-do family, rather than a public institution. Our girls are proud of it and most happy in it.

1896.7

# A MUSIC HALL NEXT.

The wages of victory are but battles to be fought.

-E. NORTH.

The Samuel Eliot cottage and the enlargement and remodelling of the Howe building are valuable acquisitions to the institution, and afford for the time being ample accommodations both for scholastic and domestic purposes.

With this increase of room and with the addition of half a dozen pianofortes and the new books and educational appliances and apparatus which have been recently procured, we are now able to keep our gates wide open to all suitable applicants for admission, and at the same time to enlarge our curriculum and to do better and more effective work than ever before.

For these inestimable opportunities we owe a vast debt of gratitude to the memory of the dear friends and benevolent donors whose legacies and gifts have made it possible for us to widen and enrich the field of our operations and to keep up with the urgent demands of the times.

But, though these accessions are admirable in every respect and bring us a step nearer to the summit of our aspirations, they do not comprise all the possibilities of improvement, nor do they form in the development of our plans the point

108 Oct. of ne plus ultra or the utmost limit of growth and expansion. Far from it. On the contrary, as soon as these were completed it became evident that we are in absolute need of a central building, around which all the others should cluster, and that the lack of such an edifice is a most serious drawback to our school. Above all other things, we must have a music hall large enough to accommodate from five to six hundred people, so that those who attend our ordinary exhibitions and special entertainments may not be obliged to stand up in an uncomfortable corner or to leave the house thoroughly dissatisfied with the insufficiency of its accommodations. In connection with this there should be ample room for a commodious gymnasium and the requisite number of class-rooms for the use of the girls, and plenty of space for the headquarters of the administration of the establishment, for business offices and one or two reception rooms. addition of this building will bring our accommodations within measurable distance from perfection. It will provide for us a most excellent place for dramatic plays, operatic performances, concerts, recitals and other entertainments of such a high order as will call for the attendance of people of intelligence and social distinction, and make them cognizant of the literary abilities and

musical attainments of our pupils, as well as of

the needs of the establishment. Without this edifice the institution is wanting in one of the most essential elements of its completeness. No school of a respectable size and with such aims for physical, mental and musical education as ours has in view can possibly fulfil its mission without it.

The proposed building has been already planned in all its details. In order to be of easy access to both departments of the school, it will be located midway between what is now known as the main building and the Samuel Eliot cottage. It is to be a substantial and stately structure, of pure Romanesque architecture, 135 feet long, 90 feet wide and four stories high above the basement. Its walls are to be of brick with brown stone trimmings, and, while the interior is most carefully arranged and supplied with every needful convenience, the exterior will present a beautiful front and a fine general appearance.

This edifice is so essential to the thorough organization and the efficient performance of the work of the different departments of the school, and also to the proper management of its affairs, that its immediate erection and equipment cannot be indefinitely postponed. Any undue delay in this direction will be seriously detrimental to the interests of the establishment and to the fulfilment of its purposes. Yet we have not at

110

present a penny that we can devote to this enterprise, and it would be a fatal mistake on our part to encroach upon the reserved fund of the institution, and thereby diminish the sources of its annual income. Hence we are compelled to appeal to the friends of the blind with all the earnestness that we can command. and ask them to come to our assistance and raise the full amount of money which is required to complete this new addition. The need is pressing, the call is clear, and, although the prevailing state of financial uncertainty is not favorable to ample gifts, the means are not lacking. Even in these distressing times we see millions of dollars given annually to universities, colleges, technological institutes and seminaries for seeing youth. Are there not some large-hearted, freehanded, broad-minded people who will build this hall for the blind, and thereby lift their school into a higher and wider sphere of activity, and start it upon a new career of usefulness? Who shall lead the way to the construction of this grand monument and attach to it his name forever? Who will come forward to supply this invaluable addition to an institution which will continue to do its beneficent work for hundreds upon hundreds of the most afflicted members of the human family when the munificent donors shall have found their crowns?

### Conclusion.

Then let us take a ceremonious leave

And loving farewell of our loving friends.

- SHAKESPEARE.

In closing this report I take great pleasure in stating that the teachers and all other officers and employés have performed their respective duties with intelligence and zeal, and that they deserve your commendation for their fidelity and devotion to the interests of the school and to the welfare of the pupils.

There has been but one change in the staff of officers. The assistant matron, Mrs. Sarah A. Stover, fearing lest her strength should not be sufficient to meet the growing demands upon the position which she occupied so ably for a long period of years, declined a reelection at the end of the school term, and Mrs. C. A. Duchemin was appointed in her stead. Mrs. Stover took a deep interest in her work, and watched over the health and the manners of the younger boys with earnestness and maternal solicitude. The place of housekeeper in the new cottage has been given to Mrs. E. L. Weeks, whose fitness for it remains to be proved.

For the ready help, counsel and encouragement which I have received at your hands in

the discharge of the duties of my office, I am very grateful to each and all the members of your board.

In view of the additions and improvements which have been recently made to the educational facilities afforded by the establishment, and of the rearrangement and enlargement of our course of study, we are entering upon the work of the ensuing year with greater vigor and with more promising prospect of usefulness than at any time in the past.

Kind friends of the blind, will you help us to keep the institution in that position in the fore-most rank in which your generosity has already placed it, and enable us to make such further progress as will suffice to render our school a model establishment of its kind?

All which is respectfully submitted by

MICHAEL ANAGNOS.

## LIST OF PUPILS.

## ACKNOWLEDGMENTS.

Among the pleasant duties incident to the close of the year is that of expressing our heartfelt thanks and grateful acknowledgments to the following artists, littérateurs, societies, proprietors, managers, editors and publishers, for concerts and various musical entertainments, for operas, oratorios, lectures, readings, and for an excellent supply of periodicals and weekly papers, books and specimens of various kinds.

As I have said in previous reports, these favors are not only a source of pleasure and happiness to our pupils, but also a valuable means of æsthetic culture, of social intercourse, and of mental stimulus and improvement. So far as we know, there is no community in the world which does half so much for the gratification and improvement of its unfortunate members as that of Boston does for our pupils.

## I. - Acknowledgments for Concerts and Operas in the City.

To Mr. Eugene Tompkins, proprietor of the Boston Theatre, and Mr. Walter Damrosch, conductor, for a general invitation to the German operas.

To the Apollo Club, through its secretary, Mr. Arthur Reed, for six tickets to each of four concerts.

To the Ceeilia, through its secretary, Mr. Francis A. Shave, for an average of seventeen tickets to each of four concerts.

To Mr. E. Noyes Whitcomb for a general invitation to the Mechanics' Fair.

To Mr. George Foxcroft for seventy-five tickets to the Star Course concert.

To Miss Olga E. Gardner for twenty-one tickets to a concert given by Miss Lena Little.

To Miss Charlotte Hawes for ten tickets to a musical lecture by Miss Louisa A. Beal.

To Miss Gertrude Franklin for eighteen tickets to a song recital.

To Mr. John Orth for tickets to two evening concerts.

To Miss Etta Parker for twenty-five tickets to a recital in Union Hall.

To Mr. Wilhelm Heinrich for ten tickets to one and twelve tickets to each of two vocal chamber concerts.

To Miss Charlotte Lynn for thirty tickets to a vocal recital.

# II. — Acknowledgments for Concerts, Lectures and Readings given in our Hall.

For a series of recitals, concerts and lectures given from time to time in the music hall of the institution, we are greatly indebted to the following artists:—

To Mr. Frank B. Sanborn for a lecture on "Personal Recollections of Emerson."

To Mrs. Florence Howe Hall for a lecture on "Reminiscences of Distinguished Men."

To Mrs. Laura E. Richards for a reading, giving selections from her own writings, both in prose and poetry.

To Mr. Arthur Howard Pickering for a reading, giving Shakespeare's Henry the Eighth.

To Prof. Arlo Bates for a lecture on "Sir Walter Raleigh."

To Miss Agnes E. Snyder, assisted by Mrs. Maud

Nichols Lyon, soprano, Mr. Charles Peabody, flute, Mr. Howard M. Brackett, violin, Mr. James B. Atwood, piano, and Mr. Walton S. Crocker, for one concert.

To Mrs. J. S. Greene of Milton for a lecture on "Lucy Larcom," and to the choir of the Unitarian Church, Dorchester, — Miss Shields, Miss Thayer, Miss Caldwell, Mr. Barker and Mr. Tuttle, — for illustrating the subject by appropriate songs and hymns.

### III. — Acknowledgments for Books, Specimens, etc.

For various books, specimens, etc., we are indebted to the following friends:—

To the Maryland School for the Blind, through F. D. Morrison, Esq., Superintendent, Miss Martha B. Lucas, Miss Lydia Y. Hayes, Mr. Henry W. Stratton, Miss Ellen B. Webster, Mrs. Sarah A. Stover, the Volta Bureau and the Society for Providing Evangelical Literature for the Blind.

## IV. - Acknowledgments for Periodicals and Newspapers.

The editors and publishers of the following reviews, magazines and semi-monthly and weekly papers continue to be very kind and liberal in sending us their publications gratuitously, which are always cordially welcomed and perused with interest:—

| The N. E. Journal of    | Educa | tion, |   | • | Boston, | Mass. |

#### GIFTS IN LIFE AS WELL AS IN DEATH.

DEAR FRIEND: — Are you thinking of making your will and of disposing of the whole or a part of your estate for educational and benevolent purposes? If so, do not forget the Kindergarten for the Blind in Jamaica Plain. Pray bear in mind the fact that this institution is doing a holy work for the needy little sightless children, its object being to mitigate the sad effects of their affliction, to improve their condition physically, intellectually and morally, and to free them from the fetters of helplessness and dependence.

#### FORM OF BEQUEST.

I give, devise and bequeath to the corporation of the Perkins Institution and Massachusetts School for the Blind, Boston, Mass., for the sole use and benefit of the Kindergarten for the Blind, the sum of dollars.

#### FORM OF DEVISE OF REAL ESTATE.

I give, devise and bequeath to the corporation of the Perkins Institution and Massachusetts School for the Blind, Boston, Mass., for the sole use and benefit of the Kindergarten for the Blind (here describe the real estate accurately), with full power to sell, mortgage and convey the same, free of all trusts.

The Kindergarten for the Blind is located at the corner of Perkins and Day streets, Jamaica Plain.

The Jamaica Plain electric cars pass within ten rods of the buildings.

# KINDERGARTEN FOR THE BLIND.

### REPORT OF THE TRUSTEES.

To the Members of the Corporation.

LADIES AND GENTLEMEN: — In presenting a brief report for the past twelve months, we take very great pleasure in being able to state at the outset that the kindergarten has maintained the usual excellence of its work throughout the year. There has been no interruption from illness or from any other cause, and no lack of public interest or of ready assistance.

Among the many educational enterprises that have enlisted the sympathy of the people of Massachusetts, perhaps none has a stronger hold on their affections than that for educating little blind children. The kindergarten for the blind has enlisted in its cause a large number of devoted friends, who labor assiduously and in the most disinterested spirit to promote its welfare and to place it on a firm financial foundation, thus ensuring for it permanent success and usefulness.

Thus cherished by the community in general, aided by individual liberality and assisted by the contributions of those who take an active interest in the amelioration of the condition of the little sightless children, the infant school has reached a degree of development which is very gratifying to its benefactors and highly encouraging to its founders. Its mission, whether considered from an educational or from a humanitarian and social stand-point, is much larger and more important than a casual observer can realize.

We desire to put on record our most sincere thanks to all who have helped the kindergarten, either as contributors to its funds or in any other way. At the same time we are obliged to ask not only for the continuance but for the increase of that support which has been so generously accorded to us in the past, and which has enabled us to carry on successfully the work of educating and training the children committed to our care.

For several years past we have felt the necessity of moving forward slowly, and the kindergarten has been allowed to grow as rapidly as the funds at our disposal would permit. But now we are forced to admit that the work has outgrown its present quarters, and that the time for their enlargement has come. There has been a steady increase of applications for admission, and our doors cannot be kept ajar to all comers

without additional accommodations. There is a pressing need of new buildings, and, as we have no money at our disposal for their erection and equipment, we are compelled to appeal to the public for special contributions, which will enable us to provide both room and the means of maintenance for every blind child who is in need of the inestimable advantages of early training and care afforded by the kindergarten. We wish to emphasize the urgency of this matter, and to ask most earnestly every man, woman and child who takes an interest in the work of the infant institution to come to its assistance, and to lend such help as is required for its enlargement and perpetuity.

### THE KINDERGARTEN AT THE ANNUAL FESTIVAL.

The commencement exercises were opened with a brief address of welcome by Dr. Samuel Eliot. This was followed by the exercises of that part of the programme which was especially reserved for the kindergarten. As usual, great interest was shown in the performance of the children, and when a class of girls stepped forward on the stage with sloyd knitting-work in their hands, and began a song to the accompaniment of the pianoforte, the sympathy and appreciation of the audience was manifest. It was hard for the spectators to realize that the little maidens who stood before them singing and working in

such perfect unison and with such dexterity were wholly lacking in sight, and greater still was the marvel to them to see Willie Robin, the girl without sight and hearing, standing among her comrades and participating in their work as deftly and as naturally as though she were in the fullest possession of all her senses. In the mean time, some of the very smallest boys and girls had seated themselves at low tables at the front of the stage, and were busied in making ready the clay models for an exercise to take place later. While this preparation was going on, Rev. E. L. Clark, D.D., was introduced. His address was truly eloquent, yet characterized by a beautiful simplicity. He made a soul-stirring appeal in behalf of the kindergarten, its great work and noble aims.

#### ADDRESS OF REV. E. L. CLARK, D.D.

At the kindergarten last week I did my best to talk with one of these little girls who can neither see nor hear nor speak. She informed me presently that I did not know how to speak. I never felt the truth of that remark so much as I do at this moment. Why should any one make a plea for them? These young people are speaking to you by their silence in the most effective and touching way. How serenely happy they are! What thoughtfulness plays upon their faces! It is impossible to find words in such a presence as this. Let me ask you, who have the joy today of seeing the spring lead on the summer, with all its beauty, to look upon these children, their faces lighted by a sun

which has not risen on sea or land. Are you not glad that you have an opportunity to assist in this work? This stage setting of forestry is, I take it, intended to suggest that this institution is not yet out of the woods,—am I right in this?

I have always found that a true sacrifice is a sweet savor alike to him who receives and to him who gives. In this work it is a joy to do good. We keep part of the pleasure which we give. Our treasures are what we have dispensed more truly than those we have retained. We act in response to the command of the Father of us all, and the pleasure he feels when under his lead the children grow in stature and in wisdom is what all men should feel. Any of us may say: "These are my children to care for. They come here today not to ask for aid, but to show me what has been done by the kindness of men in past days, that I may enjoy the same luxury of doing good in the days to come."

I took a very little child to see a lady who was sick. She was troubled because she had lost the joy of helping others. The little child said to her, "If it gave you such joy to help others, now you are in trouble, you give others a chance to make themselves happy by helping you." There is a bright side to their necessity. It is your opportunity.

Beside the share which you may have in the work of this magnificent and beautiful institution, there is a reason for your assistance in the fact that you were once children yourselves. Everybody who believes the Chinese maxim, "I count him greatest who keeps a child heart," will wish to repay to little people the service he has himself received. He still feels the delight of being carried when he carries the helpless. He loves whom he serves; he serves whom he loves. He keeps the sacred memory of other days fresh when he does to others what others have done to him. He turns about the old maxim, and says: "Where our heart is there our treasure is also, and that too in the same proportion."

There is another reason why we should lend our aid. It is the best investment a person can make. We talk about many things which pay or pass dividends, about what once belonged to us, or may still be our own; but the real property we own, our real estate, is what we invest in other lives. We shall know more about this a thousand years from today.

I thought of another thing as I sat here. When Sir Humphrey Davy was asked what his greatest discovery was, he declared it was Michael Farraday. These wise and devoted teachers have gone beyond that. They have helped these children to discorn themselves. In this I have no doubt they have discovered their own nobler selves. Shall we share this comfort of seeking and saving what seemed to be lost, of eternal gifts, of infinite grace and of joy?

There is a form of endowment which comes to us from the creator of all, who is the Father of us all. It brings the highest thought and feeling and power. See it in use before us as these children model in clay. At the kindergarten in Jamaica Plain they have a cabinet full of such work. If the children use a sleigh, they feel of the sleigh, and with marvellous grace produce it in clay. They have horses and cows and a thousand and one things, for the greater part out of their imagination. Remember this: while the kindergarten is so much to children who can see, and lays such a broad foundation for instruction, these children have a necessity to think like God, clay in hand and love in heart, along the lines of creation. Moreover, they have a special life in this way, and it does much to lighten their misfortune. Try yourself with moist clay upon a piece of glass to form the human countenance in relief. Your thought works in a lowly material which has been trodden under the feet of the centuries, formless and without beauty. By a power which you cannot explain it assumes the form of the human countenance, then the face of an older or younger person,

of a boy or a girl, an expression of happiness or sorrow. It is your creation. The morning stars sing for joy in your heart. The thought of heaven has expressed itself in the dust The power and courage which come with such effort are a spiritual benediction. It leads them who need most a helping hand. As we say, it is "education." What these children are doing with the unformed elements you are doing with these children. You are creating something in them. You are wakening a noble hope which stands for a future far beyond the time when they shall make use of this gift for their own support and happiness or for that of others. They will rise up in the gates and call you blessed when they come to see as now they are seen, recognizing the fact that you gave them the power of inner sight, that you touched them with your fingers in the day of their calamity, that you opened the avenues of thought in which they have walked ever since with felicity and joy, that you called out the nobility of their character.

It seems strange that such mental and spiritual things should come by money, and yet be beyond money or price to our brothers and sisters in pity. Boston is always the first to feel this genuine touch of nature which makes all men kin, this generous thrill of being when we touch a friend in adversity, for "friends are nearest akin."

It would not be strange if some one of us had been thinking of what kind of monument he desired to leave behind him. Man's best monument is men. Man's best eulogy is the grateful love of these children. Do you want a throne by which you can exercise a command over the world? The best throne is the heart and mind of the children. Do you wish you could issue an edict or make laws for the good of mankind? There is no edict of king which will endure so long, there are no laws of any empire which will give such power as the principles of usefulness and happiness in the lives of these little people. They have at once the

flower of promise, the fruit of toil, the sweet perfume of a blessed charity today. I think the beautiful life they are leading is something very like the happy toil and clear shining of that celestial place where they need neither candle nor light of the sun, by reason of a broader illumination coming by suffering, resplendent along the way of all who have suffered, but now enthroned, of which we read, "The Lamb is the light thereof." With them we stand. Truly, our hearts, made tender, remember how "a little child shall lead them." They are ours. We stand more firmly and think more bravely of our part in life as we say it. Our tears of pity are a bow of hope to them and to us. asmuch as ye have done it, ye will do it to those." We have ourselves received much from them. We are grateful These are the outer walks of the eternal Paradise. They are nothing more or less than our kindergarten, - mother-like to dress and to keep - are they not?

When Dr. Clark had ended his discourse, the eight diminutive modellers held up their work in full view of the audience, and one by one explained what had been made. The first object presented for inspection was a farm-yard gate, which opened into the farm-yard, its little maker said. Then came the watering-trough, succeeded in turn by the hay-cart and horses. The contribution of Tommy Stringer, who played an active part in this exercise, was next in order, and consisted of a very creditable presentation of sheep. Tommy, by means of the manual alphabet, communicated some of his thoughts about the sheep to one of his schoolmates, and the latter inter-

preted the message viva voce, to the great edification of the audience. In rapid succession a milking-pail, eggs and chickens and a dog-house were all displayed and explained by their respective makers. The children then gathered in a ring and sang a farm-yard song, representing at the same time, with considerable similitude of movement and action, ducks, pigs, roosters and all sorts of farm animals. It was all done so prettily and gracefully, and, moreover, with such hearty zest, that the audience derived a great deal of amusement and pleasure from the performance.

The kindergarten exercises closed with a medley of popular and national airs, played with commendable spirit by the kinder orchestra.

# KINDERGARTEN FOR THE BLIND.

# TENTH ANNUAL REPORT OF THE DIRECTOR.

The young oak grew, and proudly grew.

For its roots were deep and strong;

And a shadow broad on the earth it threw,

And the sunshine lingered long

On its glossy leaf, where the flickering light

Was flung to the evening sky;

And the wild bird soared to its airy height,

And taught her young to fly.

-Mrs. E. OAKES SMITH.

# To the Board of Trustees.

Gentlemen: — I present for your consideration the tenth annual report of the director on the achievements and prospects of the kindergarten for the blind with a feeling of peculiar pleasure and gratification that I am able to do so.

In looking back and reviewing the work of the past year, we find much to be thankful for and nothing to grieve over. The enrolment of pupils has been larger than usual, containing the names of 64 little boys and girls. The health of the two households has been exceptionally good. The daily tasks have been performed very regularly. There have been no serious interruptions caused by severe illness or by the appearance within our walls of any of the infectious diseases which were prevalent in the community.

We can hardly express in adequate language our sense of profound gratitude to the friends and benefactors of the little blind children for the many tokens of their unfailing interest in the infant institution and for the ready assistance which they have so freely accorded to it.

The substantial results thus far obtained in this field of beneficence show that no branch of our work is more important than this. By furnishing the means and facilities for the development and training of the youngest pupils who are placed under our care, the kindergarten not only meets the special needs of these children in the best possible manner, but also forms the sound foundation upon which the strength and efficiency of our scheme of education depend.

# APPEAL OF THE LADIES' VISITING COMMITTEE.

And more hands help to disburden.

- MILTON.

The ladies of the visiting committee continue to manifest a warm personal interest in the kindergarten. They make frequent visits, inspect the buildings, witness the exercises in the school-rooms and watch tenderly the unfolding of the children and the results of their training. Their keen insight and ready sympathy enable these ladies to perceive at a glance what is lacking in every department and to be helpful in many ways. To them the urgent needs of the infant institution are so obvious that they deem it their duty to make these known to the public and to ask for immediate assistance.

Feeling that the amount still due upon the debt incurred for buildings is a most undesirable encumbrance and that a sufficient sum of money should be raised without further delay to wipe it out, the members of the visiting committee sent the following earnest appeal to hundreds of benevolent persons, soliciting their aid:—

To the Friends of the Kindergarten for the Blind.

Through the voluntary contributions and generous gifts of many of the stanch friends of the Kindergarten for the Blind at Jamaica Plain, the major part of the debt, which was incurred four years ago for the erection and equipment of the last two buildings, has been defrayed, and the amount which remains unpaid is reduced to about \$12,000. But this sum, even in its present diminished size, forms a load which is too heavy to be allowed to press upon the work of the infant institution for an indefinite period of time. Every one can readily understand that a burden of this kind is a serious hindrance to the steady development of the cause of the education of the little sightless children, and a source of anxiety to the managers of the kindergarten.

In view of these facts, it is now proposed by the ladies of the visiting committee to take steps toward the removal of this debt. Hence they appeal most earnestly to your generosity for this deserving enterprise, and ask for your coöperation in their plan.

All sums, large or small, will be gratefully received. They may be sent to the treasurer, Mr. Edward Jackson, No. 58 State street, and will be acknowledged through the Boston Transcript.

Mrs. William Appleton,
Mrs. Elizabeth Cary Agassiz,
Miss Agnes Brooks,
Miss Caroline Derby,
Mrs. E. Winchester Donald,
Mrs. Maud Howe Elliott,
Miss Olga E. Gardner,
Mrs. Thomas Mack,
Mrs. E. Preble Motley,
Miss Laura Norcross,
Miss Edith Rotch,
Miss Annie C. Warren,
Visiting Committee.

#### FRUITS OF THE KINDERGARTEN.

Season of mellow fruitfulness;

Close bosom friend of the maturing sun!

Conspiring with him how to load and bless

With fruit the vines that round the thatch eaves run.

- KEATS.

The little seed that was planted in love and hope nine years ago has not perished; on the contrary, fostered by tender care and nurtured by liberality, it has grown to be a goodly tree and has fairly begun to yield its legitimate fruits. Some of these were enumerated in the report of the past year. Since the publication of that pamphlet we have gathered in the field of experience a fresh supply, as appears from the following extracts from the written statements of teachers in both sections of the school.

From the girls' section: —

MISS GAZELLA BENNETT. — A class of nine girls entered our school in September, 1894, having had a full kindergarten course and two years in the primary department at Jamaica Plain.

In the two years between September, 1894, and September, 1896, the class has studied, in the literary department, language, mathematics and science. The language study has included reading, spelling, writing from dictation, original composition and grammar. This work has been more satisfactorily done in two years than heretofore by any class in three years' time.

In arithmetic the majority of the class has made a gain of two-thirds of a year in time.

In science the work has been in quality superior to that of previous classes, and in quantity has exceeded by onehalf year the amount usually accomplished by our scholars.

This gain is directly attributable: 1. To the attitude of the learner; 2. To mental discipline; 3. To superior manual dexterity.

The attitude of these pupils toward any school work is uniformly cheerful, willing and earnest.

Their early mental efforts have been so directed as to lead to habits of concentration.

The early handling of kindergarten materials has resulted

in a dexterity which contributes greatly to the facility with which knowledge is acquired through touch.

Outside of the school-room, too, we have the normal child, active and enterprising. The activity and enterprise bring not unfrequently chagrin and discomfort, but also knowledge which comes only with experience.

In September, 1895, three girls were transferred to this school because the kindergarten was over-full. They were not working together and had not completed a full term at the kindergarten, so there is very little to record concerning them except that they have the right attitude toward school work.

The girls who have come to us from the kindergarten are free from those mental and physical idiosyncrasies which result from an abnormal environment. Life is conditioned upon motion; consequently, when the physical energies of the blind child find no expression in running, jumping and climbing, this physical life essays to energize itself by swaying the body, rolling the head or twirling the hands; and the feeble movement of intellectual life is stifled altogether, or expresses itself in unnatural productions of the imagination.

In these children physical energy found ample opportunity for expression in running, climbing and ordinary child play at the kindergarten; and their stirrings of mental activities were aroused to life by the "gifts" and "occupations" purposely selected to awaken inquiry and comparison.

Miss Sarah M. Liller. — Out of the class of nine which came to us from the kindergarten, five are willing workers who have learned how to study, and so find their work a pleasure rather than a burden. The other four are willing and cheerful, but, owing to slight mental deficiencies, will need to repeat the present year's work. The work required for the year, however (in oral and written language and

grammar), has been equal in amount and superior in quality to that required of any previous class in two years.

By their voluntary questions, as well as by their answers to given questions, the children have shown an intelligent grasp of the subject.

Miss Frances S. Marrett. — In September, 1894, nine children entered our school from the kindergarten. My first satisfaction in them, as pupils, was derived from the fact that they knew how to study, and from the enthusiasm which indicated a genuine love of study. This joy in work, which is so surely a secret of success, seems to me one of the richest fruits of the kindergarten.

An appreciative sense of the beautiful forms of nature was delightfully manifested by these children in the botany class. It was seldom that their trained fingers, guided by eager minds, failed to detect any important characteristic of a given specimen of plant life, and the knowledge gained from these independent observations was usually expressed in clear and definite language.

During the lessons in reading and spelling I was much impressed by the children's fund of general information. So many of the subjects and words thus presented to their minds claimed association with something learned at the kindergarten. Quite often thoughts from the poets were suggested, which told of a fond acquaintance with some choice pieces of literature.

Among the chief advantages of their first school home should be mentioned the ease and intelligence with which all of these children read. Within two years they have accomplished much more in their prescribed studies than other pupils who have not had the benefit of a kindergarten training.

What I have said of this class as a whole is especially true of five of its members. That the other four, impeded

by a sad lack of mental capacity, have been able thus far in their school life to have the companionship of more vigorous minds may be justly attributed to power gained at the kindergarten.

The three pupils whom we welcomed from the kindergarten this year have not come under my tuition except for a spelling exercise once a week. In this branch of study they are inferior to the other members of the class which they joined. This may be due to the fact that they were transferred to our school before they had completed a full course at the kindergarten, other children being in sore need of their places there.

MISS JULIA E. BURNHAM. — The majority of the children from the kindergarten show a greater confidence in the judgment of the teacher and a more submissive spirit when told to correct work or study a lesson a second time than the pupils who have not attended the kindergarten.

Many of the children are also more attentive to the things which they hear read or talked about; and often, when they hear new words at such times, they keep them in mind until an opportunity comes when the meaning may be asked.

The same characteristic is helpful in the reading class; for, if by chance the teacher passes a word which is new to them, some one is sure to ask the meaning.

As a rule, the kindergarten children have more general information than the others. This is shown in the reading class, where they can often connect some incident or fact with the subject under discussion.

Having had four or five years' training, the kindergarten children find it easier to remember the common every-day courtesies of life than those children who come to us directly from homes where no thought is given to such things.

MISS ALICE B. DEARBORN. - As a rule, the kindergarten children in my classes have more general information than those who have never been at this preparatory school. This is apparently a result of the spirit of investigation and inquiry which the kindergarten has awakened in them.

Among the children who come from poor, uncultured homes, those who have had the benefit of the kindergarten training show more refinement than the others.

MISS HARRIET W. BUSTIN.—Two of the girls who took the kindergarten course are under my instruction. Their ready obedience, their quickness to grasp an idea, and the intelligence with which they work, seem to be proof of an early and careful training.

MISS FLORA J. McNABB. — The kindergarten course has been of great advantage to the children in the manual training exercises, for it has taught them to think for themselves.

The sloyd system of knitting and sewing, which was introduced into the kindergarten three years ago, has proved very beneficial, as the children have learned to work much more correctly and rapidly.

Miss Bessie Wood and Mrs. Cora L. Gleason, who, as housekeepers, have had charge of the little kindergarten girls, write favorably about them as household inmates. Mrs. Gleason says:—

The children from the kindergarten first impressed me with their cheerful responsiveness and polite demeanor. Upon a better acquaintance I found them doing their domestic work with remarkable neatness and ease, this being the result of that early hand-training which is so important for the blind.

Their childish pranks and gaiety show a healthy nature; and their loyalty and enthusiasm for the kindergarten must have a moral influence upon them through life. From the boys' section: -

MISS SARAH L. DINSMORE. — The present year brought us several children who came directly from their homes. Circumstances made it necessary to place them in the same classes with those from the kindergarten. A great difference was at once perceived.

Those directly from home came with their minds burdened, as it were, with facts, but they were lacking in true mental development. Many of them are bright boys, and the remark is often made, "oh, if they could have gone to the kindergarten before coming here!"

On the other hand, those who have enjoyed the advantages of the kindergarten bring with them unquestionable proofs of the excellence of their training. Surrounded by its sunny atmosphere and sweet, refining influence, they have developed amiable dispositions which render them happy and lovable, and make them very dear children to work with. Each child manifests a ready and cheerful spirit of helpfulness, and there is a certain frankness and trustfulness about them that it does one's heart good to see.

They have learned to read intelligently and to feel the influence of books. Scarcely a reading hour passes without fresh proof of their power of discrimination, as shown in their attitude toward different characters. Anything noble receives their admiration, while that which savors of meanness is passed over as not worthy of notice.

The kindergarten training has developed in almost all these children industry, perseverance, courage to undertake and sturdy self-reliance, and has thoroughly established in them the habit of concentration.

MISS CAROLINE E. McMaster. — Last autumn a class of eight boys came here from the kindergarten. They, like

those who have come before, show the beneficial results of their previous training.

One day for a "nature lesson" some sweet pea blossoms were given to the pupils. Many simply smelled of the flower, but it was noticeable that the kindergarten boys examined theirs very carefully. Soon, one boy, finding the petals wrapped about the pistil, exclaimed: "What are these soft leaves covering this bony part?" The technical terms were not used, but the scientific spirit was there.

Sometimes when a poem is read one finds the pupils already familiar with it. "We learned—or heard—that in the kindergarten," is the explanation.

MISS JULIA A. BOYLAN. — The difference between the children who come to us from the kindergarten and the raw recruits is most marked. The reign of law has already begun in the one class; while in the other, as a rule, its absence is striking. Children sent to us from the kindergarten have an enthusiasm for learning which is more important in their development than knowledge acquired.

Miss Lillian W. Patten. — The boys from the kindergarten show in many ways the results of opportunities not enjoyed by others. They seem more advanced and more teachable, — grasping ideas more readily and asking intelligent questions. In most cases the leaders of the classes are kindergarten boys.

MISS JESSICA L. LANGWORTHY. — My thorough belief in kindergarten methods for all children, but for our little blind children in particular, hardly needs expression. Of the kindergarten boys who have come under my observation during the past year, only three have had the full course. Of these three, two are undoubtedly among the leaders of their class and the third always maintains a fair average and is careful and thoughtful. It is but just to themselves and to the other members of the class to say that this is one of the most promising classes in the school.

The boys read with ease, write legibly and are thoroughly interested in all objects brought for their observation and in all matters presented for thought and study. They also express their thoughts clearly.

There is no doubt that the kindergarten is one of the greatest and noblest, as well as one of the most hopeful, features of our school.

These, then, are some of the fruits of the kindergarten brought to us by the husbandmen who have gathered them, and who know whereof they speak when they pronounce it a goodly In our thankfulness we call aloud to harvest. the many givers of the garden: "Come and partake! Come and enjoy! Here are fruits, beautiful, sound and abundant, to refresh your generous hearts. All the branches have borne richly. Would you have fruits of character, precious to the world? of the mind and of bodily health, bearing within them the seeds of further increase? Here they are; and it is due to your bounty, kindly givers, that they have had a garden wherein to grow." The kindergarten for the blind still has crying needs!

# ANNUAL RECEPTION AT THE KINDERGARTEN.

In my voice most welcome shall you be. Salutations and greetings to you all. - SHAKESPEARE.

Though volumes have been written to demon-

strate the inestimable advantages arising from a

Oct.

judicious development of self-reliance and character, especially in the young, no more striking and convincing illustration of this truth could be found than that witnessed at the annual reception given by the ladies' visiting committee at the kindergarten on April 21. What was to be seen on that occasion, and the manner in which it was adapted to the perception, impressed indelibly on the minds of all present the fact, that when will combines with character to take arms against a sea of troubles, powerful indeed must be the opposition to crush such insurgents.

Whatever may have been the expectations of the guests who assembled at three o'clock in the parlors and school-rooms of the kindergarten, it is safe to say that they were amply satisfied, nor will it be denied that the occasion strikingly personified the felicific spirit which has been so potent a watchword of humanity in the past, and which, it is to be hoped, will predominate no less in the future. The dexterity and naiveté with which the children performed their work, giving samples of it in sloyd and sewing, and going through various kindergarten exercises, evoked an abundance of wondering appreciation from those who had come to familiarize themselves a little with the lives and labors of an unfortunate, but not unhappy, class. The opportunity was afforded, furthermore, to the great satisfaction of the guests, of coming in personal contact with

Tommy Stringer and Willie Robin, whose marvellous development and masterly grasp on the principles of an intelligent and useful existence completely won the admiration of all.

After a half-hour most profitably spent in this preliminary inspection, the visitors directed their steps to the main hall, where the regular exercises were to take place. Here, as in the pleasant rooms which they had just quitted, the audience felt quite at home, surrounded as they were with an atmosphere of bright welcome which beamed from the faces of the boys and girls picturesquely disposed on the platform at the end of the hall. As soon as the guests were comfortably seated, the exercises began. They were so uniformly original and attractive throughout as to hold the audience spell-bound and to elicit their warm admiration. Dr. Samuel Eliot, president of the corporation, occupied the chair, and in felicitous words opened the way for the first number on the programme, a Salute to Boston, played by the orchestra. The admirable command of the principles of ensemble playing displayed in the rendition of this selection was highly appreciated by the audience. Next, a song entitled Marjorie's Almanac was sung by the girls with commendable earnestness and expression. This was followed by a piano solo from Guy Jacobson, who showed a very good control of the instrument. The Dream March of the Children was a recitation participated in by Harry Rand and Frank Ransom, after which a song called My Shadow was rendered by the boys. Little Margaret Cobery then stepped forward, and with daintiness and precision executed a charming violin solo. A duet, having for its subject the Sweet Red Rose, was then sung by two little girls, Julia Perella and Anastasia Walsh. Following this came the address of the afternoon, by Dean Hodges of the Episcopal Theological School in Cambridge.

### ADDRESS OF REV. GEORGE HODGES, D.D.

My part in this programme is to say aloud the thoughts that are in all our hearts. It is as if in the middle of the sermon somebody were called up from the congregation to tell the preacher what he thought about it, and how much he was getting out of it. I would like to see that custom instituted, though perhaps in some other church than mine. It would be greatly to the edification of the preacher to learn the opinion of the congregation. We have a sermon here today, and the faces of the children preach it to us, and what we want to know is what we ought to think about it and say about it and do about it.

We all agree at the beginning that we are interested. No one has thus far passed upon this sermon the "silent criticism of sleep." We are all glad to be here, and feel that it is good to be here. The occasion illustrates that maxim of Dr. Howe, when he said that "obstacles are things to be overcome." It is a great thing for any institution to have about it the memory of a great name, to be pervaded with the spirit of a splendid personality. One of the fine things

about the Hampton Institute is the remembrance of the name and memory of General Armstrong, of the man who, after years of the most earnest, self-sacrificing labor, said, "I never made a sacrifice in my life." People who are engaged in that work go about with that thought in their hearts, and with the remembrance of that man in their minds. We cannot come into the presence of any of this great work here in Boston for the betterment of the blind without thinking of Dr. Howe. The day when he met Laura Bridgman in the parlor of the New England farmhouse and began to study that hard problem ought to be marked in red in the calendar of humanity. Obstacles are things to be overcome. The right use of stumbling-blocks is to pile them up for stepping-stones, whereof these children are witnesses. Here are repeated the miracles of the old gospel times, of which the Lord said that "the works that I do shall ye do also; and greater works than these." This is real Christianity, done in His name and in His spirit and by His grace.

I think, too, that we all realize that this is not only a wonderful place, but that it is a very happy place. We are impressed with the good spirits of the children. They seem to enjoy their life. They are in the midst of darkness, and are not afraid. Sometimes we have an idea that a great deal of opportunity is necessary in order to succeed; whereas history is all the time teaching us that it is not opportunity so much as the recognition of opportunity that makes success. Many people who seem to have had but a very small chance have made a great deal out of their lives. We have in our memories the names of men in science and in history who have made substantial contributions to knowledge, who through sickness have been able to give to their work only those parings and scraps of time which we throw away. We can hardly come here without getting a new lesson in the

value of our opportunities. We can hardly go back discontented with our lot, and feeling that we have to struggle on under very great disadvantages, when we see what is being done here by these children. Sometimes when privileges and blessings become fewer we appreciate them more. the most striking places in the New Testament is that time in the experience of St. Paul after he had been shipwrecked, when he was between the deep sea and the devil, and he met a little company of friends and "thanked God, and took courage." There were a great many people in the world at that time who had good reason for thanking God, and never thought of it. These little children seem to appreciate the blessings that are brought to them here, so that it is a pleasure for us to look at them. It is a blessed thing to give happiness to little children, and we ought not to go away without feeling that we have a direct responsibility ourselves in this matter of providing for the little children. The leading of a child out of darkness into light, the opening of blind eyes, is something that comes to us all as an opportunity. It is for us and our neighbors to provide for this institution and make it greater still. It is for everybody, then, who is here today, and is not already doing something for this institution, to help it in this way. might be many more children taught here, and we must make it possible. Money is used in so many foolish and unnecessary ways; some of it is thrown away, and other money might better be thrown away than used as it is, and it sometimes seems as though people were in perplexity as to what it was best to do with their money. It is a great thing to have such a sight as we see here today, and to know what money will do; to know that the money that some people spend for an elaborate dinner will take a child out of a miserable home and give it a place of light and happiness such as this. Is it not worth while to do it, to

open the eyes of the blind, to minister to those who sit in darkness and give them light?

Dean Hodges is always a forcible enunciator of common-sense principles and truths, a speaker who invariably says what he means and means what he says, and his words went straight to the hearts of his auditors, one and all.

After the address of Dean Hodges, the girls gave a recitation called *The Swallow*, and were followed by the boys in a song, *Down in the Grassy Meadow*. The next selection was a trio for the girls, entitled *Brother Robin*, and the programme concluded with a medley by the orchestra.

Dr. Eliot then arose and spoke as follows: —

#### CLOSING ADDRESS BY DR. SAMUEL ELIOT.

The children's exercises are over, and I will detain you but a very few moments while I do what I am asked to do in behalf of the work going on here. I am not pleading for the kindergarten without pleading for something besides the kindergarten. All education is bound in together, one part with another. We cannot possibly undertake the training of one class of children or of young people without involving the training of other children and other young people. We often hear of the influence of the higher education upon the lower, and there can be no question about it. The lower education would be sadly bereft of some of its best impressions if the higher education were not to speak to it and speak to it continually. But I think we can turn the case round and speak of the influence of the lower edu-

cation upon the higher. The education which is going on within these walls has a right to be respected by the very highest grade of education in this country or in any other. Could we carry through the schools, - primary schools, grammar schools, high schools, colleges and even theological schools, I venture to say, though I shrink from speaking of that too freely in this presence, - but could we carry through every grade of schools the childlike spirit which prevails here, there would be a true enrichment of our educational courses far above and beyond any introduction of Latin or algebra or what not which great educational authorities of our time are advocating as a means of elevating and gratifying the schools. Here in this place is the brightness which springs from children, and can spring only from children, and which, if carried on in its simplicity without a particle of affectation, without its being anything but a simple unconscious brightness, would transform every school in this country.

I read the other day a volume which interested me very much, — two volumes there are, in fact, on the Gurneys of Earlham. The Gurneys, as most of you know, were a great Quaker family, and one of them married a clergyman of the English Church, and was all the better for it. She was borne into a larger sphere, into a broader and brighter life by the influence of her husband, and when she was lying on her death bed her sister said of her: "Her mind's eye sees flowers everywhere." The mind's eye of any person here this afternoon sees flowers everywhere in this room, and will carry away the recollection of the flowers, and life will be brighter for every one of us because of what we have seen.

There is a great deal going on in this kindergarten which is not always taken account of. I have been looking over the report for the last year, not for the first time by any means, and I find we are carrying on industrial education in the broadest sense. We are educating boys in a most remarkable manner. Tommy Stringer has been educated to be a baker. He has been baking muffins, and as long as those mustins lasted he would not eat anything else in the way of bread food. Could any baker give a higher tribute than that to his own handiwork? He has been trained apparently as a plumber. He took off the upper part of a faucet when left to himself so that the water came in a moderate deluge, and he was able to restore the top of the faucet to its place. I do not know that we can do more in the way of industrial education than training our boys to become possible bakers and plumbers, for, if so, we are doing as much as is done in the Mechanics Art School in Boston or in other similar places that are opened nowadays. I do not wish, however, to limit your sympathies to such as Tommy Stringer. He and others like him are brought forward into great prominence in our reports, but the spirit of all these children is lovely. In this last report we read of a concert that was given by the kindergarten primary club, a home concert, and they earned five dollars by it. And what did they do with the five dollars? They brought it to their honored and beloved director and put it in the hands of Mr. Anagnos, and said: "Here is something that we have earned for the benefit of our schoolmates." I do not think we could do better than that in any school in the country. I am certainly not aware, and I have had a good deal of experience in different schools, that any boys or girls are doing better than that, - raising money with the simple resources at their command in order to help their little companions. God bless them every one for having done it. That is the spirit here, and that is something to be profoundly grateful for.

We have nearly reached the end of another year in the

kindergarten. These annual receptions of the ladies' auxiliary are landmarks. We have had many of them, and we cannot tell you the good things said and the good things done in all this time, but they all go to make the atmosphere which we breathe here richer, sweeter and purer every year, and so may it go on from year to year, each year witnessing to an increase of the best traditions which this or any other kindergarten can possibly gather and use for the benefit of all present or to come.

One change has come over us. I remember one figure. one face more prominent a year ago, that we shall see no more, Miss Cornelia C. Roeske, the teacher of music, blind herself, and therefore perhaps all the more deeply in sympathy with her pupils. She taught music here as few seeing teachers whom I have ever met have taught it, and we cannot but miss her today. We cannot listen to these vocal and instrumental exercises of the children, however well they are taught, however fully Miss Roeske's place has been filled, — we cannot listen to them without remembering her. "That shadow," as Mrs. Browning wrote, "the enfolder of her quiet eyelids," has been lifted forever. She sees where she is as she never saw here, and with the deepest reverence I venture to say that among the things she sees most clearly and most gratefully is the work she did in this place, the work which she has carried with her into the world to come.

We are very young in this kindergarten, and we have a great many wants. We cannot grow without being helped. We cannot open these doors, as Dean Hodges has said, without assistance from the outside. We must have, not only your sympathy, but your offerings. We must enlist all the influence you can bring to bear upon other people, so that this work may go forward. There are sixty-five children here, the largest number we ever gathered, and I

rejoice to add that our current expenses have been met during the year. This is very largely, indeed principally, due to the ladies' visiting committee, that has increased our annual subscribers. Thanks to them and other open-handed people who have helped us, we are coming to the end of our year without any deficit. But, my friends, we have a debt hanging over us, and we need your help to lift it. We have a debt of \$44,000, the interest of which is at least \$2,000 a year, and we want you to help us lift that. We want you to speak to others who have power to help us, for we need not only to wipe out our debt, but to spread more widely over this territory. Here is a ground set apart for the training of little blind children, and we must have your aid, we must have the aid of a great many besides you, in order that we may build on and on until every child that can be provided for on this ground is taken in. There are at this time children, boys and girls, who wait to come If we could but take them! I do not believe there is a heart among us but feels a certain twinge in thinking that there is a single child waiting for admission, and there is more than one, there are many more than one. Oh, help us do what we cannot do by ourselves. Come and enlarge. this enterprise and make the kindergarten for the blind coequal with the wants of little blind children. The exercises are now closed.

Among the audience that left the kindergarten that rainy day, there were some who thought that, although the sunny light of life may not shine on all through brightest panes of spacious windows in palace walls, yet not hopeless is the lot of those who, immured within the darkness of the dungeon, may, if they will, catch some

glimmering ray of sunshine piercing its way between prison bars to irradiate the gloom.

### DEPENDENCE UPON ANNUAL SUBSCRIPTIONS.

And so I know

That day is lost wherein I fail to lend

A helping hand to some suffering friend;

But if it show

A burden lightened by the cheer I sent.

Then do I hold the golden hours well spent,

And lay me down to sleep in sweet content.

-EDITH E. BRADT.

The loyal friends and generous supporters of the kindergarten are no longer confined to a small group; their number is legion. Their ranks have been filled up rapidly, so that they now form a large army of helpers, in which all classes of people, from the wealthiest to those possessed of very moderate means, are fully represented.

During the past year the proofs of the active interest which the community at large has taken in the education of the little sightless children have been numerous and very gratifying. None of our appeals for aid has failed to receive a generous response. The list of the regular contributors to our funds, instead of being shortened on account of the financial depression through which the country has lately passed, has been lengthened, while the forces of the promoters of our cause have made notable gains. On every side we have heard expressions of cordial sym-

pathy with our work, urging us to press forward, and substantial gifts, accompanied by joyful messages of encouragement, have gladdened our hearts. The amount of yearly subscriptions for current expenses has been increased from \$5,129 in 1895 to \$6,260.79 in 1896.

From this brief statement it will be seen that we have ample reason for thanksgiving and for rejoicing. The figures show plainly that not only the old friends of the cause of the little blind children have stood fast by it, but that new ones have been raised up in its behalf. It is through the liberality and ready assistance of all these that the holy work of the kindergarten has not been allowed to degenerate or to suffer any kind of deterioration for lack of sufficient means. As we look at the long list of the annual contributors, which is published in full in another part of this report, our joy and our feelings of gratitude are too deep for utterance.

But in order that the blessed ministrations of the infant institution may go on in their integrity without detriment or hindrance until a solid financial foundation has been secured by the completion of the endowment fund, an increase in the number of yearly contributors is indispensable. Indeed, there is no escape from our perplexities and no assurance of steady progress without it. Hence we are compelled to ask again for further assistance, for the continuance of the old subscribers and for the enlistment of new ones. Our plea is earnestly addressed to all benevolent and tender-hearted persons; but it is directed with especial emphasis to you, fathers and mothers, whose sons and daughters not only are in full possession of their faculties, but roll in affluence and enjoy all the advantages, comforts and pleasures which opulence can secure for them. Their lives are so ordered that their every conceivable physical want is instantly supplied to the full. The case of the little boys and girls for whom we bespeak your generosity is entirely different from that of all others.

These stricken lambs of the human flock are generally born in poverty and reared in the lap of misery. For them light, the "offspring of heaven," is extinct, and they live in a ceaseless night from the cradle to the grave. No human power can restore to their eyes the power of vision. The varying seasons return regularly with the rotation of the sun, but to them returns not—

Day, or the sweet approach of even and morn, Or sight of vernal bloom, or summer's rose, Or flocks, or herds, or human face divine.

They are enveloped by sullen clouds and everduring darkness, which "cut them off from the cheering ways of men." In a large number of cases they are neglected, unkempt, weak both in body and mind, averse to activity, and ignorant even of the simplest things that lie beyond the radius of their arms. If left to their fate, they are sure to degenerate through idleness, and to run the risk of falling victims to an intellectual blight which often approaches imbecility.

This picture, though extremely painful in every particular, is neither highly colored as a whole nor exaggerated in any of its details. It is true to nature, and gives a clear idea of the exact condition of these unfortunate tiny creatures.

But who are they? To whom do they belong? What do they want, and why should their call for aid be entitled to a fair consideration on the part of the community?

These unlucky children are members of the great human family; they are ours, flesh of our flesh, blood of our blood, and bones of our bones. Having been assigned by the cruel hand of fate to the chains of helplessness, they are in absolute need of your most cordial aid and of such advantages for mental and moral development as you are amply able to bestow upon them. From the depth of their grievous affliction, the effects of which are sadly stamped on their pale and wan faces, they plead touchingly with you their claim to your active sympathy and generous help and their birthright to a sound and broad education, which alone can save them from sinking into the pit of pauperism and distress and from being doomed to drag

out their doleful existence among the hopeless wrecks of mankind or in the midst of the dregs of society. They appeal to you piteously for nothing less than the very bread of life. Will you have the hardihood, instead of answering their petition favorably, to send them a stone? They cry mournfully unto you, begging you to deliver them from the perils of their environment and from the bonds of their misfortune. Can it be that their plaintive voice will fail to touch a responsive chord in your hearts?

I am aware that in advocating the cause of the education of my little sightless friends with unremitting fervor, and in striving to obtain sufficient means for their care and training and for the mitigation of some of the effects of their sore infirmity, I may appear too persistent in my efforts and inclined to press forward with too much eagerness and even with importunity; but it is impossible for me to keep silent or to be indifferent to their affecting entreaties. Their appeals are so pathetic and so powerful that they ring like bugle calls in my ears; and—

I cannot slight the gracious law

That makes a next-door sorrow mine,
Nor shun a sufferer's tears that draw

My heart with pity's cords divine.

In the sacred name of humanity, I beg of you, dear friends, to heed the plea of these hapless

children and to spread over them the mantle of your benevolence. For their sake, as well as for that of your own offspring, take a little of your time to ponder over their condition and to consider the ways and means by which it may be ameliorated. It would be monstrously selfish and merciless to shut your door to them and to turn a deaf ear to their sorrowful supplications, feeling that the picture of their sadness is entirely out of place in the gorgeous gallery of the domestic pleasures and social enjoyments which wealth supplies to you and yours. When you look with delight at your own lovely darlings and study how to enlarge their happiness and to vary their amusements, do not fail to listen to the prayers of the unfortunate little ones who live and move in total darkness and who have none of the joys that make your own home so cheery, so bright, so attractive and so glad. Pray do not slight the appeals made in their behalf, in order that you may turn your thoughts away from them; for by doing so you may smother the voice of your conscience, but you do not discharge your duty to your fellow men or to the community of which you are an honored member and in the midst of which your fortune has been amassed.

May we hope that, instead of throwing away this plea unnoticed, you will peruse it patiently, and that you will take such a warm interest in the cause of the little blind children as would be worthy of the descendants of the kind-hearted and liberal-minded men and women who made Massachusetts renowned all over the world for her philanthropy and proverbial generosity?

THE ENDOWMENT FUND IS NOT YET RAISED.

The sum of \$33,879 is needed for its completion.

But time passes; Year after year goes by and yet the work Is not completed.

-Longfellow.

The appeals for aid, which we have been obliged from time to time to address to the public, have met with good success. They have brought the various needs of the kindergarten to the notice of thousands of benevolent people, and have caused a fair number of them to take an active interest in the education of the little blind children and to become annual subscribers. Thus the immediate result of constant agitation has been a substantial increase in the receipts for current expenses, — a fact which is very encouraging, and affords us abundant reason for rejoicing as well as calling for the expression of our sense of profound gratitude to our kind helpers.

But mingling with the psalms of praise and of deep thankfulness for what has been achieved in

this direction there runs a strain of positive uneasiness and of biting anxiety about the future. We cannot overlook the fact that yearly contributions, most valuable as they are as temporary expedients, do not constitute an absolutely reliable source of income. In the natural order of things they are shifting and ephemeral rather than firm and permanent, and it would be lamentably unwise on our part to put full trust in them and to depend upon them forever. Therefore the only sure and safe way to carry on the work of the education of the little sightless children and to maintain it on its onward course is to complete the endowment. This alone is beyond the vicissitudes of circumstances and the caprices of fortune.

That the completion of this fund is indispensable to the life and development of the infant institution, there is no room for doubt or for discussion. Indeed, in the light of reason and experience it is no exaggeration to state, that an unfailing source of sufficient income to meet regularly all necessary demands is a sine quanon condition not merely of the growth of the little school but of its very existence. Only an adequate endowment, well invested and prudently managed, can meet regularly every liability, and, by being steadily at work day and night, rain or shine, it will continue to furnish the kindergarten with the motive power of its

progress and with the main stay of its perpetuity. There seems to be no safeguard equal to it, and until we obtain it we cannot possibly free ourselves from a feeling of insecurity nor from black visions of apprehension for the future. Moreover, without it the usefulness of the establishment will be most seriously impaired, and probably deterioration and decadence will gradually set in and do their worst. No educational enterprise can prosper and thrive by depending upon the fruits of spasmodic movements made in its behalf. However successful these may be at first, when the warmth of enthusiasm is still at its height and the newness of the undertaking is not yet worn off, they gradually become tiresome, undesirable and more and more distasteful to the community. Finally they lose their force, and cease to be effective.

Through the generous contributions of some of the stanchest friends of the little blind children the sum of \$11,446 has been added during the past year to the endowment fund, and the balance, which still remains to be raised for its completion, is \$33,879.

In order to obtain this amount and to secure thereby a deep and firm financial foundation for the kindergarten, we are again compelled to appeal to you, fair-minded men and tenderhearted women of Boston and of Massachusetts, with all the earnestness that we can command,

for further contributions. We implore you, for the sake of the tiny sightless boys and girls, as well as for blessings which such generosity will bring to you and to your own children, not to allow another period of twelve months to elapse without putting the capital on such a magnificent column as this endowment fund is. famous pyramids constructed by the ancient Egyptians in the valley of the Nile are unquestionably great and enduring works, which seem alike to be indifferent to age and to defy the effects of time; but those good people who shall consecrate a part of their wealth to rescue the innocent victims of one of the severest of human afflictions from the depths of misery and corruption, and to elevate them in the social and moral scale, shall build even greater and more lasting monuments than all the proudest piles of granite and of bronze.

# SUPREME NEED OF ADDITIONAL ROOM.

Give ample room and verge enough.

-GRAY.

The kindergarten buildings are again filled to overflowing and crowded to their utmost limit. There is not a nook or corner in them that has not been utilized. We have at present 64 children in attendance, while more than a dozen others are anxiously waiting opportunity to oc-

「Oct.

cupy any vacancies which may occur during the year.

When the two houses now in use were planned, each of them was calculated to provide room for 38 or 40 inmates, all told, and every one of the internal arrangements was made accordingly. Both health and safety demand that the maximum number shall not be exceeded; yet we have already gone beyond it. Circumstances have forced us to receive more little girls than we were warranted in doing by the extent of our accommodations; and, as there was not space enough to put more than two beds in each of the tiny sleeping chambers, we have had recourse to the mischievous practice of using cribs for the smallest children.

It was with profound regret that we were obliged to resort anew to such objectionable expedients; but we could not help it. It would take a heart of granite to postpone indefinitely the admission of a neglected child, and allow him to remain in the slums, and—

### Forever with corruption there to dwell

exposed to innumerable vile influences, which tend to stunt the body, to dwarf the mind, to poison the soul, and finally to permit evil propensities and vicious habits to become so strong and so firmly rooted as to render the task of their eradication later in life a Herculean one, if not entirely hopeless.

In view of this state of things, the problem of an increase of accommodations calls upon us at this time with commanding emphasis, and demands a prompt solution. For the sake of the blessed work which the kindergarten is doing with marvellous success for the salvation of the most afflicted class of little children and their emancipation from the bonds of one of the most grievous calamities in the lot of man, it is of the utmost importance that steps should be taken at once to answer the pressing question of providing additional room not only favorably but immediately.

Is it presuming too much upon the liberality and tender-heartedness of the wealthy members of our community to expect that a sufficient number among them will join hands on such an occasion as this, and contribute the whole amount which is required for the construction and equipment of two new buildings? Who will stir first, and take the lead in this matter? Who will come forward with a gift so generous as to induce others to follow his example and do likewise?

### DEATH OF FRIENDS OF THE KINDERGARTEN.

They throng the silence of the breast,
We see them as of yore,—
The kind, the true, the brave, the sweet,
Who walk with us no more.

- JOHN W. CHADWICK.

During the past two years death has made sad havor in the ranks of the warm friends and liberal supporters of the kindergarten. In the list of those who were taken away from us are included the names of the Hon. Leverett Saltonstall, Mr. George Washington Wales, Miss Helen Curtis Bradlee and Mrs. Ellen M. Baker.

These dear friends have been so constantly mindful of the welfare of the little sightless children, and so thoroughly devoted to the interests and success of the infant institution, that I cannot refrain from paying in my humble way a loving tribute to their memory and from giving utterance both to my sense of gratitude to them and to my high appreciation of their blessed lives.

Mr. Saltonstall was a noble example of the typical thoroughbred gentleman of New England. He was a man of the most incorruptible integrity and of the finest public spirit. He was tender as he was just, lovable as he was dignified, helpful as he was conscientious. His uprightness was as undeniable as his ability.

Kindness was the law of his life, truthfulness the foundation of his character, sympathy the root of his nature and benevolence the flower of his manhood. No truer, sincerer, more honest, more courageous, no more consistent man has lived in this community than Leverett Saltonstall. The following words of the poet are peculiarly fitting to him:—

How pure at heart and sound in head, With what divine affections bold.

Mr. George Washington Wales was a man of high social standing, of firm convictions, of fine taste and of genial disposition. His bearing was instinct with honor, and in his every gesture one might cspy manliness and veracity. Hospitality was the very essence of his nature; indeed, it was his grace and his attraction. Thoughtfulness and kindness, combined with strict integrity and with a high sense of duty, made him an important factor in the circles of society and usefulness in which he moved. Only those who had the opportunity of associating closely with him could know his worth, and these are bitterly grieved to feel that they hope no more for his hearty greeting, for the welcoming glance of his eye and the warm grasp of his hand and for the manifestation of his interest in their work. His manner was charming;

without being effusive, it was frank and cordial; while dignified, it was free and easy.

A simple but most appropriate funeral service was held over the remains in the beautiful library of his residence. Here the casket was imbedded in an abundance of exquisite floral tributes, which bespoke the affection and appreciation of his relatives and admirers; and to the multitude of friends, who stood sorrowfully about his bier, the following verses, written by one who knew Mr. Wales perfectly, were read by the minister:—

To pass through life, beloved as few are loved, To prove the joys of earth as few have proved, And still to keep thy soul's white robe unstained, Such is the victory which thou hast gained.

How few like thine the pilgrim feet that come Unworn, unwounded, to the heavenly home! No task to go, no anxious wish to stay, No childish terror of the unknown way.

Out of a life of holy thought and prayer, Yet full of human tenderness and care, Undimmed in lustre, and unchilled in love, Thy spirit passed to cloudless light above.

In the far north, where over frosts and gloom The midnight skies with rosy brightness bloom, There comes in all the year one day complete, Wherein the sunset and the sunshine meet.

So in the region of thy patient faith

No hour of darkness marked the approach of death,
But ere the quiet evening was withdrawn.

Fair flushed the light along the hills of dawn.

A legacy of five thousand dollars is the tangible proof of Mr. Wales' attachment to the kindergarten, with which his widow entertains an active sympathy equally as warm as his.

Like Dr. Andrew P. Peabody and Mr. John Sullivan Dwight, both Mr. Saltonstall and Mr. Wales took a profound interest in my work, and while I was in their presence, be the occasion or emergency what it might, I felt that I was surrounded by that charming and encouraging influence which radiates solely from genuine friendship and loving hearts.

Miss Helen Curtis Bradlee will be forever remembered as one of the most generous helpers of the kindergarten. The sum of her donations amounted in all to \$50,000. Of this sum, \$10,-000 were applied to the construction and equipment of the new buildings, and the remaining \$40,000 were invested, in accordance with her wishes, as a permanent fund. By these munificent gifts her name has been enrolled among those of the great benefactors of the blind, and the gratitude of generations of little sightless children has been secured to her. Although she was widely known through her large benefactions, and warmly praised, she was invariably clothed with charming humility. In her quiet and unostentatious way she set a most conspicuous example of genuine philanthropy, which gives

to wealth its largest dignity and lifts it to its highest uses. Hers was—

A soul that blossomed into deeds
With human good and human blessings fraught.

In the death of Mrs. ELLEN M. BAKER the kindergarten lost another of its best friends and constant helpers. Mrs. Baker possessed all that is lovely, gracious and virtuous, all that is praiseworthy and of good report in woman. Generous, gentle, benevolent, kind-hearted and unselfish, commanding the respect of all who knew her noble character and liberal disposition, she will be sincerely missed by many whose lives have been blessed by her friendship and thoughtful assistance. Of her deep interest in the amelioration of the condition of suffering humanity no better and more convincing testimony is needed than that afforded by her will, whereby the kindergarten, in company with three other beneficent institutions, has been made residuary legatee of her estate.

Peace be to her sweet memory!

It is hardly needful to say that, of the many blessings which have befallen the kindergarten, there was none greater and more highly valued than the friendship and devotion to it of a large number of noble benefactors, who will be forever remembered with love and gratitude, and among whom those above named hold a foremost place.

# GIFTS AND BEQUESTS.

Bearers of sunlight and gladness, Faithful in shadow and sadness— The path of the day is diviner Wherever their light may be.

-MARY MAPES DODGE.

The brightest pages of the annals of the kindergarten are those in which are recorded in the spirit of profound gratitude the gifts and deeds of the great benefactors of the little blind children.

The names that have been indelibly inscribed on the shining pages of this roll of honor during the past year are those of Mr. and Mrs. Royal W. Turner, late of Randolph; Mr. Benjamin Pierce Cheney; Mr. Albert Glover; Miss Sarah L. Marsh, late of Hingham; Mr. Moses Kimball, and Miss Betsy S. Wilder.

Mr. ROYAL W. TURNER was one of the earliest and warmest friends of the kindergarten. He died five years ago, and left to it a legacy of \$3,000, and also one-fourth of the residue of his estate, amounting to \$21,079.83, to be paid after the death of his widow. This event took place in June, 1895. Thus the total sum received from his legacies is \$24,079.83. In addition to this amount, his late widow, Mrs. Mary B. Turner, who never failed to show a cordial sympathy with the cause of the little sightless

children, bequeathed \$5,000 to the kindergarten, with a further provision in her will that one-fourth of the residue of her estate should go to it.

Mr. Benjamin Pierce Cheney, one of New England's typical business men, upright, clear-headed and far-sighted, contributed a large sum to the printing fund in 1882. Since that time his friendly interest in the education of the blind has been unabating, and it was finally crystallized in a legacy to the kindergarten of \$5,000, which his worthy son has already paid to our treasurer.

The dearest and most helpful of our older friends, Mr. Joseph B. Glover, gave to the kindergarten \$1,000 from the estate of his late brother, Mr. Albert Glover, this sum to be invested as a permanent fund in memory of the latter. From the same source we have also received in railway securities the amount of about \$1,840, which is to be kept invested forever under the name of the Glover Fund, and only its annual income is to be used for the benefit of children who are both blind and deaf.

Miss SARAH L. MARSH of blessed memory was for several years one of the regular contributors to the kindergarten, and at her death she bequeathed to it \$1,000. An equal amount has come to it from the executors of the estate of a noted citizen of Boston, the late Moses

KIMBALL, who was for a long period of time associated with Dr. Howe as a member of the state board of charities. The infant institution was also kindly remembered in the will of the late Miss Betsy S. WILDER by a bequest of \$500.

Moreover, the chorus of living friends and stanch supporters, who take a systematic and unfailing interest in the cause of the little blind children, and give to it annually, although somewhat smaller than formerly, still constitutes one of the firmest pillars of its support. During the past year it included such well-known philanthropists as Mrs. William Appleton, Miss Edith Rotch, Mrs. Annie B. Matthews, Miss Sarah M. Fay, Mrs. J. Huntington Wolcott, Mrs. William H. Slocum, Miss Eliza A. Haven of Portsmouth, N. H., Dr. J. Theodore Heard, Mrs. Mary E. Ferris, Miss M. E. Ferris and many others, who are mentioned in the list of acknowledgments.

The names of these benefactors are written in golden letters in the history of the kindergarten and deeply graved on the hearts of the blind. They will be praised and blessed for all time to come.

## WILLIE ELIZABETH ROBIN.

Beautiful as sweet!
And young as beautiful! and soft as young!
And gay as soft! and innocent as gay!

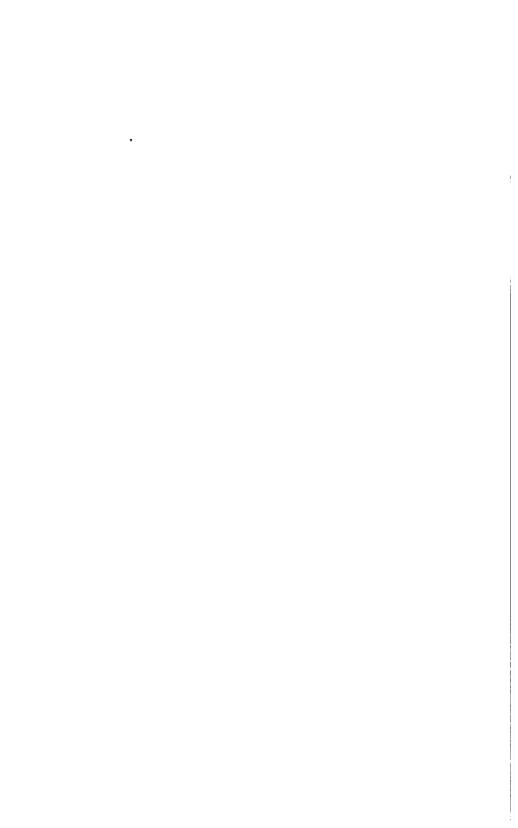

- Young.

The accounts of the education of this interesting girl have become so intimate a part of the history of the kindergarten that it is with keen regret that we realize that the chapter of her doings here recorded is the last one which will appear in the reports of the infant institu-The swift recurring months have borne tion. Willie out of the realm of childhood into that of youth. She is now past twelve years of age, and she has become a tall, comely, handsome girl, richly endowed with health and with rare graces both of mind and of body. The kindergarten has been her home for nearly six years, "six drops of time!" as Matthew Arnold puts it, - and what has been accomplished for Willie in this short period of time both by active effort and through the silent but potent influences which have surrounded her must be estimated as of no slight value. The atmosphere in which she has lived has been a healthy one, and her growth has been simple and natural, without the stimulus either of praise or of flattery. She is now fully prepared to take up the work in the institution at South Boston, to which she has

WILLIE ELIZABETH ROBIN.

been transferred, and to occupy a place of equal rank with other girls of her own age.

Some of the conditions under which Willie has been laboring during the past two years have not been favorable to marked achievements, but she has on the whole made steady progress. She has worked faithfully, and has won the love of those who have had to do with her by the admirable spirit with which she undertook to perform all the tasks assigned to her.

We have good reason to rejoice over the blessing of abundant health and exuberant spirits which Willie enjoys. In her case it may be said with perfect propriety, that a sound mind dwells in a vigorous body. In personal appearance she is as beautiful and as attractive as ever. Her face is a picture of loveliness, and bespeaks the true womanly nature which is gradually unfolding within her.

While the kindergarten sustains a positive loss in the withdrawal of Willie, she herself will be vastly benefited by her transfer to South Boston, where her intellectual development will meet with no check nor hindrance, nor will any adverse influence be suffered to affect the sweetness of her disposition and the purity of her moral nature. Her education will be carried on in the same sensible way as in the past, without notoriety or parade, and the fine characteristics which are so marked in her case will be culti-

[Oct.

vated with due care, so that they may yield rich fruitage.

Our kind and helpful friend, Miss Laura E. Poulsson, has placed us under renewed and lasting obligations by consenting, at my urgent request, to prepare a concise statement of Willie's education during the past twelve months. Poulsson has written these accounts for several years, and we were perfectly justified in expecting from her facile pen something at once clear, forcible, elegant and accurate, even to the minutest detail. It is needless to say that in the present instance, as on all former occasions, she has not disappointed us. As usual, she has spared no pains in doing her work in the best possible manner, and she has met with marked Her language is excellent, her style lucid and graceful and her narrative attractive. Both the incidents of Willie's life and the different phases of her training are charmingly and impressively presented by Miss Poulsson in the following pages.

The past year in Willie's education has been chiefly one of review, because, as was explained in the last report, it was necessary to prolong her stay at Jamaica Plain, owing to the lack of room at South Boston. It is gratifying to say, however, that this has not been altogether to Willie's disadvantage. In her various studies she has been enabled to go over the ground more thoroughly, and in all her work it is evident

that her mind has grown more mature. From each study as a centre there have been more and stronger radiations; and from a new centre, that of history, good beginnings have been made.

Willie entered upon the year's course with an eager desire to do well, and she has been, on the whole, faithful to her purpose. The sheaf of written work is much fuller and riper than that of last year's garnering. Much of it is the reproduction of what has been taught her in geography, zoölogy, history and biography, and is well expressed and written with sufficient ease to allow more amplification than was possible before.

As a beginning in the study of American history, she has been told stories of colonial days, and has written very readable accounts of The Boston Tea Party, The Indians, Indian Troubles, George Washington, Roger Williams, William Penn, Benjamin Franklin, The French and English, and a story of the Acadians which she calls Driven into Exile.

She is fond of this branch of study, but, like Edith Thomas, her imagination is most fired and her zeal for study most awakened by geography. Her reproductions of the geography lessons are extremely good, and the scope of subjects may be seen in the following list, which is a characteristic though not complete showing of what she has done: The Oceans (first in general and then in particular), Shores or Coasts, Rivers (in general, then several in particular), East and West Indies, Holland, Switzerland, Greenland, Volcanoes, Vesuvius, Japanese People, Forms of Water, Coal.

Willie delights in an atlas with raised maps which has been given to the kindergarten, although she has as yet only a confused idea of its power of representation. Feeling over the Pacific Ocean on the map, she wondered if whales were pictured swimming about in its waters for normal eyes to see; and when Texas, her native state, was presented to her touch, her heart was stirred and her mind was spurred into eager activity. In her imagination she was among home people and home surroundings again. Ten raised dots, representing the ten principal cities, at once took the form of life, and she cried out enthusiastically: "Oh, here are five people besides my father and mother and sisters and brother!" An indentation of the coast line marked the post-office, according to her fancy; "I used to go to the post-office," said Willie, to prove that she knew what she was talking about. As for the rough projections on the western side, meant for mountains, what were they but the rock house, -- that primitive home of her earliest childhood, about which so many of her dearest associations cluster, and where she lived closer to nature than she has ever done since! Ah, the rocks and the grass! Ah, the sweet, healthy rudenesses of that first farm life! With the discovery of the rock house, Willie's excitement and joy burst bounds. She was in class, but she grasped the hand of the little girl next to her, and said: "See! This is Texas, - my home!" Then, with the air of a landed proprietor on his private acres, she led the little girl all over Texas, so to speak, and pointed out what she thought were the principal places of interest.

It must be with a rueful sigh that the teacher draws

herself together to demolish all these happy imaginings; yet duty sternly enjoins it. The individual dots, even to that one which stands for Robbie, the little brother, must be metamorphosed into unknown and widely-separated cities. An inundation from the Gulf of Mexico must sweep over the familiar post-office and convert it into a big bay. And the rock house,—yes, the rock house also, with all its dear memories of domesticity, must swell into gigantic proportions and cleave itself into distant mountains and hills.

An Herculean task. Yet tenderness and skill effect it, preserving, in spite of all these transformations into the great and far, the child's precious sense of the personal and near.

Zoölogy has had its fair share of favor from Willie, in spite of the two newer claimants. She has written reviews of what she has learned about the Bat, Porcupine, Hedgehog, Frog, Crab, Butterfly, Spider, Scorpion, Fishes, and besides these a few reproductions of stories relating to animal life.

In reading she has gained greatly. She has read aloud regularly from the embossed page and has improved very much in smoothness and rapidity of utterance. Being less hampered by the medium, she has comprehended more clearly the subject-matter, and consequently has read with more interest and expression. Susan Coolidge would surely be glad to know of the delight which Willie, as one among her numerous girl readers, has taken in that charming story of What Katy Did.

Willie can now express herself in articulate speech with considerable freedom. She is fond of talking, and

is understood easily by all who habitually associate with her and to a greater extent than heretofore by friends not living at the kindergarten and by strangers. Some sounds cannot be uttered without a struggle, perfection ever fleeing ahead of attainment. The sound of g has presented much difficulty. Wearying of the correction of its pronunciation, Willie pleaded with her teacher for cessation of effort: "I have a way to say it and it is much easier than your way. Please let me say it my way."

Like the other girls, she learns poetry "by heart," and recites it. She does not learn it easily, but she has mastered during the past year, The Fringed Gentian, My Shadow, The Double Sunflower, The Legend of the Christmas Rose.

One day, when Willie showed particular marks of distaste for the study of the poem, her teacher remonstrated with her, and received the response which Willie was evidently gratified to give: "Oh, I hate poetry." On being reproved for the expression, she excused herself by saying: "But I read in a book about a little boy who said he hated geography, and I hate poetry."

In reading verse her attention has been drawn to the rhyme, and she generally answers correctly when asked to find rhymes for given words. Just before St. Valentine's day the other little girls were composing inscriptions for the valentines they were to send, and Willie was asked if she wished to do the same. With the modest statement, "I will try to write something like poetry," she set to work. "On one line I will write about the birds, and on the next about the

violets, and on the next about the snow." She wrote three valentines, one for each of her sisters and one for the little brother Robbie. There was a noticeable similarity in style and sentiment in these, as in the bulk of valentine effusions, but the one for her sister Bonnie was the best.

Soon the birds will be singing sweetly in the trees,
And violets will be waving in the breeze.

Soon the snow is falling,
And St. Valentine is out calling.

To show how well Willie can express herself at present, we give her own description of how she spent her twelfth birthday at the summer home of her faithful friends, Mr. and Mrs. Albert T. Whiting, at Hingham, and also a letter to a friend. Willie's handwriting, like that of the other blind children, is rectangular in character. Her manuscript is unmarred by corrections or mis-spelling, and is really handsome in appearance.

## ABOUT MY BIRTHDAY.

On the twelfth of July in the morning Mrs. Whiting came to my bedside and said: "What day is this?" Then I got up and dressed and went down to breakfast. After breakfast I said to Mrs. Whiting: "I will look around now."

I went to the sitting room and looked. Then I went to the parlor. Then I found some presents on the piano. I took them to Mrs. Whiting and opened them. It was a silver pin from Mr. Whiting and a dollar which a lady gave to me. Then I went to the kitchen and Maggie, the cook, gave me a cake of soap and a handkerchief from Nora. Later in the morning I had a caller. I forgot to tell you

that my mamma and brother and sisters came to see me! They were only pictures, but I played they were alive.

In the afternoon we drove to Downer Landing and we saw a little girl walking by with her mamma, and we took them in the carriage and drove them to their house.

Then we went home to have my birthday dinner. I had a cake; it was very nice.

This is the end of my birthday story.

JAMAICA PLAIN.

DEAR MR. BANERJI: Thank you very much for your letter you wrote to me. I was very glad to hear from you. I have your picture in my room and I am going to take it home Saturday to show to Mrs. Whiting.

I will be twelve years old the twelfth of July.

I like horses and cows, and some dogs that are nice. I like cats, but not wild ones, or wild animals.

I heard about India in geography. I studied about some of the countries.

I try to be good all the time.

Do you like sheep? My papa has a great many of them.

I have been on a ship once but never sailed on it. But I know a man who is a sailor. He sails on the "Enterprise."

I will give your regards to Mrs. Whiting.

Now I must close with much love.

From your little friend, WILLIE E. ROBIN.

In a note to Mr. Anagnos, Willie mentions having sent a letter in Braille to Edith Thomas, and says naïvely: "It was very nice, indeed. I learned to write Braille myself here, but last fall Miss Smith taught me how to begin it. Can you write Braille?"

Willie is inclined to be prompt about most things,

but not about letter writing. At one time a pencil that was "way up" (dull) turned her aside from the dutiful course of finishing a letter which she had commenced. Again, when she should have written a letter to her mother, it was put off with: "I am so busy now, I am afraid I can't;" but this was followed by a feeling of self-reproach so strong as to cause her to leave what she was deeply interested in and seek out her teacher, saying: "I always think a great deal of my mamma, and I love her a great deal and want to see her; but I will get ready to write after dinner."

Notwithstanding these epistolary shortcomings, which are really very slight, considering the amount of writing she is obliged to do, Willie has the punctilio of a Lord Chesterfield about letters of acknowledgment. Her sense of what is due from others as well as from herself in this respect was displayed rather comically in one instance. She had made a pair of slippers and sent them to a distant friend who had shown her many kindnesses. The non-arrival of the expected acknowledgment in what she thought an extremely ample interval of time brought forth a comment of wonder from Willie. Miss Smith suggested excuses for the delinquent friend. "But," insisted Willie, "she could write me just a postal and say

DEAR WILLIE: Thank you for the slippers. They fit me.
Your friend, Mrs. X.

She needn't write a long letter."

Willie's work in arithmetic this year has been principally in reduction of mixed numbers and general problems on the fundamental rules. She has done

very well indeed, but she has small liking for the study. It is only at the stern call of duty that her "ciphering" is done. When she wrote her last composition on Friedrich Froebel, she mentioned that he did not like school very much, but was fond of arithmetic. In the enumeration of his qualities and abilities, this strange, incomprehensible liking had evidently riveted her attention.

Willie has also done well in sloyd (sewing and knitting) and in gymnastics. Her health continues excellent, and she is the same lovely, attractive child that she has always been, in appearance and manners.

With the new school year a new epoch in Willie's life begins, for she starts upon a course at South Boston which will carry her into womanhood. In leaving the kindergarten at Jamaica Plain, where she has gained a development truly wonderful, and whose blessings she repays by a most faithful love, she has put away childish things and entered upon the period of youth. She is no longer the "big girl" among little children, but a beginner, one of the younger learners, in an atmosphere of higher knowledge. It is hoped that devoted and skilful teaching, much loving, and earnest, self-sacrificing effort may render her coming years happy and filled with high endeavor.

The kindergarten wishes her God-speed and the Perkins Institution receives her with its heartiest welcome. She will have the best that it can give.

Miss Vina C. Badger, a trained kindergartner, has been appointed special teacher to Willie, in place of Miss Marion G. Smith, and has entered

TOMMY STRINGER.

upon her duties with commendable zeal. For some time past Willie has been in need of an active and intelligent companion, an industrious helper, a conscientious instructor and a wise guide, and we have every reason to believe that in Miss Badger we have found just the person to meet these requirements.

## THOMAS STRINGER.

A form well-fashioned, strong and tall, A face all manliness.

- JOAQUIN MILLER.

The likeness of Tommy which is given in the opposite page shows clearly that the changes which have taken place in the condition of this remarkable child are very striking and that the rapidity of his physical and mental development is truly marvellous.

Five years ago the prospects of this hapless little boy were extremely gloomy. There seemed to be no hope of his deliverance from the double-walled prison of total darkness and mournful stillness. Born to poverty, he had no one who was able to undertake the task of providing the means for his education; and, as there was no suitable place in his native state where he could be received and have proper care, he was about to be irrevocably entombed in one of the almshouses of western Pennsylvania, where he would

no doubt have dragged out a miserable existence to the end of his days, vegetating stupidly and groping around aimlessly with his arms outstretched. Such a fate would have proved nothing less for him than a moral and spiritual death, which is immeasurably worse than mere physical dissolution.

Thanks to the thoughtfulness and humanity of the late William McCreery, president of the board of trustees of the Alleghany hospital near Pittsburg, Tommy was saved from this awful doom. He was brought to us, helpless as a baby, and wrapped in a blouse, by a kind nurse on the 8th of April, 1891, when he was just four years and nine months old.

At the time of his arrival in Boston the unfortunate child was nothing more than a mere mass of living, breathing clay; a helpless little animal, apparently without great intelligence, and not unlike a puppy in some of his instincts and characteristics; a sentient being in human form, disinherited of his human estate and devoid of the slightest idea of the world around him. No ray of light, no wave of sound, could reach him. Afflicted childhood could hardly present a more pitiable and hopeless wreck than he then was.

As soon as Tommy entered the kindergarten he was placed in charge of a special teacher, who devoted all her time to him, and the work of emancipating his mind and soul from their horrible incarceration began at once. His deliverance from the bondage of this death was the object kept constantly in view, and for its attainment different methods and processes were eagerly tried one after the other. Indeed, nothing was omitted which could by any possibility help to ransom the tiny captive of darkness and isolation, to kindle his intelligence, to rouse his energy and to remedy the dire effects of the savage ravages committed upon his senses by the cruel hand of fate.

Through the loving care and the rational training which Tommy has received under the genial roof of the kindergarten, he has undergone a radical transformation, which may be properly characterized as a sort of re-creation. From the puny, inert, languid, indolent, half-witted, unpromising little creature there has been evolved a fine boy, - bright, energetic, manly, instinct with life, erect in stature, innocent as a lamb, frolicsome as a kitten, full of fun and ingenuity, and not destitute even of a tendency to mischief. As a lily is free from the impurities that lie at its root, so has Tommy escaped the inheritance of any moral taint. Intelligence, affection, will-power, generosity, strict honesty, - all these qualities are very strong in him. He seems like another being, and his marvellous development bears living testimony to the efficiency and beneficence of the work of the kindergarten.

Tommy has always taken great delight in the use of tools, and this taste is turned to good account in the sloyd work, which he has just taken up under the instruction and supervision of Mr. Gustav Larsson. It does one good to see the readiness with which the dear boy grasps the idea of what is required of him, and the dexterity with which he executes his tasks. His delicate touch reveals to him at once the defects which a piece of work shows, or its complete finish, as the case may be. Manual training is bound to be henceforth an important factor in his education.

A detailed statement of how Tommy has been taught and of what he has accomplished during the past twelve months is herewith submitted. This account, written with scrupulous care by the same skilful pen which has performed a similar task in previous years, is admirable in every respect. It is in the main a résumé of the journals kept by the child's teachers. These contain a daily record of his progress, and are very creditable to the judgment and diligence of These materials were as usual his instructors. placed in the hands of our dear friend and willing helper, Miss Laura E. Poulsson, and from them she has winnowed a most interesting story, which is packed full of information, given in a fresh and attractive style, and in which there is not a dry sentence nor an incorrect nor a careless statement. Miss Poulsson has the happy faculty of grouping details effectively and of drawing a picture in true perspective, conveying to the reader a good idea of the tout ensemble. But more remarkable than this is the spirit of absolute veracity and of undeviating fairness in which she deals with her subject. No doubt her heart is flowing with sympathy; but this never leads her astray from the path of strict accuracy, nor does it tempt her to use in her descriptions any brighter colors than those warranted by the facts, or to pass unnoticed unfavorable incidents. On almost every one of these points there is a marked similarity between Miss Poulsson and Miss Frances S. Marrett, the writer of the annual accounts of Edith Thomas. Here is Miss Poulsson's charming narrative of Tommy's achievements and failures.

Tom's health having been unusually good this year, his school work has gone on almost without interruption, and excellent progress has been made.

READING AND ARTICULATION. — Although his reading and talking are done mostly through the use of the fingers, much effort is spent upon his articulation, and he can speak many words with tolerable clearness when he chooses to make the attempt. He is also exercised in reading from the lips. However, since he perceives as yet no advantage in oral speech, he has at best only a forced interest in it. Various means are devised to call out his powers in this direction.

[Oct.

In each morning talk he is required to articulate an original sentence, and repeat it until the other boys can understand what he says. An original sentence is also required as part of the articulation lesson. Some of these sentences were as follows:—

The steamboat is going jerk. Parker likes popcorn. The boys are march-[ing]. The pig is [has] sour milk. The ham is in the pig. Willie Robin is in the school-room. Do you want to go to the park? The acorns and boats and pond and wharf are in the park.

Some sentences that Tom volunteers are curiously mixed in their grammatical constructions; as: September has gone soon. Mrs. B. is going to coming. When he wanted the stopper taken out of a bottle, he said: Please give me it off.

Articulation is also de rigueur at table in asking for things to eat. There is often a strong contest between the desire for food and an aversion for articulate speech, and the pudding is still an important disciplinary ally when he has an attack of obstinacy at meal time. Its arrival will sometimes break up a severe congestion of speech which set in perhaps as early as the soup course, and Tom will then utter in his best pronunciation, and with amiable smile and tone, the belated request: "Please give me some soup?" following this up with prompt, well-uttered requests, calculated to produce the intervening dishes in time for him to despatch them and get a share of the coveted pudding.

Another way of inducing Tom to use articulate speech is by having him commit to memory some of the little poems which the other boys learn. Strange to say, he memorizes easily and remembers well. In

this way he has learned Good morning to the sunshine fair, Mrs. Pussy (from the Fingerplays), a Santa Claus song, also some verses about the Farmyard, which the children sang at the exercises in the Boston Theatre, and some others about Grasshopper Green, learned in connection with his zoölogy.

Tom's reading (by means of the fingers and not through articulation) has been in the Fifth Book, Fables for Children and Black Beauty. The first was an old friend. The second interested him greatly on account of the animal life depicted in it, and because it contained an index which he learned how to use. To find a title and page in the index, and then turn back and verify the reference, fascinated him for a long time. Black Beauty was his first story of any length, and he has taken much pleasure in it. day the substance of the preceding reading was talked over, and the continuity of the story thus preserved. The large size of the volume gave Tom quite a sense of importance in reading from it. After the novelty of this had worn off, however, and at some of the more difficult parts of the story, his attention flagged, and so one day, when he persisted in playing instead of attending to Black Beauty, his teacher exchanged that book for a small and easy one, requiring him to read the same little story over and over, until, from sheer disgust at the simplicity of the tale and its tiresome repetition, he was glad to plead for a return to Black Beauty. "Be good. Not read in baby book. No, no!"

Just before tea the kindergarten children are read to by the teachers, and Tom has had at this hour the ever fresh and delightful Seven Little Sisters. It impressed him more than his teacher realized at the time, as was shown by his references to the characters and facts afterwards in connection with experiences of his own. During the readings he often appeared exasperatingly stolid or inattentive.

Writing. — Tom is no fonder of writing than he formerly was, but he performs the task with better grace, his principal trouble being at present with articulate speech. The many little notes which he has to write under the pressure of winter work are models of brevity; but his letters, especially in the summer, when he has more leisure, are quite long and interesting. The handwriting is firm, neat and legible. Specimens of these letters are given later on, in connection with his Wrentham experiences.

MORNING TALKS. - These talks have covered a variety of subjects. The children had a box sent to them from Japan, and in examining its contents their interest naturally extended from rice and tea to other foods, so that that subject was pursued for some They enjoyed the tasting of spices, and had cinnamon, nutmeg, mace, pepper and ginger in the Carpenters' tools were introduced also, and talked of. These interested Tom greatly, as he was familiar with many of them. Zoölogical subjects had a share of attention; birds, in particular, - scratchers, waders, swimmers and perchers, - being examined and Flowers, trees, nuts and leaves had their studied. season also.

NATURAL SCIENCE. — Tom is very much interested in the realm of nature, and his lessons in zoology and

botany are supplemented to great advantage by the morning talks as well as by his own outdoor observations. The park in Jamaica Plain is his favorite resort. There he gathers acorns, catches tadpoles and learns about trees and many other things. One day while walking in the park he picked up some pine needles. These he carefully hoarded until he reached the kindergarten; then he sought out Mrs. Davidson, because the pine needles were "for the boys to see." A branch with leaf-buds upon it he gave to Miss Stratton, "to put in a vase," "to look pretty." He likes to measure the grass and feel of the buds on the trees and bushes. He must also know the names of the trees and bushes, their height, width and any peculiarity they possess; and this not idly, so as to be forgotten, but with true interest and zeal. Pine trees have an especial attraction for Tom. When at Wrentham in the summer he would spend two or three hours at a time wandering in a pine grove, trudging up hill and down, stopping occasionally to pick up a pine cone, and examining every tree with which he came in contact. He tried transplanting a "baby pine," which he pulled up and lugged home. Some tall weeds gathered on other solitary tramps were also transplanted; but they refused to thrive, although he put them in soft garden earth, carefully watered them, and tied them to stakes which he drove close beside them into the ground. In one of his walks on the farm with Miss Brown he asked for a leaf from each tree and bush which they passed. He was so familiar with them that he knew the kinds and their location. When he had collected a dozen

a book in which to put them. On returning to the house an old book was found; and then, seated on the floor, with leaves, book, pencil and writing board, Tom proceeded to put the leaves "gently" between the pages, writing the name of each at the top of its page. And this was the voluntary pastime of the dear little boy!

SAND AND CLAY MODELLING. - Tom's work in clay modelling has improved somewhat, but is still poor. It does not attract him in the least. But what he has enjoyed exceedingly is his introduction to geography through the medium of sand. First he made a plan of the kindergarten grounds, using toy houses to represent the buildings. Next came Centre street, with rows of shells for the stores and the small figure of a boy to make trips between the kindergarten and the stores. Tom tried to see how many different routes the boy could take back and forth, and named the streets traversed. The scope of representation was then enlarged to include all that he could give of Jamaica Plain, not omitting the beloved park. thing was well located, and it is Miss Conley's opinion that Tom could find his way all over Jamaics Plain if he had the confidence to go alone. this he started afresh and took a wider field. Plain, Roxbury, Boston and South Boston were represented in their relative positions, points of the compass located, and dwellings of friends set down. Next he made a plan of the town of Grafton, where he has friends and of which he has many pleasant memories. Then South Boston was again taken in hand, with the

1896.7

Perkins Institution, his friend Fred's house and several other well-known spots indicated. When reviewing the subject afterwards he remembered not only the general plan but the names of several of the streets.

As an introduction to the study of the divisions of land and water, he represented a corner of the Jamaica Plain Pond. Then a whole lake was made and its definition given. A river with its banks bordered by trees (geranium leaves) was made to flow into the lake. "The endless story" of the water, from clouds, rain, springs, streams, ocean, back to clouds again, was talked about, and also the qualities of water and its service in daily life. To study the forms of land, mountains were ranged along one side of the sand box, with the sea washing their base. Then islands were formed in the sea, and shell boats, wafted by paper sails, cruised about among them. When the boats touched shore the passengers disembarked and climbed the mountains and walked through the valleys. later lessons additional forms of land were introduced, - capes, isthmuses, peninsulas, etc., - and a lighthouse put on one of the islands. Definitions accompanied all these; but how could definitions be hard to learn under such circumstances? Tom considers geography a fine new game.

The sand box was brought into requisition to vivify one of the descriptive parts of Black Beauty, and Tom took real delight in portraying the scene as he read: "The first place that I can well remember was a large, pleasant meadow, with a pond of clear water in it. Some shady trees leaned over it, and rushes and water-lilies grew at the deep end. Over the hedge on one

side we looked into a ploughed field, and on the other we looked over a gate at our master's house which stood by the roadside. At the top of the meadow was a grove of fir trees, and at the bottom a running brook overhung by a steep bank."

ARITIMETIC. — This study is Tom's strong point. His work on the type slate consists of writing numbers, adding, subtracting and multiplying by two figures. In calculating without the slate he is very clever. When asked to add a series of numbers, such as 7 + 6 + 5 + 3 + 4 + 9 + 1, the answer, 35, is given as soon as the last number has been spelled. He also subtracts in a series like 40 - 3 - 7 - 12 - 2 - 6 - 4, very readily. For variety a Colburn's mental arithmetic was given him, so that he could read some of the easier questions and answer them. He was much amused at the simplicity of "George has 3 cents and Joseph has 4; how many have both together?"

SLOYD. — Tom has always liked the kindergarten sloyd, and this year he took especial delight in the Christmas presents which he made in class. He tried to get as much extra time as possible for the work by hurrying from the gymnastic class and making an expeditious toilet for dinner, so that he could eke out a spare half hour to spend in the sloyd room after the morning session. His work showed no little skill and neatness.

GYMNASTICS.—In the daily gymnastic hour Tom spends half of the time doing the regular exercises of the class; but during the other half a course of medical gymnastic treatment, prescribed by Dr. Brackett, is followed. This has had most beneficial

effects. His hollow chest has been filled out, his general bearing is more free and active, and his whole appearance gives evidence of a fine state of health, with the natural accompaniment of happy spirits. His only illness during the entire year was a slight attack of mumps in June. This caused him to be kept in bed for about a week, during which time he was a most cheerful and playful invalid.

GENERAL CHARACTERISTICS. — Tom's disposition, good qualities and faults cannot be better illustrated than by recounting, as usual, some of the sayings and doings jotted down by Miss Conley and Miss Brown in their note-books of the past year concerning him. Generally speaking, he is a little fellow of a very happy disposition, though of course the lights and shadows play over his spirit, as they do with other mortals; but the lights predominate.

One day, as he was walking with his teacher, he skipped along so gaily by her side that she said to him: "Are you happy?" "Yes, Tom is fun!" was the laughing reply.

He can always find a way out of a difficulty, either by comical repartee or clever contrivance of some sort. When he sat at the dinner table all bent over, Miss Conley asked him, with the expectation that he would immediately straighten up: "Are you an old man?" Unwithered by the sarcasm, and maintaining the same drooping attitude, Tom imperturbably replied: "Yes. Grandpa!"

If the road in which they are walking is bordered by a stone wall, Tom likes to follow it with his hand; and when Miss Conley objected to this proceeding, on the ground that the edge of a new coat sleeve would get worn by it, Tom in a twinkling had the sleeve pulled up to his elbow well out of the way, and turned to her with a confident air, as if to say: "Oh! I can fix that easily enough."

When starting out on another walk Tom displayed a funny little freak of imitation. He appeared equipped in his hat and coat, but with a handkerchief folded diagonally and tied around his hat so that one corner hung down over his face, completely covering it. "Why, what is this for?" asked Miss Conley. "Veil, like Toad" (one of the teachers), was the reply. "But boys do not wear veils," said Miss Conley. Upon which, Tom, determined not to be outdone, assumed the feminine rôle and declared himself a girl. But he very obediently removed the veil when assured that the weather was not such as to demand its use.

In the snowy weather, but when the ground was only sparsely covered, he hinted strongly that "Fly" and "Toad" ought to draw him to the park on his sled. When it was explained to him how fatiguing this would be, because the roads were so poorly covered with snow and he was such a big, heavy boy, he yielded without a murmur. But later on he used the same argument while trying to shorten a wearisome articulation lesson, slipping down from his teacher's lap with the quiet remark: "Tom is too heavy."

Having come to class one day without a handkerchief, he was sent to his own room to get it. As his absence was quite prolonged, Miss Conley went to see what he was doing, and found him seated on the floor, with one hand presumably searching for a handkerchief in an upper bureau drawer while the other examined his playthings, in a much more interested manner, in the drawer beneath. When he felt Miss Conley's step, he immediately found the handkerchief and was ready to go down to the school-room.

Being found in too close proximity to an ash-barrel, which he was desirous of investigating, he was told to go and play in the sun. Whereupon, wishing to hold his position, he squeezed his eyes up tightly, whipped out his handkerchief and pressed it to them, remonstrating: "Sun, no! Sun, no!"

Tom's sway is acknowledged by all the other boys, and on the playground he rules them with a rod of iron. If his authority is defied, superior force brings the rebel to quick subjection. The boys are very fond of him, - proof that he is a kindly autocrat, and will endure any indignity rather than complain and thus "get Tom into trouble," as they express it. He extends his supervision of their manners and wellbeing within doors also in some cases. In making a trip around the dining-room to dispense some candy which had been presented to him, he laid a piece on each boy's plate and then quickly clapped his hand upon the boy's mouth to see whether the proper "thank you" was forthcoming. If the boy were slower than Tom thought suitable in saying it, Tom gave him a suggestive shake to hasten matters. Tom always enjoys sharing his good things with other people, and would unhesitatingly give away the last piece in the

dish, going without himself, rather than have any other boy left out.

A consideration for the comfort of others is one of Tom's good qualities, and it is shown in many little ways. One day, when Miss Conley was writing in her room, Tom saw that a footstool would be a convenience, so he got one and put it under her feet.

Miss Conley turned her ankle on a stone while they were out walking. "Dog? Hurt?" inquired Tom, remembering an experience of his own when a dog ran against him. Then he remarked: "I am sorry."

On a spring-like day, when winter clothes first began to be burdensome, Tom felt very warm during his walk, and realized that spring was at hand. "Fly" (Miss Conley) "will put on small coat and straw hat soon?" he asked on his return.

Going to visit at Miss Conley's home, he greeted the several members of the family in different ways; evidently having standards of his own by which to gauge the degree of ceremony. "Grandpa is old," he said, before greeting the eldest member of the household; "sick; gently, gently," and there was no jumping into his lap or attempting to engage in rough play, as with some of the others.

Again, on a visit to the same place, one of the gentlemen had gone to his room to rest, and Tom wanted to follow and have a romp. To Miss Conley's "no," Tom replied firmly: "Yes, go." But when told that his friend was very tired and needed to rest, Tom sat down with a sweet little "yes; be still," took his book and did not once again tease to go.

Tom has a warm heart, and is an ardent lover of his friends. Each return from Wrentham has been of late followed by a fit of homesickness, his depression of spirits ending in a quiet cry after he has gone to bed. A reference to Wrentham, and the suggestion that Miss Brown's family might not desire the presence of a little boy who would not work and behave well, has helped him out of a naughty frame of mind when nothing else would seem to avail. At a most discouraging articulation lesson, in which he persisted in giving all sounds but the correct ones, - those which he did give being accompanied by a snarling whine and cross expression of countenance, -Miss Greeley happened in, and remonstratingly said that if he did not try to talk and work better, Mr. Brown might not like him to come to Wrentham in the summer. This, in addition to the deprivation of pudding for dinner, induced him to improve. Meeting Miss Brown in the hall shortly after the lesson, he made many promises of good behavior, and began to rehearse some of the words he had refused to utter before. They were then said so plainly that any one could have understood him.

At another time, when he had been openly rebellious during the evening reading, Miss Conley said: "Miss Brown and Parker will not love a little boy who does not mind." This acted like magic, and he instantly obeyed. After reading for some time, Miss Conley took a look at Tom, and was surprised to see big tears rolling down his cheeks. With a sob, he spelled "Parker, Parker; bad boy, not mind." Still again at the supper table his eyes filled, and in answer

to the question, "what is the matter?" came "Parker, Parker!" The fear of losing the affection of his beloved friend was still pursuing him.

When at Wrentham Tom was left alone with Mr. Brown one evening, and, though told twice to go to bed, he began to play with his buttons in the closet. Mr. Brown then led him to the stairs and sent him up to his room. In the morning Miss Brown reminded Tom that he had been told twice to go to bed the night before, and had not gone. By the look which came over his face, Miss Brown instantly saw that he had not comprehended the command, owing to Mr. Brown's lack of practice in speaking with his fingers; and she was still later reassured in her opinion by his going voluntarily to Mr. Brown and spelling: "I am sorry."

Tom is still devoted to his schoolmates, Lyman and Fred, and when he went over to South Boston on Washington's birthday he was overjoyed at meeting the boys who had been promoted from the kindergarten to the parent institution, among them Fred. During the exercises in the boys' department he was told that Fred was in the hall. Fred present and not with him was a thing scarcely to be endured, and every few minutes his little voice would ring out: "Fred! Fred!"

He took part in the operetta at the girls' department, and sat at the top of a step-ladder, apparently among the branches of a pine tree, whittling. He handled the knife so carefully that no one could fear that he would hurt himself. Willie Robin and he were near each other in the operetta, but there were such indications of a romp that it was thought best to separate them.

For little Homer, the five-year-old child at the kindergarten, afflicted like himself, Tom evinces a protective care, seeming to understand his helplessness. Homer possesses a fascination for him, and Tom likes to be with him and find out what he is doing. He followed him into the dining-room once at supper time, and seated himself to follow Homer's movements. After asking what Homer was eating, he took the fork and began to feed him, conducting the food from the plate to the mouth of the wondering child with an accuracy which was remarkable. Homer could scarcely have rebelled had he wished to do so, for Tom held his neck in a vise-like grasp with one hand while he fed him with the other.

At another time Tom was walking in the hall with Homer. He seemed to feel that the entire charge of the child rested upon his shoulders, and after a time wearied of the responsibility. Hearing the sound as of some one mounting the stairs, Miss Conley and Miss Shaver hurried into the hall and there saw the pair already half way up the steps. It is an exceedingly slow and wearisome task for even the teachers to pilot Homer from one floor to another, but Tom was marching him over the ground at a lively pace, yet with the utmost care, shielding him so effectually with his arms that he could not possibly fall. On the way to Homer's room the top of another stairway had to be passed. Tom placed himself between Homer and the dangerous point, and when the desired room was reached, he opened the door and put Homer inside, and, with a look of relief, quickly shut it. Then for a few minutes he stood with his nose pressed against the crack

of the door, to see if Homer would endeavor to come out. Satisfied at length that he had gained a legitimate relief from his self-imposed responsibility, he went down-stairs to his play.

Again, when Tom was trying to amuse Homer, he gave him his button box. Finding Homer entirely unappreciative, Tom selected some of his own prime favorites and fairly forced them into Homer's hand, determined that he should notice them. Then, as the button box was at hand, Tom went to Miss Conley and asked for a needle and thread, and had soon replaced a lost button on his blouse by a large brass one which he had chosen from the box. It was fastened securely when he had finished, but the stitches were rather conspicuous.

Tom requires much patience and invention on the part of his teachers in the matter of discipline. If ruses and dallying can shorten work or enliven a lesson hour, Tom is ever ready to employ them. One of his devices was to measure off a stint for himself at the beginning of a reading or sloyd lesson,—an exceedingly small stint,—and then say "bell," meaning that that amount was what he would accomplish by the time the bell rang. And it was next to impossible to get him to do more at those times. Being required to finish a larger amount after class finally cured that, however.

Tom's disinclination to apply himself was manifested so strongly in his articulation lesson one day that his teacher finally told him he would have to be denied pudding for dinner. This simple punishment is quite an affliction to Tom, and he set about trying to find 1896.7

out some way of escape. So he decided to deprive himself of his daily walk, as a preferable loss. When sent to the dressing-room to get ready, he went, but was heard to articulate: "Go to walk? No! Bad boy!" and when asked to make haste, he again asserted that no walk should be taken on account of his ill-behavior, but that he was to "have pudding." He seemed thoroughly disgusted when at last he perceived that he was not to be allowed to arrange matters to suit himself. At dinner he folded his napkin before the dessert was brought in, remarking philosophically: "Pudding Wednesday. I will be good." But he could not resist slipping his hand over to Miss Conley's place as he left, to see if he could find out what it was that he had lost.

As a result of the good time he had had during one of the short holidays, Tom was very tired, and consequently there were a few days of fractiousness in which he was exceedingly hard to manage. Finally, as a means of inducing him to think and mend his evil ways, Miss Conley omitted her usual bedtime visit to his room for one evening. He had no sweet familiar talk and good-night kiss. The next day there was some improvement; not enough, however, to make him feel that he might not miss the same thing a second time, which he could not bear to do. So, while sitting in her room, as the boys were preparing to go to bed, Miss Conley heard a pattering in the hall, and, looking up, saw Tom, barefooted and ready for bed, knocking at her door. Bidden to enter, he went to her and threw his arms around her neck, saying: "Good-night, Fly. Tomorrow, Wednesday, be good."

Once in reading class he was very naughty and troublesome, and at last his teacher said she feared she should give him no sauce for supper. This edict sobered him considerably, and his behavior for the rest of the lesson was as exemplary as could be desired. When the class was dismissed Tom waited; then, taking his stand directly in front of Miss Conley, drew himself up as straight as a ramrod and said in exceedingly proper and ingratiating manner: "Do you see the corn?" Nothing had been said about corn in the lesson, but Tom thought he could not fail to make a good impression if he offered some well-articulated and unexpected remark. Then he inquired insinuatingly: "Sauce for supper?" Miss Conley could not resist his little stratagem, and asked: "Will you be good tomorrow if I forgive you today?" to which Tom responded "yes," and the threatened punishment was remitted.

Now that Tom has a larger vocabulary and can understand the explanations made to him by his teacher, the obstinacy, which was heretofore such an obstacle to his progress, is much less easily aroused, and when it does appear is more readily subdued than formerly.

During the early stages of his education he would often behave like a balky horse, refusing for no apparent reason to go on with what he was doing. His interest in his studies is now so lively as to prevent any behavior of this sort, and, as has been already shown, he is willing to attempt self-discipline and self-improvement in response to his teacher's suggestions. He needs to be ruled with a firm but gentle hand, and

this has been very happily accomplished. Certainly there is no lack of love and sympathy in his associations or in the treatment which he receives.

With regard to general observation he is much more wide-awake than heretofore. He asks about people and things as he rides in the cars, takes walks, etc. A few instances may give an idea of his development in this respect. Walking along one of the streets in Jamaica Plain and pointing to the right, he said: "What is it?" "There is a house, with pretty flowers around it and grass and trees in front, and there are some tall pine trees." "High?" asked Tom. "Yes, very high." In a moment came the inquiry, "store?" "Yes, there is a store." "Candy?" "No. Peaches and tomatoes, etc.," and so on until home was reached. He is interested in the names of streets, the kinds of fences, the fastenings of doors and windows, and occasionally the people in the cars. The questions "who?" "what is it?" "what for?" are heard a hundred times a day. At the public exercises in the Boston Theatre he was full of inquiry as soon as he was seated, asking about the vibration caused by the band and many other questions concerning his surroundings.

Tom possesses the virtue of neatness in a marked degree. After he has worn his best clothes, he will, upon going to bed, hang them neatly in the closet and place his school suit on the chair with his underclothing. He does not forget a single article. Even the best stockings are removed and the every-day pair put in their place.

After undressing on Friday night, previous to his bath, he puts his soiled clothes in the laundry bag

and takes his clean clothes out from the drawer, ready for use in the morning.

When Miss Conley goes away on Sunday he sits at table by Miss Greeley; but after tea he carries his bib around to his usual place, goes to the closet and gets Miss Conley's napkin and puts that at her place, knowing she will be there to use it in the morning.

Some of Tom's amusements, when he is left to his own resources, are of a simple but unexpected kind. He was found going about with his hands full of clean handkerchiefs, putting one in the pocket of each blouse, coat and pair of trousers belonging to him, going upstairs and down, that none might be overlooked. He intended to be ready "in season and out of season."

The wave of destructive mischief which swept over Tom last year has completely subsided, and his superfluous energies now confine themselves to more legitimate channels. He continues to be truthful,—thoroughly truthful,—as he has always been; and shows the same generosity as ever,—loving to give even when it costs self-denial and work. Altogether, he is a most charming and noble child.

Among Tom's Christmas presents was a new trunk, which gave him the liveliest satisfaction. He was at once eager to commence packing it. "New trunk, for Wrentham, in July," was a frequent topic for conversation from that time forward; and, although the trunk was put up in the trunk-room until needed, Tom tied up little boxfuls of toys, etc., at intervals, so that they might be in readiness when the liberty of depositing in the trunk was accorded. At Easter some children came to see Tom, bringing with them a generous

gift, and he endeavored to entertain them. He showed his room and all his playthings, and was then asked to take his visitors up to the hall where the singing class was assembled. But when the hall was reached, instead of going directly to the seats, he led the children into the trunk-room, and, taking the hand of each child, placed it first on the trunk and then upon himself, that they might distinctly understand the trunk to be "Tom's." When the last child had seen it, he proceeded to conduct them to the singing class.

June 26 found Tom in Wrentham, at the house of the Rev. William L. Brown, where he has passed several previous summers. It has become to him the dearest of homes, where he has what Jean Paul Richter considers requisite for the human chicken, i.e., "happiness for warmth," and a play-room in which his powers may shoot up of themselves, that play-room being, in Tom's case, nothing less than a whole farm over which he may roam almost at will, with freedom of barn, tool shop, kitchen and cellar; of all of which he takes fond advantage. He began his summer campaign by carrying out a plan directly in line with some of his winter school work. The conception was a magnificent one. He would make an ocean, —a deep ocean, of real salt water. So he dragged a large dry-goods box from the shop to the road, where he covered the bottom with a quantity of sand before continuing his way to the house. When the box was safely settled on the porch, a few shells were carefully deposited on the sandy bottom, a quantity of salt then added, and finally pailful after pailful of water was pumped and poured in, and the ocean was complete. Fortunately

[Oct.

for Tom the box was comparatively water-tight, so that only an occasional pailful was needed to keep it up to high-water mark. Tom tested its saltness by tasting, sailed boats on it, and played at bathing in it all day long. Through the night the ocean ran dry, and, though Tom paid it a few visits the next day, there was no attempt at refilling it.

Some of his out-door feats seem almost impossible of accomplishment by any child of his years; but Tom is as careful as he is daring, and can be trusted to follow out his bold desires with impunity. One of his exploits, for instance, was the investigation of the roof of Mr. Brown's house, to which he mounted by the aid of a ten-foot ladder managed entirely by himself. first dragged the ladder to the porch; then, after repeated failures, he succeeded in raising it to the roof of the porch. The next step was to test the security of its position by vigorous shakings. When the ladder was firmly settled, up he climbed with the agility of a squirrel, explored the roof, measured it with his arms, and then came down to perform the same operation a second and third time at different places where the roof sloped low enough for him to reach it. He was shown how to raise the ladder by placing one end against the house and with it so braced to raise the other end. Finding this method more convenient than his own, he adopted it ever after.

Another ambitious scheme which he conceived was to stretch a string across from the shed roof to the top of a pine tree. No permission or assistance was asked; but with his string and one of his ninepins he mounted to the skylight of the shed roof. Tying the

ninepin to one end of the string, he fastened the other end firmly to the iron brace of the window. Going downstairs, he took out the ladder and set it against the pine tree; then, picking up the ninepin with the string attached, he mounted the ladder, climbed the tree and finally made the cord fast, after stretching it taut. His end achieved, he presented himself, in great glee, to the family, eager to have them inspect his work, and apparently gratified to escape the reproof which he thought he might possibly receive. After that quite a network of cords was put up from tree to tree or from posts and different parts of buildings. One long cord, stretching from the henhouse to a post, had its middle point connected with an apple tree by a second string. This, Tom said, was "a big T." One heavy rope was carried to the roof of the henhouse and made to run from one ventilator to another. Some of the strings were low enough for Tom to use as guides. He stated that they were "to walk by, to find" this or that.

A favorite fancy of the summer was the driving of stakes or poles into the ground. When the stake was short enough for him to strike its top, the matter was very simple; but with six-foot poles it was another affair entirely. Tom solicited no aid, but worked the pole down into the ground as far as possible, and then, if there were a fork or notch where he could strike a few blows with his mallet he did so, after which he would surround the pole closely with a miniature stockade driven deeply into the ground, thus making it secure enough for his purpose.

Late one afternoon Tom took upon himself the re-

sponsibility of attending to the cows. He let down the pasture bars, allowing the cows to get into the barn-yard and enter the barn. For some time there was much speculation as to the doer of the deed, especially as one of the cows was properly fastened in her stall with the chain around her neck.

The prolific apple season has been enjoyed by Tom, and has given him plenty of self-imposed employment. He is really helpful in many ways about the farm and house, because he realizes the necessity of what is to be done, and is systematic and persevering.

Fitting himself out with a bushel basket and little cart, he goes to the trees, loads his basket, and returns to the shed to pick them over, sorting out the largest and finest "for pies" and leaving the rest "for the pigs." He enjoys feeling the apples over to ascertain their size, quality, etc., even if he does not undertake to sort them. Finding a limb broken by its weight of apples, Tom said: "Poor tree. I am sorry the tree is broken."

Such tasks as filling the woodbox Tom often takes charge of voluntarily, always piling it far above the top of the box, so that his work will not soon need repetition. After a time he felt that the woodbox then in use was too small and too much battered to serve any longer, so he removed it and put a larger one in its place. He then filled the new box, packing the sticks of wood nicely until the pile was as high as his head. Another box was provided and stocked with torn and crushed paper, and a third with old shingles which he had broken up into kindlings.

A prominent feature of Wrentham life, in Tom's

estimation, is playing on the wharf and in a boat. He has been allowed to amuse himself in that way, as the water is very shallow around the wharf and the boat is kept tied. But he has become so much more venturesome that Miss Brown was loth to trust him this year, and temporized a little by saying at first that she was too busy to go to the wharf with him. At last she gave her consent, and Tom was happy. Her qualms were justified to some extent, however, although nothing alarming happened, for when Tom had tired of being near shore, he pushed off in quest of novelty. Paddling along a little, he discovered lily pads, whereupon he stretched himself out in the bow and pulled at them. In the mean time the boat got aground, and Miss Brown had to go to the rescue and pull the boat back to the shore for him. Tom resented the interference, and said he "only went to pick lilies."

Tom enjoys anything that produces a jar or vibration. A few days before the Fourth of July he filled his cart with stones, each several pounds in weight,—as large as he could lift,—and brought them to the porch. In a short time he was amusing himself by rolling and throwing them down upon the boards. At first it was done cautiously, but an ominous crash soon told that he was carrying his play too far. A couple of the hardwood boards were already broken, and before his arm could be arrested, down came another stone with a tremendous thud, splintering another board.

Boy as he is, Tom's virtues shine out within doors. He takes an interest in all that is going on, and can be trusted to do errands very nicely. He knows the ingredients which enter into cookies and other cakes, white bread and brown, and described the process of making these so accurately to Miss Conley from what he had learned at Mrs. Brown's that she thought he would be almost as competent a cook as herself. When he returned to the kindergarten in the beginning of the school year, after having seen the harvesting in Wrentham, he asked: "Cellar soon? May I go to the cellar soon?" "What do you want to see in the cellar?" "Squash, turnips, beets, apples," and then referring to Wrentham, said: "Garden all gone. Pulled up. Lima beans are upstairs in the shop. Cabbages, turnips, beets, etc., are in the cellar."

In the rôle of host Tom might be surpassed as to actual success, but his intentions are certainly of the best. A little boy came to spend the day with him at Wrentham. Although it happened to be cloudy, Tom brought out an umbrella "to keep the sun off Howard." A piece of candy was shared with his visitor, and then, feeling thirsty himself, he got a brimming dipperful of water for Howard. At dinner his solicitude for his guest's welfare was very evident; and throughout the day everything was done with the idea of pleasing the little visitor. There was an hour in the boat, rides on loads of hay, an exploration of the garden and the climbing of apple trees, and both little boys were very happy.

When Tom lost any of his playthings at Wrentham, he used to go to Miss Brown and communicate the fact, and then spell to himself: "Find it; find it," at the same time pushing his own back with his hand to start himself on the search. One night a hair brush which had been seen in Tom's possession was missing,

and he was questioned as to its whereabouts. Tom wrinkled his brows in deep thought, held Miss Brown's hand tightly and said: "Think!" tapping his forehead at the same time. But, think and search as he might, the brush was not to be found. When told that it was bedtime, he protested: "No! no! Wait and find the brush." He was very earnest, and at length his efforts were rewarded. Taking Miss Brown triumphantly to the hiding place, he recovered the brush, spelling to himself: "Find it fast." He was vexed with himself for forgetting; but, the brush being found and put in its proper place, he went cheerfully to bed.

Having seen some bean bags, Tom got the idea of having a bean pillow. So he asked for some cloth and had one made containing two quarts of beans. This he used for a fortnight instead of a feather pillow. He liked to smell of it and talk about its size, etc. One night Miss Brown found it on the floor under his bed, and for several nights afterwards in the same place. No request came for any other pillow, but when Miss Brown tried putting the plump feather one back again, Tom accepted it with meek and silent gratitude.

For a few weeks in the summer Tom had much to say about an imaginary personage whom he called "Mr. Gas," telling wonderful things that he said and had. Miss Brown asked him to write down what he knew of Mr. Gas, which he readily agreed to do, producing the following:—

Mr. Gas has a big pond and a very large merry music box. His house has a big chimney and fifteen windows

「Oct.

and two stairs. Mr. Gas has four carriages and a sled for winter. In the barn is one horse and eleven cows and four calves and much hay. Mr. Son milks the cows. Under the house is a cellar.

Mr. Gas is twenty-nine years old. He lives in New Garden, Bedford.

This phase of imagination lasted but a short time, and Mr. Gas exists no more; but he was very interesting to Tom as long as he did exist.

About two weeks before Tom was to return to the kindergarten he began to sort his playthings and pack away those he wished to leave behind. He used much judgment in separating the rubbish from what was still good. All inflammable articles which he discarded were taken to the stove; pieces of metal were "for away;" a neatly packed box of things was put in a closet for the winter, and a small table which he had played with all summer was turned upside down in the shop. As Tom said: "Where is small table? Down, in shop, to sleep. Small table is tired. Down to rest in winter."

One night, after Tom was in bed, Miss Brown heard him calling gently: "Please come, Miss Brown," so she went to his room and found him sobbing quietly. At once he began a rapid talk, telling how sorry he was for having misbehaved twice in July, it being then near the end of that month. "July is sorry. Be good in church in August. Mind at dinner and supper. No cream puffs and cake in July [meaning at that special dinner and supper]. July 26 is sorry. Will be good in August. September, be still in school. Fly must teach. Will be good in school."

In the letters given below some of the names of the animals bestowed by Tom upon the kindergarten household early last year appear. These letters are Tom's longest and were written with great interest on his part.

WRENTHAM, July 28.

DEAR TOAD: —I am going to Providence and to the ocean with Miss Brown Wednesday or Thursday. We will ride in the electric cars and steamboat. I have a new apron to play in. I have thirteen bottles. I have a big box of soft and hard pine cones to burn, and a big box for the cat or kittens or big cat. Miss Brown sends love. With a kiss,

Goodbye, Tom.

WRENTHAM, August 18, 1896.

DEAR MRS. DAVIDSON: — I picked up sour and sweet apples in my cart for the pig to eat. I climb up in the trees. Fred is here. Willie Swift wrote a letter to me. He has ten chickens with the mother hen and two rabbits. Toad sent me a pair of overalls. Miss Brown is going to hem the legs and sew two buttons on the pockets to keep things from falling out.

Goodbye, Tom.

Miss Stratton, the "Toad" of the letter, had been impressed by a certain style of garment, in vogue in the west, which seemed an ideal play suit for small boys. It is seen in some of our eastern villages also, and consists of a pair of overalls made of the stoutest washable material, extending almost to the neck, with short straps over the shoulders, capacious pockets, and fastenings so few and simple that any child can manage them, and so strong that no mother has to trouble herself about keeping them in order. A pair of these overalls, with one simple little undergarment, would

be the ideal costume for the small citizen of a free republic during the hot weather of our summer season; but then nothing so sensible and comfortable with ever be generally adopted. Tom knew a good thing, however, when he came by it, and for two weeks and more, during a protracted hot spell, he all but slept in them. Fond as he is of clean clothes, he hardly wished to do without the overalls long enough to have them washed.

The idea of shortening the legs of the overalls was Tom's own; also that of putting buttons on the Even these improvements did not bring pockets. them quite up to the acme of perfection, however: for Tom soon asked Miss Brown to utilize the cloth which she had cut off from the bottom of the legs in making laps for the pockets. These, buttoned securely, rendered the pockets absolutely safe. had by this time learned to climb trees to a considerable height, going as high as the limbs would sustain his weight, trying each one carefully as he approached the top. Maple, elm, apple and oak trees have been climbed, and even when the trunks were large and without limbs for ten feet or more from the ground, he has made undaunted efforts and succeeded. were an impediment to this boyish sport, and the overalls came just in the nick of time for Tom, and were therefore hailed with special delight.

WRENTHAM, August 21, 18%.

DEAR FLY: —I saw a dog with a curly tail at Mrs. Dimond's house yesterday. His name is Milo. He ent-candy and has a harness instead of a collar.

Milo is very fat but he can sit up. Toad sent me some

overalls. Miss Brown and I went to Providence, and we went down the river on a steamboat to the ocean. With love, Goodbye, Tom.

This story is indeed a remarkable one, and it is hard to overrate the value of the lessons taught by it. The life and achievements of its little hero may well serve as a source of inspiration and encouragement to the young people who may read it, but most especially to those who for lack of natural endowments are not classed among the favorites of fortune. to these and to their teachers Tommy has set an example well worthy of imitation, and has afforded a convincing proof that a great deal can be accomplished by earnest effort and judicious training, even under most unpromising and distressing conditions. He has done more than He has exerted a wholesome missionary influence over the authorities of the western Pennsylvania school for the blind in Pittsburg. These gentlemen have given ample evidence that they have already experienced a welcome change of heart, by announcing officially in their last annual report, that they will soon "be in a position to care for all such utterly helpless children," and that they have not had "the least desire to impose upon others a work that they should do themselves."

This solemn declaration is a cause for thankfulness and rejoicing. The new course adopted

by the managers of the institution at Pittsburg will unquestionably bring solace and relief to many an afflicted household in Pennsylvania and release many a child from the bonds of misfortune. But however helpful and advantageous it may be to others, it is too late for poor Tommy to benefit by the new régime. There is no substantial aid coming to him either from the school, which is located not very far from his birthplace, or from the citizens of his native State. Now and for many years to come he will have to depend chiefly upon the liberality of his kind friends and supporters in Boston and vicinity, who contribute annually the amount necessary for his education, and whose names appear at the end of this report. These and all others who may be disposed to join them in taking an active interest in the unfortunate child are respectfully requested to peruse the following words, with which Miss Poulsson closed her account of Tommy for the year previous to the last and which form a better and more forceful plea in his behalf than any that I can write:—

"It is 'a far cry' from the Tommy Stringer of today and four years ago, when he was first brought to the kindergarten for the blind. He came a poor, helpless baby, without sight, hearing or speech. Now, what a change! Sight and hearing are still lacking (alas! the pity of it!), but how many are the mitigations of his lot, and how great the intelligence and

DARKNESS.

Tom Stringer the day he arrived, scarcely able to walk and totally helpless, although nearly five years of age.

The Tom Stringer of to-day.

activity which have been awakened. Once almost forsaken, he has now a home in hundreds of cherishing hearts. Having no wherewithal for food, clothing and shelter, these have been provided by gracious givers from far and near. Unwilling at first to venture a groping footstep, he now roams the farm at Wrentham, delights in his sled after a snow-storm, and is even able to follow the class directions in gymnastics, a feat more difficult than the free movement of play. Mentally inert in those early days, so that he seemed but barely within the pale separating himself from the lower creatures, how capable has his mind now become! If we call upon the three R's and their associates in mental discipline to attest his cleverness, they do so in the pages of these reports; and the ingeniousness of his lively pranks bears the same witness. Who does not cry joy! joy! over a fellowbeing thus redeemed? and who does not earnestly wish that this redemption should go on? As in former years, Tom's only dependence is upon the sympathetic hearts and bounty-dropping hands of those who 'rejoice they are allied with THAT which doth provide.' He can never render adequate thanks to his good friends and helpers. Child-like, he is as yet unconscious of any burden of obligation. But there are those who can say from a full heart what he cannot say for himself: 'Thanks for the many bounties of Tommy Stringer's past, and blessings on his future and all concerned in it."

All which is respectfully submitted by

MICHAEL ANAGNOS.

### REPORT OF THE MATRON.

To Mr. M. Anagnos, Director.

Sir:—I herewith submit the following report for the year ending August 31, 1896:—

At the completion of a decade of active work, it seems a fitting time to pause and look back upon what the kindergarten has accomplished and the prosperity which it has enjoyed during this period.

The little group of ten boys and girls who were gathered under our roof on May-day, 1887, has increased in number to so great an extent that since that time more than one hundred and fifty children have shared in the privileges of this "child garden." New buildings have been erected which have furnished sufficient room for the enlargement of the work, and every provision consistent with the scheme has been made for its full development.

The harmonious and perfect whole as it now stands shows the wisdom of each step which has been taken in building up the kindergarten. A primary course of instruction has been established. Sloyd, as applied to knitting and sewing, has been introduced. A well-equipped music department has been developed, while provision was made at an early hour in the history of the kindergarten for regular and systematic physi-

cal training. The only limit ever set upon the work has been the requirements of little blind children, and their special needs have been consulted with the utmost care in all that has been done.

No small degree of satisfaction is felt in the reflection that these scores of hapless children have been enveloped during the most impressible years of their lives in an atmosphere so sunny, so cheerful and homelike that the sad affliction on account of which they are gathered here has been robbed of its poignancy, and the ameliorated condition of their existence has made it easy to give direction to thought and feeling and action.

What good does the kindergarten do? This inquiry is made not infrequently, and it has occurred to me that the views which the children themselves hold of the usefulness of the institution and of the benefit which they derive from it might be accepted as answering the question both wisely and well.

One little boy wrote: "The kindergarten has made us good boys, and I think the kindergarten is best for blind children. I shall be sorry to leave it. I wish all the blind children could come here. The best thing I like to do is to work with the blocks, to weave and paste and sew. The blocks teach me to build, the sewing to use my fingers carefully. The kindergarten is making us good men. I hope I will go out of the kindergarten a good boy. I am glad to be here. I am ten years old, and I have been here three years."

Another wrote: "I came to the kindergarten when I was five. Think it has done a great deal of good for me. I will always remember it. I like building

with blocks. It teaches us to be careful. We have lessons about different kinds of roofs and bridges. I like to make things in clay. We learn about animals and birds, where they live and what they live on."

A third boy says: "The kindergarten teaches me to be kind and gentle, loving and truthful and obedient. I am glad Mr. Anagnos thought about it. When I am a man I am going to try and help it all I can."

The following letter, which was dictated by one of the classes and sent to the children of Miss KoKa's kindergarten in Herashimin, Japan, gives general details of our daily life in the children's own words. Miss KoKa received her training as kindergartner in Boston, and she came to us for a short time to observe the work.

Jamaica Plain, January 17, 1896.

DEAR LITTLE CHILDREN: — It was very kind of you to send us such a nice box of things. We enjoyed looking at them. We thought the shoes very queer but we suppose if you came to this country you would find our shoes queer. We do not see how you can eat with the chopsticks. We are very sure we could not. We thought your sewing was beautifully done. One of the boys called the girls' shoes "a shell" and the chopsticks he thought were pencils. We think the lunch bags you have are different from ours. Ours take more room.

We have good sleighing and good fun with our sleds. We have a long coast to slide down and the sleds go very fast.

We are learning a finger play called "making butter" and we are going to make real butter in the spring when we can get cream.

We will tell you some of the games we play. We have the miller, the coach, the doves, fly little birds, the dancing game, the wheelwright, still palm, Jack Frost, and come take a little partner, and the blacksmith and many others.

Do you play these games? Do you like them? We do. Some of the children are learning to play on the piano and some on the violin.

We wish you would come and see us and we would like to go to Japan for we think it is a beautiful country.

We all thank you for sending the pretty things.

We send you a great deal of love.

We are just going to supper. Would you like to know what we are going to have? Bread and butter, crackers and milk, and cakes. Then, after supper, we play until the bell rings. Then we go to our rooms and undress. We have two little beds in each room, a bureau, two chairs.

Good-night from your friends at the kindergarten.

The year which has just been brought to a close has been a fruitful one from every point of view, and the work which has been carried on from day to day during these months shows the same careful and earnest effort to implant true kindergarten principles which has marked all our earlier undertakings.

Our well-equipped gymnasium supplies all necessary facilities for physical education, and the system which has been adopted here is followed with conscientious and intelligent care, and in a manner both regular and systematic. Many cases could be cited to show how weak and even distorted and imperfectly developed bodies have become symmetrical and strong through the agency of suitable exercises.

Sloyd, as applied to knitting and sewing, holds a foremost place among the educational factors of the kindergarten. It is not too much to say that it is

found to be an indispensable adjunct to the system of training, and there is no part of the work in which the children take a deeper interest or in which they feel greater pride and delight. The industry and skill of the classes in sloyd is shown by the large number of articles which have been made both by the boys and by the girls. Two dozen knitted articles were selected from the quantity of those produced, and they were sent to Mrs. Laura E. Richards, Gardiner, Me. Mrs. Richards held a fair at her home in June last for the benefit of the kindergarten, and these articles found ready sale.

Music is thoroughly identified with the life of the kindergarten. The finger plays, the songs and games are selected with a view to the work in hand, and they never fail to meet with hearty enthusiasm from the children. The beautiful mother songs of Froebel, Stevenson's Song of my Shadow, and Eugene Field's delightful and tender poems are special favorites with the children. Last year forty-two pupils received instruction on the pianoforte, — nineteen girls and twenty-three boys, — and four on the violin. Singing classes meet daily for both boys and girls. The work of the kinder orchestra has been carried on with regular practice and systematic instruction.

At the beginning of the new school year, September 18, sixteen pupils were transferred to the parent school at South Boston. The places left vacant by these children have already been filled, and sixty-four names now appear on our list.

The record of the health of the children for the entire year is an excellent one. No case of severe ill-

ness has occurred, nor has any epidemic made its appearance. Dr. Henry W. Broughton has rendered service to the kindergarten without compensation during the ten years of its existence, and we desire here to make grateful acknowledgment both of the interest which he has shown in the children and of the kind aid which he has given them. Our thanks are also due to Dr. E. G. Brackett for his advice in the use of medical gymnastics and for his treatment of some special cases of deformity which existed.

The members of the Ladies' Visiting Committee have as usual continued to show an active interest in all that concerns the kindergarten, and we feel indebted to each and to all of them for many kind words of advice and of sympathy.

Three children whose progress the community has watched with great interest began to receive regular instruction in the kindergarten.

EDITH THOMAS, in some respects the most gifted of the three, entered here in October of the opening year and remained with us until February, 1890, at which time she was transferred to the parent institution at South Boston.

WILLIE ELIZABETH ROBIN was admitted to the kindergarten in December, 1890. She was then six and a half years old. She is one of the pupils who were transferred to South Boston at the beginning of the new school year. For nearly six years her life here has been a slow, happy, healthful awakening of dormant powers,—an unfolding which it has been a pleasure to watch. She enters on the more exacting work which will be required of her in the school-room with

[Oct.

the surest passport to improvement,—a good mental capacity and perfect physical health. She will be greatly missed from our households, where she has endeared herself to every member.

To Tommy Stringer the kindergarten is both home and school. It has sheltered him for a period of five years, which means in reality the sum of his conscious existence, since he has no memory of time or place which is not connected with the kindergarten. goes away from here occasionally on a brief visit, and he spends the long summer vacation in the village of Wrentham; but he always comes back to the kindergarten and its familiar surroundings with delight. His friends, his books, his toys are here, and he resumes his acquaintance with them all, and even takes up his work again with every evidence of satisfaction and even of joy. He has now his own personal friends, for whose companionship he shows decided preference. During the year he has entered into correspondence with a few boys, and he has seemed to derive much pleasure from the new experience. The following letter from a boy of his own age interested him greatly: -

SOUTH NEWBURY, April 2, 1896.

DEAR TOM STRINGER: —I thought I would write a few lines to you ever since I read about you in the New England Magazine. I live on a farm in Ohio. My name is Lewis Chapman. My only pets are a dog, a cat and a doll. I have no brothers nor sisters so I have to go to school all alone. I go across the fields and through the woods and sometimes the snow is over my boot tops. I am going to send you some maple sugar cakes. My father makes maple sugar. I have five trees of my own that I play make sugar

with. I wish you could come and play with me. I am nine years old and take the Youth's Companion and St. Nicholas.

My love to yourself and teacher, E. Lewis Chapman, South Newbury, Georgia County, Ohio.

Tom replied as follows:—

DEAR LEWIS: — I thank you for the maple sugar. I have a horse and cart to play with. I have a tool box and a sled. I like to play in the snow. Jack Frost has gone now. I like to play with boys. Goodbye, Tom Stringer.

Tom is often the recipient of beautiful toys and of presents of various other kinds, but nothing ever gave him so much pleasure as the trunk which was presented to him last Christmas. His name was put on the top, and, as the letters were formed with brassheaded nails, he was able to make them out with his fingers, much to his delight. The trunk was given to him by the boys belonging to Mr. Louis Holman's Sunday-school class at the Clarendon street church, Boston. Tom spent many hours over the trunk, and day after day he would use his leisure time in tying up parcels of toys and putting them away in this wonderful trunk, preparatory to the trip to Wrentham when summer should come.

His work during the year has been in the line of object lessons, nature study, constructive exercises in arithmetic and in geography. He has read a part of Black Beauty and the Readers, in line type, up to the fifth book. He is now reading The Child's World.

He has become familiar with a number of places of interest in the city. During the year he has visited

the Old South Church, the State House, the Youth's Companion building. He takes great pleasure in boating on the river and in sailing down the harbor. His visits to the beaches are a source of great delight, as they afford him the opportunity to fill his pockets with pebbles, star-fishes, anemones and hosts of treasures dear to the heart of a boy. In the spring season he asks to go to the fields, where he finds the early flowers; and in the autumn to visit the woods, where nut trees abound. He climbs the trees in a manner which shows his strength and fearlessness, and all the time his mental activity keeps pace with the quickness of his movements and eager questions about all that he investigates come in rapid succession.

It is a pleasure to make a grateful acknowledgment of gifts and favors received during the year, and to allude briefly to the kind friends who bear in mind the needs of the children of the kindergarten.

Miss Alice Longfellow invited a class of boys and girls to visit her home in Cambridge.

The Young Ladies Missionary Society of Concord, N. H., have furnished clothing for Willie Elizabeth Robin for four years.

Dr. E. G. Brackett has generously given some valuable gymnastic apparatus.

The Sunday-school children of the Unitarian church at Chestnut Hill paid the board of a little girl through the summer vacation, and Miss E. M. Hibbard provided for the board of one of the boys during the summer vacation and for his clothes. A supply of clothing was received from Mrs. Prescott Bigelow, Mrs. Hibbard, Newton, Mrs. G. F. McNeil, Mrs. George von Meyer, and the Misses Ware.

Our collection of mounted specimens has received a number of additions: Miss Laura Norcross sent a horned toad; Miss E. M. Hibbard, a mackerel gull; Mrs. Samuel Weld, Wellesley, a woodpecker, an oriole and a scarlet tanager; Miss Slocum, Jamaica Plain, a guinea pig and a hen; Mr. Frank Lowe a sheldrake; the children of the Gore kindergarten in East Cambridge, through Mrs. Berthold, the principal, a heron and a raccoon.

We are indebted to Mr. John M. Rodocanachi for a supply of figs and dates; to Mrs. William H. Slocum for twelve barrels of apples, for many pears and for a quantity of vegetables; to Mr. Thomas A. Watson of Weymouth for five barrels of apples; to Mr. David Rice of Jamaica Plain for four barrels of apples; to Mrs. J. Cobery of Providence, R. I., for a garden settee and a quantity of fruit. We have also received fruit from Mrs. C. E. Goodwin, Augusta, Me.; from Mrs. Frank B. Allen, Longmeadow, Mass.; from Mrs. Sherman, Westport, Mass.; and from Mrs. Palmer and Mrs. S. Anderson, Wollaston Heights.

The children received Christmas and Easter remembrances from Mrs. E. Preble Motley, Mrs. John C. Gray, Miss Olga E. Gardner, Miss Caroline L. Glover and Mrs. Cutter.

Mrs. John Lord of Lawrence, Mass., sent ten dollars to be expended for Christmas gifts.

Easter gifts of potted plants and flowers were received from the Unitarian Sunday-school at Jamaica Plain.

A music box given by Mr. Samuel D. Robbins of Belmont, Mass., has been a source of pleasure to all; while the boys were made happy by a rocking-horse, which was sent to them by Mrs. H. S. Spaulding of West Newton, Mass.

Mrs. Quincy A. Shaw sent a gift of flowers. She has also kindly furnished building blocks and twenty-four jumping ropes. Mr. Herbert Stevens of Southborough has given

d.

4.

...

g) (1)

[Oct.

two boxes of building blocks, and a friend has sent us a model of a bicycle.

Through the kindness of Miss Nina Rhoades the children were treated to ice cream. Miss Rhoades gave five dollars for this purpose.

Our library has been enriched by the addition of the following books: Jungle Book, by Kipling, Our Boys in Japan, Our Boys in China and Young American Abroad, from Miss Olga E. Gardner; Captain January, from Miss Freeborn; the Birds' Christmas Carol, from Mrs. A. A. Ballou, Detroit, Mich.; Song Echoes (two copies), from Miss H. S. Jenks and Mrs. Mabel Rust.

We received tickets for Mr. Heinrich's concert from Miss Terry, and six tickets to the People's Temple entertainment from the committee.

The publishers of the Jamaica Plain News (weekly) and of the Youth's Companion have each kindly furnished the kindergarten with their papers throughout the year.

We are indebted to Mr. W. T. Ellis for a copy of the *Junior Golden Rule*; to Mrs. A. O. Swift of Waquoit for complete volumes of the *Pansy* for the years 1894, 1895 and 1896; and to Mr. W. Hamilton for newspapers.

The boys' primary club has added seven dollars to the sum which was already on hand, and the entire amount has been expended in the purchase of a picture which is to hang on the walls of the kindergarten in memory of Miss Cornelia C. Roeske. An engraving of *The Child Handel* was selected for the club, as expressing the idea of the boys that the picture should be that of a child and that it should relate to music.

If our sanguine desires in regard to this work for the sightless children are realized less rapidly than we could hope or wish, still we never fail to be cheered and encouraged by the ready response given to our appeals for help whenever special cases of misery are brought to the notice of the benevolent friends who have been so genuinely interested in the progress of the kindergarten. We trust that this new account of what is done to alleviate the sufferings of innocent children and to set their lives on a higher plane both physically and morally will stimulate to greater activity in our behalf the efforts of all who believe in the just claim of the blind to a sound education.

Respectfully,

ISABEL GREELEY.

#### LIST OF THE CHILDREN.

In addition to the above amount we have received from a friend two hundred thirty-four dollars and twenty-two cents, to make up the deficit in the account of the previous year.

Further contributions will be thankfully received and gratefully acknowledged by

MICHAEL ANAGNOS, Trustee.

## Commonwealth of Massachusetts.

### TRUSTEES' REPORT.

MASSACHUSETTS SCHOOL FOR THE FEEBLE-MINDED, WALTHAM, Oct. 8, 1896.

To the Corporation, His Excellency the Governor, the Legislature, the State Board of Education and the State Board of Lunacy and Charity.

The trustees have the honor to submit their annual report for the year ending Sept. 30, 1896.

There are now in the school 425 inmates, feeble-minded persons of all descriptions. Of these, 181 are supported by the Commonwealth in the school department and 37 in the custodial department. The towns and cities are charged for the support of 155 in the custodial department. There are 34 private pupils, of whom 5 pay more than the average cost of maintenance and instruction, 12 pay the average cost of maintenance and instruction and 8 pay about one-half the average cost. There are 27 beneficiaries of other States, who pay each about \$300 per year.

The average number for the year has been: males, 248; females, 168; total, 416. There have been 164 applications for admission, but of these only 22 could be received.

The current expenses for the year have amounted to \$70,761.98, or \$3.25 per week for each inmate. The expense per capita has slightly increased, being \$3.25 per week for each inmate, whereas it was only \$3.15 per week for the preceding year. Till now the weekly expense per inmate since the removal from South Boston has been gradually decreasing from \$3.47 in 1890 to \$3.15 last year. At South Boston the cost was considerably greater. For instance, it was \$3.89 in 1886 and \$4.19 in 1887. It is to be observed

that the gradual decrease in expense corresponds with the gradual increase in numbers. The increase in expense this year has been largely owing to a visitation of scarlet-fever. The disease made its appearance at the very beginning of the school year, and it was not until May that it disappeared. Otherwise the health of the inmates has been good.

In our last annual report we stated that it was highly desirable to separate the larger boys and grown men from the school department, and that for that end a new dormitory was needed; and we also said that there was need of a new building for the grown feeble-minded women. Later, soon after the Legislature convened, we made application for a grant of \$60,000 to be applied to the erection of two new buildings for the accommodation of 150 additional persons. This sum was voted on conditions that appear in the resolve approved April 27, 1896, reading as follows:—

Resolved, That there be allowed and paid out of the treasury of the Commonwealth a sum not exceeding sixty thousand dollars, to be expended at the Massachusetts School for the Feeble-Minded at Waltham under the direction of the trustees of said institution, for the purpose of erecting two new buildings, in accordance with the recommendations contained in the forty-eighth annual report of the said trustees. No contracts shall be made for the construction of either of the buildings hereby authorized until the plans therefor have been approved by the governor and council; and such approval shall not be given until plans and estimates in detail shall have been submitted to the governor and council and they are satisfied that the cost of the said buildings will not exceed the amount authorized to be expended by this resolve.

Plans for the new building for men and large boys were prepared during the summer, and were submitted, together with estimates in detail, to the governor and council on the 27th of August. The same were on that day by them approved, provided the building shall accommodate 120 inmates and the cost thereof shall not exceed \$35,500. Contracts were made and work was begun immediately, and it is expected that the new dormitory will be ready for occupation in the early spring. It is the intention of the trustees to erect the second building, to accommodate 80

women, during the present school year. It will be a close copy of the present girls' dormitory.

The completion of the second building will give to the school a full complement of buildings corresponding to the acreage. Nor does it seem wise to attempt to provide for further growth in this locality. With the extended accommodations now authorized the limit will have been reached within which there is economy in increasing the number of inmates, and beyond which there is no economy in the increase. With 500 there can be satisfactory classification, and the cost per inmate will be substantially the same, whether there be 500 or 1,000. And adjoining lands are too valuable, or at least are held at too high a price, for the corporation to purchase or recommend their purchase.

Yet there will remain in the community a large number of idiots and feeble-minded persons who are entitled to the benefit of the school, but few of whom under the present course of administration of the affairs of the school can be received. It is not just that those who seek for admission should forever be kept without by those who happen to be Especially is this true of the school department proper. In early days, when there were admitted only feeble-minded persons of tender age, capable of improvement by study in the school-room like normal children, only in a less degree, they were generally returned to their homes at a little beyond the age at which children of full strength, mental and physical, finish at grammar schools, and young children were admitted to take their places. But since the custodial department was created and big dormitories have been built, the old practice has been largely discontinued, and many children are staying on as men and women. Why this is so we have shown in former reports. Many of our pupils are wholly friendless. Their homes have been broken up in their absence. Their parents have died, and there is no one to receive them. The placing out of feeble-minded persons is rarely satisfactory. Seldom can a discharged male pupil support himself independently, and the school instruction received by a female pupil would be of slight help to keep her from evil should she be cast out into the world to shift for herself. Thus the school fills up with adults, and the number that can receive substantial benefit from the study of books or by work on a schoolroom blackboard gets smaller and smaller. A remedy must be found. We believe in the school, strictly educational, that was founded half a century ago.\* Again and again have we urged upon the Legislature that it must not be given up. We must from time to time admit improvable cases, and as a rule they in turn must give way to others after a few years' instruction. But we also regard a custodial institution in which the Commonwealth shall take permanent care of feeble-minded women and low-grade idiots of both sexes as an absolute necessity, and we think that the creation of a custodial department and the uniting of the two departments, school and custodial, in a single organization, by the act of 1886, was eminently wise and proper. It is only by study and investigation and experience that we can determine what in any case is the best course to pursue or recommend; and, with due regard to economy, the best results in any case will be reached by those in charge only when those in charge are familiar with every grade of idiocy.

But, whatever may be the organization or administration of the school here at Waltham, if there shall be no increase of territory, there will always be a large number of persons seeking admission that cannot be received. If in order to make room for new cases it shall be our practice to discharge every year a number of the older children from the school department, there will always be some that have no homes to which they may return, and some that it would be inhuman to send to an almshouse or even to their homes. And there will continue the steady growth of the custodial department for which provision must be made.

What, then, shall be the remedy, there being no room for further increase of members in our present location? We suggest this: that the Commonwealth shall purchase a tract of wild land of not less than 1,500 acres; that from time to time, as occasion shall require, there shall be erected upon this land dwelling-houses, barns, storehouses and shops,

The school department of this institution, originally the only department, remains and will always remain the chief department, worthy, above all other departments, of being amply sustained.

small rather than large, and of moderate cost; and that such estate, at first so equipped only to a limited extent, shall be appropriated to the reception, care and maintenance of adult male cases that shall have received a course of training at the school at Waltham.

With such an outlet the school at Waltham could be made more useful in its general work than at present, while the men and older boys transferred from Waltham to the newly acquired land would be fully as well off in every respect as here. We should at first confine the transfer to males, because there are four or five applications for the admission of males to the school to every application for a female. For the present we can take care of the women and large girls at the school. What to do with them hereafter we will determine when occasion shall arise.

The tract of land purchased should be not far from the line of one of the railroads passing through Waltham, and with its occupants would probably best be managed as a part of this school by the trustees of this school; but the course to be pursued can be determined after its acquisition.

Let our purchase be a wilderness. What is wanted is a place for work. When we take it, let there be no trace of cultivation. The desert shall rejoice and blossom like the rose. Another fifty years or more shall pass, and a fair domain, with its shapely walls, fine roads, green fields, gardens and orchards, the production of the toil of these unfortunate boys and men, will be one of the glories of the Commonwealth.

| Applications for admission duri  |        |        |      | _     | _       | 164    |

Of the 40 admissions for the year, 24 were good school cases, 7 were females over fourteen years of age, 5 were adult males who had become very troublesome members of the community.

Of the discharges, 5 were not returned from vacation, 14 were kept at home by friends for various reasons, 2 were returned by order of overseers of the poor, 2 were taken to

the State Almshouse by order of State Board of Lunacy and Charity and 4 were transferred to the insane hospital.

There were 11 deaths during the year: 3 resulted from phthisis pulmonalis, 3 from scarlet-fever and 1 each from heart disease, epilepsy, marasmus, typhoid fever and acute peritonitis.

At the very beginning of the school year we were confronted by a troublesome outbreak of scarlet-fever. The first case appeared in the girls' dormitory, October 5, and was rapidly followed by other cases in the other houses, in spite of the most careful isolation and quarantine of infected or suspected cases and the most vigorous and thorough disinfection of infected apartments. Within a month's time 23 children came down with the disease. After the first month a new case appeared about every four weeks until May 13, since which time we have been free from the disease. In all there were 31 cases, -29 inmates and 2 employees. Fortunately, the disease was of rather mild type, and there were only 3 deaths, all of very feeble young children. This sickness seriously interfered with the training classes and school exercises, and prevented all social gatherings and entertainments for the children for the entire winter season. The whole institution staff were kept busy with the care of the sick and efforts for preventing the further spread of the disease. These 29 children lived on 11 different wards, each ward containing from 20 to 50 children. With so many susceptible persons exposed, we should be thankful that a much larger number did not contract the disease. Nearly all the cases occurred in children under ten years of age.

The current expenditures for the year have amounted to \$70,761.98, or \$3.25 per week for each inmate. The slightly increased per capita cost is due to the decrease in the average number present, 416 against 426 last year, and to the extra expense caused by the outbreak of scarlet-fever.

A small addition has been made to the hospital building, to provide room for a kitchen. A wing containing a large lavatory and a coat room has been added to the rear of the boys' dormitory, for the use of the large force of working boys. A small but very complete disinfecting plant has been built near the hospital, consisting of a brick building,

15 by 25 feet, containing a steam disinfecting drum, 4 feet in diameter and 7 feet long. With this apparatus a large quantity of infected bedding or clothing may be quickly and thoroughly subjected to live steam at a temperature of 250 or more degrees Fahrenheit, without damage to the fabric, insuring perfect disinfection. We have also laid 2,166 running feet of cobble-stone gutters and built 16 catch-basins, to protect our steep roads. Our class of boy painters have practically finished the painting of the inside walls of all our buildings. They have used 3,500 pounds of white lead alone this past year. The cost of these improvements has been charged to current expense account.

The new "north building" for adult male custodial cases is now under construction, and will be roofed in before winter and ready for occupancy early in the spring. building is practically a copy of the girls' dormitory, with the addition of a two-story wing in the rear, which provides two day rooms, a toilet room and a coat room on the first floor, and on the second floor a number of rooms for em-This building will accommodate 120 inmates, and the contracts call for its completion at a cost not to exceed \$35,500. This leaves \$24,500 available for a building for adult females. This sum will enable us to put up another building similar to the girls' dormitory, to accommodate about 80 inmates. This building can be begun early in the spring of 1897 and completed ready for use before the winter. When those two buildings are in use we shall have a total of 600 inmates, the maximum number which ought to be in an institution for the feeble-minded, organized as a school, under the supervision of one superintendent.

The urgent and oft-repeated appeals of clergymer, teachers, physicians and other influential people, supplementing the applications of the relatives of feeble-minded boys or girls, show that public sentiment demands the relief of families and communities by provision for the education and permanent care of this class to a much greater extent than is now made.

The following table shows the number of applications, the number of these applications since admitted and the number still waiting for admission, for the past five years:—

|         |   |   | YEAR | No. of<br>Applicants. | Since<br>Admitted. | Still Waiting<br>for<br>Admission. |   |     |            |     |

Probably some of these children have died or moved out of the State, but it is evident that at the present time the number demanding admission exceeds the entire present or prospective capacity of the institution, to say nothing of applications in the future. At the present time this institution can accommodate only 10 per cent. of the number of feeble-minded persons in the State. Unless this State departs from its policy of caring for those who cannot care for themselves, within a few years it will be necessary to establish another institution for this class of defectives.

For several years past, in my annual report to the trustees I have called attention to the fact that few of the adult inmates could be discharged, and, as we were able to admit a very small number of young children, the average age of our inmates was steadily rising, and that, unless some provision was made for the discharge of the pupils past the school age, the institution would cease to be a school, and become merely a place for the custody and care of adults.

The following table shows the age of the 425 inmates in the institution at the close of the year:—

|                |   |   |   |   |   | Males. | Females. | Total. |
|----------------|---|---|---|---|---|--------|----------|--------|
| Under 5, .     |   |   | • |   |   | 1      | 0        | 1      |
| From 5 to 10,  |   |   |   |   |   | 21     | 14       | 35     |
| From 10 to 15, |   |   |   |   |   | 85     | 85       | 120    |
| From 15 to 20, |   |   |   |   | • | 84     | 48 -     | 132    |
| From 20 to 30, |   |   |   |   |   | 48     | 50       | 98     |
| From 30 to 40, |   |   |   |   | • | 8      | 21       | 29     |
| Over 40, .     | • | • | • | • | • | 5      | 5        | 10     |
|                |   |   |   |   |   | 252    | 173      | 425    |

It will be seen that we have 145 males and 124 females over fifteen years of age. We are practically making a home for these 269 adults, and thereby ignoring the possibilities of practical training and discipline of the scores of young teachable cases who are besieging us for admission. If we could maintain an age limit, and discharge nearly all of our pupils when the period of training and education was past, we should be able in this school to care for all the young teachable feeble-minded children in the State for many years to come.

But, unfortunately, it is not expedient to return to the community a large proportion even of the brighter pupils who have received all the instruction the school has to offer. Very few feeble-minded persons can be developed to the degree of usefulness and self-control necessary to enable them to earn money regularly, and to spend it in such a way as to independently maintain themselves in the outside world. Even those who have suitable homes, and friends able and willing to become responsible for them, by the death of these relatives are often thrown on their own resources, and eventually drift into idleness and pauperism, if not into crime. Indeed, in many cases the guardians of these children are unwilling to remove them, and beg that they be allowed to remain where they can be made happy and kept from harm. Many of these cases are homeless and friendless, and if sent away from the school could only be transferred to almshouses, where they become depraved and demoralized by association with adult paupers and vagrants of both sexes. They cannot be sent out into the world without a loud protest from their friends and the communities in which they are thrown. Even the brightest always need kindly but firm oversight and direction, rarely obtainable outside an institution.

The history of this and other similar institutions has proved that a large proportion of the able-bodied inmates, including many quite low in the mental scale, can be developed into very efficient workers at ordinary rough manual labor. Given the right sort of diet, bodily discipline, training of personal habits, plenty of sleep, plenty of out-door exercise and actual work from childhood, they grow up to

be big, brawny, willing, happy laborers. They are not able to acquire the delicate skill that would enable them to work in a watch factory or a printing office, or in any other trade or occupation requiring minute mechanical skill or the exercise of much independent judgment. As a class, they are unskilled laborers, but they are capable of doing an enormous amount of this simple work. Therefore, if the right sort of work can be provided, a large number of these trained adults of either sex, under intelligent supervision in an institution, are capable of doing a sufficient amount of work to pay for the actual cost of their support. The difficulty is to find a profitable market for this unskilled labor.

The experience of the Epileptic Colony at Bielefeld in Germany and the proposed plan of the Craig Colony for Epileptics in New York are very suggestive as to the line to be followed in making further provision for the feeble-minded in this State. A very large tract of low-priced land, at least 1,000 or 1,500 acres, might be secured in one of the sparsely settled parts of the State. No matter if the land is rough and rocky and covered with bushes, stones and stumps,—the better opportunity to utilize the capacity of this class for doing rough work. The estate should have a good water supply, an abundance of building stone, sand, gravel, clay for brickmaking, etc. On this land construct a plain, simple building, to accommodate, say 100 inmates. To this building transfer 100 of our able-bodied adult male inmates.

This force could be set to work preparing for the next building. They could clear the ground, do all the levelling and grading and excavate the basement. They could build the roads, dig the trenches for water pipes and sewers, quarry the building stone and haul the stone and sand required for the building. If a little foresight was used, a locality could be selected where good clay for brick-making could be obtained. The wood cut off the woodland would furnish fuel for burning the brick, all the work being done by the boys. The cleared land would be reclaimed and changed from wild woodland, worth practically nothing, into good grazing or perhaps tillage land. The cost of construction of the buildings necessary could be reduced to the

lowest terms by the use of the building material already on the land or manufactured there, and by the utilization of the labor of the inmates in the rough work of construction. At no time in the history of an institution is the labor of its inmates so profitable as during the period of construction.

The buildings themselves should be exceedingly plain and simple. What intrinsic reason is there for building a more expensive structure than middle-class people build for their own dwellings?

As soon as the second building is completed, a second group of trained workers could be transferred from the school. Other buildings could be added from year to year, as needed. Large numbers of inmates would not be collected in any one building. The different groups of inmates would live in relatively small homes, practically independent of each other, each group supervised and cared for by competent attendants and officers, under the direction of the general superintendent. One group of boys would work in the vegetable gardens located near the house where they live. Another group would have the care of the barns and the stock, etc. The milk, beef, potatoes and other vegetables, poultry, eggs and other food products ought to be produced within this community.

We know that the labor of the feeble-minded is especially applicable and profitable in this direction. For instance: at our barns we have 18 cows, 9 horses, 30 to 50 pigs and 75 or more hens. One paid employee, assisted only by some of the boys, takes the entire care of the barns and stock. This year we had over 20 acres under the plough, much of it used as a vegetable garden. All the work of preparing the ground, cultivating, hoeing, weeding and harvesting, was done by one paid employee, with the help of the boys.

Aside from the economic view, I believe a permanent home as sketched above would be an almost ideal arrangement if we wished only to insure to these people the greatest amount of happiness and comfort. The isolated situation, the large amount of land and the distance of the buildings apart, would make a large degree of freedom possible and desirable, and do away with many of the present unavoidable but irksome restraints of institution life.

Our school here at Waltham, when the two new dormitories are completed, will accommodate 600 inmates, at a cost for construction somewhat under \$600 per capita. An institution of the character briefly sketched above could be gradually established at an actual cash expenditure not over \$300 per capita, not including the price of the land. Given land enough, the cost of support of this class, need not exceed \$2 per capita per week.

The plan outlined above, begun in a small way, could be indefinitely extended as needed. The trained graduates from the school could at once be given a field for the full exercise of their trained abilities, where they would not come in competition with normal people, and where they would be shielded from the temptations that assail them in the world outside; where they would get the slight supervision they always need, and where there would always be a market for whatever they were able to make or to do; in fact, place them under the right conditions for utilizing all the powers God has given them.

Respectfully submitted,

WALTER E. FERNALD,
Superintendent.

## APPENDIX A.

The classification of the school and the methods of training and instruction followed are set forth at length in a portion of the superintendent's report for the year 1892, here reprinted:—

We have reason to be satisfied with the arrangement of the new institution buildings. The plan of detached and separate departments greatly facilitates the proper classification of our inmates, and helps us to secure to each inmate the consideration of individual wants and needs so hard to get in a large institution where the inmates are massed in one huge building. As we are now arranged, our inmates are classified as follows: at the girls' dormitory are all the girls of the school grade; at the boys' dormitory are the boys in the school department and the better class of the custodial boys; at the farm-house are the large boys or men who are employed on the farm and with the outside work; at the asylum are the younger custodial boys, the custodial females of all ages and the working force of grown women. Each of these departments has a competent matron, who lives in the building and devotes her entire time and attention to the supervision of the personal care of the children in that department. Thus we have divided our institution into four comparatively small families, each with distinctive and peculiar needs and all under the same general management. This plan retains all the benefits of a small institution and secures the manifest advantages of a large one.

We have a larger number of pupils under instruction in the school-rooms than ever before. In trying to secure to each child the greatest improvement possible, we have been compelled to rearrange and modify our school work in some respects. In one way the increased number of pupils has simplified the work, as we are now able to so classify and grade our pupils that class work has very largely taken the place of much of the individual teaching necessary when we had a smaller number. There are distinct

advantages to the child in placing him in a group of children with capacities and needs similar to his own. He profits by the mistakes of his fellows, and feels the stimulus of healthy rivalry. The teacher gives each child a larger share of her time, and is able to retain the attention of the whole class. Our school children are separated into six well-defined grades, classified much as are the children in the lower grades of the common schools. There is a regular progression from the lower to the higher grades, and the pupils are promoted as soon as they are qualified. No pupil is in the school-room more than one-half of each day. The rest of the day is devoted to manual or industrial training, physical drill and out-door recreation, thus securing healthy change and variety. Judging from the results obtained this year, this class work will greatly increase the possibilities of our school training.

In deciding upon the school exercises, we bear in mind the natural limitations of our pupils. Lessing well says: "Education can only develop and form, not create. It cannot undertake to form a being into anything other than it was destined to be by the endowments it originally received at the hand of nature." We do not expect to be able to entirely overcome the mental defect of any one of our pupils. It is a question of how much development is possible in each case.

As a class, the feeble-minded have dull perceptions, feeble power of attention, weak will-power, uncertain memory and defective judgment. It is useless to attempt to arouse these dormant faculties by forcing upon them the abstract truths of ready-made knowledge. Our teaching must be direct, simple and practical. The child must be made to do, to see, to touch, to observe, to remember and to think. We utilize to the fullest extent the varied and attractive occupations and busy work which are so important a part of the modern graphic methods of instruction for normal Object teaching, in the broadest sense, is a prominent feature. The school now has a good collection of objects, models, charts and other apparatus for the practical illustration and application of the subjects taught in the schools. We have for the use of the teachers a school library containing nearly five hundred recent and standard works on kindergarten and primary work, object teaching, physical and manual training, and other subjects directly connected with our school work.

At the beginning of this year our manual-training department was thoroughly reorganized. The training room was equipped with a first-class outfit of tools and benches. Three of our teachers prepared themselves for this work by attending a normal course at the North Bennet Street Industrial School. The boys

were graded into small classes, and these classes have received systematic, progressive training throughout the year. The teachers and pupils have maintained their interest and enthusiasm, and the results have more than exceeded our anticipations. The boy who begins to construct things is at once compelled to think, deliberate, reason and conclude. He becomes familiar with the properties of wood, leather, metals, etc. He acquires definite, accurate control of his muscles. We do not attempt or expect to make skilled artisans of our pupils. The value of the finished work is a secondary consideration. The mental discipline secured by the accurate doing is the result desired.

Nearly all of our pupils receive daily systematic physical training. As a rule they come to us with poorly developed bodies. Their muscular activity is especially deficient, as shown by their awkward and uncertain movements. Mental awakening generally follows as a direct result of increased physical development. The military drill is of much benefit to the boys. In nearly all of our classes in physical training we have adopted the Ling or Swedish plan of educational gymnastics. This system, as modified for our use, means the prompt execution of precise and carefully planned movements of the various groups of muscles at the command of the instructor. The pupil must be closely attentive, he must quickly hear and understand, and he must promptly execute the command. It is a mental as well as physical drill.

The varied routine work of a large institution affords a variety of occupations where the inmates can be employed with great benefit to themselves and to the advantage of the institution. This practical industrial training is a very important part of the education of our pupils. They are much happier and better off in every respect when they know they are doing some useful work. I hardly know how we would control and manage some of our larger boys and girls if their surplus energies were not worked off by a reasonable amount of manual labor.

Certain daily duties are assigned to each boy and girl, and these duties are often changed, to make them familiar with different kinds of work. The boys take great interest in the farm and garden work. This year they have picked hundreds of loads of stone from our fields and carted them off for use in roadmaking. They do all the harrowing and cultivating. One of them has, day after day, driven a pair of horses and held the plough at the same time. They did all of the weeding and nearly all of the hoeing in our large garden. The truck team, collecting and delivering supplies between the different buildings, takes the entire time of two boys. Other boys assist the baker, carpenter and engineer. One

boy devotes all his time to painting, doing as good work as we could hire done. Two boys, proudly uniformed with red caps, serve as errand boys. The shoes of our four hundred inmates are kept in repair entirely by the work of the boys. They do all of the printing of stationery, blanks, circulars, etc., for the school. The boys also do much of the housework in the buildings where they live. The girls are kept just as busy. In the laundry they learn to wash, iron and fold clothes. They do much of the sewing, mending and darning for our large household. Much of the children's clothing is made in our sewing-rooms by our girls. Relays of willing helpers keep our eight sewing-machines busy from morning until night. Every girl at all bright is expected to keep her own clothing in repair. They are taught to wash dishes, make beds, wash windows, polish floors, sweep, dust, etc. The older girls and women are of great assistance in the care of the feeble and helpless children. The instinctive feminine love for children is relatively quite as marked with them as with normal women. A newly admitted child is at once eagerly adopted by some one. The affection and solicitude shown for the comfort and welfare of "my baby" is often quite touching. This responsibility wonderfully helps in keeping this uneasy class happy and contented. Without this cheerfully given service we could not well care for the large number of helpless and feeble children in our asylum department without a largely increased number of paid attendants.

## APPENDIX B.

## Commonwealth of Massachusetts.

#### 1850.

[ACTS, CHAP. 150.]

AN ACT to incorporate the Massachusetts School for Idiotic and Feeble-minded Youth.

Be it enacted, etc., as follows:

Section 1. S. G. Howe, Samuel May, Stephen Fairbanks, their associates and successors, are hereby made a corporation, by the name of the Massachusetts School for Idiotic and Feebleminded Youth, for the purpose of training and teaching such persons, with all the powers and privileges and subject to all the duties, restrictions and liabilities set forth in the thirty-eighth and forty-fourth chapters of the Revised Statutes.

SECT. 2. Said corporation may hold, for the purpose aforesaid, real estate not exceeding in value one hundred thousand dollars and personal estate the income of which shall not exceed ten thousand dollars. [Approved April 4, 1850.

#### 1851.

### RESOLVES concerning Idiotic Children.

Resolved, That there be paid, annually, out of the treasury of the Commonwealth, to the treasurer of the Massachusetts School for Teaching and Training Idiotic and Feeble-minded Youth, the sum of five thousand dollars, to be devoted to teaching and training indigent idiotic children belonging to this Commonwealth: provided, that the board of trustees, having the direction of said institution, shall be composed of twelve persons, four of whom shall be appointed by the governor and council; and provided, that the governor, lieutenant-governor, secretary of state, president of the senate, speaker of the house, and the two chaplains, shall constitute a board of visitors, whose duty it shall be to visit and inspect said institution as often as they see fit; to examine the by-laws and

ΓOct.

regulations enacted by the corporation, and generally, to see that the object of said institution is carried into effect; and, provided, further, that said institution shall gratuitously receive and educate thirty idiotic persons, to be designated by the governor, and provided, further, that other applicants of proper age and condition, children of inhabitants of this Commonwealth, who are not wealthy, shall be received at a charge not exceeding the actual average cost of the inmates; and provided, further, that the members of the legislature, for the time being, shall be, ex officio, visitors of the institution, and have the privilege, during the sessions, of inspecting the same.

Resolved, That the governor be authorized annually to draw his warrant for the sum of five thousand dollars, in four equal quarterly payments of twelve hundred and fifty dollars each, in favor of the treasurer of the Massachusetts School for Teaching and Training Idiotic and Feeble-minded Youth, whenever he shall have satisfactory evidence that the terms and conditions of the foregoing resolve have been fulfilled. [Approved April 30, 1851.

#### 1878.

[ACTS, CHAP. 126.]

AN ACT to authorize the appointment of Trustees for the Massachusetts School for Idiotic and Feeble-minded Youth.

Be it enacted, etc., as follows:

Section 1. The offices of the trustees heretofore appointed under chapter forty-four of the resolves of the year eighteen hundred and fifty-one, and chapter twenty-six of the resolves of the year eighteen hundred and sixty-one, relating to the Massachusetts School for Idiotic and Feeble-minded Youth, shall cease and determine on the appointment of trustees under the provision of this act.

SECT. 2. The governor shall, with the advice and consent of the council, appoint six persons to be trustees, on the part of the state, of the Massachusetts School for Idiotic and Feeble-minded Youth, who shall hold their offices for three years: provided, that the terms of the six first appointed shall be so arranged that the terms of two shall expire in one year, two in two years, and two in three years; and the vacancies so arising, as well as all vacancies occurring otherwise in the office of trustees appointed under this act, shall be filled by the governor, with the advice and consent of the council.

SECT. 3. This act shall take effect on the first day of July next. [Approved April 9, 1878.

#### 1886.

### [ACTS, CHAP. 298.]

## AN ACT concerning the Massachusetts School for the Feeble-minded.

Be it enacted, etc., as follows:

- Section 1. The Massachusetts School for the Feeble-minded shall establish and maintain two departments, one for the instruction and education of feeble-minded persons who are within the school age, or who in the judgment of the trustees thereof are capable of being benefited by school instruction, to be known as the school department; and one for the care and custody of those feeble-minded persons who are beyond the school age or are not capable of being benefited by school instruction, to be known as the custodial department.
- SECT. 2. The persons who have been or who hereafter may be received by said corporation, shall from time to time be classified in and between said departments as the trustees shall see fit, and the trustees may receive and discharge any pupil at their discretion, and may at any time discharge any pupil or other inmate and cause him to be removed either to his home or to the place of his settlement or to the custody of the state board of lunacy and charity, and they may also allow any inmate to be absent on a visit for a period not exceeding three months, and the liability of any person or place to said corporation for the support of such inmate shall not be suspended by reason of such absence unless such inmate shall during such period become a charge to the State elsewhere.
- SECT. 3. Said corporation shall gratuitously receive, maintain and educate in the school department such indigent feeble-minded persons from this Commonwealth as shall be designated by the governor upon the recommendation of the secretary of the state board of education. Special pupils may be received from any other state or province at a charge not less than three hundred dollars per annum. The trustees may also at their discretion, receive, maintain and educate except in the custodial department, other feeble-minded persons either gratuitously or upon such terms as they may determine.
- SECT. 4.\* There shall be allowed and paid annually out of the treasury of the Commonwealth the sum of twenty thousand dollars to the treasurer of the Massachusetts School for the Feeble-minded for the use of said school in equal quarterly instalments, commenc-

<sup>\*</sup> Repealed, chapter 123, Acts of 1887.

ing on the first day of July, in the year eighteen hundred and eighty-six.

- SECT. 5. When it is made to appear upon application in writing to a judge of a probate court that a person is a fit subject for the Massachusetts School for the Feeble-minded, such judge may commit such person to said institution by an order of commitment directed to the trustees thereof, accompanied by the certificate of a physician who is a graduate of some legally organized medical college and has practised three years in this Commonwealth, that such person is a suitable subject for said institution. The fees of the judge for hearing and determining the application shall be three dollars, and in cases where he is required to go from his office or place of business to attend such hearing, an additional fee of one dollar and all necessary expenses of travel, to be paid upon the certificate of the judge by the treasurer of the county in which such hearing was had.
- SECT. 6. A person applying for a commitment of a feeble-minded person under the provisions of section five of this chapter shall first give notice in writing to the mayor, or one of the selectmen of the place where such feeble-minded person resides, of his intention to make such application, and satisfactory evidence that such notice has been given shall be produced to the judge and accompany the order of commitment.
- SECT. 7. The charges for the support of inmates in the custodial department of the Massachusetts School for the Feebleminded shall be three dollars and twenty-five cents a week for each person, and shall be paid quarterly as follows: For those not having known settlements in the Commonwealth, by the Commonwealth, and the same may afterwards be recovered by the treasurer of the Commonwealth, of the feeble-minded persons themselves, if of sufficient ability to pay the same, or of any person or kindred bound by law to maintain them, or of the place of their settlement if any such is ascertained; for those having known settlements in this Commonwealth, either by the persons bound to pay or by the place in which such inmates had their settlement at the time of their admission, unless other sufficient security is taken to the satisfaction of the trustees for such support. If any person or place refuses or neglects to pay such charges, or such sums as may be charged and due for the removal of an inmate whom the trustees are authorized by law to remove, for thirty days after the same has been demanded in writing by the treasurer of the institution, of the mayor and aldermen of the city, or of the selectmen of the town, or of the person liable therefor, the same with interest from the time of such demand may be recovered for the use of the insti-

tution in an action of contract in the name of the treasurer of the institution against such delinquent city, town or person, and the district attorneys or other prosecuting officers shall bring any of the actions authorized by this section when requested.

- SECT. 8. Every city or town paying the charges and expenses for the support or removal of a feeble-minded person admitted to said Massachusetts School for the Feeble-minded shall have like rights and remedies to recover the full amount thereof with interest and costs of the place of his settlement, or of the feeble-minded person himself if of sufficient ability to pay, or of any person bound by law to maintain him, as if such charges and expenses had been incurred in the ordinary support of such feeble-minded person.
- SECT. 9. The trustees of the Massachusetts School for the Feeble-minded shall annually prepare and send to the board of education a written or printed report of its proceedings, income and expenditures, properly classified, for the year ending on the thirtieth day of September, stating the sum appropriated by the Commonwealth, the sum expended under said appropriation, the whole number and the average number of inmates, the number and salaries of officers and persons employed, and such other information as the board may require, and shall also once in three months make a report to said board stating the number of inmates received and the number discharged during the preceding three months, also the whole number then in the institution and the number of beneficiaries supported by the Commonwealth, together with such other information as the board may require.
- SECT. 10. The state board of lunacy and charity may from time to time transfer from the state almshouse, state workhouse, state primary school or either of the state lunatic hospitals, to the Massachusetts School for the Feeble-minded any inmate whose condition would be benefited by such transfer, upon the certificate of a physician that such person is a suitable subject for said institution. All accounts for the support of inmates in the custodial department of said Massachusetts School for the Feeble-minded by the Commonwealth under this act shall, after they have been approved by the board of lunacy and charity, be presented to the auditor and paid from the treasury.
- SECT. 11. Said corporation may hold for the purpose aforesaid real estate not exceeding in value two hundred thousand dollars, as well as the personal estate now authorized by law.
- SECT. 12. Chapter two hundred and thirty-nine of the acts of the year eighteen hundred and eighty-three, except so much thereof as authorizes a change of the name of said school, and

[Oct.

chapter eighty-eight of the acts of the year eighteen hundred and eighty-four, and all acts or parts of acts inconsistent herewith, are hereby repealed. Said repeal shall not affect any act done, or any right accrued, or any cause of action, or any suit or proceeding had or commenced in a civil case, or any commitment made, before the repeal takes effect.

SECT. 13. This act shall take effect on the first day of July next. [Approved June 18, 1886.

#### 1887.

#### [ACTS, CHAP. 123.]

AN ACT to amend chapter two hundred and rinety-eight of the acts of the year eighteen hundred and eighty-six, entitled, An Act concerning the Massachusetts School for the Feeble-minded.

Be it enacted, etc., as follows:

- Section 1. There shall be allowed and paid annually, out of the treasury of the Commonwealth, the sum of twenty-five thousand dollars to the treasurer of the Massachusetts School for the Feeble-minded, for the use of said school, in equal quarterly payments, commencing on the first day of January in the year eighteen hundred and eighty-seven.
- SECT. 2. Section four of chapter two hundred and ninety-eight of the acts of the year eighteen hundred and eighty-six is hereby repealed.
- SECT. 3. This act shall take effect upon its passage. [Approved March 27, 1887.

#### 1896.

#### [RESOLVES, CHAP. 81.]

RESOLVE providing for the erection of two buildings at the Massachusetts School for the Feeble-minded at Waltham.

Resolved, That there be allowed and paid out of the treasury of the Commonwealth a sum not exceeding sixty thousand dollars, to be expended at the Massachusetts School for the Feeble-minded at Waltham under the direction of the trustees of said institution,

for the purpose of erecting two new buildings, in accordance with the recommendations contained in the forty-eighth annual report of the said trustees. No contracts shall be made for the construction of either of the buildings hereby authorized until the plans therefor have been approved by the governor and council; and such approval shall not be given until plans and estimates in detail shall have been submitted to the governor and council and they are satisfied that the cost of the said buildings will not exceed the amount authorized to be expended by this resolve. [Approved April 27, 1896.

## TERMS OF ADMISSION.

Persons applying for admission of children must fill out and return certain blanks, copies of which will be forwarded to any address on application to the superintendent.

Candidates for admission must be over six years of age. The best age for training and instruction is between eight and twelve.

This institution is not intended for epileptic or insane children, or for those who are incurably hydrocephalic or paralytic. None such will be retained, to the exclusion of more improvable subjects.

Any suitable person may be admitted, on such terms as the trustees may determine, according to the responsibilities and difficulties in each case. Payments are to be made quarterly, in advance, or sufficient surety therefor given. Private pupils will be required to observe strictly all the rules and regulations of the institution.

The children of indigent parents in Massachusetts may secure gratuitous admission in accordance with the law. Indigent pupils from Maine, New Hampshire, Vermont and Rhode Island may secure gratuitous admission by application to the governors of their respective States.

Children must come to the school well provided with plain strong clothing for summer and winter. The clothing must be renewed by the parents as needed. Children who tear their clothing must be provided with garments made expressly for them, and of such form and texture as may not be easily torn. Only common mending will be done at the expense of the institution. All the articles of clothing must be marked with the full name of the owner. Sufficient surety will be required for the clothing of the children, and their removal whenever they may be discharged.

Boys should be furnished with two full suits of strong outer clothing, two under shirts, three night shirts, two pairs of drawers, four pairs of socks, six handkerchiefs, two colored cotton shirts, two collars, two hats or caps, two pairs of shoes and one pair of mittens.

Girls should have three dresses (two wash dresses), four colored aprons, two white aprons, two undervests, three pairs of drawers, two underwaists, three nightdresses, four pairs of stockings, six handkerchiefs, two collars, two pairs of strong shoes, one pair of rubbers, one hat, one hood, one shawl or cloak and one pair of mittens.

The post-office address of the school is WAVERLEY.

CLEMATIS BROOK is the nearest railroad station.

For further particulars, apply in person or by letter to the superintendent,

WALTER E. FERNALD, M.D.

## RULES AND REGULATIONS.

TRUSTEES. — A meeting of the trustees shall be held quarterly.

QUORUM. — The presence of three members shall constitute a quorum.

VISITING COMMITTEE. — The trustees in turn visit the institution, one each week, and meet quarterly at the school.

The trustee making the weekly visit shall examine the state of the institution; the condition, etc., of the pupils, and of all the rooms in the establishment; and receive and examine any report of the superintendent, and make a record of his visit and impressions.

He may report on the state and condition of the institution at any quarterly meeting of the trustees.

AUDITORS. — Two auditors shall be appointed annually. They shall examine all of the accounts of the institution and treasurer. They shall aid the treasurer in the investment of any funds belonging to the institution; and no money shall be paid out by the treasurer without their order.

SUPERINTENDENT. — It shall be the duty of the superintendent to reside at, and give his whole time to the service of, the institution.

He shall select and employ all subordinate officers, teachers, assistants and servants of the institution, subject to the approval of the executive committee, and shall consult the executive committee before making any material changes in the administration of the institution.

He shall have the general superintendence of the whole institution, and have charge of all the pupils, and direct and control all the persons therein, subject to the regulation of the trustees.

He shall regulate the diet, regimen, exercises and employments. and the whole course of the education and training of the pupils.

He shall, from time to time, give to all persons employed in the institution such instructions as he shall deem best to carry into operation all the rules and regulations of the same; and he shall cause such rules and regulations to be strictly and faithfully executed.

He shall make a record of the name, age and condition, parentage and probable cause of deficiency of each pupil, and of all the circumstances that may illustrate his or her condition or character; and also keep a record, from time to time, of the progress of each one.

He shall purchase fuel, provisions, stores and furniture, and shall be responsible for the safe-keeping and expenditure thereof; provided, however, that, if the trustees think it best to appoint a steward, he shall perform these duties with the concurrence of the superintendent.

He shall collect and receive all the moneys due from the pupils, and deposit the same with the treasurer.

He shall keep a separate account with each one of the pupils, or with the parents or guardians of such of the pupils as are not beneficiaries of Massachusetts, charging them with all expenses of board, instruction, etc., and with all the money expended for clothing and other necessaries, or proper indulgences.

He shall make quarterly reports to the trustees of the condition of the institution, and make such suggestions as he may think the interest of the institution requires.

He shall prepare for the trustees and the corporation an annual report, in which he will show the history, progress and condition of the institution, and the success of the attempts to educate and improve the feeble-minded youth.

The teachers, assistants and pupils will be under the immediate direction of the superintendent, and no orders shall be given to them except through him.

No officer, assistant or pupil can absent himself from the institution without the permission of the superintendent.

The hours for work, for exercise, for study and for recreation, being established by the superintendent, each teacher, assistant and pupil will be expected to conform strictly to them.

MATRON. — The matron, under the direction of the superintendent, shall have charge of the house.

She shall enforce the rules and regulations of the trustees, and see that order and good conduct prevail in every part of the establishment.

If improper conduct is observed in any subordinate or inmate, she shall report the same to the superintendent.

VISITORS. — Persons may visit the institution under such regulations as the trustees and superintendent shall establish.

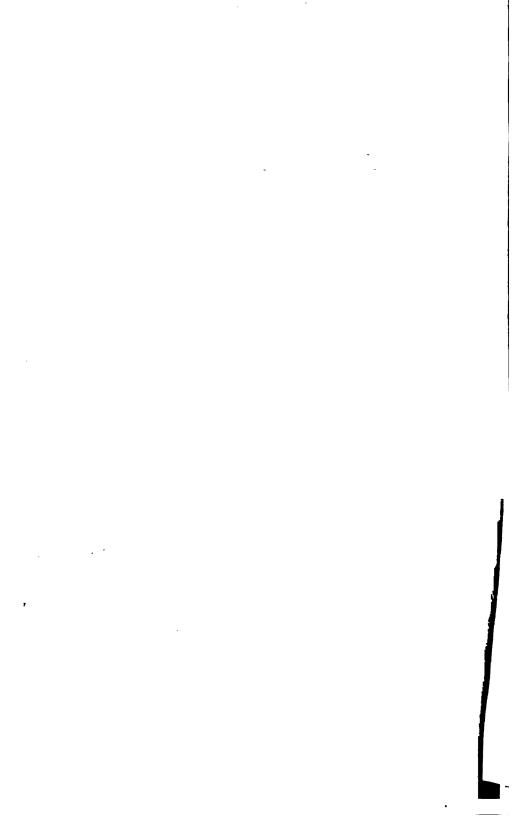

Tobacco. — The use of tobacco, either in smoking or otherwise, is prohibited in the institution.

## NOTICE.

The school is located at Waltham, near the Clematis Brook stations of the Fitchburg and Massachusetts Central railroads. Friends of children may visit them any afternoon, holidays and Sundays excepted.

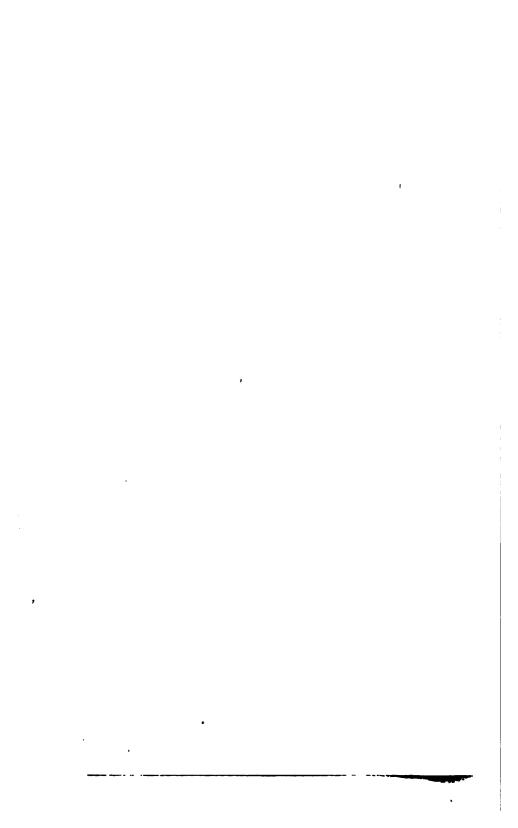

Owing to the limited means of many of the pupils, they are often in need of clothing, as the school has but a small fund which it can apply for the purpose. Contributions of clothing, or material therefor, suitable for children between the ages of eight and eighteen, will be gladly received, and may be sent directly to the school, at our expense, or will be sent for by the superintendent, if notified.

# REPORT OF THE TRUSTEES.

To His Honor the Lieutenent-Governor and the Honorable Council.

The trustees of the Westborough Insane Hospital present their twelfth annual report.

The State Board of Lunacy and Charity, in speaking of the Westborough Insane Hospital in its last annual report, makes the assertion that "in some of the essential features of a good hospital this institution is sadly lacking." This is not the first time that the State Board has criticised this hospital, though never before so sweepingly. The trustees are well satisfied, however, that the opinion of the State Board, as expressed above and in its previous reports, is not that of others, whose qualifications for forming an impartial judgment are not less than those of the members of the State Board.

The only count in the indictment made in the last report to which the trustees would call attention is the statement that "the percentage of recoveries here is based upon the number of alleged curable cases, instead of the number of admissions, which is the case of other hospitals." The statement of the trustees upon the subject in their last report is as follows: "The hospital reports made to the governor and council a year ago indicate that, of the curable cases which were admitted to this hospital in the year ending Sept. 30, 1894, 68 per cent. were cured, while the highest rate of cures of similar cases in any other State hospital during the same year was 36 per cent." It is difficult to account for the error into which the State Board has fallen, as an examination of the returns of the several hos-

pitals would have shown very clearly that the comparison was made between the recoveries in *all* the State hospitals of cases considered curable, upon the basis of the admission of such cases during the year ending Sept. 30, 1894.

The remaining criticisms of the State Board the trustees are content to leave to the sober judgment of persons who have knowledge concerning the treatment of the insane and hospital management, and who are free from prejudice. They notice only that which seems to charge them with misrepresentation.

Since the presentation of the last annual report a condition of things arose which compelled the trustees to apply to the Legislature for appropriations for improvements not contemplated at that time. This was the incapacity of the present system of sewage disposal to answer fully the purposes for which it was constructed. The largely increased numbers inhabiting the hospital had so added to the amount of sewage that the system for its disposal had become inadequate. It was found that, owing to the very heavy rains last November, which saturated the ground upon which the sewage was discharged, the soil could not absorb it, and there was an overflow into Little Chauncy Lake, of which complaint was made by the selectmen of the town of Northborough to the State Board of Health.

After consultation with the Board of Health the trustees decided to ask for an appropriation to reconstruct their system of sewage disposal; and \$10,000 were appropriated for this purpose by the Legislature. The trustees were fortunate in being able to obtain, for a reasonable price, a piece of gravelly land of about twenty-seven acres, in the immediate neighborhood of the hospital grounds. This land was deemed by the Board of Health to be admirably adapted for sewage purposes and for the carrying out of the system of intermittent filtration, which has been found to work well in other places, and especially in the town of Framingham, the municipal system of drainage of which has a deservedly high reputation. The report of Mr. J. J. Van Valkenburgh of Framingham, engineer for the hospital, which is appended to this report, gives in detail the nature of the work done and to be done, and also the objects which it is expected to attain. The trustees have every reason to hope and believe that the

problem of satisfactorily disposing of the sewage is solved for many years to come.

Great pains have been taken to keep the cost of this important and necessary improvement within the limits of the appropriation. After advertising for bids, the contracts were given to the lowest bidders who could furnish sufficient testimonials of both technical and financial ability. Louis Mitchell of Southborough signed a contract for the preparation of the sewage fields, and Salomone & Russa of Boston for the construction of sewers and reservoirs. These contracts, with the expenses of engineering and inspection, will bring the amount in excess of the appropriation, and the trustees will ask for an additional appropriation of \$2,000 to meet the additional expense of the work.

The Legislature of 1896 appropriated \$26,450 for improvements and repairs, as follows:—

- 1. For improvement and repairs of farm buildings, \$1,500. This sum has been partially expended in completing the repairs upon the main barn building, removing all decayed timber and raising the silo, in re-painting and in new farm scales.
- 2. For an addition to and furnishing the laundry, \$2,500. The new building will be completed about the 15th of October.
- 3. For enlarging the engine room and building a new coal shed, \$2,500. The work under this appropriation will be completed about December 1.
- 4. For new refrigerators, \$1,000. The material has been purchased and the work will soon begin. It has been delayed from the difficulty experienced in deciding upon the best and least expensive manner of rearranging the cellar for the accommodation of the new refrigerators.
- 5. For new furniture and furnishing, \$5,000. The trustees are gradually and carefully renewing the old and worn furniture, much of which has not been changed since the foundation of the hospital.
- 6. Cooking apparatus for new kitchen, \$1,000. A new range has been put in and other utensils that were needed.
- 7. For two new boilers, \$2,000. The boilers are in position and will soon be ready for use.
- 8. For land for the new sewage field, \$950. This was the price paid for the field.

9. For the construction of a new system of drainage and sewerage, in accordance with the recommendation of the State Board of Health, \$10,000. This work is going on rapidly, and it is believed that the new system will be in operation in November.

The income of the hospital for the year ending Sept. 30, 1896, was as follows:—

| From State for board of patients,     | •      |      |       |     | \$24,443 43       |
|---------------------------------------|--------|------|-------|-----|-------------------|
| From towns for board of patients,     |        |      |       |     | 57,810 01         |
| From individuals,                     |        |      |       |     | 32,558 43         |
| From interest on bank deposit, .      | •      | •    | •     |     | 245 58            |
| Total income,                         |        |      |       |     | \$115,057 45      |
| The ordinary expenditure was .        | •      | •    |       |     | 118,087 52        |
| Making a deficit of                   | •      |      | •     |     | \$3,030 07        |
| In the year ending Sept. 30, 1895, th | e inco | me ( | aceed | led |                   |
| the current expenses,                 |        |      |       |     | <b>\$6,219 26</b> |
| The gain to the hospital in the two   |        |      |       |     | 3,189 19          |

The difference of expenditure in the two years is owing in part to an increase in salaries and wages of valuable employees, to an increase in the number of nurses, to some rise in the price of provisions during the year ending Sept. 30, 1896, and to the employment of a regular plumber and helper for the hospital. The trustees expect to make some economies during the present year, and they are confident that the hospital will be kept upon a self-supporting basis if there should be no diminution in the number of patients.

The average number of patients during the last hospital year was 579.9, and the average weekly cost was \$3,894. The number of acute curable cases (not including recurrent and alcoholic insanity) admitted was 60; 38 such cases were discharged recovered, being a percentage of 63.25 per cent.

In extraordinary repairs and additions \$3,382.28 were spent. These were made necessary by the insufficiency of the appropriations in 1894 and 1895 for electric lighting, heat and ventilation, enlarging the hospital kitchen and renewing the plumbing. In addition, an organ for the chapel and a new piano were purchased. A new tin roof was placed upon a portion of the building, to repair damages after an unusually heavy storm. There was also some damage from a fire under

the bakery and back of the boilers, which it was believed was of incendiary origin. The repairing of this damage was charged to extraordinary expenses.

The trustees believe that the time has come when the work of this institution should be extended. The success that has attended the treatment of acute and curable cases in this hospital is very marked; and an enlarged opportunity for usefulness should be given to it. A detached building should be erected on the hospital grounds for the treatment of acute cases, and also to give more accommodation to some of the officers of the hospital who are in great need of it. All the best and most modern appliances should be incorporated into the building, with day rooms apart from sleeping rooms. The cost of such a building is estimated at \$50,000, and the trustees are proposing to apply to the Legislature for the requisite appropriation.

There have been no changes in the board of trustees during the past year. Mr. Frank W. Forbes of Westborough, after a faithful and useful service as treasurer from the opening of the hospital in 1885, has resigned, in consequence of the pressure of private affairs. The trustees take this opportunity of expressing their great regret at losing his services. Mr. H. L. Davenport of Framingham has been appointed treasurer, to succeed Mr. Forbes.

CHARLES R. CODMAN, EMILY TALBOT, GEORGE B. RICHMOND, ELIZA C. DURFEE, BENJAMIN W. CHILDS, ALDEN SPEARE, JOHN M. MERRIAM,

Trustees.

# REPORT OF THE SUPERINTENDENT.

To the Board of Trustees of the Westborough Insane Hospital.

I respectfully submit the eleventh annual report of the superintendent for the hospital year ending Sept. 30, 1896.

The following table shows the movement of population for the past year:—

|                                       |     |      |     | Men.   | Women. | Totals.     |
|---------------------------------------|-----|------|-----|--------|--------|-------------|
| Patients in the hospital Sept. 30, 18 | 95. |      |     | 209    | 358    | 567         |
| Admissions within the year, .         |     |      |     | 116    | 160    | 276         |
| Whole number of cases within the      | yea | r, . |     | 325    | 518    | 813         |
| Discharged within the year, .         |     |      |     | 116    | 179    | <b>2</b> 95 |
| Viz.: as recovered                    |     |      | . 1 | 16     | 35     | 51          |
| much improved                         |     |      |     | 23     | 27     | 50          |
| improved,                             |     |      | .   | 14     | 13     | 27          |
| not improved,                         |     | •    | .   | 41     | 65     | 106         |
| not insane                            |     | -    |     | 7      | 10     | 17          |
| Deaths,                               |     |      |     | 15     | 29     | 44          |
| Patients remaining Sept. 30, 1896,    |     |      |     | 209    | 339    | 548         |
| Daily average number of patients,     |     |      | .   | 216.43 | 363.54 | 574.9       |

# Admissions and Discharges.

There were 256 direct commitments by the courts, 9 admissions by order of the State Board of Lunacy and Charity from other hospitals and from boarding out, and 11 voluntary patients were admitted. Of the discharges, 146 went to their homes and friends and 101 were removed by order of the State Board. Of these transfers, 80 went to other institutions, 20 to their places of settlement outside of the State and 1 was boarded out; 1 town patient was discharged to the overseers of poor. There were 3 successful elopements, 1, a female, habitual drunkard, and the others quiet men.

There were 44 deaths during the year; 3 occurred in acute cases, 2 died from the exhaustion of acute delirious mania, and 1, a case of acute melancholia, committed suicide by hanging:

The number of curable cases admitted during the past year was 60; the number of curable cases discharged recovered was 38.

# TREATMENT.

A careful examination of the statistics of the admissions of the insane to all the Massachusetts State hospitals for ten years shows that but 30 per cent. of all committed were of the forms we recognize as acute, or curable. This is excluding the alcoholic cases. Errors of diagnosis undoubtedly would decrease this; but, if only 30 in 100 have any prospect of recovery, it is evident that nothing should be left undone to restore as many of the curable cases as possible to sound mental health. with this spirit that the medical treatment of this hospital has been conducted since the hospital was first opened, nearly ten years ago. Nor has the treatment been limited to the curable cases only. All recent cases receive medical treatment and no cases are neglected. The administration of the indicated homeopathic medicine is of the first importance; to assist it, all other measures that science and experience have proved helpful are used. One measure to which attention has repeatedly been called in previous reports of your superintendent, the rest treatment, is now receiving merited recognition in other hospitals, both in this country and in Great Britain, and with the same favorable results as in our own. For those nervously tired, from whatever cause, - and this includes all the acute cases, - it is always a help, and no harm can come from the judicious use of such treatment. For the convalescent, exercise is often desirable, and this has been provided in the past year by gymnastics under a competent instructor, with directions from the physicians as to the kind and amount. For others, occupation is better, and this is also directed by the physicians, so that only good will result.

During the past year there has been an extension of parole privileges. One ward, containing 35 women patients, was made an open ward, and during the past summer 20 per cent. of our whole number have had parole. It is probable that this

is about as many as can safely be trusted. It has been, however, an incentive to do well on the part of many of our patients, as by doing so they may have an opportunity to go out unattended some part of the day.

# WORK DONE BY PATIENTS.

In my last annual report I called your attention to the large percentage of patients, chiefly chronic cases, who were usefully employed. Such employment has been continued in the past year. During the winter the caning of chair seats was introduced as an occupation that could be carried on in cold weather, when patients would otherwise be idle. The result was of value in giving occupation to about 25 men, but the expenses exceeded the receipts. The work was discontinued when the opportunity for out-door wook began in the spring. Probably some more remunerative form of in-door employment will be tried this winter. Some, at least, of the success of the hospital farm is due to the Stanley Cottage patients, who, with their attendant, work steadily at whatever is needed to be done the year round. Another ward is wholly occupied by working patients, and, as in former years, many improvements about the hospital have been made by them, and much work done on construction. The average per cent. of men working was .56. Much more has been accomplished in inducing the women to work than at any time in past years. Their opportunities for out-door work are not as favorable as for the men, but women patients picked all the strawberries, raspberries and blackberries which were raised, and also picked some peas and string-beans. The goods made in the sewing-room were chiefly done by patients. The average per cent. of women working in the past year was .44, -10 per cent. more than the previous year.

# TRAINING SCHOOL.

In January of the present year the pupils of the training school were required to sign an agreement to remain the two years of the course of training. The result has been equal to our expectation. The nurses give more attention to their duties and the hospital receives better service in every way. The work

of instruction is still done chiefly by the assistant physicians, each of them having a class and giving instruction and lectures, and lectures are expected from members of the Consulting Board of Physicians.

Miss E. F. Drake, the female supervisor, has been appointed superintendent of nurses. Miss Drake is well fitted, by ability, disposition and training, for the position, and takes much interest in her work.

# THE FARM.

The farm products for this year will be greater in value than for any previous year. This result is chiefly due to three causes: first, the arable land has been brought to a better state of cultivation, resulting in an increased yield; second, twenty-two acres of poor pasture land have in the past ten years been reclaimed and made to raise crops, a more than ten-fold increase in their productive value; and, third, a marked increase in the production of milk. The herd which we had ten years ago was an average herd, but the elimination of poor milkers, replacing them by good ones, chiefly of our own raising, has resulted in a herd of cattle probably unsurpassed by any similar herd in the State of Massachusetts.

The following table shows the increase in the ten years. In the average number of cows were included all in the barn, whether they were giving milk or not:—

| Average | Yearly | Amount | of | Milk | produced | per | Cow. |
|---------|--------|--------|----|------|----------|-----|------|
|---------|--------|--------|----|------|----------|-----|------|

|                  |   |   |   |   |     | Cows.        | Pounds Milk |
|------------------|---|---|---|---|-----|--------------|-------------|
| 1886 and 1887, . |   |   |   |   |     | 291          | 5,267       |
| 1887 and 1888, . | • |   |   | • |     | 3111         | 5,780       |
| 1888 and 1889    |   |   |   |   |     | <b>3</b> 5√a | 6,309       |
| 1889 and 1890    |   |   |   |   | .   | 35 1         | 6,184       |
| 1890 and 1891, . |   |   |   |   | . 1 | 39‡ <u>‡</u> | 6,400       |
| 1891 and 1892    |   | • |   |   |     | 471          | 7,105       |
| 1892 and 1893, . |   |   |   |   |     | 4711         | 7,491       |
| 1893 and 1894.   |   |   | • |   |     | 51 4 * 53    | 8,295       |
| 1894 and 1895, . | • |   |   |   |     | 53           | 7,816       |
| 1895 and 1896.   |   | - |   |   |     | 534          | 9,045       |

# ALTERATIONS AND IMPROVEMENTS.

The changes in the sanitary plumbing of the wards were completed last fall, and the results are very satisfactory. The walls and halls look fresh and clean with new paint and varnish, and mechanical ventilation is now satisfactorily applied to all the back wards.

Under the appropriation for completing and furnishing a new laundry, a one-story building, 20 feet wide, 46 feet long and 15 feet high, with a slated pitch roof, has been constructed, and the machinery to furnish it is purchased and is in the building; and an 8 horse-power engine, formerly used to run a fan, has been installed and will furnish all the power needed. The floor yet remains to be concreted, but this will be done and the building in use by October 15.

In the rear of the present boiler house an excavation 30 by 60 feet and 9 feet deep was made during the summer, chiefly by the labor of working patients, and a coal shed 30 by 40 feet and 9 feet high is being constructed, the additional 20 by 30 feet being added to the present boiler room. It is proposed to drive the coal teams over the cellar and dump the coal in through trap doors. This building will be completed by November 1.

Material for refrigerators has been purchased and the work of reconstructing them will be soon begun.

The appropriation for furnishing the wards is being judiciously expended for that purpose.

The completion of the kitchen addition and the installation of the new range and other cooking utensils make that department amply fitted for the preparation and distribution of food.

Under the appropriation for the same, two new boilers were contracted for, and have been delivered and are in position. The steam connections are being made, and they will be ready for the low-pressure service very soon.

The failure of our system of sewage disposal in last November, by reason of the saturation of the ground by heavy rains and consequent discharge of a portion of the sewage into Little Lake Chauncy, made immediate measures necessary to provide a new system. The land you purchased for this purpose has proved admirably fitted for the disposal of sewage by

intermittent filtration. The actual construction work by the contractors was begun late in last July, and has been steadily forwarded from that time. Three filtration beds of the four planned by your engineer, having an area of an acre each, have been completed; four-fifths of the necessary piping connections are laid; the reservoir is nearly completed; and, at present rate of progress, there is no doubt that by November 1 the system will be completed, the necessary connections made with the old system, and when the fourth filtration bed is prepared the problem of the disposal of the hospital sewage will be settled for many years.

The appropriation for the farm improvements has been partially expended in completing the repairs in the main barn building, removing all decayed timber and also renewing the floor. The silo has been increased in height four feet, to make more room for ensilage. A new six-ton farm scales has been purchased and set up, and the outside of the entire barn has been given two coats of paint.

# DONATIONS AND ACKNOWLEDGMENTS.

Mrs. John Felt Osgood gave another hundred dollars to be used in entertaining the patients. Mrs. Lewis Day of Norwood gave a box of magazines and pictures. Mr. Martin Green of Worcester sends the "Scientific American," as in past years. Miss E. Merriam of South Framingham gave a stereopticon exhibition and lecture upon the Holy Land at Christmas. Mr., Mrs. and Miss Whiting, with Mr. Macomber and Miss Ellis, all of South Framingham, Mass., gave an entertainment to the patients in February last. The young people of the Unitarian Church of Westborough gave an exhibition of Mrs. Jarley's wax works last winter. Chapel, Boston, through Mr. Robert H. Kerr, gave a collection of hymn books for use in our chapel services; St. John's, Roxbury, through Mr. R. P. Palmer, gave a number of hymnals for the same use. The Hospital Newspaper Society sent a box of papers and magazines at Christmas. Mr. Frank W. Forbes of Westborough gave a box of magazines. Arthur A. Longley of Westborough gave a bundle of magazines, and an unknown friend sent a box of magazines and newspapers to the hospital for the use of the patients.

# RECOMMENDATION.

A detached building for treating acute cases of insanity, pleasantly situated, with all the modern appliances for treatment and with day rooms apart from the sleeping rooms, is not only very desirable but is a necessity, when the importance of curing the greatest number of curable cases is considered. I recommend the erection of a building of capacity to accommodate 50 cases of acute insanity, both male and female, and further recommend that, in addition to the necessary accommodations for the nurses needed, apartments be provided for one or more physicians and other officers, as our present accommodations are insufficient. The entire cost of such a building should not exceed \$50,000.

### Conclusion.

At the end of the hospital year, Dr. Ellen L. Keith, who has been assistant physician at the hospital for over seven years, resigns, to open a private hospital for the insane. Dr. Keith has shown ability and fitness for the position here, and, by her painstaking fidelity to the needs of those in her care, has given a service that cannot well be replaced. While wishing her success in her undertaking, it is with regret that the hospital is to lose so valuable an officer. There have been no other changes on the medical staff during the year.

I thank the officers and heads of departments for their loyal service and efficient assistance in the interests of the hospital.

I am grateful to the trustees, individually and collectively, for their continued assistance and counsel, and trust that it may continue in the year to come.

GEORGE S. ADAMS,

Superintendent.

SEPT. 30, 1896.

# REPORT OF THE CONSULTING BOARD OF PHYSICIANS AND SURGEONS.

To the Trustees of the Westborough Insane Hospital.

During the year that has passed the members of the consulting Board have made frequent visits to the hospital. They have come on every month of the year, have visited the hospital early and late in the day, have visited all the wards from time to time, and some members have come unannounced. This has been done in order that we might become thoroughly familiar with the hospital in all its workings. The conclusion we draw from these various inspections is, that the hospital is well managed, the patients well cared for and the institution a credit to the Commonwealth.

At our February meeting committees were formed for visiting the other hospitals in this State. We hope by these visits to become still better acquainted with the work of our neighbors and associates in this specialty, and to obtain some valuable suggestions from them.

Committees have been formed as follows: -

Pathology, Drs. Colby, Sutherland and Rand. Training School, Drs. Paine, Bellows and Nichols. Ophthalmology, Dr. J. H. Payne. Surgery, Dr. Packard.

Dr. John P. Sutherland of Boston was appointed to fill the vacancy caused by the death of Dr. D. B. Whittier. Dr. I. T. Talbot was re-elected chairman of this Board, and Dr. N. Emmons Paine secretary.

We repeat our endorsement of the "rest cure." It has proved very satisfactory, in combination with homoeopathic medication, as shown by the high percentage of recoveries in

this hospital. We are gratified to find such a large proportion of the patients receiving medicine and medical treatment. We deplore the prevalent opinion that insanity is not a curable disease, with its consequent attitude of expectation and inaction, and we heartily commend the hopeful attitude of the officers of the hospital, and their continued efforts to cure even those who may appear to have passed into incurability. We are confident that a hopeful physician will have a more beneficial effect upon those who require encouragement and uplifting than one who is apathetic and convinced of the uselessness of any medical efforts.

# Respectfully submitted,

I. T. TALBOT, M.D.
CHARLES L. NICHOLS, M.D.
CONRAD WESSELHOEFT, M.D.
EDWARD P. COLBY, M.D.
N. EMMONS PAINE, M.D.
JOHN H. PAYNE, M.D.
HOWARD P. BELLOWS, M.D.
HORACE PACKARD, M.D.
JOHN P. RAND, M D.
JOHN P. SUTHERLAND, M.D.

WESTBOROUGH, Oct. 1, 1896.

# ENGINEER'S REPORT.

Col. CHAS. R. CODMAN, Chairman Board of Trustees.

DEAR SIR: — Briefly stated, the new sewerage system as proposed to be constructed and now nearly completed, possesses the following features which at present would seem to be of general interest:—

The existing sewerage system will not in any way be disturbed. The sewage will simply be intercepted at two points on the old lines and directed into the new sewer, and, when everything is in working order, by operating two gates the sewage can be turned into either system.

The first interception is made at a man-hole easterly of the male wing of the hospital, and by means of a 6 inch pipe the sewage is conducted beneath said wing a distance of 275 feet to a man-hole near the laundry building, where the second interception occurs and where the aforesaid gates are located. Thence the sewage is conducted by an 8 inch pipe through the yard along the northerly end of the female wing of the hospital about 500 feet to a covered reservoir located in the woods 230 feet westerly of said wing.

The sewage first passes into a chamber where the sludge is intercepted, and once in about four weeks this accumulation will be discharged by means of a 12 inch pipe into an open chamber situated about 300 feet westerly of the reservoir, and afterward removed in carts. The liquid sewage in the sludge chamber-passes into a large chamber of about 18,000 gallons capacity. When such an amount is accumulated it is syphoned in a few minutes into smaller chambers, and then passes onward a distance of 2,650 feet to the filtration areas. The operation of syphoning is of two-fold importance. It allows of a more general distribution of the sewage over the areas and makes the applications intermittent, thus insuring better results in the way of purification.

It is proper to say, at this point, that the sewer is built of cast-iron water pipe, with leaded joints, and that the line of pipe from the hospital to the filtration areas is laid in the form of an inverted syphon. Its lowest point is 30 feet below said areas and 75 feet below the interception of the old sewer at the laundry building. Therefore, to guard against a possible, though not probable, clogging of the sewer below the reservoir, it is connected at the reservoir by a 4 inch pipe with the water-works system of the hospital, which will effect the clearance of anything tending to clog the sewer. Branching from this 4 inch pipe line is another pipe, on which is a hydrant located near the reservoirs, that will allow them to be kept in good condition.

At the filtration areas there are several acres of excellent filtering material, three acres of which have been especially prepared for the reception of sewage. There are three beds, one lying on one side of the sewer, and two on its opposite side. The beds were formed by first removing the loam to a depth of about 18 inches, using as much of it as was necessary to form suitable banks and putting the remainder into spoil. banks. The areas thus stripped were then levelled, and open carriers or ditches built along opposite banks of each bed and at right angles to the sewer line. Into these ditches the sewage will be discharged through 6 inch pipes, the quantity flowing being regulated by gates. By the overflowing of these ditches the sewage will be distributed evenly over the beds. Each bed has a 5 inch drain pipe extending through its centre and at a depth of from 6 to 7 feet.

In preparing these beds, the first consideration has been to secure good filtration areas, whereby the sewage can be disposed of in a sanitary manner and a good condition of purification attainable. Still, I am confident, from my experience with the Framingham filtration fields, that there will be no difficulty in raising marketable crops in the areas as prepared.

Respectfully yours,

J. J. VAN VALKENBURGH.

# TREASURER'S REPORT

#### TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the Massachusetts Hospital for Dipsomaniacs and Inebriates respectfully submit their fifth annual report, with the reports of the superintendent and treasurer. The tables of statistics show substantial improvement in the financial results of the year and in the medical work. It seems fitting to invite attention here to some of the principal points of interest.

The increase of 59 in the number of patients committed during the year, and that this increase was composed of persons under forty years of age, shows a better understanding of the hospital and of what may be expected of it, as to the character of the cases that can be benefited by its This explains also, in a comparison with the privileges. previous year, the decided increase—from 27 to 68 persons of those remaining abstinent and doing well after leaving the The facts in this regard were ascertained by visitation and careful personal inquiry in each case by an agent especially employed under the direction of the superintendent. The addition of 20.18 to the daily average number present during the year, together with the gain of another year's experience in managing the hospital, demonstrates a natural law of hospital administration in the material reduction of the weekly per capita cost to \$6.32. The superintendent's report shows the average cost to have been substantially reduced each year since the opening of the hospital.

Among others of the more general indications of progress in the development of the hospital and its work, it is of interest to mention the improvement of the grounds. Upon the recommendation of the superintendent, for the purpose of effecting a desired change in the appearance of the hospital surroundings, and at the same time to furnish work

for patients, which at certain seasons it is difficult to obtain in suitable and sufficient amounts, a plan has been obtained from Mr. Joseph H. Curtis for rearranging the roadways, walks, setting out trees and shrubbery, etc. The work will be well advanced this fall, and will produce the results indicated by the new plan of the grounds and buildings referred to in the superintendent's report.

There are a number of special and important matters that now claim careful consideration as urgently needing attention by the governing authorities, if it is expected of the trustees that they shall follow up their opportunity to advance this new and difficult work confided to them, and properly discharge the responsibility of the trust imposed upon them by the Commonwealth. The special considerations now presented relate to the work of the institution in the medical care and custodial care of its patients. It follows, from the experience of the hospital thus far in these particulars, that certain new and more practicable provisions should be made with reference to the selection of patients who are entitled to the privileges of the hospital.

#### MEDICAL CARE.

It is enough for the present purpose to refer to the superintendent's report for 1895 for a careful and forcible statement regarding the nature of the disease to be treated in this hospital, the objects to be gained by treatment, as to the steps to recovery, and the methods to be employed that offer the best and most lasting results. The work of applying the now well-recognized principles of physical training, in gymnastics, baths, etc., is shown, in this accompanying report, to have yielded the significant and instructive results graphically indicated in the table prepared by the director of gymnastics. This is direct medical treatment, and furnishes "all-round exercise."

In the summer of 1895 a temporary expedient was adopted which produced the double effect of overcoming the reluctance of the patients to take the gymnastic treatment, etc., and of allaying the general demand for too early discharge. A level rule was made requiring a six months' course of treatment for every patient in the hospital, the

discharge not being given then, however, unless the prescribed medicines, gymnastic exercises and baths had been taken and a certain amount of work done. This rule effected the desired results; the patients took their treatment, and with general satisfaction, inasmuch as all were treated alike. The period of six months was adopted as a minimum, because experience has shown, here and elsewhere, that even a longer time of treatment, as a rule, is needed to gain the best results. But the commitment of patients to this hospital is a judicial order to the trustees to keep them until it shall appear that they "will not continue to be subject to dipsomania or inebriety, or will be sufficiently provided for by themselves or their guardians, relatives or friends." The determination of the proper time The cases are for release is essentially a medical question. not all alike, and it was found that the best interests of some patients made imperative longer care than the inflexible rule permitted. Therefore the trustees have recently provided for varying the rule when necessary.

All persons, even those who think the least upon the merits of the medical treatment of inebriety, agree that these patients need to work as a part of their treatment. Employment has been found as usual in the stable, boiler house, kitchen, etc., as adapted to the strength and health of the patients. Work in farming and gardening has been carried on to a considerable extent. A few men employed at carpentering and painting are poorly accommodated. In the one shop possessed by the hospital the making of brooms is self-supporting; it employs about 60 men at daily stints, and yields about one hundred dozen brooms per week. This work, especially some parts of it, is so light and simple as to be well suited to the new-comers just recovering from acute stages of sickness and weakness.

The trustees realize the enormous difficulties incident to the peculiar effects of the disease with which they have to cope, and, in reviewing the work of the past three and a half years, must bear testimony to the good accomplished in the difficult part of the labor of preparing the way for rendering a great service to the State. Credit is fairly claimed for good results already wrought out in the spirit of making the best of the means at hand. A careful examination of the present state of the hospital, as to what it has attained in medical care with its available means, leaves no room for doubt in the minds of the trustees that the value and success of the future work is now certain, provided they are granted their requests for aid in carrying out their new plans for conducting the institution.

In recommending again this year the construction of a building to contain an assembly room which may be used as a chapel, gymnasium, etc., also a library and reading room, the trustees would emphasize these requirements as essential to the purposes which really belong to medical treatment. In noting, also, the increase in the number of patients, the trustees invite attention to a fact that has special significance. This is the increasing number of applications for the admission of paying patients at higher rates than can now be charged. The lack of accommodations compels the turning away of these patients, whose presence would contribute in several ways to the welfare of the hospital and all its inmates.

Other indications pertaining to medical care show the need of a building for a reception and observation ward, especially adapted in part to the treatment of new-comers who often are very sick, and in part to the uses of a custodial ward for those whose need of the closer restraint is most prolonged. For the latter purpose an enclosed garden might be found expedient. These considerations lead the trustees to recommend a building to accommodate 25 to 30 patients, as a receiving and custodial ward. This would leave room in the other wards for the increasing numbers, and would enable the trustees to make a beginning in meeting the demands of those who wish to pay for more private accommodations. Applications of this kind continue to be made at the hospitals for the insane, where there are such accommodations.

#### CUSTODIAL CARE.

In the conditions surrounding the problem of custodial care lie the causes of great difficulties that have attended the work of the hospital. The elopement of patients is a

matter of much anxiety to the trustees, although they are glad to report that this has shared in the improvement noted in other respects. In proportion to the whole number under care, or to those admitted during the year, the escapes were less than in the previous year; and one-half as many patients as escaped were returned, either voluntarily or involuntarily. While a large majority of these escapes occurred within a few weeks after admission, and soon after the patients were put on parole, it is probable that, even if this had been much longer delayed, many of them would have broken their parole when they had the opportunity. Although there is encouragement in the fact of progress under circumstances that have been adverse, no one realizes more clearly than do the trustees that the escapes are still too frequent. But it is as easy as it is interesting to see how the hospital has been brought to its present position in this matter as a logical outcome of the circumstances that have existed from the opening of the hospital to the present time.

To understand the situation, one must first take into his mind some preliminary facts. As to the hospital itself, when it was opened it consisted of six wards, comprising each a sitting room and adjoining bed rooms, accommodating about 35 patients in each ward. There was a service building, with kitchen, dining room and employees' quarters; besides these there were the boiler house, and stable with space under it to be used for the piggery. There were no other arrangements, except work on farm or garden, for employing or treating patients. The other preliminary facts to be noted are the two prime provisions of the act establishing the institution: it was to be a hospital, and the law declares that no person shall be committed to it "until satisfactory evidence shall be furnished to the judge before whom the proceedings for commitment are had that such person or persons are not of bad repute or of bad character, apart from their habits of inebriety."\*

Under some misapprehension in the first years many persons were sent to Foxborough who were confirmed drunkards or past the age when they were likely to be

<sup>•</sup> See chapter 414, Acts of 1889, section 6.

curable; many others had been convicted of crimes, and were of the "bad character" that should have debarred them from the privileges of the hospital. The law provided no way for revising or annulling such erroneous commitments, and the hospital, having no remedy, was continually burdened with this incorrigible and demoralizing element. The trustees, being under legal obligation to take and hold in custody these patients, were placed between two virtual impossibilities, viz., to keep them safely shut up within locked doors and never take them out except under strong guards, or to take them out for exercise and work, and keep them from running away without having the walls of a jail yard, which alone could effectively restrain such people. The situation was offensive and harmful to the very people sought to be benefited,—the well-meaning and curable patients, - and it was intolerable to all concerned, not least of all to the trustees. With the purpose of developing the necessary conditions of moral control, through the helpful and curative influences of mutual trust and confidence, the change was made to an extreme use of the parole system. The change had to be radical to produce the required effect, and has produced it in a large measure. It was judged to be most expedient, under the then existing circumstances, to put patients on parole, with liberty of the grounds by day, very early after their coming. It should be understood that many of those who have eloped ought never to have encumbered the hospital; the improvement in this regard has already been noted. Certain others have been influenced in their weakness by the men of "bad character" whom the law intended to exclude. It is due to the gradual improvement in the character of the patients, and their being made more amenable to the requirements of the hospital, that the results are coming to be as good as they are.

Additional legislation is needed to secure the return of escaped patients. The uncertainty of their being returned tempts men to break their parole, and directly increases the number of elopements. The time has come when study and experience point out new steps to be taken. The greater remedy is to be gained by some necessary changes in the law, to accomplish what was evidently intended by it; these changes will be specified hereafter. But there is something.

aside from the better material improvements asked for, which the trustees will undertake to do at the hospital, in the proposed new regulations governing this matter. These touch, in a certain way, the relations of the hospital to the courts. Some very satisfactory and encouraging conferences have been had, recently, with a number of the judges who could be conveniently seen, and through whom many of the commitments are made to the hospital. The purpose of the hospital is best served when it aids the courts in their efforts to deal helpfully and humanely with the difficult problems that these cases present. The cordiality with which the views of the trustees have been welcomed and approved by every magistrate to whom they have been personally presented must lead to a better understanding of the mutual relations.

The experience of all teaches the obvious necessity for certain amendments of the law. Through the new circumstances that could thus be made possible, and with the aid which some of the judges have recommended the trustees to seek in the admirable "Massachusetts probation system," there can be no doubt that the courts and probation officers can act to bring the benefits of the hospital more largely to proper persons, and prevent the commitment of improper ones who could not be benefited there, and could only do harm to others.

In regard to what can be done at the hospital, it is proposed by the trustees to inform the magistrate by whom each patient was committed of the changes made in his status in the hospital in the event of relaxing strict custody by granting parole, and of release on permit for leave of absence, etc. The notice in each case being placed with the original commitment in the files of the judge's office, a guide is furnished for future action in the case. The magistrates to whom this measure has been proposed have approved it.

The character of the patients for whom the hospital was intended, and to whom it can be most useful, is plainly indicated; its place in relation to other institutions should be equally well recognized. It remains true today, to some extent, that some of its patients belong to the penal institutions, and others, without this hospital, would be sent to the hospitals for the insane, or to the jails, where they

do not belong. The trustees appreciate the necessity of excluding the incorrigible classes. There would then remain those suffering, in body and mind, the effects of inebriety. Heretofore, when such cases have come to the need of legal restraint, and have occurred among people of sufficient means to provide for them otherwise than inside the prisons, it has long been the custom, throughout the civilized world, to regard them as the subjects of mental infirmity, and to send many of them to the hospitals for the insane for treatment, in the hope of cure. But when those who, becoming dependent upon public care under like circumstances of inebriety, must be restrained, and are sent, as they usually are, to meet the contaminations and the stigma of the jail for terms of punishment, it is contrary to the spirit now animating the new work of the Commonwealth in this regard. It was in this spirit that remedial influences were sought for these cases by the law of 1885, sending them to the lunatic hospitals if they were persons of good character, apart from their habits of inebriety. But it has been proved, the world over, that attempts to treat those mentally infirm from inebriety in actual association with the insane works badly for both. Here the Foxborough Hospital has its place; instead of inebriates being distributed through all the lunatic hospitals, to little purpose, they can now be sent to one hospital for their special form of mental disorder with its concurrent bodily affections.

A considerable number of patients who are found to be insane are regularly transferred from Foxborough to the State lunatic hospitals, without new commitment, by a special provision in the law. The work of all these hospitals is closely allied. These and like problems of custodial care are presenting themselves to the trustees for their careful study.

#### AMENDMENTS OF THE LAW.

The trustees respectfully present some suggestions for the legislation that is needed to improve the work of the hospital. The position it now holds, under the existing law, is as follows:—

The provisions of its organic act place the hospital exactly in the position of a State hospital for the insane. The act declares that all the laws relative to the commitment of insane persons to a lunatic hospital shall be applicable, "except that, in all proceedings relative to the commitment of any such persons, it shall be specifically alleged that they are either dipsomaniacs or inebriates, as the case may be, instead of alleging that they are insane." The certificates of the examining physicians must necessarily be based upon the implied fact of mental disease or weakness in the inebriate that renders him dangerous to himself or others, and incapable of managing himself and his affairs. This is recognized in all countries where there is legislation of this The existing "habitual drunkards act" of Great Britain defines an "habitual drunkard" as "a person who, not being amenable to any jurisdiction in lunacy, is, notwithstanding, by reason of habitual intemperate drinking of intoxicating liquor, at times dangerous to himself or herself, or to others, or incapable of managing himself or herself and his or her affairs." In Austria, where legislation to the same effect as ours is proceeding in regard to persons subject to treatment in asylums for the cure and reform of drunkards, they are designated by the Ministry of Justice as "those who, owing to habitual or periodical abuse of alcohol, endanger the moral, physical or financial security of themselves or their relations." Another class is designated as "those mentally affected, owing to the habitual or periodical abuse of alcohol, who have been admitted into hospitals or lunatic asylums, and who, although they have recovered their sanity, have not sufficient self-command to resist the temptation to drink." This recognizes, as does the English law, the close kinship of the morbid mental states in the inebriates and the insane.

The Massachusetts law, after having provided for the commitment of inebriate patients, proceeds to provide for their being given permits to be at liberty, under such restraining conditions as the trustees deem best. This is done for cases convalescing from insanity, in the lunatic hospitals, where the measure of permitting absence on visit affords a means of curative restraint and treatment reaching

beyond the hospital, that is doing great good. But, while the time within which the insane patient can be detained in the lunatic hospital is unlimited, and that within which he can be taken back to the hospital when on visit is sixty days, the limitation of the whole time of treatment in the Foxborough hospital is two years. In other words, the patient is committed to the custodial care of the trustees in the intent of the law that the curative influences of medical and moral treatment and restraint shall be applied to him, either in the hospital or his home, as the trustees deem most beneficial; to this end the law prescribes that "all persons so committed may be detained in said hospital two years," subject to permission for conditional leave of absence within that limit of time. Such limitations are common to the laws relating to inebriates in other countries.

The foregoing provisions of the Massachusetts law are essentially valuable and fundamental to the success of the institution. The difficulties that have hampered the good work of the hospital may be remedied in a great degree by amendments of the law, to the following effect:—

1. The privileges of the hospital should be more effectively limited to persons susceptible of its benefits. This could be attained by giving the trustees authority to order the final discharge of persons found not to be suitable, within the intent of the law, for the treatment afforded by the institution. Such discharges should be made at any time when the patient has been long enough in the hospital, in the judgment of the trustees, to determine the facts upon which to form a medical opinion of the case.

This would prevent the repeated return, as under the present law, of incorrigible and even criminal inebriates, who take advantage of the commitment to this hospital to escape being sent to prison, where they ought to go; and of others who only seek to get boarded here for a time until ready for an escape, which, in some such cases, is repeatedly made. The hospital cannot, under the law, refuse to receive back even such cases.

2. The law should provide for the issue to the police authorities of a notice to them from the superintendent of the hospital which will authorize them to retake and return an escaped patient; and it should also provide for the reimbursement to an officer, by the hospital, of the expenditures made by him, and for compensation for his service, in returning the patient.

While there is no question that the commitment of a person to the hospital involves authority to retake him if he escapes therefrom, the police authorities have hesitated, in some cases, to arrest patients who have eloped, there being no provision for giving them a legal notice of the elopement. The correction of this omission would render effective the proper method for the returning of those who, by escaping, disobey the orders of the committing magistrates.

3. A special blank form for commitments should be prescribed, whereby better information can be gained than by the use of the blanks at present employed in committing the insane; specific inquiries should be instituted, for ascertaining the previous record and character of the person alleged to be a fit subject for this hospital.

The trustees earnestly request the enactment of legislation to remedy these defects in the law. The status of the hospital would be improved by removing from it those persons who are an injury to the hospital and to the patients for whom it was really designed; the custodial authority would be reinforced without the great expense that would follow any present attempt to make it completely efficient; and, finally, the hospital would be given a fair chance to extend its field of usefulness.

#### NEEDS OF THE HOSPITAL.

There is urgent need, as has been shown in this and previous reports, of certain new buildings for remedial and useful purposes, as set forth in the superintendent's report:—

- 1. A chapel and gymnasium. This building would include the assembly room for church services and entertainment hall, gymnasium, bowling alley, and the library, reading room, etc. The estimated cost of building and furnishing is \$30,000.
- 2. Additional accommodations for shop and store room. Estimated cost, with furnishing, \$3,500.

- 3. A building to accommodate 20 to 25 patients for receiving and custodial wards. Estimated cost, with furnishing, \$28,000.
- 4. A piggery, to be placed at a distance from other buildings. Estimated cost, with furnishing, \$2,500.
  - 5. A coal shed. Estimated cost, \$500.

The total of the foregoing estimate is \$64,500.

At the close of the hospital year, Sept. 30, 1896, there were 135 patients in the hospital; the daily average number for the year was 145, and the maximum was 175, or near it, during some months of the year. The expenses of the coming year cannot be met from the board of the patients; the trustees therefore request an appropriation for part of the current expenses of 1897.

The trustees desire to express their cordial thanks to the busy men who each gave an evening of his crowded life to bring pleasure to the patients. Prof. George H. Barton gave a delightful talk at the hospital on "The Hawaiian Islands," which was illustrated by the stereopticon; Prof. Edward F. Morse, one on "Japan and its people;" and Prof. William T. Sedgwick, one on "The earthworm and its work." Both of these latter talks were illustrated by freehand drawing on the blackboard. The trustees would also express their grateful thanks to Mrs. John C. Phillips for money given to provide the patients with the following current periodicals for two years: Two copies of the "Century Magazine," two copies of "Harper's Monthly Magazine," one copy of "Scribner's Monthly Magazine," one of the "New England Magazine," one of the "Forum" and one of the "Review of Reviews." In this connection it may be added that the usefulness of the small hospital library has been much extended by the time and thought given to it by one of the patients who has acted as librarian.

Mr. Heman M. Burr resigned from the Board Nov. 23, 1895, as he was going abroad for some time; Prof. R. H. Richards of the Massachusetts Institute of Technology was appointed in his stead. Professor Richards qualified Dec. 23, 1895. Mr. A. Lawrence Lowell resigned from the Board in December, 1895, as he was elected a member of the Boston School Board; Dr. B. H. Hartwell was appointed in

his stead. Dr. Hartwell qualified Jan. 30, 1896. On July 1 Dr. J. J. Minot's term of office expired; he did not wish to be reappointed, and Dr. Edward Cowles was appointed a trustee to succeed him. He qualified July 1, 1896.

#### SUPERINTENDENT'S REPORT.

To the Trustees of the Massachusetts Hospital for Dipsomaniacs and Inebriates,

At this time I respectfully submit to your consideration my report as superintendent for the fiscal year ending September 30, 1896.

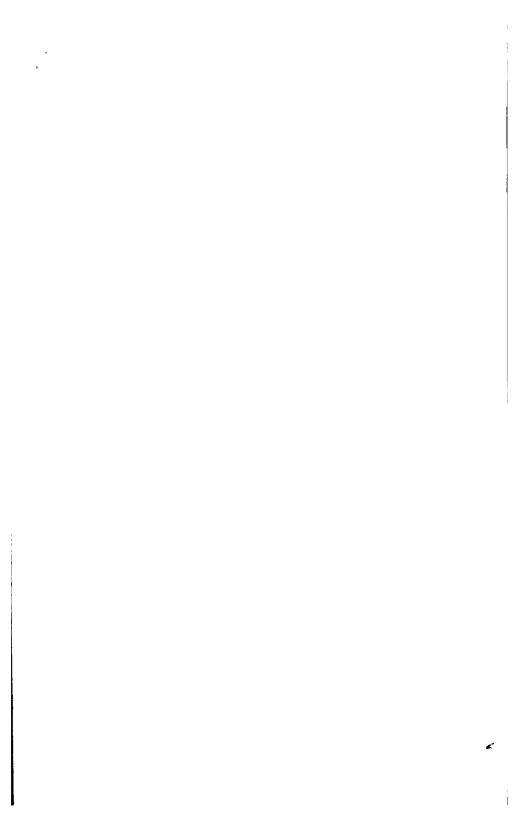

Appended are tables giving the statistical information in regard to the patients committed to and discharged from the hospital during that year, together with the results ascertained in the cases of those who were discharged from treatment during the year beginning May 6, 1895, and ending May 5, 1896.

It will be seen that 271 were received on order of commitment, or 59 more than during the preceding year; that the daily average number resident in the hospital was 145.32—an increase of 20.18 over the corresponding number for the preceding year. The weekly average cost of support per patient was \$6.32, as against \$7,\$8.41 and \$11.18 for the preceding years of the hospital's existence. As last year, for the purpose of computing the weekly average cost of support, all sums expended for material to be used in the manufacture of brooms were deducted from the gross expenditure for the year.

The usual number of patients have found employment in the work of the dining rooms, kitchen, laundry, boiler house, care of the barns and stock, vegetable gardens, general farm work and the making of general repairs. The broom shop has continued to provide suitable and satisfactory occupation for a large number of patients, and to be self-supporting. There is sufficient variety in the different steps of the process of manufacture to meet the requirements of the varying strength and skill of the men.

The use of exercise and baths in conjunction as thera-

HOJA

peutic agents has been steadily pursued throughout the year, under the direction of a competent teacher of physical training, who now gives his whole time to the work during five days of the week. Most of the patients attend the classes each day, some only two or three days each week, some receive massage treatment, while others take the bath only, due allowance being made for the peculiarities of constitution and temperament, age, previous and existing diseases, injuries and present strength or weakness. benefit accruing to the patients from the well-directed use of exercise and baths is indicated by the following observed symptoms: increase of appetite and power of assimilation, increase in weight, greater firmness of muscles, better color of skin, larger lung capacity, more regular and stronger action of heart, clearer action of mind, brighter and more expressive eye, improved carriage, quicker response of nerves, and through them of muscle and limb to stimuli. All this has become so evident to them that only a very few are unwilling to attend the classes, and many freely speak of the great benefit derived. Opposite this page is inserted a chart showing the actual and comparative results obtained in the cases of all the patients, of whom there were 50, who were discharged from treatment between April 1 and October 1 of this year, and who had completed a six-months course of treatment. They are arranged according to their ages, beginning with the youngest. The tests applied are with reference to weight, lung capacity and muscular strength, each patient being tested before entering upon the class work and again just before leaving the hospital. results of the first examination are shown in the columns of figures, while the gain or loss in either respect is indicated by the red and green lines respectively. At the bottom of the chart are shown the average results obtained through the several tests. In one of the cases there was perceptible loss of strength. This man on entrance had great strength of hand and forearm, due to work as a steam fitter, which diminished through lack of customary use, then at an early date he sprained an ankle and did no class work for a full month, after which he took part in a half-spirited, listless manner.

The hospital library now numbers 422 volumes, and is distributed through the various wards, being placed on open shelves, so as to be at all times accessible to would-be readers. Within the year it has been carefully catalogued and cared for by one of the patients, who has widely extended its usefulness through his own personal efforts and services in assisting others in making their selections. He has been ever willing to find any particular volume and to suggest one adapted to the taste of those in doubt. The Boston Press Club has contributed 80 numbers of the current magazines. for the use of the patients. Many of the patients regularly receive the daily papers and the lower-priced magazines. such as "McClure's," the "Cosmopolitan," "Munsey's," etc., for their own use, and then allow them to pass into general circulation. From the same source there has been added to the library illustrated reports of the National Museum, the Smithsonian Institution, Major Powell's "Ethnology of the Indian tribes," "Geological Survey of the Rocky Mountains," and 150 paper-bound novels by standard authors. Mrs. John C. Phillips has generously provided the following magazines for two years for the use of the patients: two copies of "Harper's," two of the "Century," one of the "Forum," one of the "New England," and one of the "Review of Reviews."

During the year the patients have arranged and conducted a few entertainments for themselves, and they have further been instructed and entertained by Professor Morse, whose subject was "Japan and its people," illustrated by freehand drawings; by Professor Barton, whose subject was "A visit to the Hawaiian Islands," illustrated by the stereopticon; by Professor Sedgwick, who talked upon "The earthworm and its work," illustrated by freehand drawings; by Mrs. Ritchings, a professional reader; by Mr. Poor, who gave each week a talk upon some subject relating to the ethics of daily life or a lecture upon travel in some portion of Europe, illustrated by the stereopticon. Mr. Edward Caton of Foxborough has kindly assisted with his stereopticon at all lectures requiring the use of that instrument.

With your approval and through your ready co-operation plans have been obtained from Mr. Joseph H. Curtis for the

relocation, in part, of the roads about the buildings, for the extension of the paths and the ornamentation of the grounds with groups of shrubs and trees. This work, involving the construction of about four hundred feet of new roadway and the removal of nearly as much existing roadway, as well as the preparation of proper beds of soil for the trees and shrubs, is being rapidly pushed forward, and in large part done by the labor of the patients. With a continuation of the present favoring weather it is quite probable that all will be in readiness for the planting of the shrubs and trees in the coming spring. In connection with this, two pavilions are to be erected for the use and shelter of the patients at all seasons of the year while they are out of doors. The details of these improvements are shown in a plan prepared by Mr. Curtis, a fac-simile of which is published in connection with These changes will greatly improve the appearance of the grounds, and effectually remove the evident barrenness of which we have been at all times conscious.

I will earnestly request you to consider several evident needs of the hospital. First, a building to contain rooms and appliances adapted to the combined purposes of chapel, amusement hall, gymnasium, reading room, bowling alley and smoking room. As you know, the rooms now used for some of the above purposes, designed and constructed for other uses, are insufficient and ill adapted. Second, an addition to the workshop, equal in size and closely similar to the one last erected, to provide needed store-room and additional work room. Third, a building to accommodate from 25 to 30 patients, to contain small wards suitably arranged for the care of the recently admitted or new patients, many of whom are quite sick, being tremulous, irritable, more or less exhausted and in some cases in delirium tremens, they to remain in this building until in condition to be put on This will enable us to provide better protection and care for the recent cases, and to devote one of the present wards to the use of those supported as private charges and thus materially assist in the further classification of the patients as a whole. Fourth, other and better quarters for the swine now housed under the horse barn, - an improper as well as objectionable arrangement. They should have a

### 22 HOSPITAL FOR DIPSOMANIACS, Etc. [Oct. '96.

piggery, to be erected in that portion of the grounds now used by the cattle as an exercise ground, and where there is abundant room for both purposes. Fifth, the supply of coal now lies exposed to the weather throughout the year, and should be protected by a shed, to be erected over the present pocket.

I take this opportunity to express my gratitude for the constant helpful advice you have given and for the great comfort and assistance it has afforded me.

#### MARCELLO HUTCHINSON.

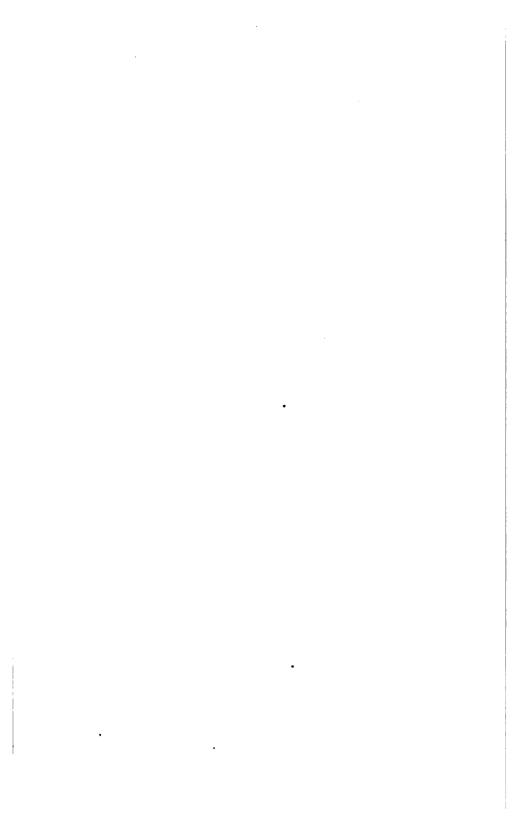

Superintendent.

FOXBOROUGH, Nov. 28, 1896.

# GENERAL STATISTICS

#### APPENDIX.

An Act to establish the massachusetts hospital for DIPSO-MANIACS AND INEBRIATES.

[Chapter 414, Acts of 1889.]

Be it enacted, etc., as follows:

Section 1. The governor with the advice and consent of Appointment of trustees. the council shall appoint five persons who shall constitute the board of trustees of the Massachusetts Hospital for Dipsomaniacs and Inebriates, and who shall hold office for terms of one, two, three, four and five years respectively, beginning with the first Monday of July in the present year, and until their respective successors are appointed and qualified; and previous to the first Monday in July in each year hereafter the governor shall in like manner appoint one such trustee to hold office for the term of five years, beginning with the first Monday in July of the year of his appointment, and until his successor is appointed and qualified. Any such trustee may be removed Removals. by the governor with the advice and consent of the council for such cause as they may deem sufficient and as shall be assigned in the order for removal. Any vacancy occurring in said board Vacancies, how filled. shall be filled in like manner for the unexpired term.

SECT. 2. The lands held by said trustees in trust for the Hospital lands Commonwealth for the use of said hospital, as hereinafter pro- for streets. vided, shall not be taken for a street, highway or railroad without leave of the legislature specially obtained.

SECT. 3. Said trustees shall be a corporation for the same Trustees a purposes for which the trustees of each of the state lunatic certain for hospitals are made a corporation under section five of chapter purposes. eighty-seven of the Public Statutes, with all the powers necessary to carry said purposes into effect.

#### [Section 5, chapter 87, Public Statutes.]

SECT. 5. The trustees of each hospital shall be a corporation for the Trustees to be a purpose of taking and holding, to them and their successors, in trust take and hold for the Commonwealth, any grant or devise of lands, and any donation grants, etc. or bequest of money or other personal property, made for the use of the institution of which they are trustees, and for the purpose of preserving and investing the proceeds thereof in notes or bonds secured by good and sufficient mortgages or other securities, with all the powers necessary to carry said purposes into effect.

To purchase land and erect buildings.

SECT. 4. Said trustees shall have authority to purchase in behalf of the Commonwealth suitable real estate as a site for said hospital for dipsomaniacs and inebriates, and to cause to be erected thereon suitable buildings for said hospital, which

Number of inmates.

Cost limited.

Plans to be approved by governor as council.

shall furnish suitable accommodations for not less than two hundred and o fifty patients and for the officers, employees and attendants, and to provide for the equipment and furnishing of said buildings: provided, however, that the entire expenditure for carrying out the purpose of this act shall not exceed one hundred and fifty thousand dollars. No expenditure shall be made for the erection of buildings except for plans therefor. until said plans have been approved by the governor and council, and no such approval shall be given unless the governor and council shall be satisfied that the cost of the resi estate and the erection and completion of buildings and the equipment and furnishing of the same ready for occupancy will not exceed one hundred and fifty thousand dollars. trustees shall have authority to make all contracts and employ all agents necessary to carry into effect the provisions of this act.

Powers of trustees for hospital.

Said trustees shall have the same powers vested in them and shall be required to perform the same duties for the management and control of said hospital as are vested in and required of the trustees of the various state lunatic hospitals under sections six and seven of chapter eighty-seven of the Public Statutes.

#### [Sections 6 and 7, chapter 87, Public Statutes.]

Trustees, general powers and duties.

SECT. 6. They shall take charge of the general interests of the institution and see that its affairs are conducted according to the requirements of the legislature and the by-laws and regulations which the board shall establish for the internal government and economy thereof. and they shall be reimbursed all expenses incurred in the discharge ... their official duties.

Trustees to make by-laws, appoint officers, fix salaries, etc.

SECT. 7. They shall establish by-laws and regulations, with suitable penalties, for the internal government and economy of the institutive: shall appoint a superintendent who shall be a physician and constant: reside at the hospital, and a treasurer who shall give bond for the faithful discharge of his duties; shall appoint or make provision in the by-laws for appointing such officers as in their opinion may be necessary sary for conducting efficiently and economically the business of the institution; and shall determine, subject to the approval of the govern and council, the salaries of all the officers. All their appointments shall be made in such manner, with such restrictions, and for sack terms of time, as the by-laws may prescribe.

<sup>•</sup> Amended by chapter 251, Acts of 1890, by striking out the word " fifty." = that only two hundred inmates are to be provided for.

SECT. 6. When the buildings constructed under the pro- Opening the visions of this act are so far completed that in the opinion of said trustees commitments may properly be made thereto, said trustees shall so notify the governor, who shall thereupon issue his proclamation establishing the Massachusetts Hospital for Dipsomaniacs and Inebriates, and thereafter the judges named in section eleven of said chapter eighty-seven may commit to commitments, said hospital any \* person who is given to or subject to dipsomania or inebriety, whether in public or in private: provided, however, that no such person shall be so committed until satisfactory evidence shall be furnished to the judge before whom the proceedings for commitment are had that such person or persons are not of bad repute or of bad character apart from Character of their habits of inebriety.

#### [Section 11, chapter 87, Public Statutes.]

SECT. 11. A judge of the Supreme Judicial Court, or superior court, Judges in any county where he may be, and a judge of the probate court, or of commit. a police, district or municipal court, within his county, may commit to either of the state lunatic hospitals any insane person then residing or being in said county, who, in his opinion, is a proper subject for its treatment or custody.

SECT. 7. All the laws relative to commitment of an insane Laws governing commitments. person to a lunatic hospital shall be applicable to and shall govern the commitment of any person under this act, except that in all proceedings relative to the commitment of any such person it shall be specifically alleged that they are either dipsomaniacs or inebriates, as the case may be, instead of alleging that they are insane.

#### [Section 12, chapter 87, Public Statutes.]

SECT. 12. Except when otherwise specially provided, no person No person to be shall be committed to a lunatic hospital, asylum, or other receptacle for the insane, public or private, without an order or certificate therefor, signed by one of the judges named in the preceding section, said etc. What the person residing or being within the county as therein provided. Such order shall state. order or certificate shall state that the judge finds that the person com- 11 Gray, 107. mitted is insane, and is a fit person for treatment in an insane asylum. And said judge shall see and examine the person alleged to be insane, or state in his final order the reason why it was not deemed necessary or advisable to do so. The hearing, except when a jury is summoned. shall be at such place as the judge shall appoint. In all cases the judge shall certify in what place the lunatic resided at the time of his com- Residence of mitment; or if the confinement is ordered by a court, the judge shall certified. certify in what place the lunatic resided at the time of the arrest in pursuance of which he was held to answer before such court; and such certificate shall, for the purposes of the preceding section, be conclusive evidence of his residence.

<sup>•</sup> Amended by inserting the word "male." Chapter 158, Acts of 1891.

[Section 18, chapter 87, Public Statutes, as amended by chapter 229 of the Acts of 1892.]

Sworn certificate of physicians. SECT. 13. No person shall be so committed, unless in addition to the oral testimony, there has been filed with the judge a certificate signed by two physicians, each of whom shall make oath that he is a graduate of a legally organized medical college, that he has practised three years in the state, and that he is not connected with any hospital or other establishment for treatment of the insane. Each must have personally examined the person alleged to be insane within five days of signing the certificate; and each shall certify that in his opinion said person is insane and a proper subject for treatment in an insane hospital, and shall specify the facts on which his opinion is founded. A copy of the certificate, attested by the judge, shall be delivered by the officer or other person making the commitment, to the superintendent of the hospital or other place of commitment, and shall be filed and kept with the order.

[Chapter 53, Acts of 1892. Substituted for section 14, chapter 87. Public Statutes.]

Notice of intention to commit to be given to overseers of the poor.

SECT. 1. A person applying for the commitment or for the admission of a lunatic to a state lunatic hospital under the provisions of chapter eighty-seven of the Public Statutes, or for such commitment of a dipsomaniac under the provisions of chapter three hundred and thirty-nise of the acts of the year eighteen hundred eighty-five, or for the commitment of a dipsomaniac under the provisions of chapter four hundred and fourteen of the acts of the year eighteen hundred and eighty-nine shall first give notice in writing to the overseers of the poor of the place where the lunatic or dipsomaniac resides, except that in the city of Boston such notice shall be given to the commissioners of public institutions, of his intention to make such application; and satisfactory evidence that such notice has been given shall be produced to the justice in cases of commitment.

SECT. 2. Section fourteen of chapter eighty-seven of the Public Statutes is hereby repealed.

[Sections 15, 16, chapter 87, Public Statutes.]

Statement to be filed with application.

Upon every application for the commitment or admission SECT. 15. of an insane person to a hospital or asylum for the insane, there shall be filed with the application, or within ten days after the commitment or admission, a statement in respect to such person, showing as nearly as can be ascertained his age, birthplace, civil condition, and occuration; the supposed cause and the duration and character of his disease. whether mild, violent, dangerous, homicidal, suicidal, paralytic or epileptic; the previous or present existence of insanity in the person of his family; his habits in regard to temperance; whether he has been a any lunatic hospital, and, if so, what one, when, and how long; and, if the patient is a woman, whether she has borne children, and, if so, what time has elapsed since the birth of the youngest; the names and address of his father, mother, children, brothers, sisters, or other next of kin not exceeding ten in number, and over eighteen years of age, when the names and address of such relatives are known by the person or person making such application, together with any facts showing whether !: has or has not a settlement, and, if he has a settlement, in what place: and if the applicant is unable to state any of the above particular, he

shall state his inability to do so. The statement, or a copy thereof, Copy to be sent shall be transmitted to the superintendent of the hospital or asylum, to to hospital. be filed with the order of commitment or the application for admission. Notice of com-The superintendent shall, within two days from the time of the admission relatives sion or commitment of an insane person, send, or cause to be sent, of patient. notice of said commitment in writing, by mail, postage prepaid, to each of said relatives, and to any other two persons whom the person committed shall designate.

SECT. 16. After hearing such other evidence as he may deem proper, Judge may the judge may issue a warrant for the apprehension and bringing before lunatic to be him of the alleged lunatic, if in his judgment the condition or conduct brought before of such person renders it necessary or proper to do so. Such warrant may be directed to and be served by a private person named in said warrant, as well as by a qualified officer; and pending examination and hearing, such order may be made concerning the care, custody, or confinement of such alleged lunatic as the judge shall see fit.

SECT. 8. All persons so committed may be detained in said Patient may be hospital two years; but when it shall appear to the trustees years. that any person held in said hospital will not continue to be subject to dipsomania or inebriety, or will be sufficiently provided for by themselves or their guardians, relatives or friends, they may issue to them a permit to be at liberty, upon such Conditional conditions as they deem best, and they may revoke said permit at any time previous to its expiration. The violation by the holder of such permit of any of the terms or conditions of the Revocation of same shall of itself make said permit void.

permit to be at liberty.

SECT. 9. When any permit granted under the provisions of Arrest and return of holder the preceding section has become void in any manner the of revoked trustees may issue an order authorizing the arrest of the holder or holders of such permit and their return to the hospital, and such order of arrest may be served by any officer authorized to serve criminal process in any county in this Commonwealth. Any person at liberty from the hospital upon a permit, as aforesaid, may voluntarily return to the hospital and put himself in the custody of the superintendent. The holder of said permit when returned to said hospital as aforesaid, whether voluntarily Voluntary or otherwise, shall be detained therein according to the term of patient.

SECT. 10. Every person may appeal from the order of the Appeal from judge committing them to said hospital to the superior court milment. next to be held in the same county. The appellant shall be held in said hospital to abide the final order of said court.

his original commitment.

SECT. 11. On such appeal the judge who ordered the com- witnesses may mitment shall have the same authority to bind by recognizance appearance at witnesses in the case that is given by chapter two hundred and trial. twelve of the Public Statutes.

Proceedings to be certified to higher court.

SECT. 12. The judge shall on such appeal make a copy of the order of commitment and other proceedings in the case, and transmit the same together with the recognizance, if any is taken, to the clerk of the court appealed to.

Appellant may be defaulted. SECT. 13. If the appellants fail to enter and prosecute an appeal they shall be defaulted on their recognizance if any was taken, and the superior court may enter an order in like manner as if they had been ordered to be committed in that court; and process may issue, if necessary, to bring them into court to be recommitted.

Appeal may be withdrawn.

SECT. 14. The appellants may, at any time before the copy of the proceedings in the case has been transmitted to the clerk of the court appealed to, be brought personally before the judge from whose order the appeal was taken, and upon their own request may be permitted by such judge, at his discretion, to withdraw their appeal and abide by the order therein; whereupon said judge shall order that the appellants comply with the order appealed from in the same manner as if it were then first imposed.

Expenses of trustees to be paid.

SECT. 15. After the establishment of said hospital said trustees shall receive no compensation for their services, but they shall be reimbursed from the treasury of the Commonwealth for all expenses actually incurred by them in the performance of their official duties. The governor and council shall fix the compensation to be made to them for services rendered in the selection and purchase of real estate and the construction, equipment and furnishing of the hospital buildings.

Compensation for services in building hospital.

SECT. 16. After the establishment of said hospital the \* inmates that have been committed to any lunatic hospital under
the provisions of chapter three hundred and thirty-nine of the
acts of the year eighteen hundred and eighty-five, and are not
found to be insane, may be transferred by the state board of
lunacy and charity to the Massachusetts Hospital for Dipsomaniacs and Inebriates; and said state board shall transfer
from said hospital for dipsomaniacs and inebriates to some
state lunatic hospital or asylum such inmates as may, under an
order of commitment provided for by chapter eighty-seven of
the Public Statutes, be found insane and requiring treatment
therein.

Transfer of patients from lunatic hospitals.

Removal of insane patients to lunatic hospitals.

[Chapter 339, Acts of 1885.]

Dipsomaniacs may be committed to lunatic hospitals. SECTION 1. Whoever is given to or subject to dipsomania, or habitual drunkenness, whether in public or in private, may be committed to one of the state lunatic hospitals: provided, however, that no such person shall be so committed until satisfactory evidence is furnished to the

<sup>\*</sup> Amended by inserting the word "male." Chapter 158, Acts of 1891.

judge before whom the proceedings for commitment are had that such person is not of bad repute or of bad character, apart from his habits Character of of inebriety.

SECT. 2. The provisions of chapter eighty-seven of the Public Laws governing such commit-Statutes, and of acts amendatory to such chapter, relative to the commitment of an insane person to a lunatic hospital, shall be applicable to, and shall govern the commitment of, any person under this act, except that in all proceedings relative to the commitment of any such person it shall be specifically alleged that he is subject to dipsomania, instead of alleging that he is insane.

SECT. 8. All the laws relative to persons committed to lunatic hosto such pitals on the ground of insanity shall apply to persons committed patients. thereto under the provisions of this act: provided, that no person so committed shall be discharged therefrom unless it appears probable Conditions of that he will not continue to be subject to dipsomania or habitual drunkenness, or that his confinement therein is not longer necessary for the safety of the public or for his own welfare.

SECT. 17. Such inmates of said hospital as are able to pay Board of for their board shall be charged for the same. The board of paid. such inmates as have a legal settlement in some city or town shall be paid by said place of settlement. The board of all persons who have no settlement in the Commonwealth, and are unable to pay for themselves shall be paid from the treasury of the Commonwealth at a rate to be determined by the board of Rate of board. trustees of said hospital.

SECT. 18. There shall be thorough visitations of said hospital Visits of trustees to by two of the trustees thereof monthly, and by a majority of hospital. them quarterly, and by the whole board semi-annually, at each of which a written account of the state of the institution shall Reports of visits. be drawn up, which shall be presented at the annual meeting to be held between the first days of the months of October and November. At the annual meeting the trustees shall make a Annual report. detailed report in the same manner as is required of the trustees of the state lunatic hospitals, and shall audit the report of the treasurer, which shall be presented at said annual meeting, Treasurer's

#### TRUSTEES' REPORT.

To His Honor the Lieutenant Governor, Acting Governor, and the Honorable Council.

The trustees of the Medfield Insane Asylum respectfully submit the following report.

The building committee of the trustees, elected under the provisions of chapter 425 of the Acts of 1892, reported to the trustees that a portion of the buildings, with accommodation for 600 patients and the necessary officers and employees, would be ready for occupancy on May 1. It was thought best, on account of the overcrowded condition of the other State hospitals and the urgent necessity of relieving them of their surplus population, to open at once the buildings which were finished, and not wait for the completion of the whole group of buildings which constitute the establishment. The State Board of Lunacy and Charity were accordingly notified, and during the months of May and June about 600 patients of the chronic and incurable class were transferred by this Board from the various hospitals for the insane.

The really great work of organizing and opening a large asylum has been carried on in a manner satisfactory to the trustees and creditable to the superintendent. This work was rendered more perplexing from the fact that the whole plan of administration was a new one in this State. The daily routine of the patients transferred was entirely different from that to which they had been accustomed, many of them for years, and they found it difficult easily to accommodate themselves to the change. In addition to this, building operations have been carried on through the year. This has been an important factor as a disturbing element, adding to the natural excitement of the patients incident to their removal to a new home. The friction and discomfort arising from these causes are, however,

becoming less every day. Twelve buildings are now occupied, and the building committee expect that the remaining six will be completed early next year, — three of them by the first of January. The establishment will then give accommodation to 1,000 patients, and with a little crowding to 1,200. The general plan of the asylum is described in detail in the appended report of the superintendent.

The trustees desire to call attention to the fact that the cottage plan adopted in the construction, with its eighteen separate buildings for patients, gives a much better opportunity for the classification of all forms of insanity than is afforded by any hospital in the State. It seems to them unfortunate that the institution should be by statute confined to the care of the chronic and incurable class of the insane who have become public charges, when it has such facilities for treating recent and curable cases. They therefore recommend that the matter of so amending the statute that the institution shall be placed upon the same basis as the other State hospitals be brought to the consideration of the Legislature.

The water supply, which was originally intended to be furnished from driven wells, has proved to be inadequate. A quantity sufficient for all purposes except drinking is obtained directly from Charles River. The question of a supply suitable in quality and quantity for all purposes is now under consideration by the building committee.

The statutes provide that the expenses of the institution shall not exceed \$2.80 per week for each patient. This sum, of course, can be sufficient only when the asylum has become well established, with at least two-thirds of its complement of inmates. This report covers the first five months since the asylum was opened, with the number of patients varying from 120 to 596, and the expenses for this period and for the month of March, during which the buildings were made ready for occupancy, has been \$3.21 per patient. This result is especially gratifying to the trustees, showing, as it does, careful economy on the part of the officials of the institution who have the immediate charge of its management. It should be stated that the expenses during the summer are always less than during the winter, when the item of fuel adds considerably to the expenditures. Just what the cost of fuel will be we are unable to state,

as our first winter is in the future. We hope, however, to have an increased number of patients, and by this means to keep the per capita expenses near the present amount.

It will be necessary, for at least another year, to ask of the Legislature an appropriation for current expenses in excess of our income. The amount of receipts depends entirely upon the number of patients. This number is a matter over which the trustees have no control, and for this reason we can estimate only approximately what our income will be. In order, however, that the asylum may not be embarrassed in its operations, we shall apply for an appropriation of \$40,000.

For the financial condition of the asylum, you are respectfully referred to the treasurer's report.

The trustees appointed in February Dr. Edward French, medical superintendent. He has been for twelve years connected with the asylum at Concord, N. H. Dr. Chas. A. Drew and Dr. Thomas Howell, both of whom had been upon the medical staff of institutions for the insane, were appointed assistant physicians. Mr. John B. Chapin was elected steward, Mrs. Mary A. Satterthwaite matron, Mr. Chas. C. Blaney treasurer and Mr. A. E. Read engineer. We believe all of these officials have labored faithfully, both in their professional and business capacity, for the best interests of the institution and the patients.

Any success which is achieved in the management of an asylum for the insane requires, on the part of those in charge, unceasing diligence, an unlimited amount of patience and neverfailing kindness in manner and speech towards the unfortunate inmates. Keeping this high ideal of service always in mind, it will be the hope of the trustees that the Medfield Asylum, the latest addition to the large number of charitable institutions established by the Commonwealth, may meet the exacting demands of the public.

JOHN G. PARK, ELIZABETH G. RICE, BENJAMIN S. ATWOOD, ELIZABETH THURBER, IRA G. HERSEY, WILLIAM O. BLANEY, EDWIN V. MITCHELL,

Truslees.

#### SUPERINTENDENT'S REPORT.

MEDFIELD, Sept. 30, 1896.

To the Board of Trustees of the Medfield Insane Asylum.

Ladies and Gentlemen: — It is with pleasure that I subnit the superintendent's report for the past five months of the Medfield Insane Asylum. As the year for the institutions in Massachusetts ends with September 30, this report is necessarily short and includes only five months, the time elapsing since it was opened. The work of cleaning, furnishing and otherwise preparing the different buildings was begun March 1, and was pushed forward as rapidly as possible. Twelve of the pottages for patients were ready to be put in order while six others designed for the filthy and more disturbed classes were in process of erection. These, with the chapel, stable and farm barns, are still unfinished. It was so far accomplished as to warrant your Board in notifying the State authorities that the asylum was ready to receive patients on the 1st of last May.

The unique arrangement of the buildings of the Medfield Asylum is such that if a general description is given the details of management can be better understood. The completed plan will show twenty-seven buildings, facing along the sides and ends of a rectangle. The situation is upon the summit of a hill, about 250 feet elevation above the sea, and known upon the topographical map of the State as "Castle Hill." The State owns 426 acres of land, part of it being situated in the town of Dover and all of it bordering upon the Charles River except upon the east side. The top of the hill is graded on a slope toward the west. The prospect from all the buildings is beautiful and extensive, and the location of the asylum was often sought in years past for the beauty of its view. The woodland north of the institution borders on the river, and offers an excellent opportunity for a magnificent park. It is already covered with desirable well-grown trees, and is diversified by

picturesque rocky hills, pleasant vales and many natural advantages.

The ward buildings are situated upon the sides and ends of the rectangle, and face in upon the chapel, laundry, dining rooms, kitchen and power house. The buildings are separate from each other, the spaces varying from one to eight rods in extent, which allows air and sun upon all four sides of each building. Eighteen of these buildings are designed to hold patients, the upper story for sleeping purposes and the lower story for sitting and work rooms. Most of the cottages will accommodate about 50 patients, while there are two which are capable of accommodating 100 each. Some of these buildings are provided with dining rooms, but it is expected that all patients who are able will walk to the general dining rooms for their meals, in the centre of the rectangle. Each dining room is capable of seating about 500 patients. The buildings are admirably lighted, with no dark corners, and substantially and thoroughly built. Heat is forced into all the rooms by fans in each basement, run by electric motors, and the foul air exhausted by a similar arrangement in every attic.

On the first day of May a transfer of 120 patients was received from the Taunton hospital, consisting of 60 of each They were brought in a special train that was run up into the asylum grounds on a spur track. Part of these were able to walk to the building where they were received, the rest were conveyed in omnibuses to the same building. patient was examined, his weight, height and other personal characteristics taken and recorded, and then assigned to the proper building. Subsequent transfers were brought from the public station in omnibuses, except the transfer from the Danvers hospital, which was in a special train left on the spur track and afterwards conveyed to the institution in the same manner as the transfer from Taunton. May 12 a transfer of 29 women was received from the Northampton hospital. On May 27 30 women and 20 men were transferred from Westborough. June 4 a large transfer was received from the Worcester hospital, consisting of 110 men and 64 women. On June 6 24 women were sent in omnibuses from the city of Boston asylum, Austin Farm, at Roslindale. June 11, 20 women and 1 man were sent in the same manner from the same place.

June 23 a large transfer of 71 women and 106 men came from Danvers. Five other patients have been received from different hospitals at different times, making a total of 600, — 302 women and 298 men.

There have been discharged 13 patients; 2 were improved and 11 were not improved. Eight of these were transferred to other institutions by orders from the State Board of Lunacy and Charity. There were 24 deaths. When we consider the feeble condition of many of these patients, and that in some cases death was a "foregone conclusion" when they were admitted, and the fact that the change of habits and environment of elderly demented patients often hastens a fatal termination, it is not excessive. All those that eloped have been returned except one, who was arrested as a vagrant in a neighboring town and committed to another lunatic hospital.

The daily average number of patients is necessarily small, because of the time elapsing between the first and last transfer before the complement of patients was reached. The average of 461.61 is the total daily average number of patients for the past five months. It is obvious that the cost of maintenance will be higher than it would have been had there been a larger number of patients in the early months. The average weekly cost per patient has been \$3.21.

Efforts have been made to interest and engage as many patients as possible in work that was of equal advantage to the individual and the State. The female patients have been employed in the mending room, the laundry, kitchen, and in sewing and knitting in the wards. The men have worked in the general dining rooms, in the laundry, kitchen, on the teams and on the farm and grounds. There is plenty of work for male patients for the next few years in outside occupations upon the grounds in construction and repairs. Match games of baseball between nines of patients and attendants have furnished considerable entertainment to large numbers.

The water supply has already been considered by your Board, and no doubt another year will see us equipped with an adequate supply.

At present the several departments are working quite smoothly and satisfactorily, considering that everything has to be tried and adjusted in such a large and new institution. The farm has been very successful and has produced a large supply of garden vegetables, so that for the past two months the tables for the patients have been supplied every day. Barrels of apples have been placed in all the wards, and the patients have eaten them freely, with no harmful effect.

The thanks of the patients and myself are extended to Rev. Father Donnelly of South Natick and to Revs. Mr. Savage and Mr. Dyer of Medfield, who have ministered to the spiritual wants of the sick and officiated at funerals; also to Miss Helen Brown for a generous supply of magazines, to Mrs. Thomas Upham for newspapers, to Miss Rose Allen for silk pieces and to Miss Garland of Dover, N. H., for magazines and silk pieces.

I feel grateful and appreciative to all my assistants and employees for their faithfulness and co-operation, especially during the opening months, when there was more or less difficulty in getting the several departments into smooth running order. To your Board I am also grateful for your hearty and generous support and your patience with the many imperfections of the management.

EDWARD FRENCH, M.D.,

Superintendent.

### TREASURER'S REPORT.

To the Trustees of the Medfield Insane Asylum.

I herewith submit my first annual report on the finances of the Medfield Insane Asylum for the year ending Sept. 30, 1896.
